Cơn'stǐ-tū-těd, pa. par. or a. [Constritutr,
A. As pa. par.: In senses corresponding to those of the verh.
B. As adjective:
I. Appointed, eatabliahed, enacted.

2. Compoaed, made up.
3. Naturally framed.
cơn'-stĭ-t̄̄-tẽr, con-sti-tu-tour,
[Eng. constitut(e); -er.] One who or that which constitutes, appointa, or establishea.
cŏn'stĭ-tū-tǐng, pr. par., a., \& s. [CONbtitute, $v$.]
A. \& B. As pr. par. \& particip. adj. : (Soe the verb).
C. As substantive:
4. The act of appointing, establishing, or composing.
5. The act or process of forming or framing ; composition.
conn-sti-tu'tion, con-sty-tu-cy-ons, con-sti-tu-ai-on, s. [Fr. constitution: Sp. constitucion; Ital. constituzione, from Lat. constitutio, from constitutus, pa. perr. of consti. tuo $=$ to establish, to constitute.]
I. Ordinary Language:
I. The act or process of conatitutiog, making up, or forming.

Consertucyone, Constitucla"-Prompe Parv
2. The set of constituting, establishing, or enacting ; enactment, establishment.
3. An established form of government; a aystem of law snd customs. [II. I.]
4. Any particular law, rule, or regulation ; sn established cuatom; an institution or nsage.
[II. 2.] [II. 2.$]$
5. The manner or nature of composing or
msking up a compound; the principles according to which compounds are made.
"Throughont this discourse tha maingetros has bees Science (3rd ed.h $1 \times 23.23$.
6. The atate or nature of being ; the particylar texture of the component parts; the natural qualitiea of any compound material body.

* 7. A corporeal frame.
- Amongst many bad effects of this ofly constitution. there in ona ndrantree $i$ auch who arrive to Ago are not
subject to stricture of fibres. -A rbuthnot: On Ali ments.

8. The temper or disposition of the body in reistion to health or disease; natural strength of the body.
And in mannera - Macaulay: Fist. in ing. eppearan
9. A disposition or temper of mind; mental qualities.

[^179]
1I．Technically：
1．Political Eoonomy，Govermment，de．：In this sense the word Constitution is popularly ned with great vagueness．In the United States it indicates a writtan body of laws adopted by a convention，and conetituting a fradamental inetrument to which all legisla－ tion muat conform．The United States as a whole，and each State as s unit，have constitu－ tions of this character，which can be changed only in the manner of their adoption，and mended oniy un－er certain stringent regu－ lations．The Couetitution of the Britieh Kingdom，on the contrary，Is unwritten，and is in a stato of constant change，it being essentially formed by the body of parlismea． tary lsw，and the ralea and methods of goveramental procedure which have grown up through ceaturies，and the fundamental postulates of which ere as stable as those of he Constitution of the United States．
In this country bach an inetrument was made necessary by the weakness of the bond between the states formed by the Articles of Confederation，an inatrument originsted duriag the Revalutionary etruggle，sad which ia a few years after its close proved so IIl suited to hold the aeparate units of the conntry together，that it became evident that either a stronger tie of union muet be made or the Statee wouid fall asunder．These＂Articles of Confederatiun and Perpetual Union＂may be looked upon as the first Constitution of the United States． The Conveation which formed the existing： Conatitution met on May 14，1787，and was made up of the wisest and ablest of the statcsmen which the country then possegsed，snd some of whom heve never been surpassed for political wisdom and sagacity．It continued in bession Wisdom and sagacity．It continued in session
until the sutumin of that year，and produced until the sutuan of that year，and produced an instrumeat which has ever aince been the admiration of legielators，and which Mr．Glad－
etone describes as the most wonderfal work ever struck off at a given time by the braia and purpose of man，yet which was，in many of its leading provisions，the result of a com－ promise between conflicting opinions，and when first promulgated satioficd no state and few persons．The instrumeathas strengthened With its sge，sud has eerved the aation admir－ ably throogh more than a century of its exist－ ence，with the aid of a few amendmente edopted to meet new conditions，or to eupply omissions io the original instrument．Of the goverument formed by it the Snpreme Court，which consti－ tutes the Judiciary Departorent，is the grestest tuner the Judicisry Departorent，is the grestest the governmental devices of nationa，and has proved of the highest utility as a controlling proved of the highest utility as a controlling power over the legislative department，which it prevents from setting eside i
The eeveral State日 have ciosely followed the geaeral government in adapting s written conetitution for each，with the ame device of edjustment in s Beries of State Supreme Courts． These state constitutions have been madified and replaced from time to time，as the old instruments proved imperfect，the great State of New York，for instance，heving within the last few years perfected the formation of a new constitution．
Other meanings have been given to the word Constitution．In the uprisings of the people of Contioentai Enrope in 1848 constitutions were demateded，the instrument bought being a solemn compect between the people and a solemn compact between the people and their despotic rulers，which would have the
effect to take from the Sovereign come of effect to take from the Sovereign come of the power which he had usurped，and retura it to its original source，the hands of the people．
mant this fthe freedom and independency of parlin－ quite remaved，our constitution filis intoruin．That nohle fabric，the pride of Britain，the envy of har
netghbourn，raised hy the Latour of so mauy cen
 fabric，I say，which wan ahis to realst the unitied efturts of so many racea of glants，may be deunullalied by a race 2．Ecclesiology：
Apostolic Constitutions：Ordinances for the discipline of the Church．particularly the apostalical constitutions and a collection of regulations attributed to the Apostles，and aupposed to have been collected hy St．Clement， whose name they bear．Their suthenticity has been greatly questioned．

3．Scots Law：
Decree of Constituition：A decree hy which the extent of a debt or obligation is ascer talued．The term is generally alplied to those decrees which are requisite to found e title in decrees which are requisite to found a title in death of the debtor or the original creditor． （Ogilvie．）

## T Constilutions of Clarendon ：

Ch．\＆Civil Hist．：Constitutions，in the sense of laws or regulations，made at a Council held at Clarendon，near Salisbury，on January 25 ， 1164．They were desigued to define the bound－ ary－line between civil sud ecclesiastical juris－ diction，sud did so in a sense favomreble to the diction，sud did so in a sense favoureble to the civil power．On this account Thomas a Becket， Archbishop of Canterbury，refused to sign them，and excommunicated many of the ecele－ sisstics who liad done so．This led to the fend between him and the civil government which ultimately caused his assassination，on Decemi－ ber 29， 1170.

TFor the difference between constitution and government，see Government．

oón-atrāin'-a-ble, a. [O. Fr. constraignable; Fr. contraignuble.) Capable of being conatrained ; liable to conatraint. (Hooker.)
oón-sträined', pa. par. or a. [Constrain.] A. As pa. par.: In senses corresponding to
B. As adjective:
-1. Reduced by force or compulaion.
2. Forced, compelled; acting under compulsion and not voluntarily.
3. Done under compulsion; not voluntary, forced.

+ cobn-sträin'-ĕd-ly̆, adv. [Eng. constrainel; -ly.) By compulsion or constraint ; forcibly, compulsorily.
". We did constrainedy those thlogs, for which
conscience was preteaded."-Hooker.
côn-strāin'-ẽr, " con-streyn-or, a. [Ėng. constrain; -er.]' One who conatrains, forces, constrain; -er.) One who conntrains, forces, of The the punystris of werki, wad to the constreyners
cön-strā̈ln'-ĭng, pr. par., a., \& s. [CoN. etkan.j
A. \& B. As pr. par. \& particip. adj.: (See the verb).
C. As subst.: The act of compelling or forcing; constraint.
* cồn-strāin'-ing-ly̆y, * con-streign-yng11, ade. [Eng. constraining: -ly.] In a constraining or compulsory manner; by contpulsion or constraint.
"Puruelyage not constreignyngli hut wilfulli."-
Wyclife: 1 Pet. v. 2 cón-strāint', * oon-streint, *con-
streynte, s. [O. Fr. constraint, pa. par. of
constrainulre.] constraindre.]
* 1. The act of constraining, compelling, or forcing; the exercise of compulsion or force. considered, the age and inclination of the person is to be considered, alsd constraint al
* 2. Confinement, restraint.

3. Compulsion, force; a compelling force or power; necessity.
"Azd, serving God hersels through mere consiraint."
Fi (1) Crabb thus discriminates between con straint and restraint: "Constraint respects the movenents of the body only ; restraint those of the mind, and the ontward actions when they both refer to the outward actions,
we say a peraon's bchaviour is constrained we say a peraon's bchaviour is constrained, his feelings are restrained: he ia constrained to act or not to act, or to act in a certain manner; be is restrained from acting at all, if not from feeling: the conduct is constrained by certain prescribed rules, by discipline nod order; it is restrcined by particular motives whoever learns a mechanical exercise is constrained to move his body in a certain direction; the fear of detection often restruins persons from the commission of vices more haviour of children must be more constrained in the presence of their superiors than when they are by themselves: the angry passions ahould at all times be resirained."
(2) He thus discriminates between constraint and compulsion: "There is much of binding in constraint; of violence in compulsion: constraint prevents from acting agreeably to the will; compulsiou forees to act contrary to the will : a aoldier in the ranks moves with much constraint, and is often subject to much compulsion to make him move as is desired. Constraint luay arise from ontward circunstan*es; computsion is always 1 pro-
dued by sane active age $t:$ the forms of duced by sane active agent: the forms of civil society lay a proper constraint upon the
behaviour of nien go as to render them agree. behaviour of men go as to render them agree. abe ther must ever be ready to compel those power llust ever be ready to compel those
who will not anbmit without compulsion: io the monients of relaxation, the netions of children slomid be as free from constraint as jossible, which is one means of lesaening the neecessity for compulsion when they are called to the performance of their duty." (Crabb: Eng. Synon.)

* con-strāint-ive, a. [Eng. constraint;-ive.] Having the power or quality of constraining compelling, compulsory-
"Not through ayy constraining necessilty, or con-
strantive vow...."Carew : Surn. of Cornzoll.
* con-strewe, v.t. [Conitrue.]
"Thel the eonclocioun constrewe ne cauthe."-Dapos.
of Richard HI, p. 29.
cotn-strict', v.t. [From Lat. constrictus, pa par. of consiringo.] [Constrinoe.]

Physiol., dc.: To render narrower without the application of external preasure.

 | serves to conszrict. |
| :--- |
| vol. i., ch. vii., p. |
| 50 . |

còn-strice'-tëd, pa. par. or $a$. [Constrict.]
côn-stricc'-tǐṅg, pr, par. \& a. [Cosstrict.]
constricting snakes, a. pl.
Zool.: One of the three great divisiong nf Suakes or Serpents, the others being the Colubrine and the Viperine Snakes. The Boas and Pythons belong to this section of the Ophidians.
cồn-strić-tion, s. [Fr. constrietion; Prov constriccia; Su. constriccion; Port. constricção; Ital. costrizione, ull fron Lat, constrictio (genit. constrictionis) $=$ a linding or drawing togeconstrictionis) = a binding or drawing toge-
ther ; constrictus, pa. par. of constringo.] [ConSTRINGE.]

Anat. A Physiol.: A binding together; compression, contraction, astriogency.
T-Constriction binds by means of the physiological operation of the vessel acted upon; compression is produced by external force. Thus, the constriction of $1^{\text {part }}$ of the throat may take place ly the reduction through
quinsy of the width of the aperture; while in quinsy of the width of the aperture; while a
wounded artery is compressed by a bandage Wounded arter
tjed around it.
cón-strić-tive, * con-strlc-tife, , [Lat. constrictivus.] Binding, contracting, astrin-
gent gent.
côn-strić-tör, s. [Mod. Lat. \& Eng., from Lat. constrictess = compressed, contracterl, 1a. par. of constringo $=$ to bind together.] [Con-
STRinge.] STRINGE.]

1. Ord. Lang.: The second word in the term Boa Constrictor, which wa originally the Latin scientific name of a great Americun
serpent. Now, however, the jublic have quite learned the term, and extended it to the Asiatic Pytbons, or, indeed, to any large suake. [Boa Constrictor.] The term Constrictor implies that the Boa so designated compresses, contracts, or even erisines any compresses, contracts, or even crinnate animal or human being which it has succecded in encireling within jts deadly folds.
2. Anat. : Any muscle which compresses or contracta a tube, vessel, or organ in tho body.
Thus the pharyngeal wall is invested lyy an Thus the pharyngeal wall is invested loy an inferior, a middle, and a superior constrictor.
There are also a constrictor isihmi fatucium and a constrictor urethrce. (Quain.)

* conn-stringe', v.t. []at. constringo $=$ to bind tightly: con $=$ cum $=$ with, together, and stringo $=$ to draw tight.]
J. To bind tightly; to contract, to draw together.
"' The dreadiul spoot.
Which shjpmen do the hurricsuocsil.
Contring'd in joss hy the slinighty sun."

2. To contract, to cause to shrink.
"Strong liquors, especifully inftammatory spirita, in.
toxicate, roustringe, harlen the firres, aud coagulate toxlcate, ronstringe, har
the fluid. "一Arbuthnot.
cơn-strínged', pa. par. [Constrinoe.]

+ 1. Ord. Lang. \& Logic: Union of two or more substances together.

2. Theology \& Church History:
(1) Theol.: The doctrine thst in the Holy Eucharist the real body and blood of Christ are present slong with the bread and wine. The doctrine of Transubstantistiou is thst when the words of consecration are pronounced by the priest the bresd and wine are changed ioto the body and blood of Christ, and consequently cease to exist in their originsl substance. The doctrine of Consubstantiation, on the contrary, is thst after consecration they continue to exist in their originsl substance, but that along with them the sctusl body snd blood of Christ exist and are partaken of by the commenicants.
(2) Ch. Hist.: It is believed thst the firat to promulgate tbe dactrine of Consubstantistion was John, snrnamed Pungens Asinns, a doctor of Paris, st the end of the thirteenth century. Luther either adopted or thought it out snew for himself, sund it will for ever be identiffed with his name. It was adopted slso by Melanchthon snd most of the other North Gernan reformers, except Carlstadt, and became the creed of the Lutheran Chureh. It ta came the creed of the Lutheran Chureh. Insurg taught in the tenth srticle of the Angsburg Confession, which asserts that the resi body sud blood of Christ are truly present in the Euchsrist, under the elements of tho bread snd
wine, and sre diatributed and received. Ulrich wine, and sre diatributed and received. Ulrich
Zwingle, and subsequently Calvin, with most Zwingle, and subsequently Calvin, with mosi of tbe other Swiss and South German reformers on the eontrary, considered that the sacra mental elements were merely symbolic of the body and blood of Christ, which wers not corporeally preaent in the Eucharist. Bitter nesa of feeling arose between the combatants on the respective sides, and efforts te reconcile them failed. The doctrine of consubstantiation is still held as a fundamental tenat hy the Latheran Charches. It is sometimes called Imprsistion ( $\mathrm{q} . \mathrm{v}$.).

cơn'-sǔl, s. [Lat. consul, in old inscriptions consol, and once cosol. Remote etym. doubtful, generally derived frons cansulo $=$ to deliberate; but the sol of the old form consol has been considered to be the root sol of solium = a seat, the sel of sella $=$ a seat, chair, or stool, sad the sed of sedeo $=$ to sit. In this case consuls would be those who ait together.

1. Roman History :
(1) Properly ( $P$ l., Consula): Two supreme magistrates, with equal authority, elected annually in sncient Rome from the time of the expulsion of the kings and the commencement of the reproble (A.U.C. 244 ; B.c. 509 ). They were called at first pretors (prators), imperatores (commanders), and judices (judges); but altimately the name consules (consuls) pre. vailed over these designations. The annaal meeting or assesably of the Rorasn citizens for their election was called by the plural term comitia, from the comitirm, a place in or near the foram, where the elections were hell. They contlmued, with a few exceptional clections during the whole period of the republic, and were so important in the State, that the soccessive years were distingulshed by the consuls who had held office during each of them. At first none but patricisns could hold the dignity, but in b.c. 366 a plebelan was elected one of the consuls, and in B.c. 1.2 two. The consulate nominally continued ander the empire, but was little more thaus titular dignity. Tiberius transferred the power of clecting consuls from the people to the senate. Afterwards their aumber was sugmented. The last consul at Rome was Dedmins Theodorns Prulimus in A.D. 536 ; the last at Conatautinople, Basilius junior in A.D. 541 .
(2) A senator (of Venlce).

Many of the compuls risis nad met Are at the duko'e alremply.
2. F. One of three suprente magistates io Frauce, designaten first, second, snd thind consul, who held office between 1799 and 1804. Napoleon Bonaparte was the first consul, aud his power soon absorbed that of the rest. [Consulate, 2.]
3. Comm.: An officer appointed by the goveroment of his country to reside in a apecified foreign land, with the view of promoting the mercantile interests of the nation in whose service he is engaged. On arriving at his destination, or on his being sppointed a consul-if he be a native of the land in which he is acciedited, he shows bis credentials to the government of the region in which he ia to reside, and obtains an exequatur [Exequatur] sanctioning his appointment, and according hiru all the rights and privileges enjoyed by his predecessors. He amnually or more trequently reports to his govermment the state of commerce in the region where bis opportunities of observation lie. The office of consul in this aense seems to have arisen in Italy about the middle of the twelfth century, sDd aboat ths middle of the twelfth century,
consul-general, s. A consul of higher official dignity than ordinary, who has jurisdictiou over onlinary consuls or at more jlaces than the one in which he ordinarily resides ; a chiel consul.

"Som mase onnsumyd wilth hate end fris envye".
*B. Reflex.: To waste, to spend.
thou consamest thyself in single 1ife?"
Bhakesp. : Sonnets, ix. 2
C. Intrans.: To waste awsy alowly, in wear away ; to be exhsusted, to disappear. (Generally followed ly away.)
"Their fesh ehall roisume aumay while they stund npon their foet, and their eye shall comoume atory Iu

II Crabb thus discriminates between fo consuvee, to destroy, and to wroste: "The ides of bringing that to nothing which has been of bringing is common to all these terms. Enmething is cammon to all these terms.
What is consumed is lost for sny future pur. pose; what is destroyed is rendered unfit for any purpose whatever: consume may therefore be to destroy as the means to the ead; things are often destroyed by being consumed: when food is consumed it serves the intended purpose; bnt when it is destroyed It serves no purpose, and is likewise unfit for any. When iron is consumed by rust, or the body by disease, or a house hy the flames, the things in these cases are literally destroyed by consumpion: on the other lisurl, when life or health is taken sway, snd wheo things are either wom or tom so as to be useless, they are lestroyed. In the figmative signification it is synonymous with unste: the former inplies a reducing to not hing; the latter conveys also the ides of misuse: to wouste is to consmme uselessly : much time is consumed in complaining, which might the employed in remelyIng the evils complained of; idlers woste their time because they do not properly estimate its value: those who consume their strength sad their resources in fruitless endeavours to effect what is impracticable, are unlitted for doing what might be beneficial to themselves." (Crabb: Eng. Synon.)
cón-sūmed', pa. par. or a. [Сомзume.]

A. Asadj.: Consnmed, destroyed, expended.
"It is nint geten to knowe hem that ben dode wid
B. As subst. : Consumption.
cōn-sŭmp'-tion, cōn-sŭmp'-ci-on ( $p$ silent), s. [Fr. consomytion ; Sp. consuucion; Ital. consunzione, from Lat. consumptio $=\mathrm{s}$ consuning ; from consumptrs, 1 le. par. of comsume.]
I. Ordinary Language
I. The sct or process of cousuming, destroy. ing, or dissipsting ; destruction.

2. The state or process of being consumed, or of gradual waste and decay.
"I ean get no remedy nyringt this conoumption of 3. The process of using up or utilisiag. [JJ. 1.]
II. Technically:
I. Politicol Economy :
(1) The utilisation or expenditure of the products of industry.
(2) The amount or qusntity of industrial products expended or utilised.
"Every new rdvance of the price to the consumer ic
 2. Meticine:
(1) Hist.: A disease called by the Greeks $\phi \theta$ iors (phthisis) $=\mathrm{a}$ decline, a decsy, a wasting awsy, from $\phi \theta i \omega$ ( phthió) $=$ to decay, to dwindle. The Romans retained the Greek word phthisis, thongla they had slsos a word of their own, consumptio: from the Latia came their own, conswmptio: from
the English word Consumption.
[Etym.]. the English word Consumption. [Etym.]. Phthisis io medicine becsnes a geuns, with
the proper meaniug of wasting away, and the proper meaniug of wasting sway, and under it were reckoned various species, as
Phthisis pulmonalis, $P$. hepatica, de. ConPhthisis pulmonalis, P. hepatica, de. Con-
sumption alse is s genns, with at least iwo species, one the Pulmonary aod the other the Mesenteric form.
(2) Symptoms, \&c. : Consmuption is popularly supposed to be produced ly a neglected cold, intiammation of the lungs, or the breaking of a hlooul-vessel. In most esses these are the efliects of the disease, not its esnses. Ita cenote origin is often hereditary tendency or remote origin is often hereditary tendency or constitutionsl proclivity. In the former case the skin in childhood has a nale pasty look,
the upper lip is large, and the cheeks full. if the upper lip is large, and the cheeks fun of if fair, it is unnaturally white, with large conspicuous veins: those who are fair being sometimes very besutiful, those who are dark generslly the reverse. The circuiation ia boih cases is languid, and the strengtb as a rule small. There is geosrally mental precocity in the fair, whilst there are often dulness sod stupidity in the dark. Soonel
or later "tubercle" is deposited at the
apex of one of the lungs, juat beneath the apex of one of the lungs, just beneath the
shoulder-bone. [Tubencle.] The irritation which It canses produces a dry corgh, soon followed by mors or less difficulty of breathing. Expectoration next takes place when the congh comes, the matter ejected being, in the earlieat stage, frothy-like saliva, then with specks of opaque matter, then wholly tenacions, and at times atreaked with blood. The original tubercles are now breaking, but others are commencing, the disease trsvelling downwards till it pervadea the whole lobe of the lung, after which a ainilar process tends to begin in the remaioing lung. Long before this, however, the whole constitution bas aympathised with the local injury. There are hectic fever, uight perspirations, emaciation, hectic fever, night perspirations, emaciation,
and other symptoms, till the scene is closed and other symptoms, till the scene is closed by cedema of the lower limbs, aphtire (small death. The nean duration of the disease from the first deposition of tubercle is twenty-three months, but in more than one-half the cases the fatal result takes place within nine rnonths and often within four. There are various types of it, specially an acnte, a chronic, and a latent type. It exista in all countries of the world, but not equslly in all. Certain climatic conditions seem highly nsefnl in the treatment of consumption, snch as those of the mouotaias of Colorado and of North Csroliva, with other districts of the United States, the eastern section of the Cape of Good Hope, parts of India, Anstralia, and New ZeaHope, parts of India, Anstralia, and New Zea-
Isnd and other localities. In viany countries lsod and other localities. In many countries deaths that occur The mortality is greatest betweeo the ages of twenty and forty.
That this disease is produced by bacilli is oow widely held by medical men, and there bas been considerable discussion as to whether or not it if contagious. Though this question has not been satisfactorily settled, definite measurea of precaution agaiost contagioo are being taken io some of our cities. Tuberculous cows sre beiog killed to prevent the commajication of the disease hy means of milk, and steps liave been taken to means of contagiou by the dried sputum of patiedts, which has beed foued to be full of bacilli.

4if (1) Mesenteric consumption: [Maraamu8]. (2) Pulmonary Consumption: [11. 2].

For the difference between consumption and decay, aec Decai.

* oôn-sŭmp'-tion-al ( $p$ silent), a. [Eng. consumption;-al.] Cousumptive; pertaining to consumption.
* cón-sŭmp'-tion-àr-y̆ ( $p$ silent), a. [Eng. consumption; ary.] Inclined to consumition ; consumptive.
"His wifo being consumptionary, ..."-Ap. Gauden:

Whim he has beent brought into contact $\ldots$,.."-Duith Niov. 11,188 .
III. Special phrases and compounds :
4. Angle of contact:

Mrth.: The angle made by a carved line and the tangent to it at the point of contact. 2. Contact action:

Chem. : The same as Catalvsis (q.v.).
3. Contact of the first order:

Math. : Contact of two curves in a point for which they have the same coefficient of the first order.
4. Contact of the second order:

Math. : Contact of two curves in a point for which they have the same differential coefficient of the first order, and the same differential coefficient of the second order (Ogilvie.)
5. Point of contact:

Math.: The point in which two lines, planes, or lodies touch each other.
7 Crabb thas discriminates between contact and touch: "The former expresses a state, and referring to two bodies actuslly in that state the latter on the other haod implying the abstrsct act of touching: we apeak of things coming or being in contuct, but not of the contact inatead of the tortch of a thing : the poison which comes from the poison-tree is so powerful in its nature, that it is not necessary to coms in contact with it in arder to fecl ita baneful influence; some insecta ars armed with
stlngs 80 inconceivably aharp, that the smallest touch possible Is sufficient to produce a punc ture into the flesh." (Crabb: Eng. Symon.)
contact-level, s. An adaptation of the spirit level-1 neved by certain instrument-mskers
for the production of exact divisions of scales, end generally for the determination of minute end generally for the determina
differences of lenhgt. (Knight.
cón-tăć-ti-cal, a. [Eng. contact: -ical.] Pertaining to or implying contact ; contactual.

* conn-tăc'-tion, s. [Eng. contact; -ion, as It from a Lat, contactio, frons contactus.] The act of touching; coutact, tonch, juncture.
* cón-tăc'-tur-al, a. [Lat. contactu(i); Eng. adj. suff. -al.] Pertaining to or implyiug contact.
cón-tā'-gion, s. [Fr. contagion; Sp. contagio, contagion; Port. contagião, contagio; Ital. contagio, contagione, all fron Lat. contagio $=$ a touching, contact, touch ; continyo $=$ to touch, to lay hold of : con $=$ together, sud tango $=$ to touch. ]

1. Med. \& Ord. Lang.:
(1) The communication of a disease by contact with the person labouring under it, as distingulibhed from infection, nsed to signify its transmission by meane of the air without actusl personal contact with the diseased person. But sometimes the word contagiou is used in both of these aenses, snd ls divided into immediate or contactical contagion, that produced by actual contact, and mediate or remote contagion, communicated by the air. Infection is used in a more extensive sense, to include also miasmats or other canses of diseasea not coming from human beings, but rising from marahes or from any other source. Some make the two words contagion and infection atrictly synonymons.
(2) The prisonous matter communicated by ontact of some kind.

* (3) Venoms, poison.

III toach my polat with this conragion,"
2. Ord. Lang. \& Fig.:
(1) The commmication by other people of anything deleterious to the mind or heart. ". Nor wilt the goodness of intention excuse the
(2) The deleterious infinence exerted.
"There, in bis cornmerce with the liveried herd.
T Crabb thas discriminates Cetween contagion and infection: "Some thingz act more properly by contagion, others by infection: the more powerful diseases, as the jlague or yellow mever, sre communicated by contagion; they are therefore denominated contagious; the less are thent disorders, as fevers, consumptions, and the like, are termed infectious, as they are commnnicated by the less rapid process of incommunicated by the less rapid process of in-
fection: the air is contagions or infectious according to the same rule of distinction; when heavily overcharged with noxious vapours and deadly disease, it is justly entitled contagious, bnt in ordinary cases infectious. In the tigurative sense, vice is for the same obvious reason termed contagious; and ked principles are de nominated infectious: some young people, who are fortunate enough to shon the contagion of had society, are, perhaps, canght by the infeetion of bad urimeiples, acting as a slow poison on the morsl constitution." (Crabb: Eng. Synon.)
cón-tā̀-ǧoned, a. [Eng. contagion; ard.] Affected by contagion.
cón-tà'-gion-ist, s. [Eng. contagion; -ist.] Med. Hist. : One who holds the view that certain diaeases, the evidence regarding the certain diaeases, the evidence regarding the
trangmission of which from those affected to othera ia doubtful, are really contsgious.
côn-tä'-gioŭs, "con-ta-geous, * con tand Ital. contagioso, all fromi Lat. contagiosms.
L. Literally:

1. Med. (Of a disecze): Communicable by contact. [Contagion.]
2. Of air, of flies, \&c.: Commudicating or transmitting contagion.
"After the whiche reyne onsued so grent excedynge
oninhee nod multytude of gyet, the whiche were oonihre nod multytude of syen, the whiche were en
the people so boyous sad contageous, thit they ylewe the people so noy ous sod contageous, th
moche people."-Fabyan, vol. i., ch. xix.
II. Fig.: Commonicating suything from one to another or to others.

T (1) Contapious Diseases dets: Acts passed from 1865 to 1868 to prevent the spreed of vellereal disease in garrison towns rough - Royal commission and 2 select Commitee reported in favour of these scts, pnblic 1883
Ing againet them was so strong that in 1883 ling againet them w
(2) Contagious Diseases (Animals) Acts: Acts passed for the protection of horses, cattle, sheep, goata, snd swine, from certain contagions diseases, sud enforced by orders issued from time to time by the Privy Conncll, which also regulates the landing end slsnghter of foreign cattle.
I Crsbb thus discriminates between contaglous, epidenical, and pestilential: "'The contagious applies to that which is capable of being caught, and ought not, therefore, to be tonched; the eridemical to that which is slready caught or circulated, snd requires, thereore, to be stoyped; the pestilential to that which may breed sn evil, and is, therefors, to be removed : diseases are contagious or $\varepsilon$ pidemi cal; the air or breath ia pestilential. They may all be applied morally or flguratively in the same sense. We endeavour to shun a contagious disorder, thet it may not come near ns ; tagious disorder, thst it may not come no portiar that we endeavour to purify a pestilential air, it may not be inhaled to our injury i we endeavour to provide sgainst epudem ical disorders, that they may not spread any farther. Vicious
example ia contagious: certain follies or vices exsmple ia contagious: certain follies or vices
of fashion are epidemical; the breath of of Pashion are epidemical; the breath of Synon.)
ctn-tid'-gioŭs-1y, adv. [Eng. contagious; ty.] In a contagions manner, so ss to commu nicate contagion or anything else capable of being transmitted from one to another.
"Thero ho nothiog which apreada more contagionaty,

 ness.) The quality of being contagioug. "Thooe corpuccles, that impregnate the Kgyptian air apon the nowlillyg of the Nilee are abie to put mpealismity of the plagtie, ... m-Boyla: Forke, vol. v., p. 66.
cotn-tas'-gin-um, \& [Jat.] The same as Contiolon (q.v.).
of icirino contagium of measles, nor any contagtums

con-ta-gy, a. [Lat. contagium.] A contagrous complaint.
otenche:- nad after folowed a contagy and an fowle

* con-tels-er, * con-teok-our, * con-tek our, con-teo-our, s. [Mid. Eng. con tek; -er, -our.] A quarrelsome person.
* cón-tĕm'-ẽr-āte, a. [Lat. contemeratus, 11. par. of contemero $=$ to defle $:$ con $=$ cum $\stackrel{1}{=}$ with, together, fully; temero $=$ to treat rashly, to defile.] Defiled, coutaminated, polluted, violated.
oón-tĕmn' ( $n$ silent), * con-temne, *oontempne, v.t. [O. Fr. contemner; ital. com temnere, from Lat. contemno $=$ to despise : con $=c u m=$ with, together, wholly ; temno $=$ to despiae.]

1. To despiae, to view with contempt or diadaun ; to scorn.
-She that asks
Her dear five bundred friends contemnt them nill."
2. To slight, to reject, to neglect.
"Because they rebelled againat the words of God,
and contemneal the counsel of the most High.. ${ }^{2}$ Pat cvil. 11.
I Crabb thus discriminstes between to contemn, to despise, to disdain, and to scorn: "Contempt, as applied to persona, is not iscompatible with a Christian temper when juatly provoked by their character; but despising is distinctly forbiclden and seldom warrsnted. Yet it is not so much our business to contemn others ss to contemin thist which is contemptible; but we are not equally at liberty to despise the person, or any thing belonging to the person, of another. Whatever springs frota the freewill of snother may ever springs subject of contempt ; but the casualtiea of fortune or the gifts of Providence, which of fortune or the gifts of Pronal merit, ahould never expose a person to be despised. We msy, however, contemin a person for his impotent malice, or despise him for his msanness. Persons are not scorned or disdained, but they may be treated with scorn or disdain; they are both improper expressions of contempt or despite; scorn marks the asntiment of s little

kind

* cón-tĕm'-pẽr-à-türe, e. [Dref. con, and Eng. temperuture (q.v.) ] Coutemperament, relative or proportionate mixture.
$\because-$ So the dififerent contemperature of the alements,
- côn těm'-plant, a. [Fr., pr. par. of contempler.] Meditative, coritemplative.

côn-tĕm'-plāte, or cơn'-těm-plāte, v.t. \&i i. [Lat. contemplatus, pa. pur. of contemplor $=$ to observe; first used of the augurs who attended the temples of the gads: con $=c u m=$ with, together, and templum = a temple, a space marded out for the observation of auguries; Er. contempler.]
A. Traissitive:
I. Lit. : To look at, to view, to observe.
"Till, growing with Its growth, wo thun dilate'
II. Figuratively:

1. To look at or observe from various points of view ; to atudy, to meditate or reflect deeply on.
"There is not moch difficntty in confining the zoind to fratis.
2. To have in view, to purpose, to intend, to design.
3. To look for, to expeet.
B. Intransitive:
4. To meditata or reflect deeply, to study, to ponder.
(t) Followed by over before the aubject meditated on.
"Sapor had an heayen of glasa, which he trod npon. comtenylatin
(2) Followed by on,
"How can $t$ comsider what belonge to myselt, when 1 hrve been 80
$J u v a n a l, ~ P r e t . ~$
5. To look for, to expect, to purpose.

IT Crabb thus diseriminates between to contemplate, to meditude, and to muse: "We conteraplate what is 1 reseot or before our eyes ; we meditats on what is plast or absent. This heavens and all the works of the Creator are objects of contemplation; the ways of Providence ara fit subjects for meditation. One muses on the events or circmonstances which have been just passing. We may contemplate and meditate for the fitipre, but never marse. In this case the two former terms have the sense of contriving or purposing: what is contentplated to be done is thought of more indistinctly than when it is meditated to be dome: many things are had in contemplation whieli ars never serionsly meditated upon: between contemplating and meditating there is ofteocr a greater distance than between melitating adod executing. Metlitating is a permanent and serious action; musing is partial and unioportant: meditation is a religious duty, it camnot be reglected withont injury to a person's syinitual improvement; musing is a temporary emplognent of the mind on the ordinary concerns of life, ss they happen to excite an interest for the time." (Crabb: Eng. Synon.)

＂Thus contended 1 with the rniers＂－Nehorm xiii． 11
＊5．To exert oneself．
＂Arrise contend thou betore the mountaina，and lot
${ }^{*}$ 6．To use power or strength upol ；to punish．
and it devoured the breat deep，and did ent up a parth
-1 mos vii 4 ． to dispute，to contest．

Their airy limbs in sports they exercime．

－I（1）Crabl thus discriminates between to contend，to contest，and to dispute：＂Contend is to contest us the genus to the species．To contest is a species of conterding；we cannol contest withont contending，although we may contend withont contesting．T＇o contend is cou－ contend withont contesting．idea of setting one＇s self up arsinat suother ；contest and dispute must Con－ clude some nbject contcsted or disputed．Con－
tend is applied to all natters，either of per－ sonal interest or speculative opinion；contes slways to the former ；dispute mostly to the latter．Individuals or diatinct bodies con－ tend；nations contest．During the present long and eventful contest betwcen Eugland and France，the English have contended with their enenies as successfully by land aa hy sea．Trifing matters may give rise to con－ tending：serious points only are contested． Coutentions are slwsys couducted personally and in general verbally；contests ore carried on in diffrrent manners according to the nature of the object．The parties thenselves
b⿵冂．boy；portt，jōrl；cat，çell，chorus，chin，bench；go，gem；thin，this；sin，aṣ；expect，Xenophon，egist－ing

mostly decide contentions; but contested matters mostly depend upon othere to decide."
(2) He thns discriminates between to con lend, to strive, and to vie: "Contending reguires two parties; strive either one or two There in no contending where there to not an opposition; but a person may strive by himaelf. Contend and strive differ in the object as well as the mode: wecontend for a prize; we strive for the mastery: we contend verbally; but we nevar atrive withont an actual effort, and iabour more or leas severe. Wa may contend with a person at a distance; bnt striving requires the opponent, when there to one, to be present. Opponents in matters of pinion contend for what they conceive to be the truth ; sometimes they contend for trifles : combatants strive to overcome their adversaries, either by dint of superior skill or saries, either by dint of superior skill or strength. Contend is frequentiy used in a figurative aense, tn appication to things;
strive very seldom. We contend with difficulstrive very seldom. We contend with difficul-
ties; snd in the spiritual spplication, we may ties; and in tile spiritual application, we may
be said to strive with the spirit. Vie has more of striving than contenling in it; we strive to excel when we vie, but we do not strive with any one; there is no personsi coilisiou or opposition: those we vie with mny be as gnorsint of our persons as our intentions. Vying is an act of no moment, but conteuding nd striving sre slwsys serions nctions: neigh bours often rie with earh other in the finery and grandeur of their house, dress, and equipage." (Crabb: Eлg. Synor.)
cón-tĕnd'-ĕd, pa. par. or $a$. [Contend.]

This isiand had theu fitteen bundred atrong shlpa
2. Extent, size.
the geometrical contene. Agure, and st tuation of ail the
Nortnluy.
3. That which is contained or included. (Now only in the piaral.)
(1) Within msterisl limits.

Scarce bad he gone when y young lad came by.
He took it up; asd fuding its content.
securd the treasure, and Away he weut. Byrom: Mose's Fiston
(2) Iu a book, writing, specch, \&c.
"I shalh prove thrwe writings not conntereita, hnt Authentcry fand the confents true and worthy of a
4. Composition, component parts
" Scarcely any thing can be determlned of the par-
ticular comtents of any slagle mase of ore by mere in-suection."- Iroodear.
5. A table or list of what is contained in a book or writing.

- Table of contents: The eame as A.I. 5.
II. Figuratively:

1. Satisfiction, contentedness, moderate happiness: esse or rest of mind; freedom from repining, grombling, or discontent.

Not deek'd with diamonds and Iadian stones,

2. Thst which is the condition of happi gess or sstisfaction.
(1) A wish, $\mathbf{8}$ desire.

In Englend work your graices fill fontent."
(2) Resignation, meekness.

His face, though fult of ares, yet show'd content.
3. Happiness, joy.

4. Acquicscence : agreement or astisfsc ton with s thing unexsmined.

Their pralse fa still-the stile in exoellent:
The mense they humbly take upon content:"
Pope: Eptetle

I To one's heart's content: To full and completo satisfaction.
B. Technioally

1. Geom. : The area or quantlty of space or matter contained within certain linits. Super ficial contents, tho area or surface included withiu certain lines; cubical contents or solid contents, the number of solid or cubic noit contained in a apace: as 80 insny cnbic taches, feet, yards, volume. (Ogilvie, tce.)
2. Customs: A paper delivered to the aearcher by the master of a vessel before ahe ia cleared ontwards, describing the Fossel's deatination, and deteliing the goods shipped, with other particulars. This content has t be compared with the cockets and the in dorsements and clearadces thereon.
3. Legis. : A member of the House of Lords who votes content, that is, an assent to any motion.
"Bupposing the pumber of contents and not con tents atrictly equal in numbera eud consequ.
"Cơn-těnt- ${ }^{\text {a }}$ '-tion, s. [Low Lat. contentatio, from contento $=$ to content, to satisiy.]
4. Satisfaction, content.
"I seek no better warrant than my own conselence nor no greater plonato than mine own contentation2. Apparently used incorrectly for conten tion.

There is no weak contentntion between theoe, and the lal)our in bard to reconeile them."-Adams
cö̀n-tĕnt'-ěd, pa. par. or a. [Content, v.] A. As pa. par.: In sensea corresponding to those of the verb.
B. As adjective:

1. Satisfied, easy in mind; moderately hispy; content.
(1) Foliowed by with.
" Barbaroxka, in hope by suffersmee to ohtain anothe kingdom, seenned contented with the answer."-K nollea
(2) Followed by a clanse.

Dreain not of other worlds
Not of eurth only, but of bighent reveald
Shilton: P. L., bk. vili. in the sense of agreed, content.
Well contented."
shuke.ph: Nacbeth, II.
2. Aequiescing, setisfied, wiliing, agreed. "Are yon contented to resien the crown?"
*3. Compozed, at ease.

Languages.
*2. Continental ; enclosed withio a continent or continents (in the sense B.).
the mayne and continent land of the whole
B. As substantive :
*I. Ord. Latsy. (Gen.): That which cont:inins any maternal thing, any person, or any abstract conception.
"I did not say that the Brok of Articles 0n1y was doctrine."-A Arohbiehop Laul: Conference with Fhher
II. Technically:

1. Geog.: A vast tract of land so much detached from the rest of the land in the world as to render it cxpedient to give it a distinctive nane. There are gencrally gaid to le four continents: Europe, Asia, Africa, and America, to which some add a tifth, Avstralia. The divigion is, to a certain extent, arbitrary. Enrope is not detached from Asia, but is continuous with it for ahout two thouaand miles; whilst, on the contrary, North and south America are separate names, and tigirel as two continents separate names, and tigired as two continents
instead of one. If Africa be taken as the
type of a continent, then a continent differs from an Island in not being whrolly detached from the continents adjacent to it; but is America bo regarded as the typo of a contsnent, then a conthent differs from an tsland nent, then a continent diners, irom an island
only fir being larger. Really, Europe, Asia, only in being larger. Realiy, Elirope, Asia,
and Africa together constitnte one island, by far the largest in the world ; America a second, the next largest; and Australia mother, the third largest; their slze renders them wortliy of being called contiuents.
2. Geol.: In essentially the amme sense as B. 1. 1. Aa the action of water tenda to wash sway all land and deposit it heneath the waves of the sea, whilst igneons agency, oper-
ating through voleanoes and earthquakes, and ating through volcanoes and earthquakes, and
generally in the vicinity of the ocean, tends to Senerally in the vicinity of the ocean, tends to heave it up, it is evident that if a sufficient
length of time be given the continents will change their places, and they have doue so in time past. This, to a certalu extent, was understood by the ancient philosophers.
"The face of places, oud their forms, deceny.
Beast in thetr twaran retrenting from the ahore,
Anke solld nutd whet ocenl whs befure: found
And ruaty minchora fx A ou on mountala ground. ${ }^{-1}$

Murchison considered that the nriginal continents had been mostly aubmerged. Lyell founded his hypothesis, designed to explain the changes of climate in bygone geologic periods, by supposing succeselve gradual redistribntiona of aes and land quita difierent from those now prevalling. (Climatel Prof. Edward Forbes considered it probable that a "great Miocene land," by which he meant a land consisting of Mioceoe beds, subsequently upheaved, extended into the Athantic far past the Azores, Great Britain, Irvland, snd Spain, belug parts of It. (Afm. Geol. Sirv. Great Brit., vol. i.; ; Q. JJ.
Geol. Soc., vol. iii., pt. I., pp. Iv.-lxvii.) Still,
 tinents have existed since a remote geological period, though thay have been eubruerged from time to time.
cǒn-tinn-ěnti-al, a. - [Eng. continent; al; Fr. continental. 1 Pertaining to a cootinent, esp. to the contingnt of Europe.

I Continental system:
Hist. : A project plamed, and to a certain extent carried temporarily intoeffect, of cutting off Britain from all connexion with the Continent of Europe, with the view, if possible, of striking a mortal blow at leer caritine and commercial aulremacy. The hirst mention of it occurs in the armatstice of Foligno, Febrnary 18. 1801, but it was not thoroughly developed till the issue of the Berlin Derree, Noveniber 19, ISO6. This placed the British islands in a state of blockade [Blockade, II.], forkade all commerce with them, made all goods coming fiom Britain or its colonies contraland, ordered all letters to or from it to be opened, and all British suljecets to be arrested. All the Contimental nations to which Napoleon conld dic they liked it or no. Britain retaliated hy guccessive Orders in Council, and tinally the restiveness of the nations under the insupportable inconvenience produced by the deportable inconvenience produce by the decreea, not merdycaused a cousiderable degree in producing the fali of Napoleon.

+ cŏn-tŭn-ěn'-tal-ist, $s$. [Eng. continental; -ist.] One who lives on, or is a mative of, a continent.

2. The quality or itste of belng contiagent or fortuitous ; accident, possibility.
Fuigar Errourt
3. A contingence, a chance or possible occurrence.
" Abore oontingency and time

- Blacklock: To Dootor Dowemsann.

"Contingencies of pomp iferducork: ixcerrition, bk, Iv.
I Contingency with a double aspect:
Law: Provision with regard to landed sstate fur two contingencles, viz., that a certaln event will happen, and that on the other hand it will oot happen. This prevente the intentions being frustrated in either case.
edn-tin'-yent, a. \& 8. [Fr. contingent; Sp.,
Port., \& tingens, pr. par. of contingo $=$ to tonch, to take bold of, to seize: con = together; snd tango $=$ to tonch.]
A. As adjective:

1. Ord. lang.: Dependent on an uncertain issuc, of doubtful occurrence, which may or may not happen.

2. Logic: Applied to the matter of a proposition when the terme of it partly agree, and partly disagree.
B. As substantivs:
3. Ord. Lang.: Anythlng which may or may not happen, anything of uncertain event. "By contingents wo re to underatand thuse things
which cone to pase without auy humaul forecast,"which conne to pass
Greso: Carmologia.
4. Mil.: The proportionate nutmber of soldiers which a country or an individual of high rank is bound or engages to purnish towards a common eaterprise; $s$ quota of moldiers or other tighting men.

## II (1) A contingent legacy:

Law: A legacy depending on a coudition and lapsing if the conditiou be not fultilled or the uncertain eveni fail to happen, as when a legacy is left to one provided he reach twenty-one years of age, (Blackstone: Comn ment., bk. ii., ch. 32.)
(2) Contingent remainder:

Law: A remainder in which the estate either ts to pass to en uncertain person or is to depend on a duhious event. It is called also an exectiory remainder. (Blackstone: Comment., hk. ii., ch. 11.)

## (3) Contingent uses:

Law: Uses depending upon a contingency. There must be a person seized to such uses when the contingency hsppens, else the use will be pernamently destroyed. They are called also springing uses. (Blackstone: Conment., bk. ii., ch. 20.)

- cotn-tin'-gent-1y, adv. [Eng. contingent: dy.] Accidentally, fortuitously; not secordIng to any gettled rule or law.
"There could have been no prophsoies, but oniy pree.
dietions which were contingoutly true or false,"

- cón-tin'-gent-nčss, s. [Eng. contingent; -ness.] The quality or state of
- cón-tin'-n-a-ble, a. [Eng. continu(e); -cble.] That inay be continued.
con-tin'-u-al, * oon-tin-u-el, * con-tin-u-ele, * con-tyn-u-el, $a_{\text {, }}$ [Fr. continuel, from Lat. continuus = holding together, unbroken : con $=$ cum $=$ with, together, and teneo $=$ to hold.]

1. Unbrokell, incessant, unceasing, procecding without interruption or cessation.
"Where in bright trail contaruat wonders rise" $\begin{gathered}\text { Thomson: Spring. }\end{gathered}$ 2. Constani, nuvarying.

## 3. Perpatual.

II (1) Continuel claim
Law: A clalia to land repeated at intervals, none of them axceeding a year and a day, It was used when possession could not be taken without hazard. It was abolished by 3 \& 4 Wm. IV. c. 27 § 11.
(2) Continual proportionals:

Math.: Quantities or magnitudes in conthaned proportion (q.v.).
T (1) Crabb thus disoriminates between concinual and continued: "Both tbese terms mark length of duration, but the former admits of a cortain degree of interruption, which the latter does not. What is conimual may have frequent pauses; what is continued ceases only to terminate. Ralne are continual; nolses in a tumultuous street are continual: the base in music is asid to be continued; the mirth of a drunken party ts one contimued nolse. Continual tnterruptions sbats the vigonr of application and create disgust: in countries siluated near the poles, there is one continued darkness for the space of tive or six monthe ; during which titme the inhabitanta are obilged to lesve the place. Continual respects the duration of sections only; continued is likewise sppifed to the extent or course of things: rumours are continual; course of things: rumours are continual; talking, walking, ruming, and the hike, is
continual; but a line, a mertes, a scene, or a continual; but a line, a arted
gtream of water, Is continued."
(2) He thus discriminates between constant continual, and perpetual: "What is continual admits of no interruption : what is perpetual admits of no termination. There masy be an end to that which is continual, and there may be intervals in that which is perpetual. Rains are continual in the tropical climates at certain sessons; complaints among the lower orders are perpetual, but they are frequently without foundation. There is a continual passing and foundation. There is a continual passing in the gtreets of the metropolis during the day; the world, and all that it contains, are sutject to perpetual clange. Constant, like continual, admits of no inter ruption; but it may cease altogether. Continual respects the outward circamstances and events; constazt the temper of mind." (Crabb: Eng. Synon.)
otn-tin' $n-a 1-1$, * oon-tin-n-al-1iche, *oon-tin-iu-el-y, * oon-tyn-n-el-iche, adv. [Eng. continual; -ly.]

1. Without a pause; uninterruptedly.
"He relgred theryaue contimualliche thritty yeran. $\begin{gathered}\text { Treviaa, } \\ \text { ill } 9 \text {. }\end{gathered}$
2. Without ceasing; Incessantly.

- Alle manere of melody

Hampole: Pricks of Conscience, $8,913$.
3. Used loosely for frequently, often, constantly.

- cón-tǐn'-n-a1-nĕss, s. [Eag. continual; -ness. $]$ The quality of being continual; continuance, permanence.
ofn-tin'[Lat. continuars, pr. par. of continuo $=$ to join iogetleer, to continue.] [Continual.]
I. Ordinary Language:

1. The quality or state of bolding or keeping together ; resistance to sepration of parts ; continuity.
"Wool. tow, cotton, and raw silk, have. besides the
denire of continutmer in regurd to the teuiuity of their denire of continu ence in regnrd to the teunity of their 2. Uninterrupted succession.
2. The brute immediately rexards his own preserva.
"onn or the comitimunce of his ppecies."-dddison: tion, or the contimusnce of his species."-Addison.
Spectutor.
3. Permanence or constancy in one statc.
4. Lastingness, duration.

5. Perscverance, unceasing action.

Hom. in. ${ }^{7}$ pationt continuance in welldolng.
6. Perseverance or constaney in conduct; fixedness of purposs or resointion.
"Continuance, is a stedtast and constannt abiding in a purposed and well aduised justter, not yeelding
to niny man in quarell of the rigit."-Wilson: The
Arte of Fhetorike, p. 36. 7. Progress of time.
"In thy book sil my membere were writien. which
a continuance wore fashioned."-Ps. exxxix. 16. io continuance were lashioned. As. exxerix.
8. Abode or continuing in one place.

With long continuance In a "ettied plidice"。
9. Permanence.
 Lacs. ULIL
II. Law:

1. English: The naming of a day to which a trial, not concluded, wili be adjourned. (Blackstone: Comment., bk. Jil., ch. 21.)

IT Notlce of trial by continuance: Notlce by a prosecutor or pladntifi, who is nnt ready to proceed, that he wishes the trial to be adjourned by continuance to some other sitting in place of allowing it to be fallen from. (Wharton.)
2. United States: The deferring of a trial or suit from one stated tsrm of the court to anotber. (Webster.)
\# Crabb thils diacriminates between conimuance, contimuation, and duration: "Continuance and duration are both employed for time; things may be of long conlinuance, or of long dreation: bnt continuance is nised only with regard to the conduct of men; duration with regard to the existence of evary thiog. Whatever is occasionsily done, and soon to be ended, is not for a continuance; whatever is made, and goon destroyed, is not of long duration; there are many excollent institutions in Englend which promise to be of no lese continuance then of utiltty. Duration is with 19 a relative term; thing are of long or short duration: hy comparison the long or stort duration. hy comparisoa, the jects is nothing io regard to eternity," (Orabb: jects is nothi

- cón-tin'-n-äte, v.t. [Contincate, a.] To join closely together.
* còn-tĭn'-ư-ąte, a. [Lat. continuatus.]

1. Closely or immedately united

Pecicham while it is continuate and undivided, $\therefore{ }^{n}$ -

our yery hesh and bones ahould be made con
with hly., $-H$ ooker.
2. Uninterrupted
.

* eôn-tĭn'-u-ā-tĕd, pa. par. or a. [Continuate, $v . j$
* cón-tin'-u-ate-ly̆, adv. [Eng. continuate; -ly.] Continnonsly, uninterruptedly; with continuity.
* oòn-tinn'-u-ate-něas, s. [Eng. continuate; -ness. $]$ Thie quality or state of being continuate; freedom from interruption; continuate;
* oón-tinn'-n-ā-ting, a. [Continvatx, v.] Joining, counecting, ubitiog.
cŏn-tinn- $\mathbf{n}-\bar{a}^{\prime}$-tion, s. [Lat. continuatio, from contimuo.]
I. Literally:

1. The act of contiouing or carrying on withoui intercuption or cessation.

2. That which is carried on ; an extension.
"... I could gend you either the Miscellany, or my
continuation of the versiou of Statiun $\rightarrow$ Pope: Letter continuation of the versiou of statiun."-Pope: Letler
to H. Cromvell, March 7,1703 .
3. Ao extension or prolongation; as, the continuation of a line.
II. Figuratively:
*. 1. A restraint or keeping together; moderation.
"And it is no wonder, if the contenuation and
 *2. A prorogation. (Scotch.)
4. (Pl.): A euphemism for gaiters, as a kind of continuation of "short clothes" or knce breeches; afterwards spplied to trousers. (Slang.)
"A sloek man . . . ta drab mborts and continuations." -Dickens: sketches by bos
-I (1) Crabb thus discriminatea beiween continuation, continuity, and continuing: "Continuation is the act of continuing; oontinuidy is the quality of continuing: the former is employed in the figurative sense for tlis durstion of events and actions; the latter in the physical sense for the alhesion of the component part: of the bodies. The continuation of a history up, to the existing period of the writer is the work of evary age, if not of every year: there are bodies of so little continuity that thisy will crumbje to pieces on the sligltest touoh."

(2) For the difference between continuation and continuance, see Continuance.
cön-tin'-u-ā-tive, a. \& \& [Eng. continucu(e); -ive.]
A. As adjective:
5. Having permanence or duration; continuous, permanent.
6. Continuing or extending.
B. As substantive:
J. Logic: That which containa the idea of continuance, permmence, or duration.
"To theme may be added contlouraties: an, Rome 2. Gram.: A word which serves to connect two sentences, or to continme a seatence.

ôn-tín'-ụ-ā-tõr, s. [Eng. continuat(e); -or.] *1. One who continnes or keeps np the uninterrupted succession ot a series.
7. Ona who continues or carries on the work of another; a continuer.
cón-tı̈n'-ue, * con-tyn-ne, * con-tune, v.t. \& i. [Fr. continuer; Sp. continuar; Ital. continuare, from Lat. continuo $=$ to continue, to last.] [Continual.]
A. Transitive:

L Ordinary Langurge:

* 1. To join togetler, to naite, to connect. "The use of the navel is to continue the infant unto 2. To carry on without interruption.
in ion: : the series of a constant continued saccession 3. To protract, extend, or lengthen; to draw out.

Tamely endurd a bride of wond rous gulength
Froub hell continued reaching th utmoet orh
of this friil world." Miton: P.L., bk. ii
4. To carry on the work of another; to complete.

*5. To delay.

* 6. To prorogue. (Seotrh.)

7. To extend or protract in duration; not to suffer to cease.
 heart." ${ }^{-P_{h}}$ xxxvi. io.
8. To persevere or peraist in, to keep up, not to cease or leave off.
 conthublyg nuch a bife as you have beea long accub-
tomed ta lead."- Pope.
9. To retain or suffer to remaia; not to get is of.

- 10. To allow to live to prolong the life of. "And buw shall we continue Clandic?"
II. Geom.: To extend or protract a line yond a certain point ; to produce.
B. Intransitive
J. To remain in the same state, position, or place.
three day the and hivititude our hing to continue with me now 32

2. To endure; to last or be durable.
xili. $1 i$ it thy kingdons shall not continue
3. To prersevere or persist, not to omit or crasc.
Bes. wif they continuad
4. Nut to leave off.
they eanerinued to pecupy their old jositiona." 5. To renain in connection with, not to leave or forsake.
"Ther went out from os. hul they were not of us;
T(1) Crabh thus discriminates between of continue, to remain, and to stcy: "The idea of roufining one's self to something is common to all these terms ; but continue applies often to tha sameness of action, and remain to the sameness of place or situntion; the former has most of the active seuse in it, sud expresses a state of action; the latter is altogether neuter, aud expresses a state of rest Wa speak of continring a ccrtain course, of contiuning to do, or continuing to be any thing; hat of reanaining in a position, in a house, in a town, in a condition, and the like. There is more of will in contiauing; more of
necessity and circumstances in remaining. A person continues in office as long as he can perform it with satisfaction to himself, and his employers: a aentinel remains at his post or atntion. Continue is opposed to cease ; remain is opposed to go. Things continue in motion; they remair stationary. Remain and stay are both perfectly neuter in their sense, but remain is employed for either persons or things: stay for persons only. Remain is often involuntary, if not compulsory : stay is altogather voluntary."
(2) He thus diacriminates between to contintu, to persevere, to persist, to pursue, and to prosecute: "The jues of not laying aside is common to these terma, which is the sense of continue without any other sddition; the other terms, which are all apecies of continuing, include likewisa soma collateral ides Which distinguishes them from tha firat, as well as from each other. Continue is comparable with persevere and persist in the neuter sense ; with pursue and prosecute in the active sense. To continue ia simply to do as ona has dous hitherto; to persevere is to continue without wishiug to chsnge, or from a positive desire to attain an object; to persist is to continue from a determination or will not to cease. The act of continuing, therefore, specifles no characteriatic of the agent; that of persevering or persisting marks a direct temper of mind; the former is slways used in a good sense, the latter in su indifferent or bad sense. Continue, when compared with persevere or persist, is always coupled with modes of action; hut in comparison with pursue or prosecute, it is siwnys followed by some object : we continue to do, persevere, or persist in doing aomething : but we continue, pursue, or prosceute aome ohject which we wish to bring to perfection by additional labour. Continue is equally indefinite, as in tha former case ; pursue snd prosecute, both comprehend collateral illeas respecting the disposition of the agent, and the nature of tha object; to continue ia to go on with a thing as it has been begun; to pur. sue and prosecute is to continue by some prescribed rulc, or in ame particular manmer: a work is continued; \& plan, measme, or line of conduct is pursued; an undertaking or a design is prosecuted: we may continue the work of another in order to supply a deficiency; we may pursue a plan that emanates either from ourselves or another; we proserute our own work onty in order to obtain some peculiar objcct: continue, therefore, expresses ess than pursue, and this less than prosecute: the history of England has been continued down to the present period by different writers; Smollett has pursued the same plsn writers; smonett has pursued the same plsn
as Hume, in the continuation of his history ; Csptain Cook prosecuted his work of discovery in three several voyages. We continue the conversation which has been interrupted; we pursue the subject which has engaged our sttention; we pursue a jonrney after a certain lengtla of stay; we prosecute any particnar journey which is important either on account of ita difficulties or its object." (Crabb: Eng. Synon.)
còn-tín'-üed, pue per. \& a. [Continuf, o.] A. As pa. par.: (See the verb).
B. As adjective
5. Produced, extended, or lengthened.
6. Carried on uninterruptedly ; continuous. ". . . those points which at the present titue are alsse ennintutily iishaie to variation "-Darwin: Grigin

- (1) Continued base, continued boss:

Music: [Fionted bass].
(2) Continued fever:

Med. : A fever which neither intermits nor remits. [Eever.]
(3) Continued fractions:

Arith. © Alg.: A series of frsctions of which the first has a fraction in the denominatur, which fraction has ngain a fraction in the denominator, and 80 onward-if need be, on to infinity. They are used in solving numerical equations and problems on indeterminate auslysis. ${ }^{2} \frac{1}{4}$ is a continued fraction.
(4) Continued proportion.

Arith. \& Alg. : Proportion in which the consequent of the first ratio becomes the antecedent of the second, the consequent of the second the antecedent of the third, and so 0u; as, $3: 6:: 6: 12:: 12: 24$, \&c.
cón-tin'-ned-1y̆, adv. [Eng. continued; -ly.] Without cessation or iuterruption; uninterruptelly, continuously.

" côn-tin'-u-el-y. * con-tin-n-el-liche,
adv. [Conincaliy.]
còn-tĭn'-pe-ẽr, s. [Eng. continu(e); er.]

+2. One who continuer, perseveres, or persiats in any set or conduct.
". . . indulgent conthnuers in otn."-Hammond, i a

* 3. One which has the quality of durability or permanence.
"I wonld my horse had the speed of your tongue,
* 4. One who causes continuance, durability, or permanence.

otn-tin'-u-ingg, pr. par., o., \& \&. [Continue, v.]
A. As pr. par.: In senses corresponding to
hose of tha verb.
B. As adjective:

1. Remaiuing in tha same atate.

* 2. Permanent, lasting, durable, abiding.
"For hero have we no continuing eity, but we seek
one to pome."-Heb, xili. 14.
* 3. Unceasing, continual.
C. As substantive:
J. The act of producing, sxtending, or protracting.

2. The act or state of remaining io the same place or condition.

* cotn-tin'-n-Y̌ng-Iy, * con-tyn-u-yng-Iy, adn. [Eng. continuing; -iy.] Uninterruptedly; without cessation or interruption.
cơn-tin- $\overrightarrow{\mathbf{u}}^{\prime}-\mathbf{1}-\mathbf{t} \mathbf{y}$, s. [Fr. continuitt; Prov continuitat; Sp. continuidod; Ital. continuita, all from Lat. continuitas $=$ a connected series, continuation.] [Continvous.]

1. Ord. Lang.: Uninterrupted comuexion union, without a break or interval.
2. Technically:
(1) Med.: Uninterrupted cohesion of the texture of any organ or part of the body.
"The solld parts may be contrncted Ly disoolvius thwir continuty ;
itself. $=A r b u t h n o t$.
"Continuzty of texture disposes, as is well kuown

(2) Geol. (Chiefly of time): In the aant sense as 1. The doctrine that there never has been a nuiverssl deatruction of animal or vegetable life in bygone geologic times, and that the gaps which now occur between strata are only local, and if they appear universal, are protnced not by such catastronnes as the Ider geologists imagined to account for then, but by deficiencies in our knowledge. Two great hresks were once supposed to exist-one between the Permian and the Triassic, which separated the palaozoic from the mesozoic or secondary rocks, and the other between the Clask and the Eocene, separating the mesozoic and the cainozoic or tertiary. Both still exist, but intermedinte Irocks, called the Lignitic but intermedinte rrocks, called the Lignitic
serics, $4,000 \mathrm{ft}$. thick, have been found in serics, $4,000 \mathrm{ft}$. thick, have been found in
America, partisly filling the latter gal, it America, bartislly filling the later gal, it is believed that were an the existent strata, known, and all whidh havs been destroye by denudation replaced, the first and all other gals wouk dis'rpear. The doctrine of geological contimity is essential to Darwinism, but it can be and is held also ly the advocates of successive scparate creations. (Nicholson, ©.)
geoiogical continutity."-Nicholson: Pratoont. (2nd evi.).

## - Solution of continuity :

## Med.: (See extract).

"That texture or cohesion of tha parts of an namimas body, upon the ciestruction of which
be abolution of contiasity." - Qinity.

4. Botany:
(1) Of inforescence, the pinnoe of leaves, te.: Uninterrupted, symmetric or normal In form through its whole length. The inflorescence of moat pisnts is continuous, so are the pinne of most pinnate lesves. The opposite of coninnuens is interrupted (q.v.).
(2) Of stems: Not jointed. It is oppoaed to rticulated. (Treas. of Bot.)
5. Philol.: (See extract).

The most natural primary division of the conso nants is luto those which require a total atoppage of the oreath at the moment previous to their being pro nounced, and which, therefore cannot be prolonged; and those in pronounctug which the the wourruption poriged adtibitum The former have recelved the de ignastion of exploulve, and the latter of continuu
continuous bearings, s. pl.
Railway Engin.: Sleepers laid longitudinally under the metals of a railway, instead of across the way.

## continnous break, $s$.

Reilway Engin. : A kind of bresk which when set in action affects the wheels of the whole trsin, snd not only of the carriage in which it is worked.

## continnons-current, a.

Elect.: Same as Diaect Curaent.
continnons impost, s.
Arch.: The monllings of an arch continued along the piliar that supports it, and down to the ground, without sny member to mark the lmpost point-that is, the point at which the arch and pillar meet.
continnous rall, s. A rail made in ections with a loagitudinsl vertical joint and the aections laid together, breaking joint.
cón-tinn'-n-oŭs-Ĭ̌, adv. [Eng. continuous; -ly.] In a continuous manner; witheut break or interruption.
† cón-tĭn'-u-oŭs-něss, s. [Eng. continuous; ness.] The quality or state of being continu ous; continuity.
con-tir-mont, adv. [Fr. centremont.] Against the hill ; upwards ; the contrary way.
obnt'line, 8. [Perhsps Eng. cant; line.]

1. Nautical: The space between the bilges of casks which are stowed alongside of each other.
2. Rope-making: The spsce between the strands on the outside of a rope. In worning, this space is filled up with spun yarn or small rope, which brings the rope so treated o a nearly cylindrical shape, either to atrengthen it or to render the surface smooth and fair for serving or parcelling. (Knight.)
cotn-tor'- nĭ-āte, cớn-tor-ní- a'- tō, $s$ [Ital. contorniato, pa. par. of contorniare, contornare $=$ to make \& circuit or furrow; con torno $=$ a circuit or furrow.]
Numis.: A name spplied to a medal or medallion of bronze, having a furrow on both sides, aupposed to have been struck in the days of Constantine the Great and his successors, snd to have been used as a ticket for dmission to the public canles of Rome and Constantinople. (Used also at tributively.)
sön-tor'sion, 8. [Contortion.]

- otn-tort, v.t. [Lst. contortus, [1a. par. of concorqueo $=$ to writhe or twist together : con $=$ $\mathrm{cum}=$ with, together, and torqueo $=$ to twist. . To twist, writhe, or curl, to bend
"The vertobral arteries are variousiy contorted."
oŏn-tort'- $\boldsymbol{\infty}$, oŏn-tor'-tī, s. pl. [Fem. \& mase. pl. of Lat. contortu8.] [Conto H , v.]

Bot.: The dames given by Lindans to the twentr-ninth of his natural order of planta; that containing Vinca, Ascleplas, \&c. They were applled on acconnt of the contorted æesti vation of some of these plants.
odn-tort'-ĕd, pa. par. or a. [Contort.]
A. As pa. par. : (Ses the verb).
B. As adjective:
L. Ord. Lang.: Twisted, curled.
II. Technically:

1. Bot. : Applied to a corolla which has the edge of ove petal lying obliquely over the next, or to the portions of a leat or to leavea aimilarly folded.
2. Geol. : Applied to strsta which are curved

CONTORTED STRATA.
or twisted about as if by lataral presaure while io a aoft state.

## cŏn-tor'tī, s. pl. [Contortax.]

oón-tor'tion, * con-tor-sion, s. [Fr. contorsion; Lat. contortio, from contortus, pa. par. of contorquea.] [Contort.]
I. Ordinary Langunge:
J. The act of twisting, bending, or curving. diaruption they would be In danger of, upon a grent and
Creation.
2. A twist, beading, or flexure, a writhing movement
" How can she mequire those hundred gracen nud motions and nirk the contortions of every muscular motion in the tace : -Swelf.
II. Technically:

1. Med.: Partisl dislocation of a limb or member of the body.
2. Bot.: Any unnatural twisting of the branches or other organ
† Cón-tor'-tion-ist, s. [Eng. contortion; -ist.] One whe proctises the twisting or bending of the body in various contortions.

* oón-tor'-tious, a. [Eng. contort; -ions.] Twisted, bent, curved; affected by contortions.
* cón-tor'-tious-nĕss, 8. [Eng. contortious; -ness.] The quality or state of being twisted, beat, or contorted.
* oón-tort'-ǐe, a. [Eug contort; -ive.] Expressive of contortion.
conn-tor-tu'-pli-cate, 日. [Lat. contortu(s)= twisted, and plicatus = folded, ps . par. of plico $=$ to fold.]

Bot. : Applied to a leaf, \&c., turned back on itself.
oŏn-tôur; , 8. [Fr.]
I. Ord. Lang.: The outline or defining line of any tigure or body.
II. Techuically:

1. Fine Arts: A line or lines representing the outline of a figure
"Travelian's colouring and contourt . . ."-Drummond:

## raver. p. ar (tr)

2. Fortif. : The horizontal outline of works of defence. When the conformation of the ground or works is descriled by contours or horizontal sections, these sections are takenat some fixed vertical interval from each other suited to the scale of the drawing or the sulject in hand, and the distances of the surface at each interval above or below some nssumed plate of comparison are given in figures at thic most convenient plares on the plan. (Ogilvie, ©..)
3. Surv.: The ontline of the surface of the ground with regard to its undulations.

- (1) Natural contour: The form of the gromd surface with respect to its undula ions.
(2) Line of contour: A horizontal plane intersecting a portion of ground.

## contour 1ines, s. pl

Civil Engineering: Lines on a map or plas of a aurvey of a district joining the asveral levela together

## * con-tourb, v.t. [Contura.]

## cơn-tôar-nê', a. [Fr.]

Her. : Applied to a beast represented standiog, paasant, courant, \&c., with its fice to the sinister side of the escutelieon.
con-tônr'-nï-ä-tě̆d, a. [Contorniate.]
Numis. : Applied to medals, \&c., having the edges appearing as though they had beed turned in a lathe.
corn-tra, prep. [Lat.] A Latin prepoaition meaning against or opposite, used largely in composition in English, to denote opposition, resistance, or contrariety. In compound word in music it signiffes an octave below, e.g. Contra-gamba, a 10 ft . camba; contra-basso, double basa; contra-fagotto, a double bassoon \&c. (Stainer \& Barrett.)
contra-danoe, $\quad$ [ Fr . contredanse ; Sp contradanza.] A kind of dance in which the pirtners ara ranged face to face or in opposita lines to each other. It is frequently cor rupted, both in apeech and writing, into country-dance.
contra-rotation, 8. [Lat. contre, and Eng. Totation (q.v.).] Circular motion in a direction contrary to some other circular motion.
oón'-tra-bănd, a. \& s. [Ital. contrabbando $=$ contrary to proclamintion; Fr. contrebande.] [Ban.]
A. As adj.: Prohibited, unlswful, illegal exeluded or forbidetu by jroclamation or law beaity, many talse helps. and contraband wares of
If Contraband goods, Contraband of war: (See extract).
When two natlons are engaged in war. if there be or subsistence of either of them, nud without which it would be diffcult for it to carry on the contest, the othor may legitimately exert every means in ita fower to provent its opponent being eupplited with neh national haw nduit thw triters of nuthority onit inter that a nation which should turnish' articlea contraband of war-that las, with supplien on warlike ehores or nay articie required for the trose
cution war-would forfeit her ueutral clarncter and that the other bedilizerent would lee warruited in preventing surch succuurs from heing sent ant eonhin
catiug thein as law ful prize."-HoCuloch; Commercial Dictionary.

* B. As substantive :

1. Illegal or prohibited traffic.
2. Contraband gools, articles forbidden to be imported or exported.

* cơn'-trạ-bănd, v.t. [Contraband, a.]

1. To declare contraband; to prolilit, to forbid.

2. To deal in contraband nuticles ; to anuggle, to import or export illegaily.

* cơn'-tra-bănd-ĕd, a. [Eng. contraband; ed.] Silliggled.
"Christinu shippes. are there aiko mearched for concealed sinves Aud goods contrabanded."-Sandys:
Travels, p 87 . (Davie.) Travels, p. 87. (Dasies.)
* Oơn'-tra-bănd-Ǐsm, 8. [Eng. contraband; -ism.] Traffic in contraband or prolitited goods; smuggling.
cơn'-tra-bănd-ist, s. [Eng. contraband; -ist.] One who deals in contraband goods : a snugggler.
oŏn-tra-băss'-Ist, 8. [Eng, contrabass(o); -ist.] A double-bass player. (Stainer \& Bar. rett.)
corn-trạ-băs'-sō, 8. [Ital.] Music: The same as Dourle-bass (q.v.)
* cŏn-tra-cŏn'-scient (scient as shent) a. [Lat. contra, tund Eng. conscient (I.v.).] Repugnsnt to conscience.
"The most reprobate wretch doth conumit mome (Daveracon
cón-tract, v.t. \& i. [Lat. contractus, ps. par. of contraho $=$ to draw together, to contract con $=\mathrm{cum}=$ with, together, and traho $=$ to draw.]

5. Incurred, as a deltt.
6. Mean, narrow, selfish; as, man of a contructed mind.
II. Grom. : Shortenel by the omission of ons or more letters or syltahles.
If Crabb thas diseriminates between con. tracted, confined, and narrow: "Controction arises from the imherent state of the object ; confined is produced by some external agent a limb is contractel from disease; it is comfued by a chain: we speak morally of the contructer apan of a man's life, and the confned view which le takes of a sulbject. Contracted and confined respect the operations of things; zarrow their qualities or acidents: whatever is cont enctal as confinet is mome or less narros: but many things are nerrow which have never been contructeil or confined; what is necrrow is theyefore more positively so than either contheyefore more positively so than either con-
tracted or confined; a contructed mind has but tracted or cominefl a contrutted mind has but
few objects on which it achls to the excluxion few objects on whinch it dwells to the excluxime
of others; a confinell education is confined to of others; a confinel. education is confined to
few points of knowleuge or information; a narrow sonl is hemment in by a single seltish passion." (Crabb: Eng. Synion.)

## contracted vein, $\varepsilon$.

Mydrani.: A term ilenoling the diminution which takes place in the diameter of a stream of water issuing from $n$ vessel at a short distance from the discharging aperture, owing to the particles nearest the peviphery expericucing greater attrition than the rest, and being thas retarded. (Ogilvie.)
cotn-trăct'-ĕd-ly, aulv. [Eng. contractelt -ly.] lu a contranted mamer; as thongh contracted; not fully.
cón-trăct'-ěd-nĕss, s. [Eog. contracted; -ness.]
I. Lit.: The quality or stste of lucing contracted ; contraction.
II. Figuratively:

1. Meanness, marrowness, gelfishness.
2. Brevity, shortuess, concisenesa.

t conn-truxct-x-bII-1-ty, a. [Eng. contrweti-ble;-ity.] The qnality of heing contractible ; possibility or capability of being contracted.

+ cón-trăct'-1-bIe, a. [Eng. contracl; able. Capalile of being contracted; admittits of contraction.
- Bmall air linders dilatable and contractible
† ©tn-tract'-1 - ble-něss, s. [Eng oon tractible; -ness.] The quality of helitg contractible; contractiblitity, contractillty.
côn-trăct'-īle, $\alpha$. [Fr. contractile; $\$ \mathrm{p}$. contraciil.] Having the power of contracting or shortening itself.

## contractile force, s.

Physics: A force ly which a body, from heat or other canse, recedes iuto smaller dimension from those which it previonsly occupied. The property is taken advantage of when, before the tire of a wheel is put on the circum ference of a wheel, it is made red hot, that, when cooled, it may grses the wheel with excceding force. Irou bars screwed when hot into walls which have bulged will in cooling force them back into their place.

## contractile tissue, a

Anat.: Any tissue of whith the property is, in certain circumatances, to contract, muscular tissue. [Contractility.]
"O." those clepreseing causes which umally put a man: Physiol. 1 tuat., vol. 1. , ch. It., p. 6 .

## contractile vesioles or vacuoles,

 J. $p l$.Zool. - Gertain clear spaces in the Protozoa which alternately contract and dilate. They are thus marked off from the permenent and food vacuoles.
cón-trăct-ill'-i-ty, s. [Eng. contractil(e) ; -ity; Fr. contractilite.] Capability of contracting. A muscle when etimulated shortene itself, nud herefore it in said to ponsess the property of conch. i., 1.
d Vital contractility:
Anat.: The property which a muscle has during life to contract or shorten itself under the operation of the will, or by mechanical, electrle, or other stinnulus. It continues for a sloort time sfter death. It is sometimea called irritability, but in this case that word is used lu a linited sense.
cón-trăct'-ing, pr, par., a, \& e. [CONtract, v.]
A. As pr.par.: (See the verb).
B. As adjective:

1. Shortening, diminishing; causing contraction.
2. Entering idto a contract; stipulsting, agreeing.
C. As substantive :
3. The act of shortening or diminishing; contraction.
4. The act of tocurring or drawing unon oneself.
5. The act of entering into a contract.
cốn-trăo'-tion, s. [Fr. contraction; Prov. contraccio; sp. contracion; Port. contraccio; 1 tal. contrazione, all from Lat. contractio.] [Conthact, v.]
A. Ordinary Language:
I. Literally:
6. The act of contracting, shortening, or nartowing into smatler dimellsions. (Used of things material or immaterial.)
7. The state of being so contracted.
8. That which is contracted; an abhrevistion.

 ${ }_{1049}{ }^{\text {you }}$
 contradictorious; $-7 y$. In s contradictory manner; contradletorily.
 dictor; - $y .1$
A. As adjective:
I. Ordinary Language :

1. Opposed, inconsistent, or contradicting.
"The Jews hold, that in case two mhates should happell to colitrulictoue anuther, they were yet lound to leelieve the contradictory usertions of both."-
south : sermons.

* 2. Inclined or given to contradiction.
II. Logic: lavolving contrsdiction, applied to two propositions, differiug trom each other

In quantity and quality, both of which eannoth and one of which must be, true. [T]

I Contradictory propositions:
Logic: Propositions of which one is universal, and the other, which is not wo, denies not sal, and the other, which is not 80 , denies not
ths whole of the assertion mads by the first, ths whole of the sssertion msids by the frist,
hut only s portion of it. 1 it thus brigty hut only s portion of it. 1t ia thus brieny
stated: Soms A's sre not B's. If the first proposition ssserts that snow falls in every country in winter, a contradictory proposition denies only the universality of the statement, but sdmits it to be trus in a more limited degres. In other words, it admits that snow falis in winter in many cases, but denies that it does so In all. Cantradictory differ from Contrary propositione. [Contrary fropositions.]
B. As subst. : A proposition which is in the fullest dsgres contradictory to another.
"'. ' ${ }^{\text {nd }}$ to make the mame thing to be determined to one, and to be not determined to one which
radictories "-Bramhall: Answer to Hobbes.
cŏn-tra-dǐs-tinct', a. [Lat. contra, sud Eng. distinct (q.v.).] Distinguished by opposite qualities.

cơn-tra-dis-tino'tion, s. [Lat. contra, and Eng. distinction (q.v.).] The quality of being contradistinct or of opposite qualities.
what is mone may ty conas to the distinct knowledge of wome other puwers. ${ }^{-G \text { Glanvilla }}$ : Scepsis.
cơn-tra-dǐs-ť̌nct'-ive, n. \& s. [Lat. contra, snd Eug. distinctive (q.v.).]
A. As adj. : Characterized by contradistinction or opposite quilities.
"The diversity between the contrudistinctiva pro-
nonns and the encitic. . ."Marrk: Herm., L.

* B. As subst. : A mark of contradistinction.
cŏn-tra-dis-tuัn'-guĭsh, v.t. [Lat. contra, and Eng. distinguish. J To distinguish by s quality not merely differential from, but the opjosite of that possessed by the other.
cŏn-tra-dǐs-tǐn'-guǐshed, pa. par. \& a [Contradistinoutsh, $v$. .]
cŏn-tra-dis-tiǹ'-guish-ing, pr, par, \& a [Contriadistinolish, v.]
* cǒn-tra-räc'-tion, s. [Lat. contro=against, and factio $=$ a making, a doing; factus $=$ made, pa. par. of facio $=$ to make.] $A$ coun. terfeiting. (Blount.)
* con-tra-fait, * con-tra-fit, v.t. [Counterfeit, $v$.
I. To counterfeit, to pretend.

2. To imitate.

* cön-tra-fiss'-ure (fiss as fish), s. [Lat. contra $=$ against; and Eng. fissure, from Lat jisstera.]

Anat.: For def. ses extract.
"Contundons, when great, do nonally produce at where the hlow was inficted, and then it is callod fisure or in the contrasy part, in which caan
obtains the name of conoratenure, "Wisemath
cŏn-tı'a-har-mŏn'-ĭ-cal, n. [Lat. contra, snd Eig. harmonical.] Tlis opposits of harmonical.
If Contra-harmonioal proportion:
Math.: Proportion in which the difference between the first and second terms is to ths difference between the sccond and third as the third is to the first. Thus $a, b$, snd $c$ are in contra-harmonical proportion if $a-b: b-c$ $:: c: 0$. The three numbers 5,15 , and 10 sre in contra-harmonic proportion, tor $5 \sim 15: 15$ in $10:: 10: 5$; i.e., $10: 5:: 10: 5$.

* cơn'-tra-hěnt, a. \& s. [Lst. controhens, pr. par. of contraho $=$ to contraet.] [ConTract.] 1. As adj.: Contracting, covensnting.
II. As subst.: One who contrscts or covenants: s eontracting psity.
* con-trai-man, s. [Countryman.]
* cŏn-tra-in'-dí-cant, s. [Lat. contra, ano Eng. indicant (q.v.).] A symptom which forbids to treat a subject or matter as a digeass in the usual manner.
"Trkroughout it wis full of coneraindicanta." -
* cŏn-tra-ĭn'-dí-ciate, v.t. [Lat. contra, and Eng. indicate (q.v.).] To indieste or point out

[^183]some peculiar method of treatment, contrary to what the general tenor of the malady requires.
-ơn-tra-in'-di-cat-ěd, pa. par. or a. [Contraindicate]

* cŏn-tra-in'-di-cāt-ing, pr. par. \& a. [Contraindicate.]
- cŏn-tra-ín-dí-cā'-tion, s. [Lat. contra, and Eng. indication (q.v.). $\quad$ as indication or symptom which forbida to treat a disease in the naual raanner; a contraindicant.
* cŏn-trälr, * con-trare, prep. [CONTRARE, Contrary.] Contrary to, in opposition. sumevir man within or without the realme."- $P$ ititcoutie: Crom. p. 95.
II In contrare: Against, in opposition to. In our conlrare: Against or in opposition to n .
"We declared our stato to the king our husband, certifying him how miserably be woold be handied, in cass he permitted thlr lords to prevail in our
Crara. In the contrair: To the contrary.
${ }^{\text {in He }}$ He was chanfululie hanged,- notwithetandiag the kingis commandement in the contratr." - Pitacottie
- con-träire', t.t. [Fr. contrarier.] To cross, to thwart.
cơn-tra-jẽr'-va, s. [Contraverva.]
con-tral'tō, a. \& в. [Ital.]
Music:

1. The voice of deepest tone in femalea. it is of a quality allied to the tenor voice in men, and the usual compass is within two octaves. The beat notea of the range are between a or $\Delta$ flat below the treble stave, and treblac or D . [Alto, Countertenor.] (Stainer \& Barreth.)
2. One who sings in a contralto voice.
3. The part written and arranged for a contralto voice.

* cớn'-tra-müre, s. [FT. contremur.] Fort.: An out-wall built about the mainwall of a city or fortification. [COUNTERmure.]
* conn-tra-năt'-u ral, a. [Lat. contra, and Eng. raiural (q.i.).] Against or opposed to nature; unnatural
" ". At be deternaloed and thed up, either by itself,

cŏn-trär'-i-oŭs-iy̆, *00n-tra-ry-ouslye, adv. [Eng, contrarious; -ly.] In a con trary manner; oppositely, contrarily.

To many things, having full reference.
cŏn-trärr-ǐ-oŭs-tyy, * con-tra-ri-oustie, s. [Eng. contrarious; -ty.] Contrariety, opposition.
*ơ̆n-trär'-i-stme (Eng.), * cŏn-trär'sum (sootch), a. [Eng. dc. contrary, and som (q.v.).] Perverse, obatinate.
cơn'-tra-ri-wişe, adv. [Eng. contrary, and wise (q.v.).]

1. In a contrary or opposite manner ; on the contrary.
"Not renderlig ovil Ior evil or railing for ralling :
2. Con versely.
"Every thing thit acts upoo the suids, must, itt the asme time, act apon the solide, and cominariwise."-
cơn'-tra-ry̆, "cón-trär'-y, * con-tra-rie, ${ }^{*}$ con-tra-rye, * oon-trair, ${ }^{*}$ con-trare, * con-treyre, a., ady., \& s. [Fr. contraire; l'rov. oontrari; Sp., Port., \& ital. contrario all from Lat. contrarius = lying over agalnst contra $=$ over against.]
A. As adjective:
I. OTd. Lang. : Lying over against, opposite. 1. In opposition to. Used-
(1) Of things material, as also of things immatericl and abstract:
the wiad was contrary."-Natt. Xiv. 24
(2) Of persons:
(a) At the present moment in oppoaitlon to. "Aod if ye wrik contrary nnto me, aud will out
bearkeo unto me; will hrisg seven times nora

(b) Disposed habitually to oppose; wayward, perverse, froward.
3. Opposite, different, excluding something else.

Whom When the Lady anw so Inire. ." wight
Ali lguurant of ber contrdry zex." spender: $F$. $\mathbf{Q}$.. III. 1. 17 .
II Opposites complete while contraries exclude one another. Thus aweet and sour ara opposites, sweet and bitter are contraries. (Trench: On the Study of Words.)
II. Logic: [Contrary propositions]
B. As adv. : Contrarily, in opporition.
C. As substantive:
I. Ort. Lang.: A thing opposed or opposite to another one.

No contraries hold more sutipathy
Than I and mich a knave.
Than I and wich a knavere.: King Lear, ii. 2
II (1) On the contrary: On the other hand. "He plented still not guility.
The king's attorney on the contrary
of divers witnensel
The contrary. Shakegp.: Henry rhil, it 1. from the ehair, that if ante of $s$ motion it they may have an opportunity of giving visible expressinn to their views.
(3) To the contrary: To ad opposite purpose. "They did It. ant for want of iostruction to the con
II. Logic \& Ord. Lang.: A prolrosition contrary to aome other one.
"The inatances hrought hy our author are but slender proofs of a right to elvil power and dominion in the flrst-born, and do rather shew the contrary."-

- (1) Conenary motion: Melodiea or chords proceeding in opposite directloos. (Stainer Barrett.)
(2) Contrary propositions :

Logic: Propositiona which contradict every smprosabia case of each other. The two yro-
fate, făt, fare, amidst, whãt, fâll, father; wē, wĕt, hëre, camẹl, hẽr, thêre; pine, pít, sïre, sīr, maxine; gō, pठt,

poufitions, "every $A$ is $B, "$ and "no $A$ is $B$," are contrary propositions. If it be esserted by one thist every star is ehining, and this be met by the connter-assertion thist no star is vhining, the two statementa are contrary proyositions.
(3) Contrary terms :

Logic: Terms more opposed to sach other than any of the same class, as black and white, rich and poor.
contrary-minded, a. Of a different mind or opinion.

* cōn'-tra-ry, * con-tra-rten, *on-trarye, vif. [Contraky, a. \& 8.] To set contrarily to, to oppose.
"When 1 came to court, I wan advised not to oom trary the king."-Latimer.
otn-trăst', v.i\& t. [Fr. contraster $=$ to strive, to contend against; Low Lat. contrasto $=$ to to contend against; Low Lat. contrasta $=$ to against, snd sto $=$ to stand.]
A. Intrans.: To exist or to be pleced in opposition to something else so as to show more clearly the difference or unlikeness between the two things; to exhihit the excelleace of one thing compered with snother.
"The Jolnte which divide the sendatone contrast fnely with the dipisiound
hanalt into pillara. $-L y$ out.
* B. Reflex. : To be of such s quality, or to be so placed, that each of two things shall show clearly the difference in quslity, extent, \&c., between it snd the other ; to put in contrast.
"The figures :- must contrase ench other hy thoir
C. Transitive:

1. Lit. : To put in contrast; to pisce so that the differences or dissimilitudes of two things msy be clearly shown.
Daity Te contrazaphing the present with the peast, . . ."-
2. Fig.: Mentslly to compare the different qnalities or extents of two things.
ơn'-trăst, * con-tras-to, s. [FT. contraste ; Ital. contrasta.]
L. Ordinary Language:
3. The set of plscing two things in such a position as to show clearly snd msrkedly the differences or dissinilitudes between them;
to exhibit differences of quality or extent by juxtaposition.

But atoop, and pinca the prospect of the soul
In sober contract with renilty:
2 The state of beit physically of being 80 opposed or plsced, physically or mentally, as to exhibit clearly and vividly differences of quality or extent; opposition, variety, or contrariety in quality.

How the poor hrates condition, forced to ran It to conres of sufferiog in the puhlic rond,
Bad contrixt f nil too forten mote his heart
With unavalling pilty
3. Opposition.
" He married Matildx. . hat not withoot eontrant

B. Ay subst. - One who in conjurction with others contributes to any design or end; one who gives a share to any common acheme or plsn.
every one of them to be contributories accord ing to their goodsand lands. ..."-strypa: Memorkuls

* cón-trist', v. $L$ [Lat. contristo.] [See aext word.] To sadden, to make sorrowful.
shandy itelect and contrist myself"-Sterne: Tristram shandy, il. tos.
* côn-trìs'-tāte, v.t. \& i. [Lat. contristatus, pa. par. of contristo $=$ to rake sad : $c o n=c u m=$ with, together, fully, sad tristis = sad, sorrow forl.]
I. Trans.: To sadden, to make sorrowful or melancholy.
"Let me nover more contristate thy Holy Spirit."-
II. Intrans.: To cause norrow or saduess. B. . . Nomowht they do contristate, but verg little."
* cön-tris-tā'tion, s. [Lat. confristatio, from contristatus.]

1. The art of making sad or sorrowful ; saddening.
2. The state or condition of being asd or sorrowfu! ; sadness, melancholy, grief.
". Whtch they may do by a kind of sadnets and
contristatiun of the spirits. . - Bucon: Nat. Mist.
cơn'-trite, *oon-tryt, a. \& y. [Lat. contritus = perfectly bruised, pa. par. of contero con $=$ cum $=$ with, thoronghls, and tero $=$ to rub, to bruise; Fr. contrit; 1tal., Sp., \& Port. contrito.]
A. As adjective:

* 1. Lit. : Thoroughly bruised or worn.

2. Fig. : Deeply sorry for sin; thoroughly penitent. [Contampion.]
… . blem that is poor and of a contrite spirit,
B. As subst.: One who is thorongldy penitent, feeling a deep sorrow for his sin, snd an tent, feeling a doep sorraw
"Buch oont ricesintend and desire shoolntion, though they have it not
cŏn'-trite-1y, adv. [Eng. contrite; -ly.] In a contrite manner or spirit; with contrition or peniteace.

+ cơn'-trite-nĕss, s. [Eng. contrite; -ness.] The quality or state of being contrite ; contrition, peniteace.
cón-tri'-tion, * con-tri-clon, * con-tricioun, * con-try-cyon, *con-tryssyoun, ${ }^{8 .}$ [Fr. contrition; Sp. contricion; contritus, pa. par. of contero $=$ to rub or bruise contritus, phe. par. of conter
thoronghy.]
[Contrime.]
* 1. Lit.: The act of rubbing or bruising thoroughly.
Broiene:: redncible into powder hy contrition."-

2. Fig.: Deep and hesrtfelt gorrow for sio, with an earnest desire to please God; repentsuce, penitence.

oón-tri'-tion-al, a. [Eng. contrition; -al.] Of the nature of, or proceeding from contrition.

* cón-trǐt'- $\mathbf{n}-\mathbf{r a}$ te, v.t. $\quad$ [Pref. $\quad$ con $=$ cum $=$ with, snd Eng. Iriturate (q.v.)] To reduce to small partieles by friction, to pulverize.
$\dagger$ cón-trïr-a-ble, a. [Eng. contriv(e); -able.] Possible to be contrived, designed, planned, or invented.
otn-triv'-ango, \%. [Eng contriv(0);

1. The act of contrifiog, desiguing, or plen ning anything for a particular purpose

2. A disposition of parts, an arrangement plan, or design.

Contrianance intrinate expreverd with encea,
Where unusisted sight
3. A device, plan, or echeme contrived for an end; an apparatus.
Inbour mad apart from this they have a motive to
 4. An artifice, plot, or acheme.
"There might be a feiot, a contrivanco to the mat

- For the difference between contrivance and device, see Device.
cón-trive' (1), * con-treve, con-trueve, * con-trove, v.t. \& ic [O. Fr. controver $=$ to find ont, trover $=$ to find; Fr. trouver; 1tal. trovare, from Lat. turbo $=$ to move, to seek for.]
A. Transitive:

1. To design or plan in tha mind; to in vent, to excogitate, to devise.
"Be thant that new syses contronea",
Hampole: Pricke of Conseience, 1,561.
-2. To examine thoroaghly.

B. Intransitive:
2. To devise means for an end, to manage to succeed in a design.
". . . persons who, nader pretence of promoting the
union, nilgint really be contrining only proing the
interregnom." Ald
*2. To plot, to echeme, to form lesigns.
To hait moy with thewe contrived

ICrabb thus discriminates between to contrive, to devise, and to inrent: "To contrive and devise do not express so much as to intent : we contrive and derise in small mattere; we invent in those of greater moment. Contriving and devising respect the manser of doing things : inventing comprehends the sction and the thing itself; the former are but the new fashioving of things that alresdy cxist; the latter is, as it were, the creation of something new : to contrive and devise are intentional actions, the result of a specific effort; invention natorally arises from the exertion of an inherent power; we require thought and combinntioa to contrive or devise; ingenuity is the faculty which is exerted in inventing. Confaculty which is axerted in inventing. Conthoughta than derising: wa contrive on familiar thoughta than derising: we contrive on familisr
snd common occasions; we devise in seasons snd common occasions; we devise in seasons
of difficulty and trial. A contrivance is simple and obvious to a plain understanding ; a device is complex snd far-fetched; it requires s ready conception and a degree of art."

* cön-triv'e (2), v.t. [Apparently from Lat. contrici, pret. of contero $=$ to pass, to spend.] To wear sway, to pass, to spend, to employ (as time) (N.E.D.)
"Coyllus conerived (eontriviti all bls youthe in tha servico of their

"Then formed to be instrumentan not controls."-
Burke: French Aepol., p . sh .
If (1) Board of Control: A board consisting of six members, estahlished hy Mr. Pitt, in 1784, for the control and legislation of 1ndia. It was abolished in 1858 on the transference of the government of Indin to the Crown.
The monopoly of Eastern trade granted to the nld East India Company was designed simply for commercisl purposes: the Government, in granting it a chsrter, had no conceniment, inat they wors calling into existence what was nitimately to become ons of the What was nitimately to become ons of Nor greatest military smpires of the world. Nor
was the Company itself awars of this: its inwas ths Comprany itself awars of this : its indenots of gonds nuder the jurisdiction of betive despots, who were accustomsd, under mome flimey pretext, to help themselves to whstever in their dominions they covetedoubordiuate despots following the evil example of their superiors-the agents of the Company, If they were not to be plunderer wholesale, required to take some steps for their own defence. Beginning in a hambla way and with relnctance to interfere for thei interest in mative politics, they soon found ntiensel ye in possession, first of detached territories sud ultimately of empire. When this uncxpectell state of things happened, it this uncxpected sta of then in Home Government to keep a certain control over thioir proceedings, especially as the necessity for some of the numerous wars in which "the Company's forces "were engsged was not obvious in England. Hence the establishment of the Board of Control, which, gradnslly increasing its power at the expenss of the Company, was often the real author of sets for which the Company were hlamed. Thus the first Afghan war was forced upon the Company by the Board of Control with the snnction of the Cabinet, the Company yirotesting in vain against what was done. When the war was unsuccessful, and was held in other ways to have sullied the fair fanne of Britaiu, the Company were theu popularly Britaint, the company originated the hnstilities comheld to have orlinated the Thastuntinics and meuced ggainst their will. The mutinics and war of 185 sund istion and annihilated its power, the double government was abolished, the functions of the Board of Contrel were altercd, and the Secretary of State for India, with the whols Cabinet, became the sulrcme goverunent of India.

* (2) Control Department of the British Army:

Mil.: Formerly a departınent of the British ariny which is now sulb-divided into the Cotnmissaint and Trsusport departments. The name was abolished by order on December 11. 1875.
cốn-trōl', con-troule, cotn-trō11', v.t.
*i. [Controls s.]
A. Transitive:

". .- sha recover'd her spirits to rentonable convan
cðn-vę-1̌̌s'-qent, a. \& s. [Fr. convalescent; Sp. convaleciente; Port. convalecente; 1tsl. convalescente, sll from Lat. convalescens, pr. par. of convalesco $=$ to regain health, to grow strong, to get better.]

## A. As adjective:

1. Of persons: Gsining 'health, becoming better, gradually advsncing towards hesith.
2. Of thinga:
(1) Assoclated with a state of returning hesith; possessed by a pereoo in procesa of being restored to health
gandauce lata in oonvalesoent charms
Freeh ma May-blowa rose.
(2) Designed for the ben covering from disease. [T (1).]
B. As subst: A person in process of recovering from aickoess.

II (1) Convalescent Home or Hospitul: A home or hospital for the reception of patients recovering from disesse.
(2) Convolescent vard: A ward devoted to patients recovering from disesse.
ŏn-va-1ĕs'-gent-1̆̆, adv. [Eng. convales. cent; -ly.] In a coovalescent stata, with returning heslth s nd vigour.
cơn-vg-lĕs'-çing, pr. par. \&t a. [ConvaLesce.]
oơn-vă1-1a-mär'-ĕt-In, s. [Mod. Lat. convalu(aria) (q.v.); Lst. amar (us) = bitter, snd Gr. p̀qrion (rhêtiné) $=$ resio.]
Chem.: $\mathrm{C}_{2 n} \mathrm{H}_{36} \mathrm{O}_{8}$. A substance formed by the sction of acids sud slkslies on convallamsrin. It forms crystallins spsagles, which melt into s resinous mass.
cơn-văl-1a-mär'-in, s. [Mod. Lat convallaria (q.v.), sud Lat. amarus = bitter.]

Chem.: $\mathrm{C}_{23} \mathrm{H}_{44} \mathrm{O}_{12}$. A bitter subatance contained slong with convallarin in Convallaria majalis. it is obtained by diluting and fil tering the mother liquid from which the con vsllariu has separsted, then digesting with animsl chsrcosl, precipitating with tannic acid, sad sepsrating the tannic acid witb oxide of lead. Convsllsmarin is a white bitter powder, easily soluble in water sad in alcohol, nesrly insolnble in ether. By heating the aqueons solution with dilute sulphuric scid tha convallsmarin is resolved into sugar, wster, snd convallsmsretin. Nitric scid colours convsllsmarin yeliow; strong sulphuric acid colours it violet.

Oon-val-lär'-ět-in, s. [Mod. Lat. conval.

Chem. : $\mathrm{C}_{14} \mathrm{H}_{26} \mathrm{O}_{3}$. A yellowish-white crys talline substance, produced slong with sugar, by boiling convallsrid with dilute sulphuric acid.
cơn-val-1är'-i-a, a. [Mod. Lat. from Class. Lat. convallis =a deep vslley, a vallay en closed on sll sides, in sllusion to the plsce where the typical "Convsllaria" growa.] Botany:
Lily of the Valley: A geoua of plsnts, order Liliacea, tribe Asparagex. The only British
specles is Convallaria majalls, the sweetscented Lily of the Vsiley. It has two ovsto lanceolate radical leaves, a eemi-cylladrical scape with racemes of very pure white fragrant flowers, with the divisions of the perisnth recurved at the tips. The berriea, which are globose, are red. It is found in woods and coppicea, especially in a light ooil, with some frequency in England, but io rarely indigenous st all in scotiand. [Conval.] There is a red-flowered and a double variety in gardens.
conn-val'-lär-inn, s. [Mod. Lat. convallar(ia); Eng. auff, -in.]
Chem. : $\mathrm{C}_{34} \mathrm{H}_{69} \mathrm{O}_{17}$. Obtained by collecting the pisnt Convallaria mojalis during flowering time, snd drying snd pulverising it; it ls thein exhausted with sicolol, sp.gr. 0.84, the tincture precipitated by subacetate of lead, the lead removed from the filtrate by $\mathrm{H}_{2} \mathrm{~S}$ gas, convsllsrla separating out on evsporation. It crystallisee in colourlees crystala, which are iosoluble in ether, readily soluble in sicohol, and which have sn irritating tasta the solution in wster froths when sgitated.
cŏn-קa-nĕsçé, v.i. [Lat. con $=c u m=$ together, with, and vanesco $=$ to vanish.]

Math. : To disappear by running together, ss the summits of solid sngles (said of the edge of a polyhedron).
cơn-va-nĕs'-gi-ble, a. [Eng. convanesce; -ible.] Thst may, or does convgneace. The convsnescible edge of a polyhedron is the edge that diesppeara when the two summits it joins run together.

* con-veane, v. [Convene, v.]
cǒn-vĕct'-ĕd, a. [Lst. convectus.] [Conveotion.] Csrried by convection.
cön-véo'tion, s. [Lat. convectio, from convectus, pa. par. of conzeho $=$ to carry.] [ConVEv.]
I. Ord. Lang.: The sct or proceas of carry lag or convaying from one plsce to naother.
II. Nat. Phil.: The mode by which hest is propsgated through liquids. This is by the portion lieated becoming lighter than the rest, snd ascending to the surface, a colder one descending to take lts place. (Ganot.)
cotn-vec'-tive, a. [Lat. convect(us), and Eag. suff. -ive.] Arising from or caused by convection.
codn-vec'-tive-ly̆, adv. [Eng. convective; -ly.] By means of convection; as heat communicated convectively.
* con-veen, s. [Convene.] A meeting, a convention.

To bld him come to our conveann

* con-vele, v.t. [Convev.]
* con-veine, v.i. [Convene.]
* cơn-vě1', v.t. [Lat. convello = to pull up, to tear.] To confute, to disprove, to set aside, to mullify. (Scotch.)
* cơn-vě1'-lęnt, a. [Lat. convellens, pr. par. of convello $=$ to pull up by the roots.] Tending to tear or pull up.
"*) the ends of the fragment, aro oxed, and will Phymiok. A12at., vol. i, ch. vil., p. ist.

2. Spec.: A small gathering for religious worship. The word was applied to the sehools of Wycliffe. Afterwards it was used of Dissenters from the Establishment in Queen Elizabeth's time, but it did not come into great prominence till the passing of the Uniformity Act in 1662 . Thes Conventicles was employed as a term of contempt for the gatherings of Nonconformists in Englund and of Covenanters in Scotland, who remained in separation from the established Churches of their reapective countriea. [Convsnticle Act.]
to lenve unrepealed the Act whicb made it denth to attend a Fresphtorian conventicle."- Mucau - Converticle Acts :

Law \& Hist.: Various Acts designed to punish those whis conducted or frequented conventicles. By 35 Etiz., c. 1, passed in 1593, sny persons attending such places were to be iniprisoned till they conformed. If they did not conform within three montbs they were to abjure the reaim, and if they would not do this, or if after ahjuration they returned to the country agsain, they were to be hanged. By the Conventicle Act, 16 Chas. 11., c. 4, passed in 1664, it was enacted that whenever five persons more than the inmates of the house where a conventicle was held attended it, every one of them was liable to a penslty of 25 or three months' 1 mprisonment for the first offeace, twice as unch ior the second, and a flne of $£ 100$ or transportation for seven years for the third. The penaltiea were modifled by the 22 Chas. II., c. 1, passed in 1670 , and the Act itself repealed by the Toleration Act. I Act itself repeated by the Toleration Act, ${ }^{1}$ Will. \& Mary, c. $18, \delta 1$, passed May 24, lis9.
Similar enactments were in force in scothand Similar enactments were in force in
st the same period. (Townsend, de.)

4. A formal engagement between two or more powers, parties, ir iudividuals.
5. Gensral agreement; tacit consent.
 6. A rule or collection of rules based on common consent.

## II. Technically:

1. History and Law: The assemblage of Oon ventions has been very common in the history of the Caited States, alike on great and on aroall occasiuns. They were frequently called during the disturbancea in public feeling which preceded the Revolutiooary War. Of Later conventiona the most ioportant was that which furmed the Constitation of the United States. Following its example, the Constitutions of the several atates hava been aimilarly formed in several gtates hava been aioiliarly formed in
conventions, and they have been called on conventions, and they have been called on
varioua other occasions, as in the sonthera States in the period preceding the Civil War.

Ia Great Britala there have been Parlismentary Conveations during times of natiogal cricis or revolutioa, assembled without waitiog for the royal writ er sanction. Such a conven tion has assumed powers beyond those of an ordinary Parliament, throwing aside precedent and recunstructing or modifying the politica machinery. Such a convention was that called by General Mook, which restored Charlea II. to the throne; also that which beetowed the throne of England on William of Orange.
2. French Hist. : The teria applied to what was more fully named The National Convention, which succeeded the National Legislative Assembly on September 21, 1792, and was dis solved October 26, 1795. It commenced by alolishing royalty and proclaiming a republic it altered the calendar, was sanguinary in its measures, and was at feud with Europe.
3. DifLomacy, Hist., Ec.: An agreetnent previous to the conclusion of a tresty. Thus France, \&c., about the extradition of fugitives from justice.
4. Mil.: A treaty or engsgement entered into ly the commanders of two armies opposed to each ntber in a campaign, as to the erms on which a truce or temporary cessa tion of hestilities may be made bet ween them.

More: all our conversings with others, ..."-Dr. H. 2. Conversation talk
oón-ver-sion, con-ver-syon, s. [Fr. \& Sj. conversion; Ital. conversione; Lat. conversio $=$ a turning round, from converens, pa. par. of converto.] [Converse, a,]
A. Ordinary Language
L. Literally:

1. The aet of turning or changing from one atate into another; transinutation, change. "Artiecial conversion of water into lice, Bacon.
2. The atate of being turned or changed from one atate into another; eliange of function.
"In robsidering transitioun of organs, it is ao imfrow one function to nuother,
of $S$ pecies $(e d .1859)$, ch. vL. p. ig.
II. Figuratively:
3. The act of changing or turning from nne mode of life, religion, or belief to another. [B. 5.]
4. The atate or condition of being changed or turned from one mode of life or religion to nother.
B. Technically:
5. Law: The act of appropriating to private usa, as in trover and conversion.

Or hring any action of conpertion
And trover for my goods.", Hudibras, iil. a.
2. Shlp-building:
(1) The change of a vessel from one class to anotber by a reduetion in aize, alteration of rig, \&c.
(2) The entting-uaually with the saw-of logs of timber into pieces nearly of the shape required.
3. Logic: The proceas by whlch tha converse of a proposition is obtained.
"Convertion is the chunging or antering of worde in ${ }_{\mathrm{an}}^{\mathrm{A}} \mathrm{p}$
4. Military:
(I) A change of front.
(2) The alteration of a mnzzle-loading gun or rifie to breech-loading.
5. Scrip, \& Theol.: The word conversion oceurs only once in the Bible, but portiona of the verb to convert occur elaven thaes, and the snbstantive convert once. Conversion is the rendering of the Greek word imiorpoфiv (epistrophën) $=$ literally (I) a turning about, (2) a turning towarda. Conversio In Latin, and conversion in Engligh, are the exactly correspondent words in those lauguages. The meaning is that a large number of the Gentiles had "turned abont" so as to leava behind them their belief in the imaginary divinities of their countrymen and direct their facea towarda Christianity, a spiritnal and moral renovation attending their change of beliep. The verb to convert is used of a change wrought The verb toconvert is used of a change wrought upon a ainner's heart when he was turned
from his sins to God without any change io his nominal religions professiona; before and his nominal religions professions; before and after his ehange of heart he remained an
avowed adherent of Judaism (Psalm li. I3) avowed adherent of Jndaism (Psaim hath change of lieart the "law of the Lord" is an instrmment or means (Psaim xix.), or the instrumentality may be hmman (Jamea v. 19, 20). The ehange is attended by repentance and forgiveness (Acta iii. 19). It makes the character ehild-like, and nona bint those who have underyone this change ahall enter the kingdom of heaven (Matt. xviii. 3). There are synonymons words of tha same meaning; as, for inatance, turn in Jer. xxxi 18, where, for the production of the sjinitual change described, tha intervention of the Divine Being is considered to be needful, and ja sought in prayer (Jer. xxxi. 18). This is tha sought in prayer (Jer. xxxi. 18). This is tha continual teaehing of the New Testament
(John vl. 44, xvi. 7 -11; Acts ii. 26). Miny (John vi. 44, xvi. 7 - 11 ; Acts ii. 26). Many
theologians call the Divinely-produced snirittheologians call the Divinely-produced sniritnal change now indicated conversion. The 17 th Article of tha Chureh of England, whila
not using the term, clearly describes the idea embodied unter it in the following words:"Wherefore they which be endued with so exeellent a benent of God be called according to God's purprose by his Spirit working in due season; they throughs Grace obey the calling : they be justified freely: they be mada the Sons of God by adoption: they be made lika the image of his only legotten Son Jesua Christ: they walk religinusly in good works Chind at tengey, by Goul's merey, they attain to and at length, by Gou's merey, they attain to everlasting felicity.
Westminster Confession of Faith is conveyed in less enneise language, but the meaning in in all respects the same. And with these the teaehings of most Protestant confession agree.

I(1) By conversion : [Lat, convertendo].
Math.: A term used when, there being four proporionals, it is inferred that the first is to its excess above the second as the tbird to its excess above the fourth.
(2) Centre of conversion :

Wech. : The point in a body about which it turns as a centre when $n$ force is apllied to any part of it, or nnequal forces to ite different parts. (Ogilvie.)
(3) Conversion of equations:

Alg.: The reducing of a fractional equation into an integral one.

(4) Conversion of proportions:

Math: When it is inferred of four proportionals that the firat is to its excess over the second as the third is to its excess over the lourth : that ie, if $a: b:: c: d$, then by converaion of proportione $a: a-b:: c: c-d$.
(5) Conversion of propositions:

Logic: A ehanging of the eubject into the place of the predicate.
† otn-vêr'-sion-ist, a. [Eng. conversion; -ist.] of or pertaining to converslon; converting.
"The Now Teatament hat, of course, been frequeatly
transiated, chiefly for convervionive purposes." Cademy, Oct. 29, 1881, p. 38 .

A. Transitive:
I. Ordinary Language
3. Literally:
(1) To change physically from one state to another, to transmute, to transform.
"If the whole atmeaphere whe converted fato water,
*(2) To change from one position to nother, to turn, to move.
(3) To change into snother kind of force or power equivslent in smount to the first.
 . 11.
4. Figurativeiy:
(1) To chsnge in cbsracter from ons state to another.
(2) To give in exchsnge for aoms equivalent; as, To convert land into money.
(3) To change in manner, conduct, religion, or mode of life. [11. 5.]

(4) To canse to turn from sny course, direction, or tendency.
"He whlch eonverteth the sioger from the errour of multitide of oins. ${ }^{-1}$ Jameat $\nabla$. 20 .
(5) To turn from one use or destlastion to another.
(6) To divert from the proper or legitimste use ; to sppropriate. [II. 2.]
"He nequitted himself not ilke an boinest man; for ho convert.

* (7) To change or turn from one language Into another; to translate, to render.
"Which story [Bereoice] then presently celebrated more elegantly converted" $-B$. Jonson.
II. T'echnically:

1. Logic: To change one proposition into another, so that what was the subject of the orst becomes the predicate of the gecond.
2. Law: To sppropriate to private use.
3. Ship-building: Toalterinsize, chsracter 3. S.
or rig.
4. Mil.: To alter s muzzle-loading gnn or rifie to breech-loading.
" Some exst-iron amooth-bore guns are still converted

pt. Ii, p. 218. Theol. To produce in an individual the spiritual ehange described under Conversion, B. 6 .

* B. Intransitive:

1. To turn round.
"Ihesu conuertid and . . . netth to hem."- Bryclife
2. To be turned or directed.
"The puhitic hope
Thomson:" winter,
3. To be converted or changed; to suffer or nadergo s clange or transmutation.
(a) Of material things:
"They roh out of it a red dust which convorleth into
corman..., -Sanalys: Travels.

## (b) Of immalerial things :

lhe love of wieked mem convorest to fear.
corn'-vẽrt, s. \& a. [Convert, v.]

## A. As substantive:

I. Ondinary Language:

1. One who is converted or brought over from one opinion or practice to snother.
2. In the same sence ss 11.1 .
II. Technically:
3. Theol. : One who is converted from ons religion to suother, eapecially from any false religion to Chriatisnity.
"The Jesuits did not persuinde the converts to lky
aside the nse of lmages.-Stillingfieet : Defencs of Dis courss on Rom. Idoh

* 2. Eccles. A lsy member of a religious order ; one who hss turned from the world to religion in adult life, as distinguished frotm those brought up from childhood in a reHgions house.
* B. As adj. : Converted to the true religion. AO. circumcising the convert Gentiles, . . ."-
II Crshb thus diacriminstes between convert and proselyte: "Convert is more extensive in its aenae and spplication than proselyte: convert in its full sense includes every chsnge of opinion, without respect to the subject; proselyte in its strict senss refers only to chsuges from ons rellgion to another.
Conversion is $s$ more voluntary act than proselytism; it emanatea entirely from the mind of the agent, independent of foreign inHuence; it extenda not merely to the abstract or speculatlve opinions of the individual, but to the whole current of his feelings snd apring of his sctions: it is the conversion of the heart snd sonl. Proselytism is an outwsrd act, which sud sonl. Proselytism is an outwsrd act, which worda snd sctions to a certain rula: convert Worda snd sctions to 8 certain rule: convert
is therefore always taken in a good sense; it is thereiore always taken in a good sense; it
bears on the face of it the stamp of sincerity : proseiyte is a term of more ambiguous meaning; the proselyte is often the creature and tool of a party; there may be many proselytes where there are no converts." (Crabb: Eng. Synon.)
cあn-vërt'-ěd, a. [Convert, v.]
I. Ordinary Language:

1. Lit.: Changed froms one state to snother, transmuted, transformed.
2. Fig.: Changed io naanera, religion, or opiniona. [11. 2.]

*And did you presently fill undor tho power of this

II Crahb thus distinguishes between onnviothon and persunsion: "What convincex binds; what persuades attracts. We convince by argunlents; it is the understanding which determines: we sre persuoded by entreatiee and personal inflnguce; it ia the imagination or will which denides. One conviction respects colely matters of helief or faith ; nur perstasion respects niatters of bellef or practice: we sTe onvinced that a thing is true or false; we sre pervaded tint it is either right or wrong arlvantageous or the contrary. A person will have half effected of thing who is convinced that it is in his power to effert it; he wili he cosily persuoded to do that which favours hia own interests. Conviction respects our most important duties; persuasion is appiied to mattars of indifference. The first step to true enentance is a thnough contriction of the enormity of sin." (Crabb: Eng. Synon.)
oon'-viot-Ism, s. [Eog. convid; -ism.] The convict systam ; the system of transportation of convicts to pensl settlements.

II. Technioally:
3. Jewish archreol.: A stated featival or eny other day on which the peoplo were divinely summoned together. On those days, as a rule, no servile work was done.

4. Eccles.: An assembly of the clergy. Speciaily the name giveut to either of two such gatherlngs, the one termed the Convocetion of Canterlury, or simply Convoration, the other the Convocation of York. The Convocation in the 16th century haviug recogniaed that the king' majeaty jnstly and rightifully is and ought to be the aupienie eartily head of the Church of Engiand, the king fin that capacity has the prerogative of calling couvocation toretier which is done at the com cationernent of escis moncment of each To e certain extent, the Cnnvocation of Calter bury is itself framed on the Psiliamentary model. It has two Houses, the Upier ode (representing the Lords), conaisting solely of biahops presided over by tha Archbishop; the Lower one, the deans, the archdeacons and proctors (the last-named officers being designed to represent the inferior clergy and to present an analngy to the Honse of Commons). The Convocation of York lese closily resembies Parlisment, for it has only a aingle house. In medirval times, Convoca tion was a much grester power than how. When the ciergy of ali degrees managed to exempt themselves from the general taxation of the country ievied in the ordinary way Convocatiou was required to assess the clerical body for the expenses of the civii govermnent body for the expenses of the civigovermnent, aily its oniy function. Others, however, have been assigned to it, especinlly the enactment of canon iaw, and the examination and cen aure of heretical booka or individuais. By 25 Henry Vill., c. 10 , Convocation was pro hibited from making any canon or ordinance which was opposed to the king's prerogatlve or to the laws, eustoms, and siatutes of the realm. By 16 \& 17 Charles IL., c. 1, Jassed in 1665, the ciergy as weli as tha laity wer required to pay their quota of taxes tugether and the former were discharged from all ohigntion regarding the subsidies levied by Colno cation. In 1716 , the remuining pivitegea were taken away and for a long tituc afterwnd taken away, and for a long tinluc arterwird it remaine almo animation, being no gooner called togetiter 8 the commencement of cach session of Parlia ment then it was prorogued before it conid do any busincse. In 1854, an effort began to evive Convoention and give it real power of dealing with ecclesisstienl matters, but both partles in Pariament are offosed to surch revointimu. However, in Felruary, 18i2, they allowed the clergy to delibernte on alterations in the liturgy, and embodied them in an Act on 5tli of March of tite same year.
5. Tin-mining: The name as Convocators (q.v.)
cơn-vあ-cā-tion-al, a. [Eng. convocation; -al.] Pertaining to a convocation in gencral, or ju particular to the ecelesiastical aynod 80 designated. [Convocation, Ii. 2.]

cŏn-F̌lv-ạ-lā'-çĕ-m, s. pl. [Lat. convolvuus (q.v.), and fen. pl. adj. suff. -acece.]
Bot.: An order of perigynous exogena, placed by Lindley in his alliance Solimales. The species are generally twining and milky plants, though some are erect bushea. The leaves are often undivided. There are no atipules. Inforescence sxillary or terminal. the partial peduncles, when any exist, generally in the form of two liracta. Corolla, monopetalous, deeiduous; the limb five-lolved plaited; stamens five ; ovary simple, with plaited; stamens five; ovary simple, wilh few, erect; atyle nne, generally divided at the top into as many gegments as the cells of the vary ; capsula one to four celled, succulent or capisular. Very common in all parts of the tropica, rarer in cold countriea. The roots abonud in a milky juiee, whieh is atrongly purgative. It is the active 1 rinciple in Jalap (Convolvulus Jalaza), Scammony (C Scammonia, de. [Convoluleus, Jalap Scanmony.] Batatus edulis is the Sweet Potato. [Batatas.] Thers are two triles or aentiona of the order: Convolvulem, with the carpols consolidated, and Dichondrese, with then distinct. There are forty-six geners known and nearly 700 arecies. Two British genera, Convolvulus and Calyategia (q.v.); apeetes three.
eŏn-vŏlv-n-1à'-cĕ-oŭs, a. [Mod. Lat. con volvulace(se) (q.v.), and Eng. suff. -ous.]

Bot.: Pertaining to the order Convolvulacerp, and eapecially to its typieal genua Con-
oon-volv'-r-lío, a. [Lat. convolvulus) (q.v.), and Eng. aúff. -ic.]

## oonvolvulio mold, 8.

Chem.: $\mathrm{C}_{31} \mathrm{H}_{54} \mathrm{O}_{18}$. An organic acld obtained by boiling convolvulin with baryta water, then precipitating tha excess of baryta with dilute sulphuric acid, remnving the excesa of sulphiric acid by lead carionate, and finally removing the lead by $\mathrm{H}_{2} \mathrm{~S}$ gas. Convnlvulite acid ia a whits amorphous bitter powder, readily solubie in water and in alcohol, insoluble io ether. Its aquenus solution is acid, and it forms salts called convolvulates. By bolling with dilute aulphuric acid, It yields augar and convolvulinol. It is also called rhodeoretic acid.
conEng. suff. in (Chem.) (q.v.).]
Chem. : $\mathrm{C}_{31} \mathrm{H}_{50} \mathrm{O}_{16}$. Alsn called rhodeoretin. A colourless trausparent resin contained in the rhizome of the officinal jalap root. Convolvulin is prepared by exhausting the root of Convolvnelus orizabensis with boiling water, then drying and pilyerising it, and treating It with twice its weight of ninety per cent. alcohol, mixing the alcoholic extrset with water till it begina to ahow turtidity; then treating the liquid twice with aninnal charcoal, distilling the alcohol from the filtrate, repeatedly treating the reaidual pulverised reain (amounting to between ten and hifteen per cent. of the root) with ether; diasolving the residue in the amallest possible quantity of absolute alcohol, and precipitating with ether till the precipitate is quite free from resin soluble in ather. The residue is pure convolvalin. Cnnvolvulin ia tasteless and inodoroua, nearly volvaluin ia tasteless and water. When dry it melta at $150^{\circ}$, forming a yellow trsnsparent liquid; it burna with a smoky flame. Finely divided convolvulin dissolves in squeous alkalies, and is converted into convolvulic aeid. When disanived in alcohol it ia decomposed by hydroehloric acid, yielding convolvilinol and glucose. It dissolves in atrong sulphurie a cid, forming a earmine colour, which afterwards turns brown and deposits a dark brown aubstance. Convolvulin is the active principle of jalap-resin. It exerts a very strong purgaof jalap-resin. It exerts a very strong purga-
tive action even in doses of a few grains. (Wats: Dict. Chem., vol. i., p. 15.)
Oŏn-षŏlv'-n-IIn-d1,s. [Eng. convolvulin, and at. oleum).
Chem.: Convolvulinolie aeid, rhoderettuol $\left(\mathrm{C}_{13} \mathrm{H}_{24} \mathrm{O}_{3}\right)_{2}+\mathrm{H}_{2} \mathrm{O}$. Ohtained by the aetion of dilute acids or of entulsin on convol. vulic ieid. It forms white inodorous needle crystals, which have a biting bitter taste, slightly soluble $\ln$ water, readily aoluble in aleohol ; it melts at $39^{\circ}$. It volatilisea when heated on platinum foil; the vapours cause coughing. It is oxidised by concentrated nitric acid into oxalio aod ipomæic acids. Strong aulphuric acid colours it flrst vellow, theng amaranth-red. It dissolves in alkalies, then amaranth-red. It dissolves in alkalies, and parts with water, becoming $\mathrm{C}_{13} \mathrm{H}_{24} \mathrm{O}_{3}$,
which is considered to be the true acid; it melts at $42^{\circ}$. It forma salts, called convolvulinolates.
 vel(us), suff. in (? Chem.), in combinstion with Eng. oleic, from Lat. oleum = dil (?).]
Chem.: A term used only in the aubjoined compound.

## convolvalinolic acid, s.

Chem.: A chenical aulstance obtained by the action of acids or alkalies on resinons glueosides contained in the root nf Jalap, Convolvalus Schiedanus, and of C. orizabensis,
conn-Volv-n-lus (pl. convolvuli), s. [Lat. = (1) a caterpillur whieh rolls itaelf up in a leaf (2) the Biniweed. Spee. Convolvulus sepium.] Bot. : A genus of plants, the typical one of the order Convolvulaces and the tribe Convolvulez. Tha calyx is without hracts, the corolla funnel-ahaped, the calisule two-celled, each cell with two seede. There are two British apecies. One is Convolvulus arvensis: it has a root running deeply into the gromid, rendering the plant diffienit of extirpation; sagittate leaves, with acute lobes; the pedimelea uanally, single-flowered, with minute brscts diatant from the flowers, which are ammewhist emall and jule rose-coloured. It is common in fields and hedges, especially where common in felds and hedges, especiall where,
the soil is light. The other is $C$. Soldanelh, the Sea-aide Convnlvilus or Bindweed. It has reniform fleshy leaves, and large rosecoloured fowers. It has heen sometimes
placed in the genus Calystegia.- The British pheclea are purgative; so also is the foreign $C$. macrocarms. C. dissectus abounda in prussle aeid, and is ona of the plants used in the preparation of the liquor called nogau.
codn-v6y, * con-vey, v.t. [A doublet of conn vey (q.v.). Fr. convoyer; Ital. convogliare; 8p. convoyar.]

1. To accompany on a journey by land or sea for the saka of defence or safety; to eacort.

## "That throngh the fear of the Algerinea Longrellow: The Golden Legend, 7 .

2. To accompany, to attend.
and sainte attend."
Skriving: Doomaday.

A. \& B. As pr. par. \& particip. adj. : (Ses the verb).
C. As subst. : The set of affecting with or throwing into convulsions.
tn-vull-sion, s. [Lat. convulsio, from conmulsus, pa. par. of convello.] [Convolse.]
A. Ordinary Language:
5. Literally:
6. In the ssme sense as $B$.

Seived him, that nell-sinme nisht dire.

- 8. A violent shaking.

> "Thoth twa massive plllars He tugrihio ronvilition to end fro Hilton: Samson Agonites.
II. Fig.: A violent agitation or disturbence; commotion.
the axme convulolons of state, . . $\quad$ "-Temple.
B. Med.: A diseased action of the musculsr tiasnes of a greater or less portion of the body, characterized by violent muscular contractions with alternate relaxstions. Such action of the museles Is , however, impossible unless nervous influence be first trausmitted to them by the brain sud nerves, snd it is in these latter thst the seat of the disease lies. As is nstural, infants and young childrea, females, and men of the temperament called nervous, are most susceptible of convulsions. Hence one species of this genus of disease is called Infantile snd suother Puerperal Convulsions, the former sffecting infanta, the latter sppearing in women towards the conclusion of pregnancy or immediately after childbirth. Convulsions have been divided into tonic convulsions, in which the contractions are of some duration end sre not quickly succeeded by slternate relaxations, sud clonic convulsious, in which the contraction is briefer and relsxation comes more quickly. Of the former tatanus is sn example, and of the later hyateria. Some have restricted the terin convulsion to those of a tonic chsracter. tions are but slight, snd very quickly succeed tions are but, slight, snd very quickly succeed
esch other, the affection is called tremor. esch other, the affection is called tremor.
Convulsions apecislly sffect the voluntary nuscles, in this differing from spasm, which is applied chiefy, though not exclusively, to similar action of the muscles called involuntary. They may be local, sffecting only certain muscles of the eyes, the face, the throst, the thorax, or they may be general over the body. They may be idiopathic or symptomatic of other diseases. They may arise from congestion of the brain or from its deticient injury of nerves. Slight convulsions arc, in masny cases, unsttended with danger, whilst masny cases, unstended with danger, whist bigh degree.
oòn-vŭl'sion-al, a. [Eng. convulsion; -al.] i'ertaining or relating to a convulsion or to convulsiuns.
 sion, snd suff. ary; Fr. convelsionnaire.]
A. As adj. : Pertaining to convulsions, convulsive.
"... roneulstonary strugglen . . ."-scoot.

1. Ord. Lang. : One sffected by convulsions.
2. Ch. Hist.: The same ss Convolsionists (q.v.).

Cbn-vill'sion-Inten, s. pl. [Eng. convulsion, sad eutf, -ists; Er. con onlisionnistes.]

1. Ch. Hist.: The name given to a section of the Jansenista who arose ia France in 1730. They were accustomed to throw themselves ypon the ground and go into convalsions. Three years sfterwards sno order was sent forth for their imprisonment.
[Convulsionary B. 2.]

IT (1) A cool card: An impudent, self-possessed fellow, whom nothing can put out of countenance. (Slang.)
(2) Used of money; implying s largo sum. (Dickens: Great Expectations, ch. Ivii.)
8. As subst. : Coolness; moderate temperature.
"They that wolde rido in tho cole of the mornyuge".

- Verlin, 1 iL 19i. -Merin, i. in 19.
IT Crabb thus discriminstes between cool cold, snd frigid: "In the natural sense, cool is sinuly the slisence of warmuth; cold snd frigid are positivaly contrary to warnith; the former in regard to objects in general, the latter to moral objecta : in the physical mense the snalogy is strictly preaerved. With re gard to the passions, cool designates a freedom from agitation, whieh is a desirable quality. Coolness io a tins of danger, end coolness in sn srgument, are alike comniendable. As cool srgument, sre afike commendable. As cold respect the affections, the cool is
and opposed to the frieudly, the cold to the warmopposed to the frieudy, ths cold to the warmhearted, the frigid to the stionated; the former
is but is degree of the latter. A reception is is but $s$ degree of ths hatter. A reception is
said to be cool; an embrace to be cold; s eensaid to be cool; an embrace to be coll,; s een-
timent frigid. Coolness is an enemy to social enjoyments; ooldness is an eneruy to every moral virtue; frigidity destroys ail forcs of character. Cooiness is engendered by circumstances; it supposes the previous existence of warmith; coldiess lies often in the temperament, or is engendered by babit ; it is always something vicions; frigidity is occasional, sud is alwsys os defect. Trifling differences produce coolness sometimes betwcen the best friends: trade sometimes elngenders a cold calculsting temper iu some minds: thooe whe srs remarkiable for apathy will often express themselves with frigid indifference on the most important eniljects." (Crabb: Eng. Synon.)
TIFor the difference between cool and dipabsionate, ges Dispassionate.
* cocl-cup, s. A cooling beverage.
t cool-headed, a. Dellbernte, calm, selfpossessed ; not liasty or ensily excited.
"The old, cooth eaded, general law, . . .
Letet. so the Surhe :

ooom-cell'd, a. A term applied to a garret-room, of which the ceiling receives its peenliar forio from that of the rafters and crossbeama, within which the lath and plaster extend so as to form a aort of arch. (Scotch.)
oôom ( $2 \lambda$ s. [Fr. écume $=$ foam, druse.]

* 1. Soot that gathers over an oveu'a mouth. (Fhilipe.)

2. A term applied to refuse matters, such as aoot, smoke-hlack, coal-dnst, the mould which forms on some liquids, the drip of journal-boxe日, naves of wheels, \&c. (Knight.)
3. The dust which falls from large coala. (Scotch.)
TSmiddy coom: The ashes of a hlacksmith's furnace.
côomb (1), cōmb (b silent), * coome, s. [A corruption of Fr. comble $=$ a heaping, from Lat. cumulus = a herp; cumulo = to heap bp.
(Skeat.)] A measnre for corn, containing four (Skeat.)] A measnre for c
bushels or half a quarter.
oóomb (2), ốombe (b silent), combe, s. two cum (pron. hoom $=$ a hollow between two hille, a dale; Corn. cum; Ir. cumar $=a$
valley. (Sheat)] valley. (Skeat.)] A valley wetween hills, a dell, a dale i in the snuth of Sentland, the bosom of a hill, having a semicircular form.
"The dark cock bayed above the coomb."
Queone ifobec, $p$.

* coome, s. [Cooms (1), t.]
côom'-ie, s. [A Weat African word.] 4 large present, in place of customs' duty, demanded by the kings and chlefs on the Bonny and other South African rivars, from supercargoes of ahipa, for the permisaion to trade with the natives. (Ogilvie.)
obomi-y, ait [Eng. coom (2), s. ; y..] Bo
grimed with the duat of cosls, noot, 2 cc .

Cbers, a [An ablueviation of racoon (q.v.).] A rscoon.
II A gone coon: A person hopelesely loat or rulned. (American slang.)
" It yon otart in any buiness with en emptypocket, you are a gons
corn'-de, obon'-di, s. [A Senegal word (t).] coonda-oll, coondi-0i1, s. The oil of Carapa guineensis, a tree of the order Meliacese, growing in Senegal. It is cloaely akio to C. guianensis, from Guiana, which yielde the Carap or Crab oil. (Treas. of Bot.)
oôop (1), s. [Cop.] $\Delta$ amall heep or mound.
oôop (2), oupe, ooup. s. [A.S. çypa = 8 hasket; Dut. kuip sz a tuh; Ger. hufe $=\mathrm{a}$ coop, a tub; Icel. kupa $=$ a cup, a bowl, hasin; O. H. Ger. chuofa; M. H. Ger. kuofe from Lat. cupa; Fr. cuve $=$ a tub, a vat. $\mathbf{C r}$. Gr. кйтท (kupĕ) $=$ a loole, a hit. (Skeal.)]

1. A cage or pen for hirds formed of a box of boards grated, barred, or wired on one side. It is gencrally used to keep fowla in while being fattened, or whila traveling.
"The ceak, the soop, the fanted cord."
1 2. A cage or pen for animals.
2. A barrel or cask for liquor.
3. An apparatus made of wicker-work need for catching flah.
4. A coop-cart (q. v.).
"Coops an' carts were unco raro"" $\begin{aligned} & \text { Piper of Peoblef, p. a' }\end{aligned}$
coop-cart, conp-cart, cowp-cart, a a close cart for unanure, liquids, sre.
©ôop, v.t. [Coop, s.] I. Literally:
5. To confiae in a coop; to shut up in a peo.
6. To cooper; to hoop round.
" He poopit a cogrie for our gudwife.
And, beigho!
Wit be coovit it braw.
Jacobite selics, il. 4
Figuratively:
7. To confine or ahut up in a narrow compass ; to crowd. (Generally followed by up in or up within.)
"The Commons, who were cooped up in a narrow npace, ..."-Macrulay: Hist. Eng., ch, s iv.
8. To cramp, to confline, to narrow.
"The contempt of all other kuowledge.
the underanding no whinin narrow bounds.
cốoped, pa. par. or a. [Coop, v.]
ôop-êe', s. [Fr. coupé.] A atep or movenent in dancing. [Coupere.]
odop'-ẽr, * coup'-ër, s. [Eng. coop, v. ; -or M. Ger. küfer ; Dut. kuiper.]
I. One whose trade it is to make and repair casks, barrels, tuls, \&c.
"The coupor's house is helde by liooping fattes."
Gacotgne: Tise Fruites of Vurra Gacotgne: The Fruites of llurra
coopers were incorvorated Th The London coopers were 1501 .
9. A popuiar name for a beverage composed of atout and porter in equal proportions. The name is said to he derived from the custom at breweries of allowing the coopers each day a certain quantity of stout and porter, which they were in the habit of mixing before drink. ing.
TThe tight-cooper, as also the wel-cooper, makes casks for holding liquid, and is the representative of the first inventor. The dry cooper makes casks for goods not in a liqui state, such as flour, rice, dried fruits, soda sc. The white-cooper makes hutter cask m , tubs, pails, and churns, and combines in aome measure tha akill and knowledge of his two elder brothers. A conper-in-general is seldom a skilled workman, but a jouber and nuender of other men's work. (Weale.)
cooper's hammer, s. $A$ hammer with a narrow peen, whose length is in the plans of the motion of the hatamer; used for battering and flaring anil iron hoop to fit the bulge of a cask. Also called a flue-hammer.
cooper'e plane, s. A long plane set in slanting position, sole upward, upon which ataves are jointed. A jointer. Planea end

ghaves are or may be used in smoothing the work. (Knight.)

## cooper's wood, s.

Bot.: Alphitonia excelsa, one of the Rhamnada.
coop'-ẽr. v.t. \& i. [Cooper, s.]
A. Trans. : To operate on in the manner of cooper.
B. Intrans. : To follow the trade or occupation of a cooper ; to make and repair casks, barrels, tnba, \&c.
côop'-ẽr-àge, s. [Eug. cooper; -age.]

1. The trade or businesa of a cooper; the cooperiug of caska, \&c.
2. A place where the trade or busioess of a cooper is carried on; a place for the manufacture and repairs of casks, barrels, de.
"Wareboosed, sonD-wilks, cooperages, \&o""-Defoe:
Tour throtegh Grent Britain, i. 26. (Davick)
3. The price paid for work done by a cooper.

* ©ō-ǒp'-ẽr-ant, a. \& s. [Fr., pr. par. of cooperer $=$ to work trigether, as if from a Lat. coopero: $\infty=\operatorname{con}=$ with, together, and opero $=$ to work ; opus = work.]
A. As adj.: Operating or working together with; cooperating.
$\because$ Bounded and conditioned by cooperant Reason
$-T y$ ndall: Frag. of Science ( 3 rd ed. ), vii. $130-1$.
B. As subst. : A cooperating agent; one who or that which cooperates with another for a conimon end.

 and Lat. operalus, pa. par. of operor = to work; opus = work; Ital. cooperare; Sp. cooperar ; Fr. coopirer.]

1. Of persons: To act or operate conjointly with others for a common end ; to labour in conjunction for the promotion of the common advantage.
"̈. . Whose hard fate it has beea to cooperate with
Spaniards. ."- Nacaulay: Hise Eng., ch. $\times x$.
2. Of things: To concur or mite in producing the same effect, or io promoting the same object. (Generally followed by with before the person or thing assisted.)
Hiar. Enture, ch, $\mathbf{x}$ xiil.

* (a) Followed by to before the ead io view (b) Followed by in.

3. To contribute to.

- Bring ali your lutes and har pa of heara and earth :
comprates to the common airth.
Cathate: The Nirne above every Name.
0ō-ōp'-èr-āt-ǐng, pr. par., a., \& s. [Coopfate.]
A. \& B. As pr. par. \& particip. adj. : (See the verb)
C. As subst. : The act of labouring together witli others for a common end; cooperation.
oō-ŏp-ẽr-ä'-tion, s. [Lat. cooperatio; $\mathbf{F r}$ copperation; Spl. cooperacion.] [Cooprrate.]
I. Ortinary Language:

1. of persons: The act of labouring together with others for a common end; conjoint or concurrent labour or efforts.
caulay: Hkt. Enal, ch. vi.
2. Of things: Concurrence in producing the same effect or in promoting the common advantage.
II. Political Economy :
3. Defnition: The combined action of numbers of persons. It is of two kinds: simple conperation, when several individuals help each other in the aame cmployment, and complex coopleration, when they do so in different employments.
4. Hist.: The pioneer of coogeration in Britain and America was Robert Owen. For some cletails of his views and work ree Сомmunism. Thongh his great philanthropic projects failed, yet they auggeated cooperation. Not that the idea was really new; it had been practised to $a$ limlted extent in inost countries. It is a form of partnership. It may be of two kinds, cooperation in production and cooperation in distribntion. During the French revolution of 1848 , the Constitnent Assembly voted the equivalent of $£ 120,000$ aterling to encourage cooperation, a commission being appointed to distribnte the sum
among workmen desirous of rising to the levet of copitalista. Abont 300 cooperative societies at once aprung iato exiatence, 100 of them in Pariz, the rest in the provinces, all of which became extinct within twenty years, except, it is believed, wlont twenty. Host of lie twenty, however, rose to prosjerity, as dia othera to a larger extent which had not obspread to Germany, but few of the cooperative spread to Germany, but few of the cooperative
aocietiee there are for production. The Rochsociete Cotton Mill was founded in 1856, and in 1864 the Wholesale Society was eatahlished at Manchester, and that at Glasgow was founded soue five yeara later. In 1873 the Cooperative Union waa organized, and the anunal production by aocieties connected with it is eatimated at over $£ 5,000,000$. The Wholesale Society (for the two are practically one institution) has depóts in Ireland and America, and on the Continent. It possesses a small fleet of stesmers, and carries on boot and shoe and cloth factories and soap works. Cooperation in distribution is designed to save the retail profits by dispensing with the middlemen. Rochdale is, as Mr. Holyoake words it, tha "Mecca of cooperation." Io 1844 a few flannel-weavers clubbed together their small snuscriptions and founded a small cooperative atore. It has risen to great prosperity, and its success has led to the establishment of a multitude of other atores of a like nature. In the United States cooperation has made less progreas than in Britain, and there is nothing here to compare in importance with the famous Rochdale experiment. There has been a large development of mutisal insurance, aod the building and loan societies of Philadelphis form another example of cooperative action. Copperative distribution has attained oo marked success, distribution has attained oo tarked success, end cooperative production still less. Profit-
sharlug is the nearest appronch to this priaciple sharbug is the nearest appronch

* $\mathrm{co}^{-}$-or'din-ançe, s. [Pref. $c=\infty=\infty$, and Eng. ordinance (q.v.).] A joint ordinance.
cö-or'-dinn-ate, a. \& s, [Pref. $c o=c o n ;$ Lat ordinatus, pia par. of ordino $=$ to arrange In orler or rank ; ordo $=$ an order.]
A. As adjective:
I. Ord. Lang.: Holding the same rank; not anbordinate ; of equal rank or authority.
"Whether thore was one Sapreme Oovernor of the
Whoie worid, or many condinate powera, presiding
over eaph country: clicmate or particular plece."-
Law: Theory of heligion, pt. iil.
II, Technically:

1. Biol.: Of the same order, of the same rank; not suborlinate the one to the other. but standiog oo the same level.

The coordinate, like other moremente of tha voluntary musclea, are liable to he infuenced by pas Physiol Anet., vol i, ch. vif., p. is.
2. Law \& Gram.: A term used in the explanation of clauses doultful in their meaning when these occur in Acts of Parliament. If two clanses are equally governed by a third one, the two are said to beordinate to each other, or simply coordinate.
T Coordinate in this aense ia opposed to subordinate, which is the term used when, of two clauses, one is grammatically governed by another. (Wharton.)
B. As substontive:

Geom., ©c. (PL.): Two llues, generally at right angles to each other, employed to fix the place of any point. Thus on a globe parallels of latitnde and meridiana of longitude are coordinates, which, taken together, fix, with nearly mathematicul accuracy, the position of any place on the globe, and wonld do so with nerfect exactoess were it a strictly geometrieal figlire. It is not essential that the angles made by two coordinates be right angles, though right anglea are most commonly employed as most convenient for use.
TI The reason why the term coordinate was given is that if various points in a carve bo fixed by such lines the acveral points of the curve may be treaterl in order. Descartes first introduccd the method of fixing the poaltion of a point or series of points in the way just described. It is now continually in use. One division is into Rectilinenr and Polar Coordinates, each of which may be in a plane or in apace (that is, not in a given plane).
cō-or'-dìn-āte, v.t. [Coondinate, a.] To make coordinate; to arrange in proper ordera and classes ; to adjust, to larmonize.
"The different parts of each leing inust be coondin-
ated in minch a nuaner as to reuder the ton being ated in much anduner as to reuler the total being
cō-or'dĭn-ä-tḕd, pa. par. or a. [CoordinATE. $v .1$
cō-or'-dĭn-āte-ly, adv. [Eng. coordinate; -ly.] In a coordinate manner or degree; without subordination ; in the same rank, relation, or derree.

## I. Ondinary Language:

1. The top or summit of anything; the extreme point. Used-
(1) Of a hill, a house, a trea, te.

Wyctifo: "Litxe, ive. ive. him to the cop of the hil"-
(2) Of the head of a man
"Bi the coppe ho him nam."-Layamon, 130.
2. A tuft on the heads of birde, a creat.
3. A biow. (Slang.)
II. Technically:

1. Fort.: A merlon or portion of a battlement.
2. Spinning:
(1) Thu conical ball of thread wound upon a apindle or tube in a epioning-roachine, and removable by slipping therefrom. Also called coppin (q.v.).
(2) A tube, alao known as a quill (q.v.), for winding silk upon in given lengths for market a substitute for akeino. Belng hollow it may be placed on the spindle or akewer of amy winding-machine. The ailk end is secured li a slot, as in the case of apools. (Kuight.)
cóp (3), s. [A contraction for Eng. copper (\%).] A term occurring only in the following compound.
cop-rose, s. A poppy, Papaver Rhozas. It is called also Copper-rose (q.v.).
copp (1), v.t. [Cop (2), s.] To throw at the head.
"I could have cop't them at their pates."
oơp (2), v.t. [Etym. donbtful ; perhaps from O. Fr. caper $=$ to aeize.] To catch. (Slang.)
oō-pá-hēne, s. [Copaiba oil.]
cö-pạ-hill'-ène, s. [Copaita oil.]
cǒp-aì-ba, cō-paī'-va, ca-pí'-ví, s. [Fr. copahu; Sp. copayba, from Port. (Braziliza Indiau?) copaiba.]
Pharm.: The balsam or oleo-resin obtained from inclaions made in the trunk of Copaifere multijugr and other apecies of Copaifera (q.v.) Copaiba ia about the consistence of olive oil, light in colour and tranaparent, with a peculiar odour, and an acrid aromatic taste; it is per fectly soluble in an equal volume of benzene it does not become gelatinous when heated to $20^{\circ}$ Fahr., and is not fluoreacent. It containa a resin, Copaivic acid, and an essential oil, Copaiba oil. It diasolves one-fourth of its weight of magnesia carbouate when heated, wnd remaina transparent; it is said that a amal! quantity of water contained in the balsam first combines with the maguesia, balsam first combines with the maguesia, forming a hydrate which ia soluble in the resin. Copaiba acts as a atimulant on the urinary organs. It ia also a powerful diuretic
copaiba balsam, s. An oily resin of an amber culour; it is used as a velincle in oil paintiog, and also as a varnisb. (Weale.)
copaiba oil, s.
Chem. : A colourless trausparent, mobile, peculiar smelling oil, obtained by distilling Conaiba with water, and drying over calcium chloride and rectifying. It boils at $260^{\circ}$. Its optical rotatory power is $34 \cdot 18^{\circ}$ to the left it becones brown and viscid by continued boiling. Chlorine colours it yellicw-green, then blue, and then whit" crystals separate ont. Nitric acid heated with it turns it into on resin. When distilied with calcitum hypochlorite it yields chloroform. When hylrochlorite acid gas is passed into copaiba oil, it chloric acid gas is passed into copaiba ond it also Hydrochlorste of Copahene or Coprivene $\mathrm{C}_{15} \mathrm{I}_{24} 3 \mathrm{HCl}$ ), which is obtained by recrystallisation from alcohol in transparent prisms, which melt at $7^{\circ}$, and are insoluble in water and coid nleohol, but casily soluble in ether. A liquid sabstance is formed at the same time which is called Hydrochlornte of Coprahilenc It is a black viscid oil, solnble in aleohol and ether.
copaiba resin, s. [Copaivic acid.]
cöp-aī'fĕ-ra, s. [Eng. conai(ha); Lat. fero to bear, to produce.]
Bot.: A genus of legumineus planta, suborder Casalpiniex, tribe Cynometrex. It has zometimes been placed anongst the Amy ridacer. The calyx is 4 -partite, the petals 0 ,
the stamens 10, decllnato. The ovary has two ovules, but the two-valved frult is only oneseeded. Leaves alternate; pinnated lasflets, aometinnes dotted. Inflorescence in axillary and terminal spikes. C. Jacquini or aflecinalis furnishes titie West Indian Copaiva halsam. C. Langsdorfi and C. coriacea, with varioue othef epeciea, ara said to furnieh the Copaiva balsam of Brazil. C. pubifora and bracteata, balsam of Brazil. C. pubifora and onacteata, called Purple Heart, well fitted to resiat the discharges of artillery.
cŏp-ai'-va, s. [Copalba.]
cŏp-ai'-vēne, s. [COPaIbA oll.]
cơp-ai'-vic, a. [Eng. copaiv(a); and өuff. ta] copaivic acid, s.
Chem.: Also called Copahuvic scid. - A cryatalline reain, which exista in Cepraiba balsam. It is aeparated by disaolving the resins which remain after the oil has been distilled off in aqueous ammonia, and leaving the solution to evaporate In a cool place. It is puriffed by washing with ether and recryatallising from alcolel. Copaivic acid forms colourlesa rhonbic cryatals, soluble in forms colourlesa mhombic cryatals, soluble in heating. It is to have the formula $\mathrm{C}_{20} \mathrm{H}_{32} \mathrm{O}_{2}$.
cō-pऑl', s. [Sp. copal, from Mexican copalli $=$ resin.]
I. Ord. Lang. \& Chem.: A resin produced by a plant, Rhus copallinum, which grows in Mexico. It is obtained in rounded, nesrly transparent, massea; is brittle in texture and colourless, or slightiy yellow. It is slightly aoluble in alcolol and casential oila, and is made into varnish by mixing in a melted atate with oils. Compos.: Carbon, 78 to 80.5 ; hydrogen, 8.7 to 10.5 ; oxygen, 9 to 10.7 per cent.
TI (1) Brazilian copal: "Copal" fowing from several species of Hymenæa, and from Trachylobium Martianum.
(2) Indian copal: A resin obtained from Vateria indica. It is called in England Gum animi.
(3) Madagascar copal: Hymencea verrucosa.
(4) Mexican copal: Hymenaa Conibaril.
3. Min.: A mineral calied rosail copal copaline, or copalite. [Copalite.]
copal varnish, s. A varnish made from copal. It is durable and brilliant, and may be used in the manufacture of philosophical inatrumeats.

## cō-păl'-çhê, s. [Mexican.]

copaiche bark, s. The name given to two kinds of bark resembling Cascarilla (q.v.) They are the Brazilian and the Mexican Co falche bark. The former is from Strychno pseudo-quina, and the latter from Crotom pseudo-china.
cō'pal-ine, s. [Eng., \&c. copal; and aut. Min.: The same us Copalite (q.v.).
cō'pal-ite, s. [Eng., \&c. copal; and suft. -ite (Min.) (q.v.).]

Min. : A combustible mineral of a yellow gray, or brown colour. It resembles conal in harduess, colour, lustre, transparency, and in the difficulty with which it is dissolved in alcohol. Compos. : Carbon, $85^{\circ} 7$; hydrogen, $11 \cdot 4$; oxygen, $2 \cdot 9=100$. It is found in the Londion clay of Highgute, on which account it is sometimes called Highgate resin. It is found also in the East Indies. Copalite is called also copaline and fossil copal.
cǒp-ăm'-ry, s. [Mid. Eng. cop $=$ cup, and amry $=$ ambry ( $\mathbf{q} . \mathrm{v}$. ).] A press or closet for keeping cups, \&c.
"Aberd. layg.

* cō-par'-çen-a-ry̆, * ō̄-pnr'-çen-arie, s. [Eng. coparcener; - $y$.$] Joint succes.$ sion or inheritance in any estate; a partnership in heirship.

word as Cap and Cape (q.v.).
A. Ordinary Language.
L. Laverally:

1. Any covering for the head. [Cap.]
2. A cloak, a cape.
" $1 n$ kirtles and in copes riche
3. The top or summit of anything

Wror [Cor.] "Wrapt in dense clond fioin base to cope:"

- II. Figuratively:

1. Anything sprean over or covering the head, as a clond.
"This his . . . ber reluy cope did upon." $\begin{gathered}\text { Gomer, il. } 101 .\end{gathered}$
2. The arch or cancpy of heavell.

> In thin coicmotion, lut ho atarry cope
> of heaven perbaps,

Sitton: P. L., bk. iv
3. The roof of a house, and hence the house itself.

Within this toodily cope, lotb moe and least.

## 4. The arch over a doorway.

B. Technically:

1. Eccles.: An ecclesiastical vestment roembling a cloak. It tskea its name from the cappa or hood, which was originally a very necessary and highly ornamental appandage.

It ia made of various materials : ailk, saitin velvet, eloth, dec., of different colours, and

COPES richly embroidered. acrosa the breast by a jowelled clasp. When laid out flat It la in shape an exact semicircic. It ia worn in the Roman Catholic Church by clergy of all ranke. As distinguished from the chasuble (q.v.) it is a proceasional vestment, while the chasuble is Eacharistic. The cope is
one of the vest. ments worn in Ritwaliatie churches, hit it was decided by the Judicial Committee of the Privy Council, in the case of Hibbert . Purchas, 18 in 1 , that "the cope ia that the cope ia tering the Holy Communion on high feast days in cathedrals and collegiate chorchex, and the aurplice in all other ministrations."
2. Founding: The top part of a mould; the lower is the drag. [Flasik.]
3. Old Law: A cuatom or tribute due to the king, or lord of the soil, out of the lead mines in the Wapeutake of Wirksworth in Com. Derby. (Blount: Law Dict.)
" Fgreas and Regreess to the Kingz Higb-way.

4. Arch. : A crown, arch, or ercheó lintel. [Coping.]
copechisel, s. A chisel adapted for cutting grooves.
cope (3), s. [Cope (3), 0.]

1. A bargain or exchange
"To makie a cope for dearth of hay."-Oreene: Mar sacom, p. ist.
2. An encounter, a hostile meeting.

 handte, an oar, and movis (pous), genit, ro\&br $($ podos $)=\mathrm{a}$ foot.]

1. Zool.: An order of Crustacea, rsnked under the sub-clasa Entomostraca and the legion Lophyropoda. They are animals of small size, the body divided into two segments, viz., a cephalothorax and so abdomen. There are two pairs of antennæ, two pairs of footjaws, and five pairs of ordinary feet furmiahed with bristles and adapted for swimming. There is a jointed tail with a tuft of bristlea at its extrenity. Some are found in fresh water, others are marine. Prof. Huxley says that in addition to the species placed under Copepoda by Latreille and Milne Edwards, the order containa aome of the Epizon or lehthyophthira. There are two familiea, the Cyclopide, which have but a siogle eye; and the Cetochilidæ, which have two eyes.
2. Polroont.: No certain pronf has yet been obtained that the Copepoda occur fossil.
 Lat. copepod (a); Eng. suff. -ous.] Belonging to, or laving the charecteristics of, the Copepoda (q.v.). The first form is aloo used aubatantively.

* co'-pēr, s. [Eng. cope (3), v.; -er.]

1. Ord. Lang.: A dealer; now nnly surviving in this sense in the conpound horse-coper (q.r.).
2. Lead-mining: One who contracts to rase lead ore at a fixed rate.
Cŏ-pẽr'-nǐ-can, a. [Pertaining to Copernieus, the Iatinised form of Copernik or Zopernic, a Ronan Catholic ecclesiastic, a canon of Thorn, in Prussia. He was born in-
1422 or 143 , and died on May 23, 1543.] Pertaining to the cclebrated astronomer, Copernicus. (See ctymol.)
II (1) Copernican hypothesis:
Astron.: The view regarding the eolar system promulgated by Copernicus, and which he was careful for ecelesiastical reasons to calt a bypothesis instead of a theory. Poje Pias VIl, in the early part of the nineteenth century, having prouised a repeal of the Papa; edict agninst the Copernican system, no offence was afterwards taken at Rome if the Romad Catlolic professors called the Copernican views a theory, which they had not before been permitted to do, having been required to employ the term hypothesis. (Lyell: Princip. of Geol., bk. i., ch. iv.)
(2) Copernican system:

Astron.: The system of astronomy promalanted hy Copernicus, which in most of its essentiol features was identical with that now accepted. Previona to hia time the systera in vogue was the Ptolemaic one as modified ly Tycho Brahe. Both of these

eminent men had placed the aarth in the centre uf their syatem, and made the sun and the planete to revolva around it. Copernicus took the great step forward of placing the sun in the centre, and reducing the carth to the comcuratively humble position of a planet. The place which be assigned to the planots were essentlally correct, but he falled to explain accurately the laws which regulated their movements. He supprosed that they must be united tu the central body - the ann - hy bars like Ptolemy's epluycles It was not till Kepler and Nowton had made two othar great movements forward that the mechanism of the hes vens came to be understood. Thers Is Injustice to thess men whea the term Coperis injustice to these men when the term Copernican system is held to embrace discoveriss made subsequent
(Prof. Airy, dc.)
(3) Copernican theory:

Astron.: The theory or explanation given by Copernicus of the colar aystem. [CoperNLOAN HYPOTHE日IS.]

L. Orlinary Languape:

1. Gen. : The metal described under II. 1 (2) 2. Specially:
(1) A coln of copper-s penny, a halfpenay, or a farthing.
(2) A vessel or utensil, esp. a large vessel for cooking or washing. Such were originally of eopper, but are now more frequently made of iron. In the pl. the terni is applied to the large cooking boilers on board ship.
MThey
Nat. Hiat
II. Technically:
2. Chem.: A dyad metallic element. symbol, Cu ; atomic weight, 63.5 ; sp. gr., $8 \cdot 95$; melt ing point, $1,091^{\circ} \mathrm{C}$. Copper is a red, malloable, ductils, tenaclous metal, which soma times occurs native. It does not decomprese water at red heat, nor oxidise $\ln$ dry sir; a red heat it oxidises to a black oxids. Heate with atroog sulphuric acid, $\mathrm{SO}_{2}$ is liberated
and capric aulphate formed. it is easily dissolved by nitric acid, $\mathrm{NO}_{2}$ belog given off and cupric nitrate formed. Copper forms teveral alloys. Braas is an alloy of wo-thirds copper and one-third zine; bronze, gun-metal, and bell-metal are alloys of copper with tin. Conper forms sets of compounds, the cuproga Copper forma sets of compounda, the cuprons and cupric salts. [Cupric, CUPRous, and their compounds.] Copper pyrites is a cuproso ferric aulphide. Copper arsenite, or Scheele's green, ia used as a pigment for well papera, \&c.; it is very poisonous. Compounds of copper with enomonia are known. Copper saits are detected by giving in an acid solution a black precipitate with Hos. By giving a blue precipitate with KHO it becomes black on boiling. When a plece of clean steel ia placed in a solution, copper is deposited on it. Ammanis gives a blue precipitate, which dis ammo in cese formin a dark-blue solution otassium otassicm ferrocyana sue a red-brow recipitat a aoluble in ammonia forming a blue aolution. All alts of copuer are poisonous. Verdigria is an acetate of copper, ofteo formed by cooking food in copper vessels.
3. Alchem. : Copper was represented by the alchemists hy the aame sign as the planet Venus, both the metal and the goddess being asaociated with the island of Cyprns.
4. Min.: A ductile and malleable isometric mineral, often in twin crystals, with the composition face octahedral, or a double six-sided pyramid, or filiform and arhorescent. Hard еяя, $2.5-3$; 8p. gr., 8-8.9 or more ; colollr copper-red ; streak metallic, fracture hackly Compos. : Copper, pure or with a slight ad. mixture of silver, hismuth, de. it is found in beds and veins, chiefly near volcanic dykes, n serpentine, \&c., or looge in the soil. It occurs abundantly in the United States, particularly in Lichigan the mines at Calumet on Lake Supe rior in that state being the richest in the world This country is the largeat producer of copper.

T (1) Hot coppers: Parched throat and mouth from the effects of drink. (Slang.)
(2) To catch copper : To conse to grief. (Slang.)
"Go to. no more Barber. Ienst copper you catch.".
(3) To cool one's coppers: To quench one's hirst, esp. after excessive drinking. (Slang.) Hughes: Tom Brown at Oxford, eh. iii.)

## B. As adjective :

1. Having copper in ita composition, pertaining to copper; made of copper.
2. Red and metallic in aspect, coppery.
"In a hot and copper aky." coleridge: $\mathbf{A} \mathrm{nc}, \mathrm{Ma}$

## oopper armenate, $s$

Min.: A nams which has been applled to (1) Olivenite, (2) Euchroite, (3) Erinite, (4) Cornwallite, (5) Clinoclase, (6) Clualcophyllite, and (7) Liroconite.

## copper arsenide, 2

Min.: A name which has been applied to (1) Domeykite (q.v.), and (2) Whitneyite (q.v.)

## oopper-belly, 8 .

Zool.: The nams of an American serpent, Coluber erythrogaster.
copper-bit, s. $\Delta$ pointed piece of copper, riveted to an iron ahank and provided with a wooden handle. It is used for soldering. If not previoualy tinned, it ia hested to a dull red in a charcoal fire; haatily filed to a clean metallic aurface; then rubbed immediately upon a lump of sal-ammoniac, and next upon s copper or tin plate, umon which a few drons of solder have been placed. This will consof solder have been placed. This will conlrletely coat the tool, which may be wiped ready for uae. (Knight.)

## oopper blende, 8 .

Min. : The same as Tennantite (q.v.).
copper-bottomed, 0 .
Naut. : Sheathed below with copper. The process began with the ships of the navy in 1761, and was completed for the then existing vessels by 1780 . (Haydn.)

## oopper butterfies, s. pl.

Entom.: The English name of the amall butterflies belonging to the family Lycsenidæ, sud specially to jta typical genus Lycena They are really of copper colour, and have an onisciform larvs. One species ia common in Britain. [Lyceana.]
copper-cap, 8. The copper capaule, charged with a fulminate and placed on the nipple of a tire-arm, to explode the charge when the hammer falla. (Knight.)
copper-captain, s. One who calls himself a captain without any claim to the title a pseudo-captain.
copper carbonate, a
Min.: The same as Malaceite or ChessyLITE (q.v.).
copper-coloured, a. Red, with more or less of metallic lustre; or simply reddish like the metal, but without its lustre.

## copper-faced, a.

Type: Having a face of copper upon a shank of type-metal. (Kuight.)

## copper-fastened, a

Shipuuilding: Having the planks, etc., fastened with copper bolts, in contradistinction to iron ; the latter being liable to rust, especially in contact with oak and by exposure to wet. ( $\mathrm{K}^{\prime} n \mathrm{ight}$.)

## copper froth, $s$

Min.: The same as Tybolite (q.v.).
copper-glance, 8.
Min.: The same as Chalcocite (q.v.).

## copper-green,

Min.: The same as Chaybocolla (q.v.)

## copper-head,

1. Trigonocephalus contortrix, a venomous American snake, which gives no warning of its attack.
2. (Pl.): A name given to those in the Northern States, during the War of Secession in 1861-65, who favoured the South.
copper-iron, s. \& a
A. As substantive

Elect. : A comple of the two metale for use in a voltaic battery.
B. As atj.: Consisting of copper and iron.
 counde - Ewereat

## copper-manganese, $s$.

Min. : A variety of Credserite (q.v.).
copper-mica, $s$.
Min. : The same as Chalcophyllite (q.v.)

## copper-zickel,

Min.: The aame as Nickilune or Niccolntil (q.v.).
copper-nose, s. A red nosa produced by the akin disease called acne rosacoa, by in toxicating liquors, te. (Shakesp.)

## copper ore,

Min.: The same as Melacontre (q.v.).
II Blua Copper ore is = Azurite; Emerald Copper ore $=$ Dioptase ; Oreen Copper ore $=$ Malachite; Octahedral Copper ore $=$ Cuprite Velvet Copper ore $=$ Cyanotrichite ; and Yellow Copper ore = Chalcopyrite.

## copper-ozide, $s$.

Min.: A name which hss been applied to (1) Melaconite, and (2) Cuprite.

## copper-phosphate, s .

Min.: A nams which has been applied to (1) Libethenite, (2) Tagilite, and (3) Phosphorocalcite
copper-plate, a. \& a. [Copperplats.]
copper pyrites, s. sing. \& pl.
Min.: The same as Chalcopyrite (q.r.p.
copper-rose, s. Papaver Rhoas.
eopper selenide, $z$.
Min. : The same as Berzelianiti (q.iv)
copper silicate, $s$.
Min.: A name which has been given to (1) Chrysocolla, and (2) Dioftase.

## copper-spot, 8.

Entom.: A predatory beetla, Calosoma call aun, found in Canada. It haa rows of copper coloured dota on its otherwise black elytra.
copper snboxide, 8 .
Min.: The same as Cuprite (q.v.).

## copper sulphate, s.

Min.: The same as Chalcanthite (q.v.).
copper sulphide, s.
Min.: The same as Copper-qlance (q.v.)
oopper-underwing, s.
Entom.: A moth of the family AmphiprIdxe. (Stainton.)
copper uranite, 8 .
Min.: The same as Cuprouranite and Torbernite (q.v.).
copper vitriol, $\varepsilon$.
Min.: The same as Chalcanthite (q.v.).
oopper-wire, * copper wyre, s. Wire drawn out of copper, which is a very ductile metal.

## copper-work, 8.

1. A place where vessels, dc., are mandfactured from copuer.
2. Work wrought in copper.

## oopper-zino, s. \& a

A. As substantive:

1. Ord. Lang.: A mixture of copper and zinc.
2. Elect.: A couple so formed, tirst intro duced by Dr. J. 11. Gladstone and Mr. A Tribe, in 18i2, has been used with effect in voItaic hatteries. (Haydn.)
B. As odj.: Consisting of copper and zinc.

* cǒp-pẽr (2), s. [Mid. Enc. cop = cup, and suif. -er.) A cup-bearer. (Ful. of Hon., iii. 58)
oǒp'- pẽ̃ (3), s. [Prob. from cap (2), v.] $\Delta$ policelnan. (Slang.)
oóp'-pĕr, vet. [Copprar, B] To sheathe or cover with aheets or a deposition of copper.
od̆p'pẽr-as, * coperose, * coppresse Topras, s. [O. Fr. couperose, coperose; Ital. copparosa; Sp. caparrosa, caparros; Port
caperosa. Supposed by Diez to be from Lat. caperosa. Supposed by Diez to be from lato
cupri rosa $=$ copper-rose. Murray thinks it is from Low Lat. (aqua) cuprosa; cf. Ger. Kupferwasser $=$ copperas.]

Min. : The same aa Melanterite (q. v.).

- Dana has a copperas group of minerala in which he includes the ordinary vitrinls. The aninerals compriaed under it are Melanterite,

A. As adj. : Pertaining to the people called Copts, or to their aect.
B. As subst.: The language spoken by the Copts formerly or now, unless where Arabic has displaced their native tongre. [Copric hangeager]

TI (1) Coptic Church:
Ecclesiol. \& Ch. Hist.: The remnants of the once numerous Church of Egypt-that which had the celebrated school at Alexandria. It broke of from the body Catholic in the ensbracing the Monophysite doctrine, viz., that not two natures, but only one, existed in Christ [Monophysites], a view from which it has never since defrarted. When Jacob Baradaus formed a slightly modified Monophysite sect, most of the Egyptian Christians became Jscobites. Being tyramised over by the Greeks, they cheerfully submitted to the Mohammedans, under Amrir ben Elaas, in A.n. 638 , and aided him, in 640 , to take Alexandria. Since then they have been trodden onder frot by the Mohaminedans. Abont 250,000 Copts atill exist io Egypt, rostly in its upper prowince. They have a patriarch bishops, presbyters, archleacons, patriarch, anb-deacons, lectors, cantors, and, deacons, They have two yernlar conycnt and exorcists. Anthony and St. Paul, with a number of aecondary monasteries.
(2) Coptic language: The language not of the old Egyptians who built the pyramids and covered monuments and temples with hierogiyphics, bat of their successors sabsequent to the introduction of Christianity. Theirs hore to the old Fgyptian language a relation like that of the Italian to the Latin-i.e. the nacleus came from the old language, but there was an increasing ingress of foretignt there It continued till the tenth century, when it was in large measure superseded by Arabic. By the seventeentl if had ceased to be apoken, and existed only as a written dialect. Whilst it lived three dialects were recogniaed-the Sahidic, in Upper Egypt; the Bahiric or Memphitic, in Lower Egypt; and the Bashmuric,
corp'tine, s. [Mod. Lat. copt(ls); Eng. auff. ne.
Chem.: A colourless alkalofd which occurs along with berberine in the root of Copris irt
folia, Coptme dissolves in aulphuric actd, the solution becoming purple-red when heated; it gives a crystalline precipitate with a solution of mercuric potassium iodide.
cơp'-tǐs, s. [Gr. ко́nтw (kopto) $=$ to ent; so named from the divisions of the leaves.)
Bot.: A genus of plants, order Ranunculacea, tribe Helleborea, sepals 5 or 6 , coloured petaioid, petals small cucullate, capsules 6-10 on long stalks, $4-6$ seeded. Coptis irifolia, Gold-thread, is a bitter, given in the United States as a cure for sphthons affections of the mouth in children. It yields a yellow dye. The plant is not confined to America, but grows also in Norway, Siberia, Kantchatka, de
cǒp'-n-la (pl. copulpo), a [Lat. $=3$ band or liok.] [COUPLE.]

1. Gram.: That word in a sentence which acts as a link between the subject and the predicate.
2. Jogic: That word which acta as a link between the subject and the predicate of a proposition; as, Men are mortal: are is the copula linking the predicate "mortal" to the aubject " men."
3. Music: [Coupler].
4. IJaw: Corporal consummation of marriage. (Wharton.)
cơp'-ulăte, a. [Lat. copulatus, pa, par. of copulo $=$ to join : co $=$ con, and a verb apere (only found in the pa. par. aptus) $=$ to join, to fit.] Joined or agsociated with something else.

If "(1) Copy of countenance: A flam or humbug.

(2) To set u copy: To write in an exerclisebook a cony for a learner to imitate.
"We took him setting of boy: cozics."-shakesp. Trabh thus discriminates between copy, model, wittern, and specimen: "A copy and a model may be both employed either as an original work or as a wurk formed after an original. In the former aense, copy is nsed in relation to impressions, maouscripts, or writinga, which are made to be copied by the printer, tha writer, or the engraver : model is used in every other case, whether in morality or tha arts: the proof will seldom be Iaulty when the copy is clear and correct. There can be no good writing formed after a bad copy; no human being has ever presented us with a perfect model of virtue. In the accond aense copy is used for painting, and model for relief. The comy onght to be fithful, the model ought to be just ; the former ehonld delineate exactiy whist is delineated hy the original ; the latier shonld adhere to the the cise rules of proportion observed in the original. The jilictures of Raphsel do not lose their attractions even in bad copies: the aimple mordels of antiquity often equal in value originals of modern conception. Pattern and specimen approach nearest to model in aignification: the idea of guidavce or direction is cation: the idea of guidasce or direction is
prominent in them. The modet alwaya serves prominent in them. The modet alwaya servos to guide in the execution of a work; the pat-

Clmply to determine the choice; the speotmen helps only to form the opinion." (Crabb: Eng. Synor.)

My Lord Melun, let this be coptod onte,
And keep it mafe for our remembrace." Shakean: Kimp JJin, v,
2. To imitate, to make or construct anything in imitation of an original.
"F in never fatl, when they eopy, to follow the bail
3. To imitate the style, language, or manner of another; to plagiarize.
II. Fig. : To imitate in manners, character, or life ; to endeavour to resemble; to follow a pattern or model. (Frequently followed by the adverb out.)

- Set the examples, end thetr gonla infume

To copy out their great forefather Pisma"*
Dryden : King Arthur
B. Intransitive :

1. To do enything in imitation of an original or pattern; to make a copy.
(1) Followed by from before the thing copied.
hen a painter copias from tho llfa. . . ."-Dryden.
(2) Followed by after.
" Several of oar countrymea. to have copion aftor it in thelr dramatick writing
2. To write down or transcribe the words, Agures, \&c., of another, with the iuteotion of frauduleatly passing them off for one's own
"The temptation presents itself to those slower or
careless menbers of the clam to copy from their quicker clans-jellows"- Ftaron: School Inspection,
If (1) Crahb thus discriminates betrreed to copy and to trunscribe: "To copy respecta the matter; to transcribe respects simply the act of writing. What is coried must be takeo immediately from the original, with which it must exactly correspond ; what is tramscribed may be taken from the cory, but not necesssrily in an entire state. Things are copied for the sake of getting the cootents; they are often transcribed for the sake of clesmess and fair writing. A copier should be very exact; a transcriber should be a good writer. Lawyera cony deeds, and have them afterwards fregnently transeribed as accasiou requires. (Crabb: Eng. Synon.)
(2) For the difference between to copy and to imitate, see lmitste.

* oŏp'-y̌ed, pa. par. or a. [Copied.]
cơp'-y̆-е̌r, s. [Copien.]
©ō'- $\breve{\mathbf{y}}$-hōld, s. \& o. [Eng. copy, sod hold.]
A. As substantive:

Law:

1. (See extract).
"A tenure, for which the temant hath nothing to hhew but the copy of the rolls made by the teward or nose it bolds at the will of the lord; yet not simply, but aceordisg to the exsisum of the masior. These custous of wanors rary, to obe point or other, flmost in every wawor. joun oppy-how the lord rates at what Ante or Inconue be plenser, when the tenant lis admitted Into it: that which is certain, iss. Eind of tnheritance,
and cailed in many places custonary: becutee the and called lo many places customary; beceuse the blood paylug the castomary fine, na two shillings for an acre, or so, cannot be denled hils admlasion" - Cowoel.
2. Projerty held by such tenure.

## B. As adjective:

Law: Held under the tenure described in A. 1 .

T (1) Copyhold Commissioners: The tithe
commissioners acting to cesry ont the Copy hold Act.
(2) Copyhold Inclosure Commissioners: A board formerly existing, bnt now joined the tithe commissioners. (Wharton, dc.)
cobp'-y-hōld-ẽr, \& [Eng. copyhold; er.]

1. Law: One who holds land by the terrure of copyhold.
IT Till the passing of the Act $\in$ Geo. IV., $c$ 50, § 1, copyholders were incapable of sitting on juries; bnd till 2 and $\mathbf{3} \mathbf{W m}$. IV., c. 45, 819 (the Reform Bill) became law, they were not allowed to vote at county elections of members of Parlimment. Then those the annuas value of whose copyhold was $£ 10$ obtained the privilege. Copyholds being the remains af Perdal elavery, the tendency of recent legisla tion has been to sweep away vexatiou restric tiona upon the free action of copyholders, and Act 21 and 22 Vict., c. 94 , which came into operation on Qct. 1,1858 , was designed to facilitate the enfranchisement of copyholds.
2. Printing: A clasp to hold copy while being set up; also a persou who holds copy for a proof-reader.

A. As $p r . p a r$.: In seoses corresponding to those of the verb.
B. As adj.: (See the compounds).
C. As subatantive :
3. The act of making a copy of or transcrib ing an original; initation of a pattern or model.
4. The act of transcribing the words, figures, \&c., of another, with the intention of frandulently passing them off as one's own
copying-book, 4. A book componed of thin blank paper for use in a copying press (q.r.).
oopying-clerk, s. A clerk employed to make copies or letters and other docunients.
copying-inks, s. Ink of a viscid character apecially prepared for use in e copying-press.
oopying-instrament, s. A tracing idstrument, or one for multiplying by manifold process. A silhouette-machine is one for siving, on a reduced scale, the outline of a shadow-portrait. A photograph is used for copying drawiogs an a changed seale.
oopying-paper, $s$. Thin, unsized paper, used damp for taking impressions from writ ings in a copyivg.press. (Knight.)
copying-preses,s. A machine for taking copy of a writing by pressure. The usual system is to write with an ink having a somewhat viscid character, and to expose the writ ten page to pressure in contact with a leaf of bibulous paper. (Knight.)
copying-telegraph, s. An spparatus for automatic telegraphy known as Bonelli's telegraph. The apparatus consista of a dispatching instrument and a receiver at the respective ends of the line. (Knight.)
corp'- ${ }^{\mathbf{y}}$-ist, s. [Eng. copy; -ist.]
5. One who copies or transcribes an original ; a copier.
6. One who imitates in any way; one who follows a pattern or onodel; an innitator.

cơp'-ك゙-right (gh silent), s. [Eug. copy, and right.]
Ord. Lang. Law: The exclusive privilege possessed for a certain time by an author, his heirs or assigns, of printing, reprinting, publish ing, and selling his original litersiry or artistic productions. In the United States authors pubtishers, \&c., caasecure copyright for twenty eight years; and the author, if living, or his widow or childrea, can then secure an extension of the copyright for fourteen yeurs, makiog the final limit forty-two years. 10 Great Britain the first copyright law, that of 1710, fired the time of copyright at fourteen years. Ia 1814 it was extended to twenty-elght years, and did not lapse then till the author's death, if be still lived. By a later act the copyrighlit was exteaded to forty-two yearn, with the additional proviso that it should not lapee till
seven years after the author's death.
Internstional copyright has long existed between some Europesa conntries, hut was oot other countries till 1891, despite the fact thet the injuatice and immorality of the existiag system had loog been generally recognized. The existing lew went into effect July I, 1891 with the provid that its but with the pris wiso that the work must be reclprocal, 8 nd also that the work oa which copyright was sought must be manufactured within the United sates. This provision was adopted for the benefit of American priaters, and is not acceptable to anthors. International copyright now exists between the United States and several other countries, and will, no doubt, become more general.
corp'- ${ }^{\text {y }}$-right ( $g h$ silent), v.t. [Copyrtart, s.] Io aecure the copyright of a book, \&c., by fultilling certain formalities.

## onquelioot, ooquelioo (pron. vonk-11-00),

 3. [Fr.]1. The Wild Poppy or Red Com-rose.
2. The colour of the Wild Poppy, $s$ reddishorange colour.

* oō-quet' (quet as kĕt), s. [Coquette.]
" oó-quet' (quet as keัt), v.t. \& i. [Fr. "coqueter $=$ to swagger or strowte like a cock on his owne dung-bill" (Cotgrave); from $\operatorname{coq}=a$ cock. 1
A. Trans.: To eotertain or ply with complimenta and love-making; to pretend to make love to; to flirt with.
"You are copuetting a mald of honour, my lond,..." "You
- Swivt
B. Introns.: To endebvour through vanity to attract lovers, or at least admirers ; to act the coquette; to flirt.

In paw coguricting $t$, other night
that odious knight."
$\mathbf{0 0}^{\prime}-$ quet-ry̆, $\boldsymbol{o o}^{\prime}-q u e t-t r y ̆$ (quet as kĕt), B. [Fr. coqueterie.] The acting the coquette an endeavour, prompted by vanity, to attract lovers, or at least admirers ; firtation.
".- Femanlo compantous, without a dalh of coguary,
cō-quet'-ta (quet us kĕt), 日. [Etym. doubtful.] A teron occurring oaly in the bubjoined compouod.

## coquetta baric, s.

Pharm.: A name given to fibrous Carthagena bark, from (cinchona lencifolia, which grows in New Granada lt oceurs in quitts or flattered orange-coloured pieces; its powder is orange; it contains quinine, onnch quinidine, also some cinchooine. (Garrod Mat. Medica.)

## oō-quette' (quette as kĕt), * oo-quet',

 \&u. [Fr., from coqueter = to coquet (q.v.).]A. Aa subst.: Originally applied to men as well as to women ; now restricted to the latter One who, prompted by vauity, endeavours by art to gain lovers, or at least admirera ; a vai flirt, a jilt, one who lays herself out for ad miration.
hali of the Restoratios."-Macaulay: lifist. Eng, ch.
${ }^{*}$ B. As adj.: Coquettish; full of or characterized by coquetry.

## Coquet and coy ot once her air:

If Crabb thus discriminates between coquett and jilt : ". . . one miny he a coquet without being a jult. Coruetry is contented with $\mathrm{cm}-$ ploying little arts to excite notice; jilting ex ends to the violation of truth and honour, in order to awaken a passion which it atterwards isappoints. Vanity is the mainspring uy which coquets and juts are impelled to action hut the former indulges her propensity mostly at ber own expense only; but the latter does no less injury to the peace of others than she does to her own reputation." (Crabb: Eng. Synon.)
oō-quet-tĕd (quet as kĕt), pa. par. [CoQUET, $v$.
cō-quet'-ting (quet as kět), pr. par., $\alpha$., \& s. [COQUET, v.]
A. \& B. As pr. par, \& particip. adj. : (See the verb).
C. As subst. : The conduct or habita of a coquette; coquetry.
boll, bof ; pout, jowl; cat, çoll, ohorus, çhin, bexich; go, gem; thin, this; sin, ayp expeot, Xenophon, ea̧ist. -ing.

©o-quet-tish (quet as kět), a [Eng. pertaining to a coquette; acting like a coquette; vain, flirting, light.

cö-quet'-tigh-iy (quet as kĕt), adv. [Eng. coquettish; -ly.] In a coquettish manner.
cö-quil'-la, a [Port. coquitho = a little cocoa nut (\%).] (For definition see the compound.)
coquilla-nuts, s. pl. The aceds of Attalea funifera, a Brazilian palm-tree. They are three to four inches long and very hard, and are used for various purposes in turnery, especially for making the handles of nmbrellas, of doore, de.
cō-quim'-bite, s. [Ger. coquimbit, from Coquimbo, a department or province of Chill in which it occurs.]
Min.: A hexagonal mineral with a hardness of $2-2 \cdot 3$, a sp . gr. of $2-2 \cdot 1$, a white, yellow, brown, or alightly violet colour, and an astringent taste. Compos.: Sulphuric acid, 42.7 aesquioxide of iron, $28 \cdot 5$; water, $28 \cdot 8=100$. (Dana.)
có-quî-tō, s. [Spanlah, dim. of coco (q.v.).] Bot. : A palm, Jubra spectabilis.
oor (1), s. [Fr.] A horn.
I (1) Cor de chasse: A hunting horn. (Fr.) (2) Cor de vaches: Cow-horn, used in many placea abroad to call the cattle home, and formerly employed in England to rouse the labourers to their work. (Fr.) (Stainer © Barrett.)
t cor (2), s. [Lat.] The heart
$\dagger$ (1) Cor Caroli (the Heart of Charles):
Astron.: A name given by Halley, th memory of Charlea 1., to a atar of the third, or intermediate between the second and third, magnitude, situated on the neck of the Lower Dog in the constellation Canes Venatici (the Hunting Dogs). When symbolically drawn, it was represented as a heart surmounted by a crown.
(2) Cor Hydrae (the Fydra's Heart):

Astron. : The atar better known by the name of a Hydre.
(3) Cor Leonis (the Lion's Heart):

Astron.: The name of the star a Leonia, enerally known as Regulus, the bright atar in the zodiacal constellation Leo, the Lion.
(4) Cor Serpentis (the Serpent's Heart):

Astron.: The star Unukalkay, also called a Serpentis.
cor (3), s. [Heb. ํ. (kor), from 7 ำ $($ karar $)=$ to assume the form of a circle or sphere, to be round. Cor therefora ia so called from the circular form of the vessel in which the measurement was nade. 1 A Hebrew measure of capacity, containing $11 \frac{1}{2}$ bushela; a homer
or ormer. Cor occurs in Ezek. xlv. 14. In the original it is found also in 1 Kings iv. 22, v. 11,2 Chron. ii. 10, xxvii. 5 ; Ezra vii. 22 , being alwaya tranalated "ineasura." The Hebrew cor (kor) has had assigned it as ita Greek equivalent кópos (koros), which occurs in Luke xvi. 7, where it is rendered measures.
"Concernlng the ordinance of oil, the bath of oll, Ye bhall offer the tenth part of a bath out of the cor: homer."-Ezek. xiv. is
-ŏr-a-çi'-a-dæ, s. pl. [CORACHDR.]
oŏr-ā'-çi-as, s. [Gr. каракias (korakias) $=$ like a raven or a crow; Lat. corax (geuit. coracis); Gr. xópag (korax), genit. кópakas (korakos) = a raven or crow.]
Ornith. : Tha typical genus of the family Coraciifle and the aub-family Coraciine (q.v.). ooracias garrula is the common Roller. It has the head, neck, breast, and belly various ahades of verditer-blue changing to pale green, the shonldera azure-blue, the back reddiahbrown, the rimp purple, the primaries of the wings dark bluish-black with a lighter edge, he tall-feathers greenish-blue, the outer ones unged with black. The length ia sbout thirteen inches. The common Roller is found throughout Europe, but its apecial hahitation is in Africa. It has been occasionaily killed in Britain, as a visitant from the South. Ita
favourite habitats are forests of oak and birch.
 [From Mod. Lat. coracias, and fem. pl. adj. auff. -ides.]
Ornith.: Rollers; a famlly of fissiroatral birds, though presentling some conalderable afinity also to both the cooirostral and dentrorostral tribes. They hava a long lisll, broad at the base and compreased towards the tip, at the base and compreased towards the tip, sour sub-familiea: Momotinæ, the Motmots; Tour sub-finmiliea: Momotinæ, the tiea; Eurylaimine, the Broadbills; and the Coraciine or Rollers proper.
 and pl. auff. ince.]
Ornithology:
t I. Fruit Crows. In Bwainson's classificstlon of birds, a auh-family of Corvidæ (Crowe) having for ita type Coracina ( $q . v$.). Thaterm is not now much uaed, as being liable to be confonnded with [2] (q.v.).
2. True Rollers, the typical anb-famlly of Coraciidæ (q.v.), of which Coracias la the type.
corr-a-çi'-na, s. [Lat. corax (genlt, coracis) ; Gr. ко́pal (korax), genit. ко́paxos (korakos) =a reven or crow.]

Ornith.: A genus of birds, the typical one of Swainson'a aub-family Coracinge [1] (q.v.). by short thick feathers.
corr'-a-çite, a. (From Lat. corax (genit. corocis) = a raven or crow; ao named from its pitchy blackneas.]
Mfin.: A variaty of uraminite. Hardnesa, 4.5 ; sp. gr., 438 . It is believed to be pitchblande mixed with some gummite. It is found on the north ahore of Lake Superior in a vein two inches wide, occurring near the junction of trap and ayenite.
obr'-a-cle, s. [Wel. corwgl, cwrwgl, dim. of corvog a a trunk, a carcasa ; cwrwg $=$ a framo or boat.] A kind of boat in use amongst

coracle.
fishermen, from the escliest times, in Wales and parta of Ireland, and conuposed of a frame of wickerwork covered with leather or oiled cloth. It ia light, and capable of being carried on the ahoulders by one man.
the" skins of coracles of whokerwork covered with ch xrl .
cor'a-cō, in compos. only. [Gr. (in compos.) корака (korako), as in корако-etoj̀s (korakoeidēs) = like a raven; кópaç (korax), genit. ко́ракоs (korakos) = a raven or crow.]
Anal. : Hooked like the extremity of a crow's bill, as the coraco-acromial, clavictlar and humeral ligaments, and the coraco-brachialis muscle.
cor'-a-coid, a. \& s. [Gr. корахш́dins (korakōdés), корахо-ctorns (2orako-idès) = like a raven, of the ravea kind : ко́pa $\xi$ (korax), genit. ко́ракоя $($ korakos $)=$ a raven or crow, and eibos (eidos) $=$ form, appearanca.]
A. As adjective:

1. Hook-like, in this reapect resembling the extrempity of a crow or raven's bill ; as the coracoid process of the acapula.
2. Pertaining to the coracold process or bone.
B. As substantive:
3. Human Anat. : The coracoid process.
4. Compar. Anat. : A aeparate bone, which in hirds, reptiles, and monotremes entera into the composition of the pectoral arch, though

In most ouammals it is reduced to a mere pro cess of the acapula. (Nicholson.)
coracold bone, s. The same as CoraCoID, 8. (q.v.).
coracold procens, 8. A short hook separated by a strong groove from the edge of the gledoid. (Trans. Amer. Philos. Soc., vol. xiii., p. 199, 1873).

- Cor'-ase, s. [Couraaz.]
*oor'age, v.l. [Courrac.] To encourage, to cheer.] (Heywood.)

## * cor-a-geus, a. [Couraozous.]

- cor-a'-jiō, s. [ltal.] Courage.
"Bravely, conagoo 1"
cor-a-gous, coraious, $a$, [Couratazous,
cor'al, co-rale, co-rall, co-ralle. 8. \& a. [O. Fr., from Lat. corallum, corallium; Gr. корá入入cov (korallion) $=$ coral; Fr. corail;
Ital. corallo; Sp. coral.]
A. As substantive:
I. Ordinary Language:
I. In the same aense as II.
"Thousands of yeary in Indino rene

2. A piece of the aubstance described in II. hung round the necka of infants for them to bite with their gume whilst teething.

A spoiled child ha threw hin coral and belia at my II. Geology:

1. Gen.: The calcareous polypidom or akeleton of Polypee or Zoophytes. (Grifith \& Henfrey.)
2. Spec.: The polypidom or akeleton of the species helonging to the genus Corallium (q.v.). (Grifith \& Henfrey.)

I (1) Black Corals :
Zool: Corals of the aub-order Zoantharia Sclerobasica, and the family Antipathide, They are composite animals, consisting of a number of polypea united by s thin feshy coenosarc, either almple or anpported by an axis or sclerobase. The corallum or skeleton is horny and not calcareous.
(2) Cup Corals:

Zool.: A name for the family Cysthophyllide (q.v.).
(3) Organ Coral:

Zool. : Trubipora musica.
(4) Red Coral (Corollium rubrum):

Zool.: The red coral of commerce is brought from the Mediterranean, where it livea chlefly at depthe of five or aix fathoms, though it has been found at 120 or more fathoms. [Conalr Lirm.]
B. As adjective:

1. Made of coral.

> Or eneal twia bearanth the deep Their coral tomh.
2. Consisting of or full of coral.

Darwin': Poyused the death of thowe corat-groven."p. 461.
3. Of the colour of coral ; red or pink.
"A corall lip oi hue."
II Obvious compounds : Coral-paven, coralproducing, coral-structure.

## ooral berry, s.

Bot.: An American name for Symphoricarpue ivilgaris.
coral insect, s. The inaccurate name given by many popular writera and apeakera to the little animala which, aggregated in countless multitudea, rear the vast coral reefs so frequent in the tropics. Theas animals are, however, of lower organisation than inaects. They ahould be called coral polypea, or coral zoophytes, or corai buildera, or coral animals, but never coral insects. [Actinozoa.]
coral island, s. An ialand made in large the kind.
coral islet, s. An islet formed by corals.

coral-mud, s. The mud produced by the decomposition of coral. It ia carried some

[^187]datance out to sea by currenta．Lisutenant Nelaon ahowed that the mud thus derived from the Bermudian coral reefa was undistinguish－ able in appesrance from chalk．

coral polype，s．An anthozoon．
coral rag，s．
Geol．：A limestone of middla Oolitic age，so called because it conslats in parts of continu． ous beds of foasil coral，for the most part ra－ taining the poaition la which they grew at tha bottom of the sea．Sometimes tha masa is fifteen feet thick．Leading genera：Cary－ ophyllia，Agaricia，and Astrea．Ths coral rag extends through tha calcareons hiliss of tha north－weat of Berkshire and ths north of Wiltshire，recurring at Scarborongh in York－ shire．

## coral－reef，coral reef，$s$.

1．Ord．Lang．© Geol．：A reef consiating to considsrable extent，though not exclusively， of coral．The stony skelatena of eoophytes form large masses of limestone，and thesg， with ahells，fragmenta of echini，sc．become with ahells，fragmenta of echim，ac，becoms cemsnted together hy carbonats or hins，de rived probably from the dscomposition of desd corals．Sometimes there are masses of thas aecondary limestons；thess could have besn derived only from chamical precipita－ tion．Mr．Darwin divides coral reefa into three kinds－（1）the annular or lagoon reet， generaliy called an atoll，（2）the sncircling or barriar reet，and（3）the fringing or skirt－ ing reef．The firat two are found only where subsideace is in progress．For ths construc－ tion of the first seg atoll．Ao encircling reef，that is ons eacireling an island at soms dietance from the shore，is found in an ares of subsidence where ths central meuntain or bigh land has not yet disappesred beneath high land has not yet dizappeared beneath the ocess．Allow tims enough，with this con tinnancs meanwhils of the present conditions， and the encircling reef will becema an atoli． A harrier reef－the best knewn exampla of which is ons running paralisl to the north－ east coast of Australia for 1,000 miles， 350 of them without a break，is a portion of what， if complete，would be an encircling reef．A fringing reef，close to tbe shore of a volcanic laland，again is produced by tha elevation of the srea，which converted into dry land tha narrow chsnnel by which it was at one tima separated frem ths shore．The Dangereus and Society Archipelagoes ars areas of suhsidencs with atolls，as，it may be presumed，is ths cass with the Bermuda lsiands，the only apecimen in the Atlantic of an atoli．The grest Australian harrier reef has alresdy been grest Australign he New Hehrides，Solomon mentioned．The New Hehrides，Somimon tringing recfs．Slow upheaval is in progress fringing recfs．Slow upheav
in that portion of tha Pacific．
2．Pabcont．：The reefs of Palæozoic times， if they be werthy of the name of rects，were bulit up hy Rugose Corals．From the Mo－ gozoic times till now the chief recf－huilders have heen the fanilies Astreidæ，Poritide， and Madreporidæ，the Oculinidæ and Fungia taking a icsser share in the work．Coml reefs are evidences of the proximity of laud．
II Coral－reef region：The region where recf－ besring corals liva．It extends only about 1,800 miles on each side from the equator， except in the case of Bermuds，which lips in the hot waters of the Gnlf Strean ； $66^{\circ}$ or more is the temperature of the sea benesth which corsls will not live．

cor'-oy-lŭm (Lat.), toor'-cle, t cor'-oyle (Eng.), e. [Lat. $=$ a little heart, dimin, of cor $=$ the heart.]

Botany :

1. The embryo.
2. The smali axis of growth in such dicotyledonous embryos as the walnut. (Treas. of Bot.)
cord (I), * coorde, carde (I), s. \& a. 10 . Fr. 齿 Fr. cordb; lital. corda, from Low Lat, corda =s cord; Lat. chorda; Gr. Xopor (chorde) $=$ the string of a mustcal instrument. Thus cord and chord are but different forms of the same word.] [CHosd.]
A. As substantive:
I. Ordinary Language:
3. Literally:
(i) A swall rope or string composed of several atrands or $t$ wists.
"The arman of the prisoner were boond behind him (2) In the same sense as II. 3. (Colloquial.) (3) (Pl.) : A suit of clothes made of conduroy. *(4) A large sinew.
"Cordes or greats sinnowes of the bodye Tomalinas,
4. Fig.: Any thing which acts as a bond morally in the same way that a cord does physically; s moral tie, restraint, or attraction. -"Pror. he mhall be bollen with the cords of his sinin"
II. Technically:
*I. Music: The string of a musical instrument, now written chord (q.v.).
5. Veterinary (Pl.): A contraction of the muscles of the neck; a lisease of horses.
"The cords, sthe ocut-evil, the ciaspa \& the clelks,"
6. Timber: A measure or quantity of wood, so called from having been originally meaaured with a cord of a certain length. It is a pile 3 feet long, 4 feet high, and 4 feet broad, pud containe 128 cubic feet.
 "imber excluatve of the very large growth of pluere are $1,250,000$ cords of varl4. Fabrics: The same as Cosduroy (q.v.).
7. Weaving: The alace of the design-laper conftned by two vertical linea; also, the string which connecta the neck-twines at the leaf. (Knight.)
8. Anat. : [Spinal comd].
$\because$ Having so far determined the functions of the ontire cord. "- Todd \& Bovman : Phyziol. Anat., vol.
i., ch. fio., p. 16.
B. As adject
9. Made of amall rope or string.
10. Made of corduroy.

TI Obvious compound: Cord-maker.
Cord-covering machine: A machine in which a cord recelves a covering of thread or silk; when this is plaited on it constitutea braiding. (Kright.)
oord-dryer, s. A machne for drying sized or dyed cords, webbing-tapes, dc.
oord-grass, s. [Prior anya that it was so named by Turner, becanse he saw the natives of East Friealand thatch their houses with ropes made of it. (Britten \& Holland.) A grass, Spartina stricta.

## cord-moss, s.

Dot. : Funaria hygometrica.
cord-wood, s. Wood plled up ready to be sold by the cord. In Scotland, wood conveyed to market on board of vessels, as diatinguished from wood thoted down a river.

* cord (2), * corde (2), s. [A contraction of accord (q.v.).] Accord, agreement.
"By word and cord."-Aliaxunder, 411.
cord (1), v.t. [СоНD (1) , s.] I. Ordinary Language:

1. To fasten round or tie with a cord.
2. To make or conatruct of cords.
"And with a corrdot ladder fetch her downe", + II. Timber: To plle up wood for measure ment or sale by the cord.
cord (2), corde v.i. [a contraction of accord, v . (q.v.).] To accord, to sgres.
"The word mot corde with the thing Forkyng";
cord'-s'ese, s. [FT.]
3. Literally:
4. A quantity of ropes or cords; ropes or cords collectively.
buthinat: ©ordgoge nad other parts of shipplng." ${ }^{-1 n}$
$\dagger$ 2. A strand of a rope.
"And the rope, with fts t wisted cordage three,
Longfellow : Godden Legsnd, ti.
5. The ropes or rigging of a ship.

$\dagger$ II. Fig. : Anything reaembling a quantity of cords, as the tendrila of a vine, \&c.

- Haaghng loose from their apars in a motionleas calm in the tropica grape-vines."
cor-dē-1'-tēş, s. [Named after Corda, a dis. tinguished fossil botanist ; with Gr. suff. -tтทs (-ites).]
Paloont.: A genus of fossil vegetablea, either a gymnosperm or a lycopodiaceous plant. It has broad, otriated, parallel veined leaver. It is found both in the Devonian and in the Carboniferons rocks. Some bave thought that the small fruit calied, from ity form, Cardiocarpon, belongs to Cordaitea, but this ia doubtful.
cord'-al, s. [Fr. cordaille.]
Her.: A atring of the mantle or robe of estate, composed of silk and gold threads, twisted like a cord, and having a taasel at the end.
cord-ale, s. [Fr. cordaille.] The cordage or tackling of a ship.
v. "Ane anker \& tua cordali."."-Aberd. Reg. A. (1548),
oor'-dāte, cor'-dāt-ĕd, a. [Lat. cor (genit. cordis)

> Botany, Zoology, \&c.:
+I. (Of the form cordated): Heart-shaped, applied to plane or to solid bodies [2].
$\cdots$ The young hirds fary in heving oo thoir hressts Brit. Zooh; Oentil falcon.
2. Heart-shaped, having two round lovea at the base, the whole resembliog the heart in a pack of cards. lt is used of plane surfaces, and is now discrininated from Cordiform (q.v.).
cor'-dāte-1̆y, $\alpha d v$. [Eng. cordate; -ly.] In a cordate manner or form.
cor-d̄̄'tō, in compos. [Lat. cordatus.] [ConDATE.]

## cordato-hastate, $a$.

Bot. : Between hastate (i.e., apear-shaped) and cordate, but nearer the former.

## cordato-ovate, $a$.

Bot. : Between ovate (i.e., egg-ahaped) and cordate, but nearer the former.

## cordato-sagittate, $a$.

Bot. : Betwect sagit tate (i.e., of the form of an arrow-head) and cordate, but nearer the former.
cord-ěd (I), pa. par. or a. [Cord (I), v.]
A. As pa. par. : (See the verb).
B. As adjective :
I. Ordinary Language:
I. Tied or fastened with cords.
2. Made or composed of cords.
3. Piled up for sale by the cord.
4. Grooved or furrowed, as corduroy.
11. Her.: Bound or wound round with cords.

* cord'-ĕd (2), pa. war. or a. [Cond (2), v.] corded fabric, $s$.
I. A fabric having a pile which is cnt in ribs in the direction of the length of the warp, as corduroy.

2. A fabric having alternate larger and swailer threads, either in the weft or the warp, so as to give a ribbed or corded surface. (Knight.)
cordeler, ${ }^{2}$. [Fr. "cordelitire $=$ knotted
cord-worke in smbroidery" (Cotgrave).] For def. see etym.
cordelerls lonotitis, epl. An ornament in embroldery anclently worn by ladios in Scotisnd.

cor-děl'-iër, s. [Fr. condelier, from cordelicre = the cord which he wore; from O. Fr. cordel, Fr. condeau $=$ a cord, a girdle.]
3. Ch. Hist. \& Ecclestol. (pl.): A fratarnity of monks helonging to the order of St. Francis. They arose in the 1sth century. They wore a brown or black habit with a mantle and hood of the aame colour, and around their waist a cord of three knota. [Etym.] They sre called also Friars Minor, snd were the strictest branch of the Franciscans. They are mentioned in the Romaunt of the Rose. [FeancisCans.]

And who to aneist but ${ }^{\text {grave condelise"" }}$ Prior: The Thie' and Cordetier.
2. Civil Hist. (pl.): A political clab which during the first French revolation met in a chapel which had been built by the Cordeliers [1.] It was formed In December, 1700, Danton bcing its first president. It took part in executing all the violent measures to which the extreme revolutionists had recourse, and in some cases was the first public body to demand them. It was dissolved in 1794, and several of its nembers executed.
3. Rope-making: A machine for rope-making invented by Mr. Cartwright. (Rossiter.)
$\operatorname{cor}^{\prime}$ dell-ing, cor'-del-lingg, a. [Fr. cordeler $=$ to twist.] Twisting.
cord-ělle', s. [Fr., dinin. of corde $=$ a cord.] 1. A cord or tassel.
2. A tow-rope of a barge, \&c.
"By onss, sails,
Fint, in Weoster.

* corde'-mĕnt, s. [Mid. Eug. corde (2), v. ; -ment.] Agreetuent, concord, harmony
"A cordement: concordia, concordancio."-Cathot Anglicum
oord'-ẽr, s. [Eng. cord; -er.]
Sewing-machine: A device for laying cords between fabrics, or cords or braids on the surface of a fabric.
* oor-de-van, cor-de-wane, * oor-dewayne, * cor-do-wan, s. \& a. [CoRdwain.]
A. As subst. : Spanish leather from Cordova. "His schoon of condowane."
Chaucer: The Tale of Sir Thop
B. As adj. : Made of Spanish leather.
oor'di-a, s. [Named by plumier after E. Cordus, a German botanist of the sixtcenth century.]
Bot.: A gemus of plants, the typical one of the order Cordiacea (q.v.). The corolla, which is funnel-shaped or campannlate, has a flat $5-7$ cleft limb; the staniens are 5 ; the style bifid, with 4 stigmas; the ovary $3-4$ celled; drupe 1 or 3 celled, only 1 perfect; seed 1 . The fruit is aucculent, mucilaginous, and emolifient. That of Cordia Myxa and C. Iatifolia is eaton by the natives of lndia, as are the drupes of C. abyssinica by the Abyssinians, who call it wanzey or vanzey. The wood of C. Myxa is said to have furnished the wood fron which the Egyptiana made their mummy cases. The bark is a mild tonic. C. Rumphii has a brown black-veined wood smelling of musk, and C. Gerasacanthus, the wood of economic value. About 200 species of cordia are known. [Cordiaceen]
cor-d1- $\overline{\mathbf{a}}^{\prime}$ ceé- $\boldsymbol{m}_{\text {, 3. }}^{2}$ pl. [Mod. Lat. cordia, and fem. pi. aud. suft. -acere. I

Bot. : An order or sub-order of perigynous exogens, alliance Solanales. It is most closely akin to the Boraglnacem, and next to the Convolvulacer. It conaists of trees with alternate harsh acabrous exstipulate leaves; calyx inferior 4-5 toothed; corolla monope talons 4-7 cleft; stamens 4-5; ovary 4-8 celled, each with 1 pendulans ovale. Fruit, 8 drupe 4-3 celled. The species are found in the tropics of both hemispherea, in South America atraggling into more temperate latitudes. In 1845, Lindley enumerated eleven genera, and estimated the known species st

180. But 200 species of Cordia itself are now known. Mr. Carruthers, F.R.S., makes the Cordiacem a aub-order of Boragnacew.
cor'-di-al, * cor'-di-\&ll, a. \& \& [Fr. \& Sp.; Itsl. cordiale; Low Lat. cordialis spertaining to the heart, from Lat. cor (genit. cordis) $=$ the heart.]
A. As adjective:

1. Cheering or comforting the heart; reviving, invigorative, restorative.
" He oniy took condlal waters, in wbleb we infuned ometimea purgutiven "- Fisman : Aurgery.
2. Proceeding from the heart; sincere, earnest, hearty.
support rave them on almost bvery occaulon a condial 3. Warm, affectionate, hearty, sincere, with ont hypocrisy.
"That our most bitter fcen (so much depends
On men of name) are turned to complaitriiends"
B. As substantive:
I. Ord. Lang.: Anything which tends to cheer or comfort the spirits.
"O cordial delicloun : 0 sootber of pain $1^{-}$
II. Technically:
3. Comm: An aromatized and swsetened spirit, employed as a beverage.
4. Medicine:
(1) A medicine which increases the force of the heart, or strengthens the circulation.
(2) A medicine given to restore or iucrease the atrength, to revive the spirits, and generally to cheer and comfort a person in a stata of depreasion.

Many Restoratived of vertues rare,
And costly Cordialiee she did mpplic.
\# For the difference between cordial sud hearty, zee Heabty.

oöre (1), s. [O. Fr. cor, cuer; Fr. cour ; Ital. cuore, from Lat. cor $=$ the heart.]
A. Ordinary Language:
L. Literally:

* 1 . The heart.
 2. The hesrt or inuermost part of anything "Core of fruta. Arula."-Prompl. Porv.
II. Figuratively:

1. An internal foundation or bamis.
[^189]
## paicie that bypothois in aurs to be dixalpoted it it

2. The innermost or deepest part of anything; the essence.
"Li I approcech the core of my hartia gried"

- 3. A centre or central part.

B. Technically :

1. Arch. \& Masonry: The loner portion or Glling of a wall.
2. Founding:
(1) An internal mould which forms the interior of a cylinder, tube, pipe, fancet, or other hollow casting. It is made of various proportiona of new sand, loam, and horsedung. It requirea to be thoroughly dried, and when containing horse-dung minat be buraed to a red-heat, to conaume the atrew. This makea it poroua and of a brick-red colour. The core la made in a core-box, and has proThe core la made in a core-box, and has projecting portions, known as core-prints, which reat in the prints of the mould. The model makes an impression, partly in the cope and partly in the drag. When the pattern la removed, the core ia laid in ita place, the projecting portions resting in the receases made by the printa of the pattern. Touching the loam of the mould st no other point, it occupiea, in the case of a pipe, a central poaition in the space which is to be run full of metal. When the metal has been poured around it and then cooled, the core is broken out, leaving the casting hollow. Simple corea are those which do not prevent the delivery of the cope and drag, that is, which have no undercope and drag, that is, which have no underof the flask from belng parted in the usual way.
(2) A central piece occupying an axial position within a circular aperture at which clay or lead exudes in the procesa of making earthenware or leaden pipes. The core gives the inside ahape to the pipe. (Knight.)
3. Surgery: The heart or inncrmost part of 10 ulcer or boil.
"Launce the sore,
And cut the head; for, tili the core be fonnd
The secret, vice is fed, and gathere ground. "Firgil.
4. Veterinary: A diaease in aheep caused by worms in the liver.
5. Submarine Telegraphy: The conducting wires in the heart of the cable. They are twisted in a apiral atrand and covered with zeveral layers of gutta-percha, between each several layere or gutta-percha, between each of which ia a coating of Chatterton'a com-
pound -a mixture of tar, resin, and gutta-pound-a mixture
6. Electro-magnetism: A solld bar of iroo aronnd which a helix or apiral is wound.
c. ". is the cores of electro-mngnels."."Everett: Tho
7. Rope-making: The central strand around which four other strands are twisted in a ohroud hawser-laid rope.
8. Hydr. Eng. : A wall or structure absolutely impervioua to water, placed in an embankment or dike to prevent the percolation of water, which may penetrste the porous material of which the remainder of the dike ia composed. The core may be of puddle or a wall laid in hydraulic cement. (Knight.)
core-bar, s. The bar or apindle which supports the core of a shell.

core-box plane.
divisible box in which clay is rammed to form cores.

Core-box plane: A peculiar form of plane which has a cutting thoth projecting below the sole, to plough grooves in the parts of a core-box. It is commonly known among carpenters as "the old woman's tooth."
core-print, s. A yrojecting piece on a pattern for moulding, to form a hole in the mould to receive the end of the cors by which it is sustained in the monld in proper peaition relatively to the object cast. (Knight.)
core-valve, s. A plug-valve which has a rotary reciprocation iu a cylindrical or hollow
conical seat, occupylog about the same relative
poaition to ita seat as the core of a faucet does to the casting itself.

I. Ordinary Language

1. Lit. : A native of Corinth

* 2. Fig.: A debanchee ; a licentious charscter ; a wencher.

Corinthian, e lad of mettle, a sood boy. ...."

## II. Seripture canon:

St. Paul's First and Second Emistles to the Corinthians: Two well-known epiatlea formiug lart of the New Testament.
(1) Corinth and its Church: Corinth was a celebrated city, aituated on the istlimus separating the Peloponnesus from the mainland of Greece, and with a lofty aad extensiva citadel, the Acrocorintlins, kecping wateh over the sechrity of the plain below. The lsthmian games were held in the vicinity. Commerce had made the city wealthy, aikl wealth had readered it cormpt, Courtesans $s$ warmed in it everywhere, and the Greek verb
 impurity of a gross kind. Some improvement had taken place sinee the old Greek city had given way to the Roman one founded by Julins Casar ; but still the moral reputation of the placo was low. It, however, stood high intellectually. Two visits of the A postle praid to Corinth ere described in the Acta of tho Apostles. During the first of these residences in Corinth, which continued for ahout eighteen months, from A.D. 51 to A.n. 53 , he foundei the Christian Church there. the inajarity
of the comverts being Gentiles (Acts xviii.

1-18). Afterwarda the eloquent Apollos took op the work (Aets xix. 1). The-second re leas Including Coriath, continued threemonth (Acts xx. 3); but an onrecorded visit seems also to have 'been mande (2 Corr: xil. 14, xiij. 1). Thers is come reason to believs thet there may elao have been on eplstle, now lost, earlier elao have been en epistle, now lost, carler
than the two which form part of the canon than the two
(I Cor. $v, 9$ ).
(2) The two canonical epistles to the Corinthfans:' The external and internal evidence that these two epistles emanated from St. Paul ia so atrong that it convinced aven the sceptical mind, of Dr: Fordinand Chriatian Banr, who, allowing oaly four of the cpistles attributed to St. Paul to have been really hik, placed the thians, and Romans, and tha order In which thians, and Romane, and tha order in which
they are now given is that in which, in his they are now given is that in which, in his
viaw, they were issued at first. The probable viaw, they were issued at first. The probable
date of the two epistles to the Corinthians is date of the two epistles to the Corinthians is
A.D. the first haviag been written from Ephesus (I Cor. xvi. 8), and the eecond a few montins later from Macedonia (2 Cor. 1. 16, viii. 1, ix. 4, xi. 9). The aubtlety of the Greek mind and other canses had produced divisions in the Church of Coriath, and four parties had arisen, ona of Panl, one of Apolloa, ona of Cephas, and ona of Christ. The first doubt less believed in the high apostolio dignity of St. Paul, and being mainly Gentlle, approved of his casting off the burdensome yoka of Judaism. The party of Cephas, consisting of Judaizing Christians, depreciated the author-
ity of St. Panl, repreaenting hia call to ity of St. Panl, representing hia call to in character. The party of Apollea was probably in its essence Panline, but with more of that wisdom of the world which Paul had ignored at Corinth ( 1 Cor. i. 18-24). The party of Christ may have begun by professing to rise above all sects and cuded by becoming lack of Christian love wlich they produced, there wers other matters for censure. A case of incest had been discovered, yet the perpetrator of the offence had been allowed to had also arisen in connexion with the IIoly had also arisen in connexion with the loly Comminion. Thare was serious error the dead being called in question by eome. The Apostle in the First Epiatle combats these errors with great eloquence and power. In hia Becoed Epiatle he welcomes back to the fold the now peniteat delinguent whose expulsion he had counselled, and anew vindicates his apostollo anthority.

Corinthian brass, s. An alloy of gold, Bilver, and copper, so called from the fact that at the burning of Corinth many statues made of these metsis were melted together. (Weale.) [Brass.]

* coriour, a. [Curbier.]
có-ris, s. [Gr. кópıs (koris) = a bug . . . a plant-a kied of St. John's-wort. This is aot the modern botanical genus Coria.]
Bot. : A genus of perigynous exogena; orler Priniulacex, family Primulide. It is a branched herbaceons ahrub, with alternats linear coriaceous leaves; flowers in dense terminal spiked racemes, and globose capsules with five valves and five aceds. Coris monswith five valves and five seeds, coris mons-
peliensis, dried and reduced to powder, was peliensis, dried and rednced to powder, wns

Tarner: Albioni: Eniland, ik. Hi., eh. xvi.
corik (1), oorke, a. \& a. [Sp. corcho; Dut. cortex = bark.]
A. As substantive:
I. Ordinary Ianguage:

1. Literally:
(1) In the same aense as II.
(2) A amall stopper for a bottle or cask, made of the substance described in II.
"Prior had paseel his boyhood in draw fug corks at a
(3) The float used by anglers.
2. Figuratively:
(1) A cant torm for an overseer, a steward. (scotch.)
(2) A name given by operstive weavers to he agents of nanufacturers. (Scotch.)
II. Technically:
3. Betany a Commerce:
(1) Spec.: The outer layer of bark of the Cork Oak (Quercus Suber). It is a very elastic tissue consisting of thin-walled nearly cuhical cells. It does not peel off, but often containg long clefts. It forms a protertion to the subjacent celie from injurious influences.
(2) Gen.: The suberous layer of the bark of other trees when greatly doveloped.
4. Chem.: Cork twice beiled with elcohoi about 10 per cent. diasoived. The extract deposited Cerin, $\mathrm{C}_{17} \mathrm{H}_{28} \mathrm{O}$, a white substance meiting at $100^{\circ}$, then an amorphous acid melting at $88^{\circ}$, called decacryiic acid, $\mathrm{C}_{10} \mathrm{H} \mathrm{HO}_{2}$; afterwards, on further evaporation, a fatty substance meiting at $150^{\circ}$ was deposited, substance medy, $\mathrm{C}_{24} \mathrm{H}_{36} \mathrm{O}_{3}$. The remsinder of the liquid, evaporated to dryness, left a mass which, repeatedly boiled with water, yielded to that liquid a tannic seid, separating from to that liquad aqueos solution in dark red flocks. Its the aqueous solution in fition forms with gelatine a yellow, with tartar emetic a brown, precipstate, and reduces an ammoniacal silver solution in the colld. Potash snd ammonia colour its solution red, baryta water gives a dark celoured precinitate. The calcium sait lias the formula $\left(\mathrm{C}_{27} \mathrm{H}_{21} \mathrm{O}_{17}\right)_{2} \cdot \mathrm{Ca}+\mathrm{SH}_{2} \mathrm{O}$. The squeous extract when further evaporated deposited a redbrown precipitate cailed corticic acid. Tho portion insoluble in water of the residue obtained by evaporating the original aicoholic extract had nearly the appearance of the originai cork substance; it dissolved essily and almost completely in boiling alcohol, and partly serarated on cooling as a jeily. Its partly senarated on cooling as a jelly. and alooholice solution evaporated. The paper, and penetrated the yaper like fat.
cork insolubie in sleohol is called suberin, which is a modificd form of cellulose. Cork oxicised with nitric acid yields oxslic, surberic, and ceric scids. (Watts : Dict. Chem. \&c.)
B. As adj.: Pertaining to or made of cork. When you fish, thus, -user
Watton: Angler, p. i , ch. xii.
I Mountaix cork:
Min. : A variety of asbestos light enough to swim on water. It is found in veins in eerpentine. It eccurs in scotland, Norway, Saxony, Spain, de.
" cork-brained, * corkebraind, $a$. Empty, or light-headed.

## "Why you thall eee an upatart corksesraind Jacke <br> Whil beare ive hundrod akers on his backa Works.

* coric-braine, s. An empty or lightheaded fellow.
Wor출 (1830). .
oork-alaep, s. A wirs attached to the neck of \& bottle, and holiting down the cork. (Knight.)

## corle-cutter, s.

1. One whoae trade is the cutting of cork for verious purposes.
2. A machine for cutting corks for bottles.

Cork-cutter's knife: A knife with a very thin and sharp blade about six inches long ani tapering, with a truncated end. it is constantly whetted upon the board from which rises the stake on which the cork reats during cutting. (Knight.)
cork-fancet, s. A faucet adapted to be inserted throogh e cork, to draw the contenta of a bottle. [BotTLe-FAvcet.] (Knight.)
oork-jacket, s. A jacket lined with cork for the parpose of sustaining the wearer on the surface of the water.
coric-machine, s. A machine which produces a cleanly cut cork, usually of cylindrical form, tha tapering form being after wards given by pressure. The knifa of the machine cnts a perfect arc ; the machine drops the cork into one receptacle and the ebsuvings inte another, and the hone instantiy sharpens the knife for farther work. (Knight.)
cork-press, s. A press in which a cork, previonsly wetted, is rendered elastic, to enable previously wettedily to enter the neck of a bottie In ona form, the cork is placed bebottie. In ona form, the cork is paced and tween the serrated surfaces of centric cam, and pressed to a less or the eccentric cam, and pressed to a less or greater extent by s partisl rotation of the
latter. Another form is a icver press with jaws.
cork-pall, s. A substitute for a corkscrew, having liooks or fangs which clasp a cork when in the bottle and draw it thence. The jaws, while coilapsed by the slide, sre passed through the neck of the bottle, and, being opened, are then clasped around tha cork by the motion of the slide, and the cork with ita retractor is drswn from the bottle. (Knight.)
oork-tissues, s. pl.
Bot. : The vegetable tissues of which cork is composed. (See the extract.)
"In direct contrast to the generating tigsues are the henling tigsues, suberons tissues or cork-tistues
Two kinds of the tissue are distluguished, true cork or suber, and periderm . . "-Thome: Bot. (transi. by Bennett, 1879), p. 43.
cork-tree, 8
Bot.: Tha tree, Quercus Suber, from which cork is derived. It grows in Spain through the whole extent of the Tierra Caliente, but is most abundant in Catalonia and Valencia.

## cork-wood, s.

Bot. : Anona palustris.

- (1) New South Wales Cork-wood: Duboisia myoporoides.
(2) West Indian Cork-wood: Ochroma Lagopus.
cork (2), cor'-kĭn, kor-ker, s. [Gael. corcar $=$ the Lichen tartareus (Lightfoot); corcuir = a purpie or red dyc (Shaw); Norw. korlje = a corruption of sm Arabic word into one more familiar (Prior).]
Bot.: Two lichens: (1) Lecanora tartarea (Scoteh Highisnds), (2) Roccelta tinctoria.
cork (3), s. [A corruption of calk.] [CAlkin.] A calkin ; a nsil, or a number of nails, driven into a horse's shoe to prevent his slipping on frosty ground or ice.
cork (1), v.t. [СОRк, e.]
* 1. To make of or fit with cork.
"Crepleatus. He that weareth a corked ahoo or slipper."- Huloes.

2. To stop bottles, caske, \&c., with cark stoppers.
". . a a bottle in it well corkenh . . ."-Aneon: Foy
3. To blacken anything with a burnt cork.
corls (2), v.t. [Cone (3), 2.] To ahoe a hoste with sharp points. (Nuttall.)
corlsed, pa. par. or a. [Conk, v.]
A. As pa par. : (See the verb).
4. 48 adjectivs:
5. Mede of or fitted with cork.
6. Stopped with a cork stopper.
7. Blackened with a burnt cork
8. (Applied to wine): Having acquired a tath or flavour of the cark.

* oorkes, s. [Conkir.] The old name for the Lichen omphalodes.
coric'-通g, pr. par., a., \& s. [Cors, v.]
A. \& B. As pr. par. \& particip. adj.: (Beo the verb)
C. As substanllve .
I. Ordinary Language:

1. The act of fasteaing or stopplag with a cork.
2. The act of blackening with a hurnt cork.
3. The state of acquiring a flavour of the cork. (Applied to wine.)
II. Engin. : The upturned edge of a obelf or of an iron wall-anchor, \&c., inserted into the wall, to prevent its slipping out.
corling machine, s. A mochine for driving corks into bottles.

* corking-pin, s. A pin of the largest size, such as were used to fasten up a lady's hair.
"As oock-chaters with corking-pin
The colool boys stabs to malike them silu."
* oorkin-preen, s. A corking-pin. (Scotch.) And wersle for e corkin preen;
Gyne to the yill ${ }^{4}$ quaftin."

* cork-Ir, s. [Gael. corcar.]

Bot.: A kind of lichen, Lichen omphalodes, now called Cudbear in Scotland. Also called Corkes (q.v.).
Corikir grows; but the corkir is white, . . ."- Whartin: Corkir grows;
W. at., p. 136.
oork'-lŭng, \&. [Eng. cork, and suff. -ling.]
Ielthy.: A ish, Crenilabrus multidentatus. It is found occasionally in the British aeas. [Caenilabrev.]
cork'-scrow (ew as $\hat{\mathbf{a}}$ ), 8. A serew apparatus for extracting corks from bottles.
$\dagger$ cork'-scrcw (ew as $\hat{u}$ ), v.t. [Conkscasw, 3.] To direct or push forward in a wriggling fashion.

corkscrew-stairs, s. A wioding stairs with a solid newel.
cork'-wing, s. [Eng. cork, and wing.]
Ichthy. : A fish, Crenilabmus norvegicus. It is called siso the Goldfinny sud the Goldsinny. [Chenilabrus.]
cork'- $\mathbf{y}^{\prime}$, corlx'-1e, a. [Eng. cork; -y.]
I. Literally:

1. Consisting, or of the nature, of cork.
the suberous or corky layer." ${ }^{\text {or }}$ Srown :
of Bot. (ed. 1854), p. 92. Vanual of Bot. (ed. 1854), p. 92 .
2. Having scquired a flavour of cork; corked.

* II. Figuratively:

1. Shrivelled up, withered.
" Bind fast his corky arms." $\begin{aligned} & \text { Shakesp. : King Lear, lit. r. }\end{aligned}$

- Slc corkie gowks in rhymin' atralns

* corky-headed, * oorkie-headit, a. Empty or light-headed.
* corley-noddle, s. An empty-headed fellow.
* oor-lew, 8. [Curlew.]
"Ot cranes, of pokakes, of oortesous"-Treviea, $L$ sas.
corm, oor'-mŭs, s. [Gr. кор $\mu$ бs (kormos) $=$ the trunk of a tree, a log, and кeipw (keirō) = to cat short.]
Bot. : Tha dilated base of the atem in monocotyledoneus plants which intervenee between

the roots and the first buda, and forma the reproductive portion of the atem of such
 plants, when they are not caulescent. It consists of cellular tissue trsversed by bundles of vessels and pleurenchyma It has been described as a muchshortened rhizome, consisting of a few unde. veloped internodes. It differs from a hulb in being solid, and from a tuber in ita oval figure Examples: the so-called "root" of the Arum or that of the Crocus. (Lind ley.)
cor' - mó - ğĕns cor-mog -cın-m, s. pl. [Gr. корио́s (kormos), and $\gamma<\nu \nu \dot{\omega}$ (gennaó) $=$ to sagender, to generate.]
Bot. : The same as Cormophytes (q.v.)
 [Gr. корао́s (kormos) [CoRm], and фutóv (phuton) $=$ a plant.]
Bot. : One of Endlicher'a primary divisions of the vegetabie kingdom, the other being the Thallophyta. Under this head are ranced all the floweriog plants, and the higher vascular cryptogamz.
cor'-mot-rant, © cormerawnte, * cormirande, s. \& a. [O. FT, cormoran ; Fr. cormorant; Sp. cuervo marino; Port corvo marinho, from Lat. corvus marinus = the ges crow : corvts = crow, and marinus = pertain. ing to the aca; mare = the sea. (Skeai.)]
A. As substantive

1. Ordinary Language:
2. Lit.: In the same ennse as II.
3. Fig.: A glutton.
II. Ornith.: The name of the sea-bird called Phalacroconax Carbo and other species of the same genna. The genua Phalacrocorsx belongs to the family Pelecanide. The Common Cormorant has the top of the head, the neck, breast, lower parts, sud rump lustrons greenish-biack, a whitish collar under the throat, the feathers of the upper part of the back and wings ashy brown, bordered by a large band of glossy greenish-black; the iris is green, the feet biack. Length $27-29 \mathrm{in}$. The cormorsnt is the кopak (korax) of Aristotle. It is found in both hemispheres. In Europe it is more frequent in the north than elsewherc. It occurs in Britails. It feeds on flahes, and with vorscious appetite. It builds geinerally on rocky ahores and isiands, or more rarely on trees. Four other species of the genus are found in Europe. An Asiatic one, the Fishing Cormorsnt, Phalacrocorax Sinensis, is domesticated in China, where it ia nsed for catching fish. According to Mr. Fortune, a atring is tiod round ita neck to pretune, a string is thod round its neck to preNont abwallowiag to me fishes which it catchea. Not able to make awny with them for its
own sustenance, it with much docility brings own sustenance, it with much docility brings
them on board a boat to its master. [Phalathem on boa

Mhe stormy Papours ever driving by.
Where oapreys, cormorants and herons cry.

* B. As adj.: Rapacious, greedy, ail-devouring.

In bot What eise dear that is consumed thas cormerait war."
no this cormerant war."

corn-dodger, s. A kind of cake made of Indian corn, wrapped in an envelope of husks or paper, and baked very hard under the embers. (American.)
corn-drill, s. A planter for sowing com in rowa. The corn-planter, properly speaking places the seed in hilla in a row. When the plawa are checked, ao called, the cors may bu rowa are checked, ao calied, the cort may be
worked one way and then acroas, and so on. corn in drills can be tended but one way. Corn in drills can be tende
(Knight.) [Corn-planter.]
corn-exchange, s. A market for corn; a place where farmers and corn-factors meet for the exhibition of samples and the sale and por the exhibition

- The London Corn-Exchange was com menced in 1747. The present building whe opened in 1828.
corn-factor, s. One who deals in corn whoiesale ; a corn-merchant.
corn-flag s. The popular amma of the genus Gladiollas (q.v.).
* corn-floor, s. A floor or prepared place for threshing corn.
"OOr.:-Hhou hast loved a reward upon every eom
corn-flour, s. The meal of Indian corn ground very fine.
corn-flower, s. [Cornflower.]
corn-fly, s.
Entom., Agric., \&c.:

1. A name given to Chlorops toeniopus, and other spectes of the same genus of Muscide The larva produces the diaease called gout in wheat.
2. A name given to apecies of Orcinis, alse ranked under the Mnacidæ.
corn-grater, s. A roughened eurface for raaping green corn from the cob.
corn-harp, s. An tnstrument made of wire for freeing grain from the seeds of weeds. (Scotch.)
corn-harvester, 8. A machine for cut ting corn in the ficld; sometimes delivering the com in ahocka, sometimes merely laying it in gavels upon the ground, or in a cradle on the machine, from whence it is taken by hand and shocked. (Knight.)
corn honewort, s. A book-name for Petroselinum segetum.
oorn-huller, 8. A machine for removidg the hull or cuticie from graina of corn with out powdering them.
corn-husls, s. The busk or external covering of corn. (See the compound.)

Corn-hush splitter: A machine to tear husks into long shreds for atuffing for mattreasea, \&c. (Anight.)
corn-husker, s. A machine for taking the car of corn out of its enveloping sheath of leavea. Sobse machines operste npon the corn in the fieid to husk it off the stalk ; in others, the ear is simpiy jerked from tho stalk, and the machine tears of the busks from the ears. (Knight.)
corn-husking, s. An assemblage of friends and neighhours at the houae of a farmer to assist him in stripping the husks or ahncka from his Indian corn. It is also known as corn-shucking. (American.) (Ogilvie.)
corn-juice, s. A name given to whiskey. (American.)

#### Abstract

corn-lunife, 8. 1. Mod. American: A blade about 20 in . long, attached by a tang to a handle, and. nsed for cattling etanding corn. it resembles imilar purpose. (Knight.) 2. Ant. Roman: A knife as shown io the mustration used in vineyarde, and also in

ARCIENT ROMAN CORN-KNIFE. (Seculatis dolabrata.)
cornfields for cutting roots of trees, \&c. (Adams: Roman Antiquities.)
corn-laws, s.pl.
Law, Polit. Econ., \& Hist. : Laws designed to regulate the price of corn. Three distinct phases of opinion on the sabject, each carried ont by legislation, have occurred in the history of the Corn Laws :-
(1) Period I.: The exportation of cora was forbiddsn, whils ita importation was freely allowed. It must have been produced chsaply; had it not been so, ita high price, with the axpense aupersulded of carriags to the contiaxpense supersuithout legislation, have prenent, Would, without exportation sesms to vented ita sale there. Exportat licence, tili hsve been illegal, uniess by royal licence, till the passing, in A.D. 1360-1, of ths Act Edward III., c. 20, sllowed grain to be sent to Calaiand other special pisces, where it was for the advsntage of the king that his corn should be forwarded. The Act 17 Richard 11., c. 7, passed in 1394, gave liberty of exportation, 4 Henry VI., c. 2, limiting the permission to the times whan wheat was 6s. 8d. per quarter, and barley 3s. By the Act 3 Edward IV., c. 2, passed in 1463, the importation of foreign prain was for the first time prohibited, unlese when whent sxceeded 6s. 8d. per quarter, snd ryo 40. There was vacillsting legislation during the succeeding reigns, ons phase of things being the Act 1 Willism snd Mary, c. 12, passed in 1689 which granted s bounty on the passar in in of wheat when the elling price at oxportation or whe boms was not more than 48s. per qusrtar, Fith similar bounties on other descriptione of grain. All slong from the time of Queen Elizabeth, more or less of legisiative interference with the free transit of grain from one part of Englsnd to another hsd taken place. In 1815 the boonty syatem was owspt sway, and no further interference took place with the free export of grain. Up till about a.D. 1789, England was a country which produced more grain thas it needed, exporting the surplus.
(2) Period II.: During this period the legisture did ita best, in the intereat of the landowning clase, to prevent the fres importation of foreign grain. The firet restrictive Act wse in 1463 [Perion 1.], and existed at the same time as other Acts interfering with the export of grain. By 13 Geo. III., c. 43, passed in 1773, importation might take plscs apon payment of 6 d . per quarter when the price of wheat rose above 48s., and the exportation when it fell to 44 s . In 1791 the 48 s . was raised to 54 s ; the duty when wheat wes between 50 s . and 54 s . was 2 s .6 d. ; and when below 50s., 24s. 3d. Other Acts followed in below $1804 .$, and 1816 , till at length a sliding 1801, 1804, and 18used in 1828, by 9 Geo. IV., c. 38. By this enactment grain could at any c. 38. By this enactment grain could at any time be imported on payment of of grain increased.
(3) Period HI.: On March 15, 1838, Mr. Villiers, seconded by Mr. William Molesworth, attacked the Corn Laws in the House of Commons, but was defeated by an overwheliming majority. The same year Mr. Cobden urged majo Manchester Chsmber of Commerce to petition Parliament against thie Corn Laws, petition Pariament against the Corn laws, and the Anti Corn-Law League was brought Into existence, Messrs. Cobden and Bright being very prominent members. On March 12, $1839, \mathrm{Mr}$. Villiers again brought the subject
before the llouse of Commons, losing the vote before the llouse of Commons, losing the vote this time only by 295 to 342 . A similar motion in the Honse of Lords failed by 24 to 224. Just before the fall of the Whig Ministry in 1841, Lord John Russell was in favonr of a small fixel duty on the importation of corn, whila Sir Robert Peel retained attachment to the aliding scale. A large mbjority ( 360 to 269) of the Honse of Commons sided with Peel, Augnet 27, 1841, in the decisive vote

Thich overthrew the Whig government, and on Feb. 9, 1842, he proposed a new liding ecale, which ultimateiy becams law. [SLidino ecale.] In the recess between the Parliameatary seasions of 1845 and 1846, the failure of the potato crop, and the consequent fsmins in Ireland, brought the subject of the Corn Laws again to the foreground. Sir Robert Peel saw that they couid not longer be maintsined. Men were dying of hunger, and the Corn Laws made bresd srtiffisilly desr. Lord Stanley (afterwards the premier, Jord Derby) and other Conservatives could not be brought to concur with Sir Robert Peel in undertaking the necesant char The Queen was therethe necessary change. The Queen was ussell, fore sdvised to sead for Lord John hussell, and did 60 , Sir Robert Peel therefors returned to oftice, snd on Jan. 27, 1846, proposed a Bill sbolishing the Corn Laws, which received the Roysl assent on June 26, 1846. It is the Act 10 sad 11 Vict., c. 46 . A smali remnant of duty, 18. par quarter, left by Peel, was swept away on Juns 24, 1869. The working-classes of the towns may be trusted to prevent any revivsi of lawe the effect of which would be to make their bread dearer, for the benefit of one or two classes in the community wealthier thsn themseives.

4. A square cap anclently worn by doctors of divinity.
5. A kind of lady's head-dress, so called from two projections resembling horns.
6. A cap of paper used.by retallers for inclosing amall wares.
7. A lit1le plece, a bit.
"Ho, taketh the neary with ermetus of trenchat

## II. Technically:

## 1. Music:

(1) An obsolete reed wind-instrument not unlike s hautboy, but larger and of a coarser quality of tone. In this country they were of three kinds, treble, tenor, and bass. The tubes gradually increased in dinmeter from the mouthpiece to the end, and their outline was gently curved, lience the Italian name cornetto curvo. In Germany, as in England, they were once in common use for sacred and secular purposes. They were often made of wood neatly covered with dark leather. (Stainer \& Barrett.)
(2) A cornet-slop (q.v.).
2. Farriery :
(1) (See extract.)
"Cornet of a Horse, is the lowest part of his pantern
that runa round the cofth, nad dis ditinguisied hy thi hoir that founs and covers the is diatinguislem hy the -Farriers Dict.
(2) An Insirument for blood-letting; a fleam. 3. Military:
(l) A company or troop of horse, so called from a cornet-flayer being attached to each.
(2) The officer who carried the colours in troop of horse, corresponding to the ensign io infantry. The title fa now disused, being soperseded by that of second lieutenant.
digitity with which the veteran appenred in Hyde Park on his charger at the head of hia regiment"Hacculuay: Hist. Eng., ch. xiv.
(3) The ensign or colours of a troop of cavalry.

4. Surg. : An auricular inslrument, which
does not protrnde heyond the external ear. does not protrnde heyond the external ear. It is used in cases of obstruction of the meaths auditorius by reason of contrsction, or the presence of polypi, and is made of gold or silver.
5. Chem.: A paper head, in form of a cone, naed to cover a vessel

## cornet-à-piston, $s$

Music: A metallic wind-instrumed of the trumpet cless, furnished with valves and

CORNET-A-PISTON.
stoppers. it was formerly called e cornopean. Its quality is midway between that of the bugle and the trumpet. It is frequently used hin orehestras where a trumpet is not obtainable, but it has not been much employed in ahle, but it has not been in

## cornet-stop, s.

Music: A name which has been given to several kioda of organ stops.

* cor'-nět, v.i. [Cornet, s.] To play on the cornet.
"Here's a whole chorve of Syluans at hand cornetiting avd (rippiug th' toe."-Chapman: Widdowea Teares,
cor'nět-çy̆, s. [Eng. cornet; -cy.] The rank, position, or appointment of a cornel.
aton. . . ."-Ld. Chesterfied. .
* cor'-nět-er, * cor-net-tier, * cor-netter, $s$. [Fr. cornetier, from corne $=\mathbf{a}$ hom.] A hlower or player of the cornet.
"'. the rable of trunypetters, cornetters, and other
cor-nětte', s. [Fr.]
Metal. : The little inbe of gold left when the alloy of ailver and gold taken from the c $\because$ : el

is rolted and boiled in nitrio acid to remove the former metal. (Ogilvie.)
cor'-ņ--̈le, s. [Fr. cornéule, dimin. of cornb (m.), cornée $(\mathrm{f})=$ horned ; Lat cornu $=\mathrm{a}$ horn.] [Corneous.]
Entom.: One of the minnte transparent segments defending the compound eyes of insects. (Owen.)
oor'-ně-ŭs, s. [Lat., = horny (\%).]
Mining: A kind of tin ore fonnd in black columns, with irregular sides and terminating in prisms. (Weale.)
corn'-field, corn-field, s. [Eng. corn, and field.] A fleld in which corn is growing; corn or arable land.
meadow. ${ }^{\text {a }}$. Wide expanse of cornteld, orchard, and
corn'-flow-er, s. [Eng. corn, and flower.] I. Formerly (Ger.): Various plants occurring in corn.
"There be certaic corn-lonoers, which corne seldona or vever in other places, unleas they be seth hat ooly 2. Nou (Spec.): (1) Centaurca Papaver Rhceas.
- (1) Golden Cornfower: Chrysanthemum segetum.
(2) Yellow Cornfower: The same as (1)(q.v.).
cor'nic, a. [From Lat. corn(us) (q.v.), and Eng., dec., suff. -ic.] Pertaining to or derived from the tree Cornel.
cornle acld, s. The sams as Cornin (q.v.).
cor'nĭçe, * cor-nish, s. [O. Fr. \& Ital. corrice; Fr. corniche, from Low Lat. cornix (genit. cornicis) $=$ a border, from Gr. корwis (koronis) =a wresth, a cornice, корwivך (korōnē) = a crown.]

Arch. : The highest projection of a wall or column; any moulded projection which

crowns or fimishes the part to which it is sttached. When plain it is called s coping (q.v.).

Cornice or frieze, wlth boesy pealptures graven",
cornice-pole, s. A pole carried along the tops of windowa, on which ran rings, to which are attached the curtains.

## cornioe-ring, s.

Ordnance: The ring which lies next to the trunnion ring.

- cor'nǐ-cle, s. [Lat. corniculum, dimin. of cornu = a horn.] A little horn.
cor-nle'-u-1a, s. pl. [Lat., pl: of corniculum $=$ a little horn, dimin. of cornu $=$ a horn.]
Anat.: Any smsil projectiona liks diminu. tive horns. Two such exist upon the hyotd hone besides two cornus or horns. There are also corniculs of the larynx.
oor-nicc-ṛ-1ā'rix-a, s. [Lst. cornicularius = a soldier who led the wing of s small division of troops.]
Dot.: A genus of Lichens, tribe Psrmeliacese. The species are rigid tufted plents, occurriug on the ground or on high mountains.
cor-nic'-n-lāte, a. [Lat. corniculatus, from cornu = a horn.

1. Ord. Lang.: Horned, crescent-ahsped. "Yeous monn-like grown corniculate,"- H. More. 2. Bot.: (See extract).
"Corniculate plantan are stech as produce many die -uch hollow fowers as bave on thair opper part a kiod of spur, or litte born. "-Chambers.

* cor-niod-p-10̈re, 8 . [Lat. cornicularius $=$ an offtcer who led the wing of a small body of troops.]

1. A lieutenant or assistant to a superior omcer
2. An assistant or secretary to a magistrate.

* cor-nif'-ic, a. [Lat. cornu =a horn, and facio $=$ to maks.] Productive of horn; making horm.
cor-nif-r-cà'-tion, s. [Eing. cornific; -ation.] The formstion of horn.
"The habit of cornitication is more likely to have bexn formed nearer homa" $\rightarrow$ Soulhey: The Docior, ch.
cor-mi-form, a. [Lat. corniformis, from cornu $=$ a horn, and forma $=$ form, shape.]
Horn-shaped. Horn-shaped.
- cor-nig'-ẽr-oŭs, a. [Lat, corniger, from cornu $=\mathrm{s}$ horn, and gero $=$ to carry, to bear.] Bearing homs ; horned.
"Natare, Io other cornigerous anlmale, hath placed
cor'-nĭn, s. [Lat. corn(us)=a cornel-tree ; and Eng. suff. -in (Chem.) (q.v.).]
Chem.: A crystalline bitter substance extracted from the root of Cornus florida. The bark of this tree is used in North America as a febrifuge. It is also called cornic acid.
corn'-ing, pr. par., a., \& s. [Cons, v.]
A. \& B. As pr. par. \& particip. adj. : (See he verb).
C. As substantive:

1. Ord. Lang.: The act of preserving or pickling with brine.
2. Pouvler-making: The act or process of granulating powder.

## corning-house, $s$.

Fowder-making: The house or building in Which the corning or gramulating of powder is carried on.

Corn'ish, * Corn-yshe, a. \& s. [Eng. Corn(wall); snd sutt. -ish.]
A. As adj. : Of or pertaining to Cornwsll. the Cornifh, Irith, and many of the Armorick

## B. As substantive:

I. The language snciently spoken in Corn will; it was a dislect of the Celtic. It sur vived as a apoken language up to the present century. Its literary remains are scanty.
*2. An inhsbitant or nstive of Cornwall. "The Cornist lnve entirely loas the orligial lso
Cornish-boller, s. The cylindrical-flus boiler of Smeaton, who did ao much to increase the economy of working steam

## Cornish-chough, * Cornyshechowghe, $s$.

Ornith.: A bird, Fregilus graculus, ons of the Corvidæ (Crowa). Its bill and legs are of s fins orange colour; the feathera of the baek sre glossy hlsck; its tongue is long, snd its sre glossy hlsck; its tongue is long, snd its
claws, which sre black in colour, large hooked. cisws, which sre black in colour, large hooked.
It catches up bite of lighted sticks, and is It catches up bits of lighted sticks, and is
occasionslly the originater of Ares. It is occasionsily the originator of fles. It is
found in Cornwall and in the other southern counties of England, also in the Alps and in Greece.
Bulorn "Cornyhe chowghe or crowe. Pyracorax."-
Cornish-diamond, s. A variety of transparent quartz
 Corninh-diumo
Artiain, ill k .

Cornish-engine, s. A form of singlescting condensing sterm-engine used esprecially in the copper and tin mines of Cornwall, but also used as a pumping-engine for water-supply in very many places. Steam, being aflnitted sbove the piston at the conmencencut of the stroke, follows the piston to the point of cnt-off; the remsinder of the stroke is completed by the combinined sid of expusasion snd the momentnm acquired by the mass of msterial set in motion by the first impulse of the steam. On the completion of the stroke, the steam is allowed to pass freely from one side of the piston to the other, producing an equilibrium of effect during the out-stroke.

Before the piston arrives at the point of com mencement again, the equilibrium-valve mencement again, the equilibrium-valve to closed, shntting in a quantity of steam before it. By means of this cushloning, which is onbject to the nicest adjustment, the loss
from clearance and steam-ports is rendered from clearance and steam-ports is rendered
practically nothing, if the steam so compressed be equal to the initial pressure. (Knight.)
Cornish heath, s. [So named from itt ahundance in Cornwall.] A heath, Erica vagans.

## Cornish-hug, s

## 1. Lit. : (Ses extract).

oos has an advernary on his breast, ond holls him there. -chambers
2. Fig.: A trescherons throw or injury dons by a pretended friend. (Fuller.)
Cornish moneywort, s. Sibthorpia europcea.
cor-nish, s. [Cornice,] A cornice.
Sandys: Troaveh, $\mu$ illas.. austaining the cormidel-
corn-irshed, a. [Eng. cornish; ed.]
Her. : Adorned with a cornice or moulding. corn'-isst, s. [Eng. corn(et); -ist.] A performer on the cornet or horn
corn'lĕss, a. [Eng. corn; -less.] Destitut. of or unprovided with corn.
Lytion: : Psham, ch. Ixiv. (Davies) parmon's atable."-

## corn'-mūşe, s. [Cornemuse.]

cor-nö'-pĕ-an. 8. [Lat, cornu =a horn; Matav (paian) $=\mathrm{s}$ hymn, a war-song.] Music: [Cornet- $\dot{\text {-piston] }}$
 Eng. 8ufic -in.]
Chem.: A resin soluble in slcohol and ether, obtained from the bark of Corot Cornova, tres growing in the East Indies.
corn'stōne, s. [Eng. corn, and itone.] Geology :

1. An earthy ilmestone of Devonisn age often mottled red sad green, existing in Here ford, Salop, and the South of Wales. In plece it exists only in small concretionary lumps but st othera it expaads into large aub-crystal line masses. Fish remsins ars found in it in Herefordshire, Brecknockshire, and Shropshire, and on the Moray Frith. (Murchison: Siluria.)
2. An earthy concretionary limeetone in the Permian rocks, undistiogujahabie externally from No. 1 , but quite different in age, being much more recent.
cor'nū, s. [Lat. = a horn]
Science, sc.: A horn, or anything more or less horn-alaped.
cornu-ammonis, s. [The horn of Am mon, i.e., of Jupiter Ammon, the horns on whose hesd the fossil cephalopod so-called was supposed to resembie.]
I. Geol. : An old name for the fossil shella belonging to the genus Ammonites or the family Ammonitidx (q.v.).
3. A nat. : A nsm8 for the hippocampus major or pes hippocampi of the brain. [Cornva.]
cor'-nu-a, s. pl. [Lat., pl. of cornu $=$ a horn.]
I. Anat. \& Zool.: Horns, or horn-like processes on any part of the body or the framework more or less comparsble to horns. They are larger than cornicula (q.v.). There are cornus of the coccyx, of the hyoid bons, of the fascia lata, \&c. (Quain.)
4. Bot.: Horn-like processes in the corona of certain plants. [Connv.]
cor-nū'-bǐ-an-īte, $\quad$ [Lat. Cornubia $=$ Cornwsll, snd suff. -ite (Min.) (q.v.).]
Geol. : A hard and laminsted purple or dark blue rock found in the west of Cornwall. Dans conaiders it identical with Felsite ( $q, v$. )
cor-nụ-cō'- pĭ-a, cor-nụ-cō'-pī-m, z [Lat. = the horn of plenty : comu $=$ a horn; copia $=$ plenty.]
5. Antiq. (Of the two forms): The hom of plenty; s hom wreathed and filled to over Howing with flowers, fruit, corn, \&c. It wat

[^190]
the oymbol of plenty, peace, and concord. It was fahled to have been a gift from Juplter to hio nurse, the goat Amalthea. It was a frequent attribute of Ceres.

Pruit towere the varione offepring of the land,
Hughes: The Trtumph of Proce
2. Bot. (Of the form Cornucopie): A genus of grasses, tribe Phalerez. Oaly koowa ofecea, the Cornucopiae cuculata the Horn of Plenty Grass), often caltivated here in gardeas. It is a native of Greece and Asia Minor.
cor-nun-li'-tëş, s. [Lat. cornu $=$ a horn, and Gr. $\lambda$ íoos (lithos) $=a$ etone.]
Palceont.: A genus of Sllmrian Ameljds, order Tuhicola. Cornulites serpularius is a cosmopoite silurian fossil, ranging from cosmopoite Siturian fosil, ranging from from a low position in the Llandeilo formation from a low position in the Llandelio formack to the very summit of the Ludlow rocka. Niurchlson considered it a fossil very distioc:
tive of the Silarian formation. (Murchison: Siluria.)
cor'-nŭs, s. [Lat. cornus, cornum = (1) a cornel-cherry, a dogwood tree, (2) a javelin made of cornel-wood; from cornu $=$ a horn, the name being given on account of the hardness of the wood.]

1. Bot.: A genus of plants, the typical cne of the order Cornacere (q.v.). Calyx, fourtocthed ; petals, four auperior; stamena, four. Fruit, drupaceous, two-celled, two-aeeded. The Dogwood of the United States (comue florida) is a amall tree of vary ornameatal appearaace, besriog whitiab flowers surrounded by large white loracts, which appear in early spring before the leaves. In winter it bears scarlet herries. The wood is white, fioe grained add ageful for inlaying. The barks of Cornus florida, C.sericea, and C. circinata are used io the United States as aubstitutea for Pernviao bark in jotermittent fevers; the young branches of tbe first-named plaut atripped of their bark and rubbed with their ends against the teeth make them very white, while the Indians extract a carlet colour from the bark of the fhroun vearls $C$ oftcinclis is cultivated in Jopan rools. $C$ offinulis is cultivated in Japan, drinks of the country. (For the Connel and the Corneltan cherav, see these words.) the Cornelian cherav, see these words.)
The Common Dogwood of Europe (C. san guinea) is beautiful in autumn from the redness of its foliag. The wood makes the best char coal for guopowder, and is very hard, being made ioto akewers, cogs for wheels, dc. Io past times it was used for makiog arrows. It is about five or aix feet high, with atraight braoches. The Dwarf Cornel (C. suecica) is a herbaceona piant about six inches high, whoge berriea are said to be tonic, and to have the power of increasing the appetite. It is a creeping plant, growing in alpine pasturea in Bcotland aad Northumberland.
2. Palce-botany: It is believed that the genus Cnrnus has been found in the Cretacecus rocks of the United States.
©or-nu-spir'-a, s. [Lat. cornu =a horn, and spira $=$ a coil, twist, or spire.]
Zool. \& Paloont.: A foraminifer wlth an nnchambered apiral, auggestive of the form of the Gasteropodeus genas Planorbis. It came into existence only in the Tertiary, and still exists in the North Atlantic about 530 fathoms deap.

* cor-nӣte', v.t. [Cornute, a.] To bestow horns upon, to make a cuckold of, to cuckold. "Tou are most shametully, most, sinfully, most
eor-nūte', a. \& s. [Lat. cornutus $=$ horned ; ornu =a horn.]
A. As adjective
L. Ordinary Language:

1. Lit. : Bearing horns; horned.

- 2. Fig.: Cuckolded.
II. Bot. : Morn-shaped, horned; terminating in a process like a horn, as the fruit of Trapa bicornis.
* B. As subst. : A cuckold.
* cor-nūt'-ĕd, a. [Enc. cornut(e); ed.]

1. Lit. : Bearing horns, horned.
2. Fig. : Cuckolded.
"Cornuted aldermen, and hen-peck'd squires"
nen, and hen-peck squires"
somervile: The Bowling-Green.
cor-nū'-tō, s. [Its1., from Lat. cornutus = horned, cornu $=\$$ hcrn.] a cuckold, one who wears the horns.

* cor-nn̄'-tor, \&. [Eng. cornut(e); -or.] One whe cuckelds another; a cuckold-maker. "Defles his bed and proves his own oormutor""
corn'-wäin, s. [Eng. corn, and wain.] A corn-wagon.

Corn'-wall(1), s. [From Cornubia, the old Latin name of the county; Wel. Kernu $=$ Cornwall: Wel. kern, cornty ; a horn, and A.S. Cornwall: Wel. kern, 1

Geog.: A county of England, constituting the eouth-west extremity of the island. It is from about 70 to 81 milea loog by 42 broad.
corn'-wall (2), s. [A corruption of cornel (2), i.e., of corn.] Cornwall-sallet. [Conneir gallet, Corn-sallet.]
corn'-wal-lite, s. [Ger, cornwallit, from Eng. Cornwall (q.v.), where it occurs, and Eog. suff. -ite (Min.).]
Min.: A green amorphous mineral, with a hardness of $4 \cdot 5$, and a 8 gp . gr. of $4 \cdot 16$. Compos. : Araenic acid, $30^{\circ} 22$; phosphoric acld, $2 \cdot 15$; nxide of copper, 54.55 ; and water, 13.02. Found in olivenite in Cornwail. (Dana.)
oorn'-wëed, s. [Eng. corn, and weed.] Bisctrula pelecinus. (Treas. of Dot.)

+ corn'- ${ }^{\text {y }}$ (1), a. [Eng. corn (1), e. ; -y.]
I. Literally:

1. Producing corn or grain.
2. Furnished with graina of carn.
". . . bringing bome the corny ear." Prior: Solunon: Knowedgen.
3. Consisting, or of the nature, of corn.
"The summer'e corny crowae.
4. Made or produced from corn or malt.

Now I have dronke a dranght of corny ele."
Chaucer: ${ }^{\text {The }}$ Parconeres Fale, $12,99 a$
II. Fig.: Iutoxicated. (Slang.)

* cor-ny̆ (2), a. [Eng. corn (2), o.; -y.] Of the nature or appearance of horn ; corneous.
odr'-ö-cöre, s. [Malay (?) or some other language from tho Easteri Islaods.]

Nout.: A type of vessel used in the Eastern Archipelago. It is of various formas. $\boldsymbol{A}$ corocorg of the Moluccas is a masted vessel $50-60 \mathrm{ft}$. long, matted nver for about fourfirths of this diatance. That in use in Celebes has a raised apparatus projecting beyond the gunwale and the gtern to accommodate a second tier of rowers. The crew sometimes number sixty men, and the vessel is not unfrequently employed for piratical purposea. (Ogilvie.)
 corrodium, corredium, conredium; Ital. corredo; O. Fr. conroi = furniture, provision. The ultimate aource of the word is not clear, but is probably Lat. con $=$ cumn $=$ with, together, and rodo = to gllaw, to eat.]

Old Law: A aum of money, or allowance of meat, drink, and clothing, due to the king from an abbey, or other house of religion, whereof he is founder, towards the reasonable sustenance of guch a one of his servants, or vadelets, as he thinks good to bestow it on. The difference between a corody and a pension seems to be, that a corody is allowed towards the maintenance of any of the king's gervants in an abhey; a pension is given to one of the king's chaplaina for his better maintenance, till he may be provided of a benefice. (Blount.)

## t cŏ-rŏl', s. [COROLLA.]

Bot. : An anglicised form of Lat. corolla (q.v.).
cơ-rŏl'-1a, s. [Lat. =a littie crowo, wreath, or garlatid; dimin. of corona $=\mathrm{a}$ crown, a wreath or garland.]
Bot. : The inner whorl of two geries of floral envelopes, occurring in the more highly dcveloped plants. It is situated within the exteriorly to the stopes cand pistils. In all cases ith divisions, which are called petals, alternate with those of the calyx. They ane
generally colonred-i.c., in botanical isnguage they are some other colour than groen. The corolla is, as a rule, larger than the calyx, but in aome plants this la not the case. When the petals of a corolla are all distinct, they are sald to be polypetalous, which is the normal type of a coroila When they cohere conto ouously by their margina they are generally called monopetalous (ooe-petalled), which in not a quite accurate term; a better one is gamopetslous, meaning that the petsle have in a

corolia of canterburv-bell.
certain aense coutracted what may ve peetically called a marriage union. For the eeveral forms of corollas age Monopetalous, Polyperalova; see also Petal. The petals of a corolla are really only moditications of leaves. The corolla is not easential to the reprodnction of a plant. it shades the productive organa Inside it from injury, and, 10 some cases, by secreting honey attracts bees and other insects to aid in their fertilisation.
cơr-ǒI-1ā'-çě-oŭs, a. [Lat. corolla, and snff. aceus.] Pertainiag to a corolla.
". . , a corollacoous covering."-Loe.
 ar-1e, " ớ'rǒl-ar-乌̆, \&. [Fr. corollaire; ital. corollario; Lat. corollarium =a present of a crown or garland; corolla $=$ a little $\mathrm{crown}_{1}$ dimin. of corona $=$ a crown.]
A. Ordinary Language:
I. Literally:

* 1. A present of a crown or a wreath.

A conolaria or mede or coroune.
Chaucer: Boethius, p. 6
2. In the same seose as B. I.
II. Figuratively:

1. An appeodix, a supplement.
"A corollary to this pretaces. In which I have done
Justice to others"-Dryden: Fables. (Prei) Justice to otherk -Dryacn: Fablew (Pret.)
2. A consequeace, a result.
"It is bot anatural corollary that we enforce oue *3. Surplus, excess.
" Now come, my Ariel, bring a corollary,
Shakesp : Tempert, iv. :
†4. Any adjunct.
". What they call liberty and its corollariex,"-J. L.
Froude, in Daily Telegraph, Feb. 20, 1882.
B. Technically:
3. Math. : An Inference, deduction, or consequence which foliows from what is directly demonstrated in a proposition.
4. Law: A collateral consequence.
t cơr'-ǒ1-1äte, cơr'-ǒ11-ä-tĕd, a. [Lak corolla, and Eng., \&c., auff. -ate.]
5. Like a corolla.
6. Having a corolla.
t cơr'-t̀l-lẹt, s. [A dimin. ct Fr. corolls $=$ a corolla.]

Bat. : The corolla of a floret in an aggregated flower.
cŏ-röl-11-fiör'-x, s. pl. [Lat. corolla (q. $\bar{\nabla}$.) flos (genit. floris) $=\mathbf{a}$ fower, and fem. pl. suft. -e. $]$
Bot.: A division or subdivision of Exogens, in which the petals are united into a hypoEynous corolla or not attached to the calyx It was trst introduced by Decandolle in the edition of his "Théorie," pullished in 1819. He included under it guch orders as Sapotaccæ, Ebenacex, Oleineæ, Apocynew, Gentianeæ, Convolvulaceæ, Labiatæ, dc. It may be divided into two aeries-a Hypogynous one, in which the atamens are free from the corolla,
boll, boy ; pout, Jowl ; cat, çell. chorus, çhin, bençh; go, gem; thin, ṭhis; sin, aș; expect, Xenophon, expist. ph = $\mathbf{R}$

 nuon the haly gospela shail any. The thinge whet I moe God: null their shall kiss the book."-Blackutone:

- By the Act of Union, 5 Amve, c. 8, the sovereign subscribes sn oalh slso to preserve the Protestant and Preshyterian Church Govermment in Scotland before ruling over that land.

## coronation stone, $s$.

Archaol. \& Hist.: A stone on which the novereign is crowned. It is fixed under the geat of the oaken coronstion chair. It is a historic fact that, prior to A.D. 1296, It lay in the abbey of Scone in Perthshire, and that the Scotch had for a long period been accustomed to crown their kings mpon it. In 1296, how ever, it was taken by Edward 1., and an engagement made in 132s, in the treaty of Northampton, to give it back was not kept. it seems historic too that it had been first phased in the sbbey of Scone in A.D. 805, the Scotch having bronght it originally from Jreland. But when an effort is made to identify it with the stone which tha pstriarch Jacob rolled for a pillow st Luz or Bethel (Gen.

Gite, fat, räre, amidst, whãt, fâll, father; wē, wět, hëre, camẹ, hẽr, thêre; pinc, pĭt, sïre, sĩr, marine; gō, pơt,

Ixvili. 11, 18, 22) the region of myth has been reachud and history left far behind.
cor-dn-7i-tion (2), s. [A corruption of carnation (q.v.).] Dianthus Caryophyllues

* ๙-sōne, v.t. [Crows.] To crown. p. "galomon wan corond kyng-"-Lapend w Hoty nood,
 crow, (2) anything beat or curved Hike a crow's bill.]
Anat.: The acute process of the lower jawbone, so named from a fancied rasembiance to a crow's bill.
* co-rōne (2), "co-rowne, s. [Cnown.] "Than lleth the mede in the corone" Chaucer: Boethius, p. 119.
cơr'-dn-gl (1), "cor-дall, \&. [A dinin from Lat. corona.]

1. The iron head of a tllting-spear, conatructed so as to be sufficient to unhorse without wounding a knight. Though properly of iron, it was occasionally, when intended for practice or pleasure only, made of wood. It terminated in tliree pointa, thus remotely resemhling a crown, wheace it received its name.

2. A tilting-spear.
"With coronals stel and stelde."-lyboame. Dis

- coronel (2), \%. [Colonel]
 Class. Lat. corona $=\mathrm{s}$ crown.]

Zool. : A genus of Ophidians, the typical one of the family Coronellidm (q.v.). Coronelle austricea is common on the continent.

* co-rone-ment, * co-ron-ment, s. [Bid. Eng. oorone $=$ crown; and suff. -ment.] A coronation or crowning.
"Whan the folk had blen at the coronment."
corr-ot-nẽr, s. [Low Lat. coronator, from corona.]

Law: A functionary whose name coroner -anciently coronator, frona Lat. corona $=$ a with - inplies that he has principaly oeas the crown is concerned. His office is very the crown is concerned. mention being thade of it in A.D. 925 . His court is a court of record in which, sfter Eis court is a court of record in which, sed in sight of the body of oae who has died in
prison, or so suddeniy that allepicions of prison, or so suddeniy that allepicions of for the puryose pronounces a decision as to the cause of death. "Accidental death" is s frequent verifict, but there are cases in whicb it is "Wilful murder against some person or persons unknown," or an individual is named. In this the proceedings ander the auspices of the coroner prepare tho way for a eriminal prosecution. He also officlates as a sherifl'a oubetitute when the oheriff himself is interested in 8 suit, and cannot therefore act in it himself. The office is an elective one in the United States.

## coroner's oourt, s.

Law: A court of record in which a coroner discharges hie appropriate functions.
coroner'a inquest, s. An investigation into the cause of death, held by a coroner, ueually with the aid of a jury.

* cơr'- ${ }^{\text {onent }}$ (1), b. [CORNET.]
cơr'-t-nĕt (2), s. [1tal. coronetta, dimin. from Lat. corona $=$ a crown.]
L. Ordinary Language:

1. Lit. : A amall crown or circle of gold, or of gold and precious stones.
coroners.twas not a crown neither, twas one of there 2. Fig.: Nobility, noble birth or high descent.
"Kind hearta are more than coronets,"

## II. Technically:

1. Her: : An inferior kind of crown worm by the nobility. The coronet of the Prince of

Wales conaists of e circlet of gold, on the edge four crosses patte or between as many fleurs-de-lis ; and from the centre crosses rises so arch surmounted by an orb and cross. The cononet of a duke is adorned with strawberry

leaves: that of a marquis with leaves and pearls interposed; that of an earl has the pearls raised sbove the leaves; a viscount's coronet is surrounded with pearis only, as is sleo that of a baron; but in the case of the latter the number is restricied to four.
2. Archoeol.: An ornamental hesd-dress.
3. Tournament: A coronel or head of s tilting-spear. [Coronel (1), s.]
4. Veterinary: The lower part of the pastern of a horse that runs ronnd the coffin, snd is distinguished by the hair that joins and covers the upper part of the hoof.
5. Bot.: 'Hairs arranged in a form like that of a coronet. Ex, those st the apex of a ripe seed of Epilohium. (Thome.)

* cơr'-क-năt, v.t. [Cononet, 8.] To edorn or deck, as with a coronet.

oŏr'-क-net-ăd, a. [Eng. coronet; -ed.] Wear. ing or eutitled to wear a coronet; of noble birth.
cŏ-rōn'- $\mathbf{1}$-form, a [Lat. corna $=\mathrm{s}$ crown, and forma $=$ form, sppearance.] Having the form or appearance of a crown.
cơr-ó-nill'-la, 8. [Mod. Lat, dimin. of Class. Lat. corona $=$ s crowa. $]$
Bot.: A genus of Leguminosx, the type of the gub-trlbe Coronillee (q.v.). It has woequally pinnated leaves and long tapering jcgumes, separating at last into one-seeded joints. Coronilla Emerus is called Scorpion Senna. It is a mall bush with bright yellow flowers, growing in many parts of Europe. Its leavea are cathartic, like those of the true senna, but less powerful in their action. Other cathartio species are C. varia, from Southern Europe, C. globosa, and C. tberica;
 others are cultivated as ornamental plants.
cơr-o-nill'-lĕ-ge, s. pl. [Mod. Lat. coronill( $a$ ), and fem. pl. adj. auft. -eo.]

Bot:- A 日ub-tribe of leguminous plants,
tribe Heydsarea. tribe Heydsarea.
cơr'-ón-old, a. [From Gr. кopivn (koroñ) $=$ a crow .. anything hooked or curved... the apophysis of a bone, snd eifos (eidos) $=$.
form. $]$ form. $]$
Anat.: Hooked or curved at the tip, as various portione of the skeleton are. Thus there is a coronoid fossa of the humerus, a coronoid process of the lower jaw, and another of the ulna.
"The olecranar nud eoronodd fosse are confluent"-
cơr'oón-ūle, s. [A dimin, from Lat. corona= a crown, a garland.]

Botany:

1. Gen.: The little crown or coronet of downy tuft on a seed.
2. Spec.: A small body tesembliug a calyx, crowning the nucule in the genus Chara.

* coroune, " corowne, " corune, s. \& v. [Crown.]
cǒ-rō'zō, s. \& a. [Native nsme of the palm.] For definition 6ee etymology.

## corozo-nut, s.

Bot. : The seed of a palm, Phytelephas macrocarpa, a ustive of tropical America, the hardened albumen of which is ased by turners under the name of vegetable ivory. Called also lvory-nut.
cor'-põr-a, s. pl. [Lat., pl. of corpus (genit. corporis) $\stackrel{=}{=}$ a body.]

Anat.: Bodles. 'Thus there are Corpors albicantia, corpora Arantit, corpora cavernosa, corpora peniculata, corpora mammillaria, cor pora quadrigemina, and corpora striata [CORPCS]

## $\$$ Corpora of moveables:

Scots Law: Movables which may be reem and feit, as furniture, corn, \&o., in contradie tiaction to s debt or anything similar.
cor'-por-al (1), s. [Corrupted from Fr. caporal ltal, caporale, from ltal. capo $=$ head, chuef from Lat. caput $=$ head.]

Military :
*1. Formerly: A kind of brigade-major, who commanded skirmishing parties detached from the other forces. This was the meaning of the word in the reigns of Queen Mary and Queen Elizabeth.
2. Now: A petty non-commissioned officar ranking immediately uoder a etrgeant, snd just sbove the ordinary rank and file. He has charge of one of the squads of the company places and relieves sentinels, and keeps goon order in the guerd. He receives the word of the inferior rounds that pass by his gram. There are generally three or four corporals in each company.

The cruel oorpisal whimperd tn my ear
Five pounds if rightly tipt, would est me clear."
T (1) Corporal of a ship: An officer that frath the charge of setting the watches and sentries, snd relieving them; who sees that all the soldiers and sailors keep their arms nent and clean, and teaches them how to use them. He has a mate under him. (Harris.)
(2) Lance corporal:

Milit.: One who acts as corporal previously to his obtaining the full sppoontment to that grade. Meanwhile his pay is only that of a private.
cor'-potr-al, "cor'-pot-rall, a. [0. Fr. corporal; Fr. corporel; Lat. corporalis $=$ pertaining to a body, irom cormus (genit. corporis) $=2$ body.]

## aory.]

Mil. A body of men intended for rapid movements.
corpse, * corse, 8. \& a. [Conps.]
A. As substantive:
I. Ordinary Language:

* 1. The body, living or dead.
" Bot naked, without oeedfult restimoate
"Behold. they were all dend corpses."-2 Kingu

2. The dead body of a haman being.
". :". carne and took up his corpuo, and lald it in is
*3. A human being (used in contempt)
"To stuff this maw, this vast unhlde-bound corpece".
II. Law: Stealing a body for the purpose of dissection, or with any other object, is s punishable offence; so slso is refusal, on the part of one whose duty it is to inter it, to give it the rites of sepulture.
B. As adj.: (See the compounds)

I For the difference between corpse and body, ses Bony.

## coxpse-candie, s.

1. Lit.: A candle kept burning round the coffin containing a corpse up to the time of its interment
2. Fig.: A local name for the tgnts fatuus or Will-o'the-Wisp (q.v.).
coxpse-cooler, s. A temporary coffin nstural decay by expnsure to an artificially cooled stmosphere. (Kntght.)
corpse-gate, s. The same as Lici-ante (q.v.).
corpase-light, s. The ignts fatuus or Will-o-the-Wisp, also called corpse-candle (q.v.).

T Tho corpoelights dance-they regono, and now . . . No more la given to gifted ayo! seors: olondinaas
corpse-sheet, s. A ohroud or windingheet.

## corps-let, s. [Corslet.] A corsiet.

 Judith L L 669 .cor'-pụ-lẹnçe, cor'-pụ-1ẹn-ç゙̆. s. [Fr. corpulence; Lat. corpulentia, from corpus $=\mathrm{s}$ body.]

* I. Corporeality ; the quality of having a body sud substantial form.
$\ldots$ men phansie $G o d \mu e \theta^{\prime}$ U $\lambda \eta s$ with matter and corpulency . . ."-Hammond: Works, vol, Iv., werm. 7. 2. Excessive fstness or bulkiness of body; feshiness, obesity.
"Her age and corpulency rendered all attempts of
thet sort impossihle."-Melmoth: Pliny to Tacitus thet sort impo
*3. Thickness, grossness, density, or opaqueness.
-Ray: the heaviness and eorputency of the weter. ...-
TI One of the most notable csses known of corpulence wss thst of Daniel Lsimbert, who being weighed a fow days before his desth, in 1809 , was found to be 739 lbs., or $\$ 2$ st. II lhs. Corpulence is often constitutionsl, and not simply dependent on the qusitity or cbaracter of the food consumed. The ixtter, however, have a powerful influence. In 1863 Mr. Benting published a psmphlet recommending to the over stout abstinence from tugsr sid substances containing minch starch, a regimen which he considered hsd ensbled him to diminish his own inordinste stoutness.
or'-pu-lent, a. [Fr. corpulent; Sp., Ital., (b Poit. corpulento; Lat. corpulentus, from corpus =a body.]
I. Literally:
* 1. Corporeal ; possessing a body and ma teriai form.
*2. Pertaining to the body ; carnal.
thinic. to elovate our fancien, to mako it posealbio to carnal."-Eamile Work, vol. iv., eerm. vil.

3. Excessively fat, fleshy, bulky, obese.
tuyit: ' I wasasea, vory corppulent and hesuy ....-Hack-
*4. Solid, dense, thick, opaque
"The overmnch perspiculty of the atone may noem
*II. Fig.: Dense, obscure, wanting in ciearness.
"Wo my it it a feeshy atiie, whea there is moch perphrnais, sod circuit of woids; nid when, with Jonson: Disoverice.
IT Crabb thus distinguishes between corpu lent, stout, snd lusty: "Corpulent respects the festy state of the body; stout respects also the state of the muscles and bones: corpulence is therefore 6 D incidentsl property ; stoutness is a nstural property : corpulence may come upon us according to circumstsnces; stoutness is the nstural make of the body which is born with us. Corpulence snd lustiness are both with us. Corpulence by the ststs of the health; but the former may arise from disease; the lstter is alwsys the consequence of good health; is alwsys the consequence of good health;
corpulence consists of an undue proportion of corpulence consists of an undue proportion of
fat: lustiness consists of a due snd full profst: lustiness consists of a due snd full pro-
portion of all the solids in the body." (Crabb: portion of all
cor'-pu-1put-1美, adv. [Eng. corpulent; -ly.] In a corpulent manuer.
cor'-pŭs, s. [Lat., pl. corpora.]

* I. Ord. Long.: A body.

IL. Technically:
I. Bot.: The mass of anything. Thus corpus ligneum, or corpus lignosum, is the mass of the woody tissue in s plsnt. (Treas. of Bot.)
2. Anat.: In the eame sense as I. Various parts of the mechanism of the bodily rrsme are so called. Thns there are, Corpus callosum, corpus ciliare, corpus dentutum, corpus fimbriatum, corpus Highmorianum, corpus luteum, snd corpus spongiosum urethra, dc.

## corpus callonum, s. [Lat. $=$ the firm

 body.]Anat. : The grest transverae commissure of the cerebral hemispheres in msn and the mammalis.
Corpus Christi, s. [Lat. $=$ the body of Christ.] For def. see etym.
If There is 8 Corpus Christi College st Cambridge which was founded sbout A.D. 1351 snd annther at Oxford founded in A.0. 1546.

II (I) Corpus Christi Day:
Ecclesiol.: The day on which the festival of Corpus Christi is kept.
(2) Festival of Corpus Christi:

Ecclesiol.: A festival in the Church of Rome in honour of the body of Christ, slleged, after transubstantistion has been effected, to be corporally present in the Eucharist. It was first celebrated at Liege, in A.D. I24I, by the Carst cens of St. Martin. It was recommended in a bull issned by Pope Urban IV. between 1262 and 1204 , snd conflimed snd enjoined by 1262 and 1204, and confrmed $8 n d$ enjoined by
the Council of Vieme in 1311 or 1312 . The French call it la Fetc-Dieu. It is observed on the Thursday after Trinity Sunday. The rejection of transubstantiation by the English Church st the Reformation naturally carried with it the abolition within its pale of the Corpus Christi festival.
"Ampfellow: The Thevogian: Tale ; Torquema

## corpus delicti, s.

Law: The substance of the crime slleged, with the attendsint circumstances as specifed in the libel.

## corpus juris canonici, s.

Law: The body or code of canon lsw.
corpus juris civilis, s.
Law: The body or code of civil law.

* cor'-pụ-sąnçe, s. [Corposant.]
cor-pŭs'-cle (ole as cel), s. [Lat. corpusculum (pl. corpuscula) $=\mathrm{a}$ little body, dimin. of corpus (q.v.).]
I. Ord. Lang. : A little body of snything.

II. Technically:

1. Nat. Phil.: In the same sense as [I.] 2. Anatomy:
(1) Human: Minute solid microscopio bodiee found in the blood. They are of two kinds, (1) Coloured corpuscles, known slso as the red particies or the red globuies; and (2) the colourless, known also as the white or pale

## COBPUSCLES OF HUMAN BLOOD.

corpuscles. The former are the more numer ous. The coioured corpuscles are not really globular; they are flattened or discoidsl, the outline being circular. On the sides constituting the disks there is sometimes a con cavity. Their sverage size is from zrot to $\pi^{\frac{1}{2} 0}$ of an inch in diameter, their breadth of that amount.
(2) Compar.: In most msmmsls the corpuscies are like those of man. In the comel, puscies are they are elliptical in outline. In birds, reptiles, and most fiehes they are oval birds, reptiles, and most fishes they are oval
disks with s central elevation on each aide. disks with s central elevation on each aide. Those of the invertebrats are, as a rule, not
coloured, the annelids alone being an exception. They are, as a rule, disk-shaped, with a circular or an oblong outline. Quain.)

## 3. Botany:

Plural:
(1) Certain cells forming within the embryo sao in the Coniferx. Each of these corpuscles in its turn produces in Its interior a rosette of cells, generally four in number, with which the pollen tube comes in contact. The name corpuscle in this sense was given by the grest hotanist Robert Brown.
(2) The spore eases of certain fungsls.

II (I) Touch corpuscles (Corpuscula tactus):
Anat.: Certain corpuscies found in the skin of the hand and foot, and one or two other parts, deaigned to make those parts more sensitive in tonch. They were discovered by R. Wagner and Meissuer. (Quain.)
(2) Vermiform corpuscles:

Bot.: Spiral vessels in a contracted, strsngied, or distorted condition. (Treas. of Bot.)
oor-pŭs'-cụ-lar, a. [Fr. corpusculaire, from Lat. corpusculum.] [Corpuscle.] Pertsining to a corpuscle or smail trody.
"The mechnnical or corpuscular philosophy, thougt portd, had lain dead for many ages in contempt aud oblivion"--Bentley.
If $\dagger$ (I) Corpuscular philosophy: The philosophy which attributes all phenomens to the sction of bodies on each other. It is called slso the Corpuscularian philosophy (q.v.).
(2) Corpuscular theory or hypothesis of light: Nat. Phil.: The theory or hypothesis which represents light is an imponderable substance consisting of molecules of extreme tenacity, emitted in straight lines with slmost infinite velocity from luminous hodies. It is called also the Emission theory. It had the powerful support of Sir Isaac Newton, but the Undulatory theory or hypothesis, the rival of the former one, is thist now generally $i$ accepted.
00r-pŭs-cụl-är'-ían, a. \& s. [Lat. corpucul(a); Eng., \&c. suff. -arian.]
A. As adjective:
J. Pertaining or relating to minute bodies or corpuscles, or to the corpuscular philosophy (q.v.).
"As to oatural philowophy, I do not expeet to sood intelligible than the corpuscularian or meebanical." Boyle.
boll, boy ; pout, jowl; cat, ¢̧ell, ohorus, çhin, beņh; go, gem ; thin, this; sin, aş ; expect, Xenophon, exist. ph = 1.

C. As sutbst. : The act or process of wearing away or consuming by frequent friction, \&c.
cor-ral', s. [Sp., from corro = a circle ; Port. $=$ a cattle-pen.
I. A pen or enclosure for cattie, harses, \&c.
3. An enclosed apace formed of wagons as 8 means of defence for emigrants while passing through indian territory.
4. A pen or enelosure for capturing elsphanta.
odr-ral', v.t. [Corrale s.]
5. To shut up into a corral.
6. To form into a corral.
cơr-rë́-a, cor-rat-a, s. [Named after Joseph Correa da Serra, a distiaguished Portuguese botanist.\}
Bot.: A genus of Rutacea, tribe Boronlex. The leaves are simple, dotted, and downy the calyx is cup-shaped, nearly entire ; the retals four, reddish or greenish; the atamens eifht. The leaves of Corncio alba and other species of the same gemus are used in their native country, Australia, as a suhstitute for tea. They are sometimes called Native Fuschias, from a slight resembance they have to that genus of plants. Some are knowa in British greenhouses.

* cŏr-reo-ci-on, * cor-rec-ci-oun, \& [Cornection.]
oôr-réct', a. [Fr. correct; Sp. correcto; Ital. correlto, from Lat. correctus, pa par. of corrigo = to set straight or right : con $=$ cum $=$ with together, folly, and rego $=$ to rule, to direct.]
I. Set right; free from fault or imperfection, or according to a fixed standard or rule.

2. True, exact ; in aceordance with facts.
3. Accordiug to propriety.
4. Accurate, faultleas.
"Always tuse the most correas editions . . ."-Follom

- Crabb thus discriminates hetween correct and accurate: "Correet is equivalent to corrected or set to sights : accurate impiles pro perly done with care, or by the application of care. Correct is megative in ita senae accurate in positive: it is sufficient to be frea from fanlt to be correct ; it must contain every minute particular to be accurate. Information is correct which contains aothing but facts; it is accurate when it contains a vast number of detsils. What is incorrect ]a allied to falsehood; what is inaccurate is general and indefinite." (Crabb: Eng. Synon.)
cör-rěct', * cor-recte, *oor-ette, v.t. \& th [Fr. corriger; Sp. corregir; Port. corrigir; Ital. correggere.] [CORRECT, a.]

## A. Transitive:

I. Ordinary Language:

II. Printing: To revise a pronf; to polat out by certain marks any words or letters which may require correction; siso to alter the tyje where a wrong letter, \&c. has been used.
B. Reflex. : To necall words used in error.

+ C. Intransitive

1. To make corrections or amerdments.
".... I corrected. because it was as pleasant to mo
to correct as to write. "-Pope: Homer, Fred.
2. To chastise, to punish.

- Crabb thus discriminates between to cor rect, to rectify, and to reform: "Correct respects ourselves or others; rectify has regard to ones aelf only. correct is either an set of anthority or discretion; rectify is an act of discretion oniy. What is corrected may vary th its magnitude or importance, and consequently may require more or less trouble what is rectificel is always of a nature to be nitered withont great injury or effort. Habitual or individual faults are corrected; individual mistakes are rectified. A person corrects himself or another of a bad labit in speaking or pronouncing; he rectifies any error in his accounts. Mistakes in writing nust be corrected for the advantarge of the scholar; mistakes in pecuniary transections eanaot be tou soon rectifid for the satisfaction of all parties Reform like rectify is used only for one's aelf when it respects ipersonal aetions; but reform and correct are likewise employed for matters of general interest. Correct in neither case amounts to the same as reform. A rerson corrects himself of particular habits; he reforms his whole life: what is corrected undergoes a change, more or less alight; what is reformed nssumes a new form anif lecomes a new thing. Correction is always alvisable; it is the re moval of an evil : reform is enuaily so as it respecta a man'a own conduct; bnt as it reapects pubiic matters, it is altogether of a questionshle nature; a man esnnot begin too soon to reform himself, nor too late to sttempt
reforming the constitntions of nociety. The abusea of goverument may alwaya be edran tageously corrected by tha judicious hand of a wise minister : reforms in a atate are suwa $y$ attended with a certain evil, and promise but an uncertaia good; they are never recom mended but by the young, the thoughtless, the lusy, or tha interested." (Crabb: Eng. Synon.)
cór-rěct'-ą-ble, $\dagger$ cor-rěct'-I-ble, $a_{\text {. }}$ [Eng. correct; able.] Capable of being cor rected; that may or can be corrected.

6. That which servea or tends to correct the qualities or effects of any ingredient; a eorrectory.
II. Printing: The correcting of a proof; the altering of wrong type.
T Crabb thos discriminates between correction, discipline, aud punishment: "Children are the peculiar subjects of correction; discipline and purishment are conflined to no age. A wise parent corrects his ehild ; a master maintains discipline in his school; a gederal preserves discípline in his army. Whoever commits a fault is liabie to be punished by those who hava authority over him; if ba commits a crime be ambjeets himself to be punished liy law. Correction and discipline are mostly exercised by means of chastiaement, for which they ars often employed as a mubstitute; punishment is inflicted in any wsy that gives pain. Correction and discipline are both of them personal acta of nuthority exercised by superiors over inferiors, but the former is mostly employed by one individual over another; the latter has regard to a nmuner who ane the aubjects of it directiy or indirectiy: punishment has no relation whatever to the ageot by which the action la per-

culir, which torms matter, nurrounded by a layer of veal-

oor'-tio-al, a. [Mod. Lat. corticalis, from Class. Lat. cortex (genit. corticu) = bark.]
Bot., Zool., dc.: Belongiag to the outar part of a plant or animal. Exterasl as opposed to medullary.
[^193]
## cortical integument, s.

Bot.: The bark or false bark of eadogens.

## oortical layer, 8.

Zool.: The layer of consistent sarcode which in the Infusoria encloses the chyme mass, and is aurrounded by the cuticle. It is called also the parenchyma of the body. (Nicholson.)

## cortical stratum, $s$.

Bet. : The superficial layer of tissue in the thallus of a lichen. (Treas. of Bot.)

## cortical tissue,

Bot. : A tissue in the stem of dicotyledonous plants just beneath the epidermia. It ia oftea separated into two portions, an outer and an inner cortex. (Thomé.)
-or-ti-ciar'-1-a, e. [Lat. cortax (genit. corticis) $=$ bark, sud fem. adj. auff, -aria.]
Entom.: A genus of beetles, family Lathrididæ. Sharp, in 1871, enumerated 14 British apecies.
cor-tǐ-cà-ta, s. pl. [Lat., Deut. pl. of corticatus = covered with bark.]

Zool.: "Barked corals," corala with bark. A usme rometimes opplied to corals possessing a fixed calcareons or horny axis of some solidity, from which the fleshy portions project like branches from the stem of a tree. They are now ranked under Zoantharia and Alcyonaria.
oor'ticc-äte, + cor'tion-ä-t关d, a. [Lat. corticatus $=$ covered with bark.]

Bot.: Coated; harder externally than internally.
"This animal in a kind of lizand, a quadruped corti-

## corticio acid, 8.

Chem.: $\mathrm{C}_{12} \mathrm{H}_{10} \mathrm{O}_{6}$. An acid found in the alcohelic extract from cork. An amorphens cinnamon-coloured powder, which is precipitated by water from the alcoholic extract. It dissolves in alkalies, forming a deep-red aolution.
cor-tĭç'-ífěr, s. [Lat. cortex (genit. corticis) $=$ cork, and fero $=$ to bear. $]$ One of the Corticata or harked cerals.
cor-tiç-\ffeẽr-oŭs, a. [Lat, cortex (genit, corticis) $=$ bark, and fero $=$ to besr.] Prodncing bark.
cor-tǐc'-1̌-form, a. [Lat. cortex (genit. cor(icis) $=$ bark, and forma $=$ form, appearance. $]$ Of the form or appearance of bark.
cơr'-tǐ-çĭn, s. [Lat. cortex (genit. corticis) $=$ bark, aud Eng. вnff. -in.]
Chem.: An amorphous, tasteless, inodorous powder obtained from the bark of the Aspen, Popmlus tremula. It is easily acluble in alcohol snd in acetic acid, and is precipitated by water or sulphuric acid.
cor'tǐ-cōģe, a. [Lat. corticosus = full of bark.] Fill of bark, abounding in bark, corticous.
cor'ti-coŭs, a. [Lat. corfex (genit. corticis) $=$ bark, and Eng. anff. -ous.] The same as Coaticose (q.v.).
cor-tî'-1ê, s. [Ital., from Iow Lat. cortile, curtile.]

Architecture:

1. A small court surrounded or iaclosed by the appurtenances of a building. It was an important festure in the architecture of the early Christian churches or basilicas, and was usually square in plan.
2. The court-yard or area of a dwellingheuse.
cor-ti'-na, s. [Lat. = a ronud vessel, a kettle, a canldron.]

Bot.: That portion of the velum in a fungal which adheres to the margin of the pollen when the latter is in fragmenta. (Lindley.) The flamentons rigg of aome Agarics. (Treas. of Bot.)
0or-tĭn-är'-1-cŭs, s. [Lat. cortin(a) (q.v.), and Eng. auff. -arious, from Lat. auff. -arius.] Bot.: The same as Cortinate (q.v.).
cor-tinn-är'-1̌-ǔs, s. [Lat. cortin(a), and anff. -arius.]

Bot.: A genus of fungals, closely akin to Agaricus. They have a apider-like web, and bright red-brown spores. The epecies are numerous.
cor'-tǐ-năte, s. [Lat. cortin(a), and Eag., \&c. auff. -ate.]

Bot. : Having a etructure like that of a cobweb; cortinarious.

* cor-tine, * cor-tyn, s. [Cuatain.]
"Cost up the cortyns.": Chancer: C. T., 0,8s1.
cor-t̄̄'-sa, s. [Named efter J. A. Cortnsus, Professor of Botany at Padua.]
Bot.: A geaus of Primulacex, containing but one known species, a plant from the northern aud alpine parts of the easteru hemiaplere. The radical leaves have long petioles. Inforescence umbelliferous, the fiovers with a tubular 10 -toothed calyx; a corolla with a ahort tube; 5 stamena; and a s-celled capsule dehiscent from the apex, and giving forth many seeds.
cor-tū'-spal, a. [Mod. Lat. cortus(a), and Eng., \&c. auff. -al.]
Bat. : Pertaining to the geaus Cortusa, or having it for a type.
- Cortusal Alliance: [Cortcosales].
cor-tū-mā'-1ēş, s. pl. [Mod. Lat. cortusa (q.v.), aad pl. auff. -ales.]

Bot. (The Cortusal Alliance): An allinace of perigynoua exogens, containing the orders Hydrophyllacee, Plumbaginacee, Plentaginacer, Primulaceæ, and Myrsinaceæ. The fiowers are generally dichlamydeous, monepetalous, and aymmetrical ; the placenta free and central; the cmbryo lying amid much albumen. (Lindley.)
oơ-rŭn-děl'-līte, s. [Mod. Lat., \&c. corundum; dimin. anff. ell; aod -ite (Min.) (q.v.).] Min.: The same as Margarite (q.v.).
cơ-rŭn-dóph'-y̆l-lite, co-rŭn-dǒph'-1lite, s. [Dans, who gives the form cormclophilite, derives it from Lat., de corendum, and Gr. фidos (philos) $=8$ friend. The British Museum Catalogue alters this to corundophyllite, which wauld be from Gr. фüג入or (phullon) =a leaf.]

Min. : A variety of Clinochlere (Brit. Mus. Cat.). Dans, on the contrary, considers Clinechlore as properly separatiug into two minerals, one of which is Cormmdophilite. It is a moneclinic mineral crystal, being in donble hexagonal prisms. The hardness is 2.5 ; the gp. gr. 2.9 ; the colour green; the lnstre of the clesvage faces semewhat pesrly. Compos.: Silica, $24.0-25.06$; alumina, 259 - 30.7 ; jrotoxicle of $\mathrm{iran}, 14 \cdot 8-16 \cdot 5$; mag has strong double refraction.
cơ-rŭn'-dŭm, * co-rĭn'-dốn, * co-rǐ-vìn'dŭm, ${ }^{\text {a }}$ co-rĭ-vĕn'-dŭm, $s$. [Ilindust., sce. karand.]

## Mineralogy:

1. Gen.: A rhombohedral transpareat or translucent mineral, very tough when compact. Its hardness is 9 , its al'. gr. $3 \cdot 9-4 \cdot 16$. Its lustre is gencrally vitreous; its colours blue, red, yellow, browa, grey, or "ncarly white; its streak in all cases ceiourless. It conaists of purealumins-i.e., oxygen, $46^{\circ} 6$, and aluminum, $53.4=100$. Chemically viewed, it ia aluminum-oxide, $\mathrm{Al}_{2} \mathrm{O}_{3}$. There are three ia aluminum-oxide, ${ }^{\text {and }}{ }_{2} \mathrm{O}_{3}$. There ore of it-Saphire, Corusdum proper, and Emery. (See tbese worda.)
2. Spec. (Corundum proper): It inclndes the apecies of the geona which are dark in colour and ouly translucent. But its hues may be light blae, grey, brown, or black. It ia found la many localities io the Apalachian Mountaio Syatem of the Luited States.
a cơ-rǔs'cạnt, a. [Lat. coruscans, pr. par. of corusco = to gleam, to glitter.] Gleaming, slittering in flasies; flashiog.

cör-ĭs-cäte, vi. [Lat, coruscatus, pa. par.
of corusco $=$ to gleam. to glitter, to fiash.] To gleam, to glitter in flashes, to flash.
ot ". more coruscating and eutleltenlag than xny other matter. . . ."-Gratnill: Art of Embalming. D.
3. 

cŏr-ŭe-cā'-tion, s. [Lat. coruscatio, from coruscatus, pa. par. of corusco.]
J. Lit.: A flash, a audden gleam or burat of light in the clouds or atmosphere; a brilliant radiation.
"Wo zee that lightnings and corucoatione, which ane 2. Fig. : A brilliant display of Intellectual power or wit
"Thero are benatitul coruscations of haney."-Zat

 (q. v.), and fem. pl. adj. auff. ida.]

Bot. : A family of Orchids, tribe Ophreæe.
of-ry'-gi-ŭm, s. [From Gr. кopes (komus) $=$
a helmet, which the flower somewhat re a helmet, which the flower bomewhat resembles. (Loudon, Paxton, \&c.) Is it not rather from к心́puксор (körukion), dimin. of кы́puкоя (korukos) $=$ a leathern sack or wallet for provisions?]
Bot.: A genus of Orchids, the typical one of the family Ophrea. It has gaccate petals, and the lateral gepals connate. Nine or ten epecies are known, all from the Cape of Good Hope.

* cơr-y̆-dà'-lĭ-a, s. [Corvialie.]

Chem.: The ssme as Corydaline (q.v.).
cör-yd'-a-line, †cơr-yd-a-in'-ng, s. [Mod. Lat. corydalis (q.v.), and suff. ine, -ina (Chem.).]

Chem. : A weak organic base, $\mathrm{C}_{18} \mathrm{H}_{19} \mathrm{NO}_{4}$. Corydaline occure in the roots of Corydalis bulbosa, C. fabacea, and Aristolochia cava. The root is exhausted with water contaloing hydrochlorle acid, the solution precipitated by sodium carbonate, the precipitste dried and treated with alcohol, and the solution allowed to crystallize. Corydaline crystallizes in colourless needles, which melt at $130^{\circ}$. Nitric acid converts it into a red-brown resin. Corydaline is fusoluble in water, but soluble in alcohol, forming a bitter solution. Concentrated sulphuric acid dissolves it, following centrated sulphuric acid
a dark orange solution.
 dallis) $=$ the crested lark, the spur of which those of the fumitories somewhat resemble.]

Bot. : A genue of plants, order Fumariaces, tribe Fumariee. There are four petals, onc of them gibbous and spurred at the base; the ovary has many ovules; the pod is two-valved, compressed, many-seeded, the seeds with a crest. Coryfalis claviculata, the White Climbing Corydalis, is indigenous to Britain, especially on the walls and roofs of honses in the Highlands of Scotland. It has long, very slender, much-branched stems, pinnate leavea, the petioles ending in tendrils; the flowers small, pale yellow, amost white. C. solidir and lutectare not indigenous to Britain, though they have here and there escaped from gardens. The tubers of C. tuberosa contain a peculiar alkali called Corydaline (q.v.). C. peculiar alkali called corydalne (q.v.). and at the same time gomewhat astringent and at the same time somewhat astringent and acrid. lt was formerly used as a substitute worms and as an emmenagogue.

- Climbing Corydalis:
(1) Corydalis claviculata. [Coryoalis.]
(2) An American nane for Aulumia. (Treas. of Bot.)
cŏr-y̆1-ä'çeč-80, s. pl. [Lat. corylus (q.v.), and fem. pl. adj. suff. acere.]

Bot.: Mastworts. An order of diclinous exogens, aliance Queroales. It consiats of trees and shrubs with alternate, gimple, exatipulate leaves, often with the veins ranning atraight from the midrib to the margin. Male flowers amentaceous, with 5 to 20 stamens; female having the ovary crowned by the rndiments of an adherent caiyx, seated within a coriaceous involucrs called a cupule; ovary
with two or more cells; ovules pendulous or peltate. Among the genera are Carpinus (Hornbeam), Corylue (Hazel), Fague (Beech), Castanea (Chestnut), and Quercus (Oak). Found in the temperate parts of the Old and New Worlds. In the tropies they grow chiefly on mountains. In 1844 Lindley enumerated eight genera, sod estimated the apecies at 265 .
cőr-y-1Øph-1-dæ, s. pl. [Mod. Lat. corylophus, and fem. pl. adj. вuff. -ide.]
Entom. : A family of pentamerous beetles. Type, Corylophus.
 met, and $\lambda$ ó $^{\prime} \phi$ os (lophos) $=$ the back of the nack, a crest.]
Entom. : A genus of beetles, the typical one of the family Corylophidæ. Sharp euumerates two British epecies.
 fruit appearing as if covered with one.]

1. Bot. : The Hazel-nut. A genus of trees, the typical one of the order Corylaceas. The 'barren flowera are in a cylindrical catkin, the scalee 3 -cleft, the middle lobe covering the two side ones; etamens three, with one-celled anthers. Fertile flowers 1 or 2 together, within a mioute involucre of 2 ho 3 cohering, lacerated, hairy scales, the whole constituting a short catkin; etignas two, flliform; nut Invested with the enlerged united scales of the involucre. Corylus Avellana is the Common Hazel-nut or Hazel (q.v.).
2. Palco-botany: A apecies of Corylus is found in the Miocene.
cǒr'-y̌mb, * cǒr-y̌m'-bŭs, s. [Lat, corymbus $=$ a cluster of ivy berries, or of fruit or flowers; Gr, корv $\boldsymbol{\beta}$ os (korumbos) $=$ the uppermoat point, head, or end.]
Botany:

* 1. In Pliny what in now called a capitulum. This is not the corymb of modern botanists.

A Amongst the ancient botanists, it was nsed to express the bunches or clusters of berries of ivy diocosis flower, wbose seeds are not pappous, or do not fly away in down: "uch are th
2. A kind of inflorescence, skia to the raceme in heving stalked flowera, but differing

coryma, elden thee.
in having the lower perifels so long that their flowers are clevated to the same level as those of the upper ones. Examples, the Wallfower the Elder, \&c.

+ © Cumpound Corymb:
Bot.: A corymb the expansion of which is centrifugal insteal of centripetal, i.e., it commences at the centre instead of the circumference. A branched corymb, each of whone divisions is corymbose, is more generally called a Fascicle (q.v.).
 [Lat. corymbus, $i$ connective, and suff. -ate -ated.] Garnished with branches [buaches (?)] of berries. (Johnson.)
cơr-y̆m-bif'-ẽr-a8, s. pl. [Lat. fem. pl. of corymbifer $=$ bearing clusters of ivy berries from corymbus [COAYмв], and fero $=$ to bear.]
Bot.: The name giveri in 1789 by Jussieu to the sub-order of Cnmposite plants afterwards called Asteracere. It is one of three sub-ordera of Composites, the others being Cyaarocephalæ and Cichoracere.
cơr-y̆m-biff'-ẽr-oŭs, $a$. [Lat. corymbus $=\ldots$. a corymb; fero $=$ to bear; and Eng. suff. -ous.]

 Port．cosmogoniu，all from Gr．кобرобovia（hos mogonia）＝the creation or origin of the world ко́ $\sigma$ ноs $(k o s m o s)=$ order，. the worli Cosmosl，and yovos（gomos）＝that which is begotten，a child，．．a begettillg；yiyvouat （gignomai）$\Rightarrow$ to be produced，to lecome；root үє́vo（genō）or $\gamma \in \nu(g e n)$ ，Sans．gan．］The origin or creation of the worid；an investigation or dissertation regarding it．
TI Cosmogooy and geolngy，though having eertain relations to each other，are still dis tinet，cosmegony inquiring inte the first origh of thinga，and geviogy commencing at a peried when，that origin having taken place，succes sive events in the earth＇s history began to leave behind them memorials from which thelr character might he more or less cleariy rea－ soned out．Various epochs may be traced in its history．
（1）Ancient Cosmogony unmodited by the Beti Anolent cosmogony wnmodiled ay vie speculative minds in most ancient countries， and a work formally named noguoyovia （kosmogonia）was publlished by a Greek poet and philosopher，Permenides，believed to opinion anong the most sncient theologiana －Fgyptian，Hindoo，Greek，ard Roman－was that the world was created by the supreme Being．Various philosophers，on the contrary， whose attachment to the creed of their respec－ tive countrise was but nominal，believed in tha eternity of the world．The acceptance of this latter tenet did not necessarily exclude belief in a Supreme Being．Thus Plato held at the same time that there was a Supreme Intelli－ gence，snd that matter was eternal．Thongh not created by the Supreme Being，Heoperated on it end fashioned it according to Ilis will． Successive creations and catastrophes of the world were held to have occurred，and ita ultimate destruction or renovation by fire was also expected．
（2）Jewish \＆Christian Cosmogony：The doc－ trine of the eternity of matter disappeared wherever the new phase of lelief arose，for the teaching of the Old Testament was preeise ＂In the beginning God created the hesvens and the earth＂（Gen．i．1）．See slso the whole of Gen．I．，witn Exod．XX． 11
（3）Jewish © Christian Cosmogony Ulended with independent speculation：While geology was in its infancy，it gave its strength to cos－ mogonical inquiry，with the result of generat ing controversies which continued century after century．They were terminated，not by the settlement of the question in dispute but by the wise resolve of those engaged in it，or at least of the higher minds among them，to confine their inquirics，at least for a time，to geological facts，and reconstruct，as far as it was practicable，the past history of the globe， before sreculating as to its origin．Metaphy sicians like Kant took up the akandoned held， but withoot notable result．
（4）Semi－scientific Cosmogony：Geologistis have shown some tendeney to return to cos－ vastly increased number of facts whieh the investigations of the last half century have gecumulated．The revival of the nebular hy pothesis of La Place was a return to cosmo－ gonical speculation．［NEbulah hypothesis．］ gonical spectlation．［NEBulah hypothesis． The efforts made by Sir Hilliam Thomson （afterwards Lord Kelvin），Prof．Tait，and others，to ascertain ly a study of the sun what fund of hygone time geologists can draw upon aiso fall within the province of cosmagony．
cơs－mŏg＇－raph－ẽr，8．［Gr．кобноүра́фоs（kos－ mogruphos［＇©osmogaphic］，and Eng．suff． er． 7 One who descrihes the broader features of the worid without descending to details ； one who studies or writes on cosinography （q．v．）．

cost (2), " ooste (1), ${ }^{n}$ const, ${ }^{2}$. [ 0 . Fr. cost, coust ; Ger., Dnt., Sw., \& Dan. kost ; Sp. costo, costa; Ital. costo;'O. H. Ger, chosta.] [Cost, v.]

## A. Ordinary Language:

L. Literally:

1. The price, value, or amount pald or charged for any cummodity bought or taken in barter.
"In the oast of whot there has been vory little
2. Expense, cherge : money expended on the carrying ont of anything.
"He wehal hau a moper at your aither cost." $\begin{gathered}\text { Chuucer: } C \text { C. } \\ \text { T., } \\ \text { " }\end{gathered}$
-3. Value, worth
"Haeran me zet ofte grat coor."- $A$ yenbicte of Inveyt. p. 176
3. The enstensnce given to a servant, as distinct from money; ss, I got so much money in wages, besidea my cost. (Scolch.)
II. Figuratively:
4. The penalty paid for any set committed, or any duty omitted.
5. Loss, detriment, tnjury, pain, or trouble. Though dearly to my mow thy traion, and tonla.

* 3. Luxury, sumptuousuess, great expense. "Let foreign priaces valoly bonat
B. Law:

1. (Generally in plural): The smount of cbarges incurred by the gainer in a suit, and awarded agamst and to be paid by the party losing.
2. Scots Law: Dnty payable in kind, as distinguished from that paid in money.
I Crabb thus discriminstes betweeo cost, expense, price, snd charge: "The cost is what a thing costs or octasione tn he lsid ont; the expense ia that which is sctually isid ont; the price ia that which s thing may fetch or cause to be laid out; the charge is that which is required to be lsid ont. As a cost commonty comprehends an expense, the terms are on varione occasions used indifferently for each other : we spesk of counting the cost or counting the expense of doing snything; at a great cost or at a great expense: on the other hand, of venturing to do s thing to one's cost, of growing wise at other people's expense. The cost and the price have respect to the thing and its snppoaed value: the expense and the charge depend on the option of the peraona. The cost of $s$ thing mnst precede the price, and the expense mnat aucceed the charge; we can never set a price on anything until we have aacertained what it has cost ua; nor can we know or dafray the expense until the charge be made. There msy, however, frequently be a price where there is no cost, and vice vers $A$; there may also be sn expense where there is no charge; but there cannot be a charge without an expense. Costs in a suit often exceed in value sud amount the thing contended for: the price of things depends on their relative value in the eyes of others : what costs nothing sometimes fetches a high price; and other thinga cannot obtain a price equal sud other thinga cannot obtain a price equal to the first cost. Expenses vsry with modes of hving and mens desires; whoever wants much,
or wants that which is not easily obtained, or wants that which is not easily obtaincd, charges are exorhitant the expenses inust necessarily bear a proportion. Between the epithets cosily and expensive there is the same distinetion. Whatever is costly is naturally expensive bnt not vice versA" (Crabb: Eng. Synon.)

## cost-book, s. \& a.

## A. As substantive

Miring: A book in which a number of adventurera who have obtained, for a stipulated jrsyment in ore or in money, the right to work alode or ming cater their nanies, the shares which eacli of their number las in the adven. ture, and the proceedings which take place at their several neetings.
B. As adj.: Possessing or nsing such a

If Cost-book mining company: A mining company registered on such s model or acheme. cost-free, $a$. Fres of coat or charge.
$\uparrow$ cost-sheet, s. A table or statement showing the cost or expenditure on any undertaking.
00nt (3), cogte (2), s. [O. Fr. coste; Lat. eonta.] [CoAsT.]

- I. Ordinary Language:

1. A rib or side.
"Betwixt the cost of a ship."-Ben Jomson: Staplo
2. News.
3. A country, a region, a district.
4. A coast or shore.
"By the case of the feyer toe"*
Torrent of Portugat, 121.
II. Her.: An ordinsry which contains s fourth part of the bend, when only one is borne; when borns by conples it is called cottise (q.v.).

* cost (4), * coste (3), s. [A.S. cost=s manner, a mesua; O. lcel. kostr; O. H. Ger. chost, kost.] 1. A contrivance, a plan.
"Nis ther coss nan other."-Layamon, id. 181. 2. A trick.
"He haueth thes deofles costes."
O. Lng. Homilies, p. 99.
cost, * costen, v.l. \& i. [O. Fr. coster, couster; Fr. côter; Ger. \& Dut. kosten; Dan hoste ; Sw. kosta; Ital. costare, from Lat. consto $=$ to stand together, to cost.]
A. Transitive:
I. Literally:

1. To stand at; to require to be psid, expended, or laid out for.
Lord iay Ood of that which doth cofterings unto the 2 Sam. Ixiv. 24.
2. To be at a cost or charge for ; to pay for. "Coute in bem that thel schace her heedis." -
Wyctife: Acts Xxi. 24 . II. Figuratively:
3. To require or demsud en expenditure of, ss of time, trouble, \&c

And this ellight disconteat, azea say,
Cose hloorl upou another day ".

2. To be the canse of, to give rise to.
will require the art of a writer, and cost hin:
B. Intrans. : To be bought for; to be lisd at a price.
I To cost dear: To require or cause the ontlay or expenditure of a large amount, whether of noney, tine, trouble, or pain.
cods'ta ( $\mathrm{pl} ., \cos t \varepsilon$ ), s. [Lat. = s rib.]

1. Anatomy:
(1) Human (Generally in plural): The ribs. ln man they number twelve on exch side. [RIB.]
II Coster of the Scapula, 1.e., of the Shoulderblade: Three borders to thic acajula, (I) the superior, (2) the external, sxillaty, or inferior, and (3) the internal or posterior border. (Quain.)
(2) Comparative :
(a) of Vertebrates: The ribs.
(b) Of Crinoids: The rows of plates which succeed the inferior or hasal yortion of the cnp.
(3) Of corals: The vertical ridges on the outer surface of the theca; they mark the position of the septa within. (Nicholson.)
2. Bot. : The midrib of a lesf.
cost'-age, * coust-age, kost-age, s [O. Fr. costage; Low Lat, costaqium, from Lat. consto $=$ to cost.] Expense, charge, cost. "A man may goon with lytel costage, and schortte

4. Cotton-thread.
II. Technically:
5. Bot. : The appropriate aame of any plant belonging to the genus Gossyplum, and apecially of Gossypium herbaceum, G. religiosum, G. barbadense, G. indicum, and G. arboreum. [Cotton-taEe, Goasypum.]
*I (1) Corkwood cotion: The game given in Trinidad to the down of Ochroma Lagopus. (7reas. of Bot.)
(2) Larender cotton: A aame given to a kind of southernwood, Abrotonum firminea, the teaves of which are covered with hairy pubescence.
(3) Natal cotton: A textila material resemhling trua cotton, derived from the pods of a species of Batatas. It is of the order solanacea, and tha same genus as the Sweet Putato. (Treas. of Bot.)
(4) Petty cottan: A general aame for G naphaHum and other woolly composite plants.

* (5) Philosophic cotton:
o. Chem.: Flowera of zinc which resemhla cottoo.
(6) Wild colton: The species of Eriophorum. [Cotton-grasa.]

2. Hist., Comm., Manufact., \&c. :
(1) Definition: The tibres or filamentous matter produced by the surface of the seeds in various syecies of Gossypium [II. 1], and filling np the cavity of the seed-vessel.
finte, fät, färe, \&midst, whãt, fâll, father; wè, wơt, hëre, camẹl, hẽr, thêre; pine, pit, sïre, sïr, marine; gö, pơt

Spain, wheocs in the fourteenth century it spread to Italy, and ultimataly to the whole of Europe. It is mentioned as ons of the "commoditees" imported into England by the Janusys (Genoess) in the "Libel of English Janusys (Genoess) In the "Libe of English Policis" (1436), and even earlier in a "Com-
potus of Bolton Abbey," dated 1290, there is potus of Bolton Abbey," dated 1290 , there is 1d." Cotton staffs wers first mado by ma chinery by Louls Paul, between A.D. 1736 and 1743. They now constitnte oon of the lead ing staples of manufacture, alike io the larg manufacturing citiea of the United Statea aod of England.

Columbua found the cotton-plant wild in Hispaniola, in other Weat India Ialands, and in Sonth America. The Mexicaus were soon sfter found to be clothed chiefly in cotton. Cotton-seed was brought into Englad from the Levant, thance it was taken to the Bahama lalands, and in 1786 to Georgis. The first cotton-mill in Ambrica was erected at Beveriy, Massachusetts, in 1788. The raw cotton required for the mecessities of maxulac ture ia raised in the Sonthern Statea, and cooverted loto textile fabrics io the Northern and southern Statea. The principsl supply of Europe also comes from this country.
The production of cotton in the Coited States is over $7,000,000$ halea aonually; in the East is aver $2,500,000$ bales; China, I, 500,000 bales, \&c. The conaumption in the United States da abont $3,000,000$ bales; in Great Britain about ia abont $, 000,000$ bales; in Great Britain about
$4,000,000$, , \&c. Oil is produced from the qeed.
B. As adj.: Made of cottoo.

II Obvious compounda : Cotton-goods, cottonmanufactory, cotton-manufacturer.
ootton-hale, s. A bale of cotton.
T Cotton-bale tie: A device for fastening the ends of the hoops by which cotton-bales are kept in a compact state.
cotton-brush chopper, s. A machius with revolving knives to cut up the old dried cotton-staks, to prepare the land for ploughling for another crop. (Knight.)
ootton-chopper, s. An implement which is drawn over a drilied row of cottooplants, and chopa gsps in the row 80 as to
leave the planta la buaches or bills. The machine is aupported on two wheels, and has a plough to run on each side of the row Motion is communicated from the rotary axle by hevel-wheels to a ravolving head having oblique cntters, which chop gaps in the row of plants as the machine progresses. (Knight.)
cotton-cleaner, s. A maching for aeparating the clust and dirt from cutton. This is performed by a acutching and blowing action the tussocks of cotton being torn asunder an opened, sllowing the dirt to fall out. The heavier portions fall through gratings, and the lighter are carried off through alr-ducta by means of exhauat-fana. (Knight.)
cotton-elevator, s. An arrangement io s cotton-mill of a tube with air-blast or
spiked atraps for carrying cotton to the npper stortas.

## cotton-famine,

Hist., \&c. : The nams given to the fsilure of the cotton supply to the Lancashire snd other cotton-mills which took place whilst the ports of the Southern States of Americs wers blockaded by the fleeta of the North during the war between the Federals and Confederstes, which coutiuued from early in 1861 to 1865. Whan that great struggle began, nearly all the raw cotton required for manufacturing purposes had been supplied by America; when importation from that quarter falled, s stimulus was given to the cultivation of the cottonplant in India and other countries. In India plant in india add other countries. In India much cotton had from tims immemorial been grown in Berar, a portion of the Nizam's
dominions pledged to the Anglo-1ndian government in security for a debt. Ons remote result of the famiae has been to break the partial monopoly of cotton previousiy possessed by America, and inerease at once the smount sod the certainty of the supply.
ootton-gin, s. A device, origitally invented by Whitney, 1794, in which lint is picked from the seed by means of saw-teeth projecting throngh alits in the side of the chamber in which the seed-cottou ia plsced.
ootton-grass, B. A nams given to the apecies of the genns Eriophorum, becauss of their fruit beiog clothed at the base with a silky or cotton-liko substance. It really belongs, not to the grasses, but to the sedgea (Cyperscex). There are seversl Britial species; the most com mon is Eriophorum angustifolium, the Nerrow-

COTTON-GRASB.
leaved Cotton-grass, which is common in turfbogs and moors. Paper and the wicks of candles have been made of its cotton, and pillows stuffed with the sarne material. The leaves were formerly used in diarrloa, and the spongy pith of the atem for the removal of tape-worm.
cotton-hook, s. A claw with a handle, by which cotton-hales are moved in loading and shipping. (Knight.)
cotton-lord, s. A very rich cottonmanufacturer
cotton-machines, s. pl. Machines of various kinds for carrying ont the aeveral proceasea in the cleaning, arranging, atul weaving of cotton. [Cotron-cleanek, Cot-TON-aIN, \&c.]
cotton-mill, s. A factory or establish ment for the manufacture of cotton-goods.
cotton paper, s. We are indebted for cotton praper to the Arahians, and it is surmised that they learned it of nations atill east of them. The use of conton for this purpose was probably derived from China. Ita first uas io Europe was among the Sarscena in Spain, sand canot be traced back beyond the tenth century. It preceded the usa of flax tenth century. It preceded the usa of fax thre for that purpoae. The paper of Xativa, a city of Valencich, was famona in the twelfth
centory. (Knight.) [PAPER.]
cotton-plcker, 2

1. A machins for scutching cotton to tear apart the matted masses sad clean it. [Cor-ton-cleaner.]
2. A machine for picking cotton from the bolls of the plant. One form consista of travelling toothed belt, which catchee the cotton fibre and drags it into a receptacle. (Knight.)
cotton-plant, 8 . The name given to various speciss of Gossypium, a genus of the order Malvacee. It has the calyx cup-shaped, with five short teeth, the whole surrounded by an iovolucre cordata at the base, and above separating into three broad deeply-cut eegments. The petala are 5 ; thestamens, which are many, are monadelphous; the ovary, ${ }^{3}-5$-celled; the fruit, a 3-5-celled capsule; the seeds numerons, covered with cotton(q.v.). The gennshas representatives in both hemispheres. How many species exist is diffcult to determine. They havs been noduly multiplied in boohs. Some one or other is cultivated averywhere, from the equatur to $36^{\circ} \mathrm{N}$., and the same of S. latitude. In the United Statea the apecies cultivated is Gossypium barbadense. There are two well-marked varisties: (1) The Sea-jsland, or Long Staple Cotton, Iotroduced from the Bahamas in 1785, grown on the cosat of Georgia and South Carolins, sand on the adjacent isisuds; snd (2) the Upland, Georgian, Bowed, or Short Stapls Cotton, which grows in the Southern States generslly. The formor is the finer; the latter constitutea the bulk of the American cotton. Indlan cotton ia furnished by G. herbaceum. It growa in Yersia, the Levant, Egypt, the south of Europe, \&c. It is called Surats, from Surat, on the weat coast of india, whence much of it is exported. The cotton of Brszil, Peru, and other parta of South America is derived from G. peruvianum. Cotton from the last two species is ohort staple.
ootton-press, s. A press in which cotton ia baled for tranaportation and storags. There are various forms of cotton-presses, known as the screw, toggle, beater, revolviag, hydraulic, yortable, double-acting, windlass, rack-and-pinion, re-pressing, and rolling-pressurs presses. See under those heads respectively. The old form of press was the acrew, which ascended vertically from the follower and worked in a nut io the upper cross-beam. 1t was rotated by a sweep. (hnight.)
ootton-printing, s. The art of staining woven fabrics of cotion with various figures and colours. (Weale.)
cotton-roee, $s$. A common name for the composite genns Filago.
cotton-rush, s. Eriophorum. [CotTonaRASS.]
cotton-sedge, s. The same as CotrosRustr (q.v.). (Bentham.)
cotton-seed, $s$. The aeed of the coltorplant.

QI (1) Cotton-seed cleaner: A machine for tearing the remaining fibre from the cotton-seed, or one which so far compacts the flbre upon the geed that the latter will roll upon itself without making a mat, and ao become fitted to be gown by an ordinary machine. (Knight.)
(2) Cotton-seed huller: A machine by which the hull of the cotton-seed is rasped off and aifted from the farinacema and oily matters, which are utilized for their oil and the refuse for manure. (Knight.)
(3) Cotton-seed mill: A mill for grinding the aeed of cotton, either for manure or for ohtaining from the meal the oil, either by pres. sure or the more usual mode of treatinent hy bisulphide of carbon (Sim'a process) or hydrocarbon. (Knight.)
(4) Cotton-seed oil: The oil expressed from the seed of the cotton plant. (Weale.)
(5) Cotton-seed planter: A planter in which the feed-motions are positive, as the aeed adheres by the interlacing of its flbres, and requires to
be torn apart and driven dewn the clute to be torn apart and driv
the ground. (Knight.)
ootton-spinning, $a$. Engaged in epinning cotton. (Used of machines or of per sons.)

colloco $=$ to arrange, to set : col $=$ con $=$ with together, and loco=to place ; locus=a place.]

## A. Transitive:

## I. Onainary Language

1. Literally:
(1) Gen.: To arrange or set together in any place ; to lay or dispose.
"Couchy or lejne thingos togedyr. Collsco."-
(2) Spec. : To lay or repose on a bed or couch. But where unlruised youth with nostuffd brain Both couch his limbs, there golden stoeedoth rikelgn.
(3) To lay or deposit in a bed or layer; to ved.
"It is at this day in use at Gaxa, to gouch potaherdas
or vesseli of earth, in their walle, ...-Eacos: Nat or vist.
Het
(4) To conceal, to hide away.

- In the soler of Juppiter ther beu couched two tunnes." (5) To cause to cower or hide.

This sald. ho shakes alott his Ruman bizde, Which. like x flo oon towerthg 1 n the tikie, Coucheth the fowl below with hia mingi shask"-
2. Figuratively:
(1) To Include, to comprise, to involve, to express.
"That grant argament for a future state. . which St
Pnul hath couchaci in the words I hare read to you." Pnul hath conched in
Atterbury: Sermon.

* (2) To conceal, to include or involve secretly.
"There is all this, and more, that lles naturally couched under this allogory," $\rightarrow$ LE Eerange
* (3) To arrange, to aettle.
-The omperor's ban was aiready formally eouchad,
aud ready to put to the print."-Religuta Wotoniana.
p. 5 .
(4) To combine.

Come then, my friend. Yul chango roy style,
And couch instroction with Deathand the Rake

* (5) To set.

II. Technically :

1. Old War, ©c.: To set or fix the apear in tts rest.

But he stooped his head, and couched his spear
 2. Surg.: To practise an operation by which, when the crystalline lens of the eye has been rendered opaque hy cataract, a needle is in serted through the coats of the eye, and the lens is pushed down to the lower part of the vitreous humonr, ao as no longer to atand in the axts of vision and impede the passage of the light.
3. Malting: To spread ont steeped bariey upon the floor to allow of its germinating, and so becomiug malt.
"It the weather be warm, we Immediately oouch
4. Paper-making: To take the flake of imperfectly compacted pnip from the monld or apron on which it has been formed. With hand-laid paper this is the business of the coucher, who receives the monid from the dipper and couches the aheet upon a felt. In paper-machinery the operation is performed by a roller called the conching-roller. (Knight.)

* B. Reflexively:

1. To lay or place one's self in as small a compass as possible.
be, "to the watere contre themeelves, as close as may Ity - Aumet: Theory of the Earth
2. To hide, to conceal.
3. To dispose to rest.

There benethe thei esuchen bem.

- C. Intransitive:

Maundevilte, p. 63

1. To lie down, espectally npon a conch, the ground, de.

Couch $d$, and now Aild ochers on the gras
Maton: P. L., bk. iv
2. To lie, to aleep.
" II I oourt moe women. youll couch with moe men."
3. To crouch, to bend, to give way, to atoop.

Ifanchar in s strong ass couching down betwean
wo hurleua -Gen. xilix. 14
4. To lie in concealment; to hide, to crouch. " Whare Bertram conched like hunted deer."
5. To be laid, diaposed, or apread ont.
"̈. and Mlessed of the Lord be his land, dow and
$\times \times$ anil. 14 .

## t ounçh (2), v.s. [A contr. of conchopraes

 (q.v. $\lambda]$ To clear laud of conch-grass, weedachich (1), conche, cowohe, a [O. Fr. oorche, couche.] [Coucr (1), v.]

L Ordinary Language:

1. A bed, or any place of rest.

Whos when anch good call be ebtasio'd would strive

2. A bedroom, a bed-chamber.
"Whau thon shalt preye, entre iu to th! cowein, and 3. A sota, a piece of furnitnre on which it is customary to repose or recline dressed.
4. The lair of a wild beast.
"Then myghte noghto his eowcho kemne".
II Technically:

1. Malting: The heap of ateeped barley on the fioor where the grains undergo germination, effecting the change into malt. The operation of conching takes about fourteen daya, and the aubsequent kin-drying, which arresta germination, takes two days.
"This hesp is called by maltsters a couch, or bed, of
*2 Naut - [COACH s,
2. Painting, ec.:
(1) A layer or coat of paint or varnish on the canvas or panel intended to be painted on.
(2) A coat of gold or silver-leaf on any aurace intended to be gilded or silvered over.
3. Arch.: A course or layer of sand. (Crabb.)

* couch-fellow, s. A bed-fellow; a very cloze and intimate companion.
couch (2), wǐtçh, twitçh, quǐtçh, quiçh, quiok, s. \& a. [Eng. quick = living, from the difficulty of eradicating.] The same as Couch-grabs (q.v.)

Zool.: The name given in Brazil to the Puma, formerly called the American Lion, and now the American Panther. It extended formerly throughout a great part of both formerly throughout a great part of both destroyed through a great part of the latter, destroyed through a great part of the latter,
except its mast westerty portions. It is the Felis concolor or the Puma concolor of naturaliata. [Piman.]
ough (proa kof), "coghe, * coughe, "cowe, "cowghe, s. \& a. [Dut. kuch.] [Conor, $v$.]
A. As substantive:

1. Med. \& Ord. Lang. : A apasmodic effort, attended with noise, to expel from the air passages of the lunge aome foreign body or irritating matter, which elge would injure the delicate respiratory apparatus. Properly speaking it is not a disease; it is the effort of nature to remove what, if it be allowed to remaio, may generate one ; or it nay be the symptoms of a disease of the lungs, the liver, the atomach, or the intestines; or may be produced by the over-excitability of the aystem in the nervous temperanient. At the sams time, when itaelf violent, it may produce morbid effects. Phyaiologically viewed a cough acts thus: some irritation produced by the passage through the air tubes of inteosely cold air, or some other cauae, affecta their lining membrane, the capillary veasela of which beconie distended with blood. As these become thickened and tumiffed, the these become thickened and tumifted, the and oppression eusues, the effect being greater If the venous rather than the arterial capillaries are the seat of tha congestion. The secretion of mucus now exceeds what it would he in a atate of perfect health, and the mucus itself becones depraved in quality and is itself a fresh cause of obatruction. A cough comes to the relief of the patient. The violent expiration of air expels the matter causing the obstruction, and as the proper stimulus to the capillaries is that produced by arterial blood, this, which is alwayg driven from the lung during expiration, removes the congestion in the capillaries, aud at least congestion in the capillaries,
2. Veterinary: Also called the husk; a disease incident to young hullocks when their windpipes are chaked with tape-worms.
B. As adj. : Pertaining to cough; designed for use in cough, de.
oough-wort, s. A plant, Tussilago Farfara. (culpepper.)
cough (pron. kof), * coghe, * coughen, * cowghen, "cowghyn, * cowhyn, cangh; Ger. keuchen , veichen = to bably an onomatopoeic word taken from the zonnd of coughing; thia is aeen clearly when somnd of coughing; thia is aeen clearly when Nurth of England.]
A. Intrans. : To be affected with a cough;
to make a violent effort to clear frum the lungs any irritsting or olistructing matter
In"tho atreet, hant quarrelled with a man for poughting

côug'-när, s. [Malay.] A three-masted Malay vessel, lecked or undecked, and rigged with square sails.

* côu-hāge, s. [Cowhaoe.]
could, pret. of v. [Can, v.]
coule, " cowle, s. [Low Lat. cuvella.] A vessel.
$\mathbf{0} \mathbf{u} \mathbf{u}-10 e^{\prime}$, s. [Fr. couler $=$ to flow.]

1. A stresm of lava.
2. A chanael worn by running water. (Amer.)

## côu-lẽur, s. [Fr.] [Colour.]

couleur-de-rose, s. $\quad[\mathrm{Fr} .=$ colonr of rose.] Used figuratively to express a perfectly satisfactory or agreeable aspect of affaira.
cốn-lisse', s. [Fr., from couler $=$ to flow.] [Culels.]

1. Arch.: A grooved piece of timber.
2. Hydrautic Engin.: A pair of hattens, or a groove in which a aluice-gata moves up and down.
3. Theatre: A aide-scene in a theatre, or the apace inciuded between the side-scenea.
côul-oir (oir as wâr), s. [Fr. = a atrainer, from couler; Lat. colo $\#$ to flow, to atrain.]
4. An ascending gorge or gully; esp. nesr a mountain aummit.
5. Hydraulic Engin.: A dredging-machioe used in the conatruction of canala, \&c.
côu-lomb' (b silent), s. [Named in honour of C. A. de Coulomb, a celehrated French phyaiciat (1736-1806).] The unit of electrical quantity. [UNIT, 4 (1).]

* oonlpe, "culpe, s. [O. Fr. culpe, from Lat. culpa = fault. $]$ Blame, fault.
"Raptiome that we reaceyven, which hynymeth us
the culpe."-Chaucer: Parton's Tale, $\mathbf{p}$. 286.
cōul'teõr, + col-ter, * cul-ter, *coltour, * coul-tre, * cul-tour, * cul-tre . [A.S. culter, from Lat. culter; Fr. coutre.] An iron blade or knife inserted into the hean of a plough, for cutting the ground and facilitating the operation of the furrow-slice by the ploughshare.
"Yet they had a fle for the mattocks, and for the coulter-neb. 8
Ornith. : The Puffin, Fratercula arctica, from the shape of its beak. [PuFfins.]
cô̂-măr'-am-ine, s. [Eag.coumar(in), snd amine.]
Chem. $\mathrm{C}_{9} \mathrm{H}_{5}\left(\mathrm{NH}_{2}\right) \mathrm{O}_{2}$. An organic base prepared by the action of iron filings and acetic acid on nitro-coumarine. It erystallises in orange needles insoluble in ether, acluble in hot alcohol and in boiling water. it melts at $170^{\circ}$. It forms a crystalline salt with hydrochloric acid.
coû-măr'-ic, a. [Coumanouna.] Pertaioiog to coumarin (q.v.).

## coumaric acid,

Chem. : $\mathrm{C}_{9} \mathrm{H}_{8} \mathrm{O}_{3}$ or $\mathrm{C}_{6} \mathrm{H}_{4}(\mathrm{OH})-\mathrm{CH}=\mathrm{CH}-$ CO OH1 also called oxy-cinnamic acid. Ob tained by the action of potash oo coumario.

It crystallises in colourless plates, which melt st $190^{\circ}$. Its alta are moatly soluble in water. $006-m a r-i n-$ Ǐa, $a$, [Eng. coumarin; il the same as yl (?) (q.v.), and suff. -tc.] Derived from conmarín.
coumarilic acid, s.
Chern: $\mathrm{C}_{9} \mathrm{H}_{6} \mathrm{O}_{3}$. A monobastc acid obtaiaed by boiling monobrom-coumarin with potash solution, aud decomposing the potassium salt with hydrochloric acid. It crystallises from hot water in colourless needles, which are soluble in alcohol, melting at 1930.
coû'-max-in, + coû'mar-ine, s. [Couhalouna.]
$\mathrm{CH}=\mathrm{CH}$
Coumarin occurs in the Tonka-bean, the fruit of Coumarounc odorata, in small white crystals, between tha seed-coating aod the kernel; also in Woodruff, Asperula odorata, and in the leaves and flowers of Sweet-scented Vernal Grasa, Anthoxanthum odoratum, and other plants. It has been prevared aynthetically by heating salicylic sodiun aldehydes with acetic anhydride, aodium scetata being produced at the aame time. Coumarin is extracted from the Toaka-bean by strong alcohol; it cryatalizaes io colouriess rectanguar pates, melting at $67^{\circ}$. It ta nearly insoluble in water, has an aronatic odour and s burning taste, and is aoluble in alcohol and cther. Bromine and chlorine unite with coumarin, forming $\mathrm{C}_{9} \mathrm{H}_{6} \mathrm{O}_{2} \mathrm{Br}_{2}$ and $\mathrm{C}_{9} \mathrm{H}_{6} \mathrm{O}_{2} \mathrm{Cl}_{2}$, cryatalline substances. Cold nitric acid con erts coumarin into nitro-coumaria, $\mathrm{C}_{9} \mathrm{H}_{5}\left(\mathrm{NO}_{2}\right) \mathrm{O}_{4}$, but when hasated converts it ioto picric acid. When boiled with atrong caustic potash solution it is dissolved, and ia reprecipitated by acida. Coumarin melted with aolid cauatic potash yielda salicylate of potassium.
2. Cheese Manufacture: The coumarin exating in Melilotus corvieus imparts to Swiss Chapziger cheese its peculiar odour.
cồ-mar-ou'-na, s. [From Coumurou, the name arnoag tha Indians of French Gulana: Fr. Coumaroun.]
Bot.: An old genus of Papilionaceous plants, now called Dipteryx (q.v.). [Coumarin.]
counn'gy̌, " counn'sel, "con-mail, conasyle, "coun-ceil, " coun-ceill, "counsell, s. [O. Fr. concile; 1tal. \& Sp. concilio $=$ a council, from Lat. concilium $=$ a meeting, ar assembly : con $=$ cum $=$ with, together calo $=$ to call. The word is frequently found coafounded with counsel (q.v.), with which it had originally no connection.]

## A. Ordinary Language:

I. Literally:

1. A number of peraons met together for deliberation, consultation, and advice; espe cially a oumber of peraons aelected tor their experiencs or emidence to act as sdvisers in the administration of any governmeat, or of any branch of a government. [Pbivy Council. aod see - 7.]

An old lord of the council, rated me the other day int 2
2. The act of conaulting and deliberating together ; coasultation, deliberation.
"Then the Pharisees went out, and held © council
3. The place where a council meeta for de liberation and advice; a council-chamber.
11. Fig. : The faculty or qualifications neces. ary for counsel and deliberation; deliberative or coasultative talent, judgment.

## O great in action and son' counci, wise!

B. Technically

1. Polit.: The higher branch of the legisla ture in some States of America and the Englisil colonies ; geaerally called a legislative council
2. Ch. Hist.: An ecclesiastical asaembly attended by the representatives of Churches scattered over a wide area-a province at least, but, in a large number of instances, the worldthe objects of tha gatbering being the discus aion, and if possible the aettlement, of questions thell agitating the Churchea. Churcb councils, to a certain extent, are modelied upou the gathering of the Apostles and Elders $s 8$ Jerusalem to discuss the question what Jewish ceremovies, if any, should be imposed upoo Gentile converts to Christianity (Acts xy. 129). This was essentially s couecil, but the
techulcal viow is that conncilo, properly so called, did not arise till the second century. At first they were provincial, but in the fourth general or cecumenical counclis began to be held. The word cecumentcal was derived froin Gr. oikouperıós (oikoumenikos), meaning of or from the whole world, and this again was from ouxoveévy (oikoumene, the inhabited world. During the time that the Church was devoloping itaelf into the form which it was destined to retain during medizval times, eeven cecumenical councile were held. The first met at Nice in A.D. 825. It condemned Arianism, and gave its sanction to the doctrine of the Trinity in Unity, which is still the creed of the Roman Catholic, of the Greek, and of the Protestant Churches. The second-that of Constantinople, A.D. 381 -condeinned the elder Apol linaris, or Apoillinarius, and his followers, who believed that the Divine nsture, in Christ, did the office of a rational human soul, and that God the Word, s aensitive soul, and a body, conetituted his person. The third-that of Ephesus, A. 0. 431-condemned Neatorius, who was sileged to have made Christ consist of two persons, whiist the council held that the Divine Saviour had two natures in one person. Divine saviour had two nstures in one person. demned Entyches, who msintalned thst there was only one nature in Christ, that of the Was only one nature in Christ, that of the Word, which bscame incarnste. The decisions by nearly the whole of Christendom. Those of the fifth (the second at Constantinople, held in 553), the sixth (slso st the same place, a.n. 680), and the seventh (that at Trullo, A.D. 691 ) have met with only partial scceptance.
The most important council of moder times, thist held st Trent from A.D. 1545 to 1563, was not cecumenical, for its suthority was not accepted by the Graek Church or by the Protestant reformers. It was, however, highly important, deflining with precision the loctrines held by the Roman Cstholic Chureh on sll important pointa, and specially on those on sll important pointa, and

A nore recent council was that held at Rome in 1869 and 1870, which promnlgated the infallibility of the pope as head of the Chureh. Amoug Protestant conncils may be mentioned the Pan-Anglican Synod, which met at Lambeth Paisce in 1867, and was at tended by Anglican bishops from England, rom the Colonies, and from America. The Pan-Presbyterian Congress, which was held st Edinburgh in 1877, and a subsequent meeting in America were councils of the scattered Churches of that denomination.
$T$ (1) Common Council: [Соmmon Council].

of a natlon, na standing argument it ollages."-swoitt. * (3) To take scrount ni note. (Followed by of.)
Gonie. of no man eounts of her besuty."-Shakesp. : Two
*IL. Law: To plead or argue a case in comit.

- (1) To count out: An expression used in the British Honse of Commons when the Speaker, having had hia sttention called to the number of nembera present, counts them, snil finding less than forty present in the House, declarea the House adjourned.
(2) To count kin with one (Scotch): To compare one's pedigree with that of another.
II Crabb thus distinguishes between calculate, to reckon, to compute, and to count : . . to calculate is the generic term; the rest denote modes of calcuating: to cambute denates any nnmerical operation in gencral, but is particularly epplicabia to the sbstract science of figures; the astronomer calculctes the motions of the heavenly bodies; the mathematicisn makes algebraic calculations: to reckon is to enamarate and set down things in detail ; reckoning is applicable to the ordinary husiness of life; tradesmen keep their accounta by reckoning ...To compute is to come at the result by calculation ... historians and chronologists compute the times of particular events by compsring then with those of other known events . . . To corent is as much as to take acconnt of, and when used as a mois of calculation it signtiles the same as to reckon one by one; as to count one by one, to count the houra nr minutes... These
words are all employed tn application to moral objecta to denote thia estinuite which the word takea of things. To calculate is to look to future events and their probabla consequences . . to compute ts to look to that which la past and what reaults from any past event .. . to reckon is either to look at that which is present and to set an eatimate upos it, or to look to that which is futare as aomething desirable . . . To count is to look on the thing that ls present and to set a value upon it according to efreumstances
(Crabb: Eng. Synon.)
count (1), counte (1). s. [O. Fr. conte, cunte ; Ital. conto, from Lat. computus.]

## 1. Ordinary Language:

1. That which servea to join or conple two things together; a boad, a coupler. [II. 1.]
"He mad* the howe with cedre couplis."-Wyelifo:
2. A brace or tie which holds two dogs togethar.
"It is in some sort with friends no it fa with dogs in - conples; they
3. A pair or brace; two of the same klnd or class considered together
(1) Generally:
$\because$ behold Ziba the serrant ot Mephibosbeth met blin, with a couple of asses sudded,...-iSam. xvi. 1
(2) Spec.: A male and a femala of any :stecies; but more especially of the human kind when married or betrothed.
" So shall all the coupler three,
Ever true in loving be,"
Shakegp. $\mid$ Mids. Nights, Dream, v. 1

## II. Technically:

1. Building: One of a pair of rafters or apars in a roof, joined at the point of meeting at the top, and held together at the bottora by a tie.
2. Physics: Two equal parallel forces acting towards contrary parta-i.e., in contrary tirections. They canoot be balanced by any single force whatever. (Ganot.)
TThe work done by a couple in turning a body through any angla is the product of the couple by the angle. There is an identity of dimenaiona between work and conpla. (Everett: The C. G. S. System of Units, ed. 1875, (Everett: The
ch. i., p. 6.)
3. Magnetiam: The magnetio action of the earth acting on a magnetized needle. It ia called a terrestrial maguetic couple.
4. Voltaic Elect. : A pair of plates forming a battery, or a part of one; two metala in metallic contact and a conducting liquid in which tbey are placed. It is aometimes called Which tbey are placed. It is aomenimes callaic elemant. When the metals
are not-in contact the conple is said to be open, and when they are connected it if said to be closed.
5. Thermo-electrics: Two metals soIdered together, the two ends of which can be joined by a conductor. Then there may be a bis. muth-coppar couple, a bismnth-antimony conductor, \&c.
6. Astron.: A donble star. it ls of two klads, an optical and a phyaical couple. [ 1 (4), (5).]
II (1) Magnetic couple: [COUPLE, 1I, 3]
(2) Mechanical couple: [II. 2].
(3) Moment of couple: The product of a force by a length. If $m$ atanda for mass, $L$ for leugth, and r for time, then moment of couple is $=$ $\frac{\mathrm{mL}^{2}}{\mathrm{~m}^{2}}$. (Everett: The C. G. S. System of Unite, ed. 1875, ch. 1. p. 5.)
(4) Optical couple:

Astron. of Optics: A double star, of which the two constituents have no apparent mutual relation, except that they look to the eye in proximity to each other.
(5) Physical corple:

Astron.: A double star, of which the two conatituents have a mutual relation to esch other in addltion to the optical oae.
(6) Thermo-electric couple: [II. 5$\rceil$
(7) Voltaic couple : [11. 4].

TI Crabb thus discriminates between couple, brece, and pait: "Couplesand bracesare made by coupling and bracing; pairs are either so of themselves, or are made ao by others: couples and braces alwaya requires junction in order to and ons them complete: pairs requira aimilarity maka them complete, pairs reque comples are only to make them what they are: cocuples are joined by a foreign tie ; bruces are produced by a peculiar moda of junction with the objects themselves. Couple and pair are said of peraons or things; brace in larticular cases, only of animals or things, except in the burlesque atyle, where it may be applied to persons. When used for persona, tha word couple has relation to the marriage tia; the word pair to the association or the moral union : the former term is therefore more appropriate when apeaking of those who are soon to be married, or have just entered that state ; the latter when speaking of thoas who are already tixed in that state."

* couple-beggar, s. A term applied in Ireland tu a suspended priest.

No couple-beggar lin the land
Eer jo $n$ and
couple-close, $s$.

1. Arch.: Conples; a pair of rafters or spars for a roof.

cóu-puire', s. [Fr., from couper $=$ to cut.]
Fort.: A passage cut through the glacis in the re-entering angle of the covered way, to facilitate sallies by the besieged. They are sometimes made through the lower curtain, to let hoats into a little baven built in the reentering angle of the counterscarp of the outworks. (Knight.)
cour, v.i. [CowEr.] To cower, to stoop, to bead down, to subrit.

- But here my mase her wing mann cour.

Sic fighta are int beyond her Pow'r.". Shantor.
cotur'age, "cor-age, s. [O. Fr. corage; Fr. courage; 1tsl. corragio; Sp. corage; Port.
coragem, from Lat. coraticum, from cor $=$ the heart.]

* 1. The disposition of the mind ; inclinstion.
" rd such $\begin{aligned} & \text { conrage to do him good" } \\ & \text { Shakesp.: Timon }\end{aligned}$
* 2. A heartfelt deaire, wish, or longing.

Hadde this knight to ben corago madded man."
3. Bravery, boldness, daring, intrepidity.

-4. Encouragement.
"To the courrage of such so would this realme any
F Now only used in the singular, but the plural was formerly not uncomnou.

TI The courage of one's opinions: Fearlessness in expressing one's opinlona on eny aubject, even when unpopular or unpalatahle.
-I (1) Crahb thus discriminates between courage, fortitude, and resolution: "Courage respects action; fortituds respects passion : a mas has conrage to ineet danger, and fortitude to endure pain. Courage is that power of the to endure pain. Courage wish bears up against the evil that is in prospect ; fortitude is that power which in prospect ; fortitude is that power Which endures the pain that is felt: the man of courage goes with the same coolness to the mooth of the cannon, as the man of fortitude undergoes the ampatation of limb. Courage geems to be more of a manly virtue; fortitude is more distinguishable as a feminize virtue: the former la at least most adapted to the male sex, who ars called upon to act, and the latter to the females, who are obliged to endure: a man without conrage would be as ill prepared to discharge his duty in his intercourse with the world, as a woman without fortitude would be to snpport herself under the complicated trials of body and mind with which ahe is liable riala of body and mind witb Which ghe is lable to be assaded. Resolution is a minor apecies of courage; it is courage in the minor concerns of life ; courage comprehends under it a spirit to advance ; resolution simply marka the will not to recede. . ; courage always supposes some danger to be encountered: resolution may be exerted in merely encountering oppogition and diffeulty . . ." (Crabb:Eng. Synon.
(2) For the difference between courage and bravery, bee Braverv.
odur'age, v.t. [Counaor, z.] To encourage, to embolden or atrengthen in epirit ; to anlmate.
"Moreouer charge Jequa: and courage him axd bolden tim. -reut. IIL 28. (15st)
ctur'-aged, a. [Eng. courag(e); -ed.] Having or enise.
'He who so is meat Hke atomacked vato a woman, nor luaty couraged,

"His zudiction whe to courreas valn.
ompaniea unlotter'd, rude and shallow."

8. The nstural bent or disposition.
"It to best to lenve nature to her couree, who is the
covereiga physiclan in mcot diseames."- Temple. 9. Study, accupation.
"A courne of learniag and ingentous studtes."
9. The dishos placed upon ths tablo st one time.
" Vnethe watz, the fyrst cource in the court kyndely
Gawaine, 234.
10. Ordinary, svery-day occurrence; as, A matter of course.
11. Used as expressing something which mnat be done or said, but not from the heart; hance, form, emptiness.
M"Men thilk no if they believed in Cod, hut they live No if they thonght there was Done; their vows and
promises are no more than words of courve."LiEztramge.
B. Technically:
12. Sports:
(1) Racing, Athletics, \&c.: The ground or distance marked out for a race.
(2) Coursing: A single chase after a hare by one greyhound or by a brace.
both' courses,"- $F$ "iell, Jaus 28, 1882, p. 213 vertorious in
13. Masonry: One row or tier of bricks or stones in a wall. A plinth-course is a lower, projecting, square-faced course; a blockingcourse is one laid on top of the cornice; a bond-ing-course, one in which the stones lie with their length across the wall; a heading-course, one being all headera; a stretching-course, one consisting of stretchers; a springing-course, one upon which an arch rests; snd a stringcourse, a projecting course in a wall. Rows of slatea, tiles, and shingles are also termed courses. The berge-course is one projecting over the gable of a building. (Knight.)
14. Music: A act of strings of the same tons placed alongside, and atruck one, two, or three at a time, according to the strength of sound hy the soft pedal, which shifts the bank of keys. (Knight.)
A. File-eutting: A row of parallel tecth on the face of a file. One course makes a singlecut file. A course crossing the former at right angles constitutes it a double-cut file. Eight courses of cuts are required for a square file, double-cut on each side. On the halfround files for gulleting saws as many as twenty-three courses are required for the convex side, and only two for the straight side. (Knight.)
15. Mining: The direction of a veln or lode. (Knight.)
*6. Tilting: The charge of two mounted knights in the liats.
"But this hot kuight was cooled with a fall, which,
at the third course, he received of Phalantus." ${ }^{\text {Shl }}$, 7. Nautical:
(1) That point of the compass towards which a ahip is steering; the destimation.
(2) (Pl.): The sails which hang from a shiy's lower yards; the foressil is called the forecourse, sad the mainsail the main-course. When a ship sails under the mainsail and the foresail only, she is aaid to sail "under a palr of her courses."
"To the cournes we have devised studding-Bails, sprit-
mafls, and top-aifil."-Raleigh: Rasaye.
16. Medicine:
(1) The menstrual flux, the menses ; catomonia.
"The toppare of womens cources if not auddenly locked to, wo thezn undoubtodil into a consumption, On Consumptions.
(2) A continned and methodical line of treatment in the administration of medicine, ${ }^{*}{ }^{6}{ }_{6}$
 man: Shrgery.
17. University and Scholastic: A eeries or certain number, as of lectures, readings, \&c. I (1) Course of crops:
Farming: The rotation of crops.
(2) Course of exchange:

Comm.: The current rate of exchange between two places.
(3) Course of the face of an arch:

Arch. : The face of the erch-stones which have thas jointa radiating to the centre. (Ogilvie.)
(4) In coutse:
(a) The same as of course. (Vuljar.)
(b) In dus arder.
${ }^{*}(5)$ By course, be course: The same as of course.
" Moche sorowe
be course felia." "When thaire kyng was kylt, how
Destruc. of Troy, 1,242
(6) Of course:
(a) Of consequence, naturally.
"W1th a mind unproppossessed hy doctors and com. mentators of any mect, whose reayonligs, iaterpreta tion, and hanguage which I have been used to
course ouke alf chine that way...-Locke.
(b) By settled rule, according to pracedent, without doubt or gainsaying.
"A Neither shall I bo so far wating to myelf, as not
desire a patent, granted of coureg to all useful proto desire $n$ patent, granted of courec to all useful pro
lectors --sitift (7) To sail wn

IT Crabb thus discriminates betwsen course, race, and passage: "We puraus whstever course we think proper; we run the race that is set befora us. Course is taken ahsolutely hy itself; race is considered in relation to othera: a man pursues a certain conrse according to discretion; he runs a race with another by wsy of competition. Course has a more particular referance to the spsce that is gone over; race includes in it mors particularly the ides of the mode of going: we speak of going in, or pursuing a particular course; but always of running a race. Course may be used in connexion with the object passed over or not : passage is seldom employed but iu the direct connexion. Course and passage are used for inanimats as well as animate objects : race is used for those only which sre animate." (Crabb: Eng. Synon.)

* course-a-park, s. A country game of some aort ; perhaps kiss-in-the-ring.
"At conrearpark, irithout all do bet, By ali the maids i' th' town."
cöurse (1), v.t. \&i. [Course, s.]
A. Transitive:
* 1. Ordinary Language.

1. To run after, to chase, to hunt, to pursue.

1. Of persons: Polite; having court-like or polished manners; well-bred.
"Bilop, though courteous, was indexilie."-Mucen-
2. Of things: Characterised by courtesy or politeness; polite, kind.
"Bystanders whom His Majesty recogniked often came in for a courteous ward. - arccailtay: If Crabb thus discriminates "Courteousuess ons, complatisnt, and courty: displaysitself in the atdress and the manners, compluisance in direct good offtces: courteousness is most suitable for stranger's; complaisance for friends or the nearest relatives: among well-bred men, and men of rank, it is an invariable rule to aldress each other courteously on all occasions whenever they meet, whether acquainted or otherwise... Courtly, thongl derived from the same word as courteous, is in aome degree opposed to it in point of aense; it denotes a likeness to a court, but not a likeness which is favourable: courtly is to courteous as the form to the reality; the courtly consists of the exterior only, the latter of the exterior combined with the spirit, the insincerity when contrasted with the latter, which muat necessarily suppose the contrary:
a conertly demeanour, or a courtier lika demesnour may be snitable on certain occa sinns; but a courteows demeanour is alwaya desirable. Courtly may likewise be employed In relation to thinga; but conrteous haa always reapect to persous : we may speak of a courtly atyle, or courtly grandeur; bnt we al courily style, or courteous behaviour, courteous language, and the like." (Crabb: Eng. Symon.)

II．Technioally：
1．Law：A clause in an agreement whereby either party may atipulate for the truth of certain facts，or may bind himself to 1 lerform or giva something to the other．If the covenantor covenants for himself and hia heirs， it is then a covenant real，and descends upon the heirs，who are bound to perform it，pro－ vided they have assets by descent，but not otherwise ；if he eovenants aloo for his exect． tors and adminiatrators，his personal asseta as well as hia real are likewiso pledged for the performance of the covenant．（Blackstone： Comment．，bk．It．，ch．xvii．）
2．Scrip．，Theol．，fc．：An engagement entered Into between Jelovah and some other beint or person．
（1）Scrip．：A vast number of passagea in the Old Testament，and a few in the New，speak of covenants．There was one with Noah，as the representative，after the Deluge，of all mankind existing or who ahould subsequently be bern ：nay，as the representative alse of the inferior animated creatures（Gen．，vi．18，ik． 9－17）．An＂everlasting covenant＂was made with Abralam and his posterity（xvii．4，i， 9 ）， of which circumcision was the token（10－14）． It was renewed to lsaac ând his posterity （xvii．19）．The covenant was in foree while the israelites were a nation．The Sabbath was part of it（Exol．xxxi．16）．The two tables of stone on which the moral law was written were tables of it（Dent．ix．11）．The priesthood entered into it（Num．xxv． 13 ； Neh．xiii．29）．It was renewed to David （2 Sam．xxin．5）．Private individuals，male and female，were bound by it－denarting from Gorl they violated his covenant（Psalm 1． 16 Prov．ii．17）．That covenant the laraelites broke（Jer．xxxi．32）．These are the chief of the Old Testament covenants．
In the New，the Christian dispensation is considered as a covenant（Heb．viii．13），the covenant of promise（Eph．ii．12），of which Jesus ia the mediator（Hcb．xii．24）．There is reason to believe that for Testaments，in the expression Old and New Teatsments，Covenanta ahould be anbstituted，and the heading of the
two porttons of Sacred Scripture ahould be The Old and New Covenants．
（2）Theol．：Two covenanta are especially recognised by evangelical writers，the Covenan of works and the Coveruent of grace（q．v．）．
（3）Ch．Hist．：Coccelua，in the 17th century， carrisd the tdes of Divine cnvenants more thoroughly than had before been done through bis whole aystem of theology．Calvinista hava done ao to a greater extent than Arminiana．
IT（a）Covenant of grace or of redemption：
Theol．：A covenant of a twofold character ： on the one hand，being between the Eternal Father and the Eternal Son，the former engag ing，in considerstion of the miasion to earth and especially the atoning death of the Eternal Son，to grait aalvation to those who should believe in the Redeemer．On the other hand， it was a covenant with men that，on their believing，they ahould receive eternal redemp－ tion through the blood of Chrigt．
（b）Covenant of redemption：
Theol．：［Covenant of grace］．
（c）Covenant of voorks ：
Theol．：A Divine engagement formed with Adam，the parent of our race．Its condition was，Obey and live for ever：diaobey and dia （Gen．ii．16，17）．It ia believed that it was made for lim as representing all who should ultimately apring from him，and that his fall made them no less than him liable to death．

3．Scottish，Ch．，Civil Hist．：Four bonds of agreement algned by those who believed that the religlous viewa and the political aettle ment which they advocated were in danger of being crushed，and therefore pledged them－ aelves to aupport them notwithatsnding any peril which might arise．
（1）The first covenant was aigned at Edin－ burgh on Dec．3，1557，by the Earla of Argyle， Glencairn，and Morton，Archibald Lord of Lorn，John Erskine of Dun，with many of the leaser barona and Influential country gentle－ mea．［Conareotron．］It was designed to aid in carrying out the Protestant Reformation in the face of all reaistonce which might be in the face of all reaistence which
（2）Tha aecond covenant was aubacribed at Perth on May 31，1559，by the Earla of Arbyle and Glencairn，Lord Jamea Stewart，the Lurla Boyd and Ochiltree，and Mathew Camplell of Terringland．1ts object was the aame as that of the former one．
${ }^{(3)}$ The National Covenant was signed on Feb．28，1638，the first name appended being that of the aged Earl of Sutherland．Tha covenant was aigned firat in Greyfriars Church， Edinburgh，and then as it lay apread out upon a tombstone in the adjacent graveyard．The people，the great majority of whom were Preabyterian，had by a vote and reaolution rid themselves the year before of episcopacy， and knew that their only hope of ultimate auccesa lay in union．
（4）The Solemn League and Covenant， written by the Rev．Alexander Henderson， accepted by the Scottish General Assembly 0 on August 17， 1643 ，and aubsequently by the Convention of Estates．It was then sent to London，where，on Sept．25，it was subscribed by the English Parliament and the Westmin－ ster Assembly of Divines．It was deaigned to be a league between England and Scotlaud noder the revolutionary leaders then dominant， and to establish in England no less than in Scotland the Preshyterian in lieu of the Epia－ copal Church．
This is the covenant most frequently alluded to by sir Waiter scoth in his novels．［Ceven－ anter．］When scotiand declared for Charles II．against Oliver Cromwell，the young king， previous to landing in 1650 ，aubscribed the covenant．In 1661 the Scottish Parliament passed an Act absolving the liegea from the obligation，and prohilditing its renewal withom tbeir apecial warrant and alprobation．

## ＊ J Writ of Covenant：

Comveyancing：A writ which a person whe was in process of purchasing land ly meant of a＂fine＂aued for as one step in the com plex process．By thia writ it was atated con trary to the actual fact that the vendor had covenanted to sell the lands to the purchaser． and failed to keep his agreement，on which account the writ to compel him to do ao was aought．When such an action was brought， the king，by ancient prerogative，claimed a noble for every five marks of land aued for，

[^201]which came to one-tenth of the annual value. (Blackstone: Comment, bk. ii., ch. 2L.)
IThe Writ of Covenant was aboliahed by 3 and $\$$ Will. $1 \mathrm{~V} ., \mathrm{c}$. 27, § 36 . (Wharton.)
otrv-ăn-ant, - cov-en-aunt, v.l. \& i. [Covenant, s.]

* A. Trans.: To grant or agres to by covenant.

oठv'-ĕn-ant-ẽr, côv'-ěn-ạnt-õr, s. [Eug. covenant; -er, -or.]

1. Ord. Lang. : One who enters into s covenant ; a party to a covenant or contract.
"A crivenant to do any action at a certaio time or Hobbes: De Corpore Politica, pt. Li, ch. IV.
II. Ch. \& Civil Hist. : A subscriber of or an adherent to any of the four covenants described under Coressant, 1I. 2 (1), (2), (3), and (4), and especially the last two. When the third or National Covensint was signed, it was pretty apparent that civil war would be the result of the deed, and preparationa for it were made both by Charles 1. and by the Covenanters. On Jan. 1, 1640, the latter took post upon Dunse Law to the number at first of 12,000 , and after a little of 24,000 . Next year they entered England, made a treaty with the English parliament, and aided them io the civil war against the king. On the fall of Charles they entered into the Solemn League and Covenant, designed to promote uniformity of bellef both in Encland and Scotland on the basis of a Presbyterian estahlishment, but very partial success attended the scheme. Being monarchical rather than republican, they sympathised with Charles Il. against the Commonwealth, and on his sabseribing the covenant on August 16, 1650 , fought an obstinate battle for himi at Worcester on Sept. 3, 1651, which resulted in their defeat aod a "crowning mercy" for their antagnoist Oliver Cromwell. In 1661, when the English and Scotch nations concurred in restoring Charles II., that monarch renounced the covenant, his prior aubscription to which had been insincere. Parliament declared the covenant thlegal, and ordered it to be barnt. Many in consequence renounced it, or quietly allowed the fact that they had ever signed it to lapse in ollivion ; but the more resolute apirits held to what they lad done, and no severity on to what they had done, and no severity on
the part of the government conld turn them aside from their purpose. oftener than once they were in arms against the goverament. la November, 1066 , they were diaperaed with loss at Rullion Green io the Pentland Hilla. On June 1, 1679, they defeated Claverhouse the "Boanle Dandee" of song, at Drumelog, but were themselves totally ronted by the Earl of Monmonth at Bothwell Bridge on the 22nd of the same month and year; man of the prisoners takea being tortured and then subsequently oxecuted. For a time the noted Richard Cameron was their leader, on
which account they are often called Camaronians ( $q$, 7 .). He, with about twenty others well armed, entered the littla town of Sanquhar, in Dumfriesshire, on June 22, 1680, and fornally proclaimed the depositlon of "Charles Stuart," meaning the king, but he was killed in a akirmiah at Airdsmoss, in Ayrshire, on July 20. For their aubsequent history see Cameronians, also Reformed PresbyteR1ANS.
cov'-ĕn-ant-ingg, pr. par., a., \& 8. [CovENANT, v.]

解
Cŏv'-ĕn-try̆, s. [A.S. cofantreo, from Cuent [CUNE], the ancient name of a little river which runs past tha towo, and -ree or $-r y=a$ river (Somner). According to others, a corruption of Convent-garden, from a specious convent founded, according to Leland, by Cunt, and destroyed by Edric in 1016. In 1044 Earl Leotric, with hia wife, the lady Godiva, founded at Coventry a magnilicent Benedictine monastery (Charnock, \&c.).] The name of a tow in Warwickshire.

- To send any one to Coventiy: A phrase algnifying to refuse to have any communicatioa or intercourse with any one, to take no notice of him, to exclude him from aociety. The origin of the phrase ia not very clear. Sisveral explanations have been given, of which the most plausible la that the citizens of Coventry had, at one time, so great a dislike to soldiers, that any wornan seen apeaking to one was at once shut out from soclety, no intercourse whatever befing allowed between the garrison and the towospeople : hence any soldier sent to Coveutry was shut out from all aocial intercourse.

Coventry bells, s. The bells or hell ahaped corollas of Camparula Medium, or that plant itself. It ia called also Canterbury BeLLs (q.v.)

Coventry blue, s. Blue thread, mach uscd for working or embroidering npon linen, The preparation of it was formerly one of the ataples of Coventry.
have lost my thimble and askein of Conentry

16. To ahelter or protect from pursuit or danger, to screen, to ahield. [B.]
17. To overwhelm.
"O And the waters covered their enemies: therw was
18. To incuhate or brood on
whilist the hea if covering her egge, the mane

19. To copulate with a femsle, usually of the luwer a pinala
20. To comprehend, embrace, or iacluds.
21. To be equivalent orsufficient, to auffice for.
22. Ta pasa over ; as, to cover the ground or distance.
23. To take exact sim at ; as, He covered him with his riffe.
24. To have rauge or command over; to command.
"I alowly and gradually raised the pistol . till it ${ }_{\text {ch. }}^{\text {fairly }}$
B. Military:
(1) To shelter or protect troops in their rotrea
(2) To atand exactly behind another man.

- Crabb thus diacriminates between to corer and to hide: "To cover is to kido as the means to an end: we commonly kide by carer. ing: but we raay easily cover without hiding, as also hide without covering. The ruling idea in the word cover ia that of throwing of putting something over a body: in the word hide is that of keepiog carefully to one's self, from the observation of others. . . . There are many things which decency as well as health require to be covered; and others winich from their very nature mnat always be hidden. Houses nust be covered with roofs, and bodies with clothing; the earth contains many treaaurea, which in all probability will alwass be hidden." (Crabb: Eng. Synon.)
côv'-ẽr (2), * covere (2), * covyr (2), * Lover (2), * kevere (2), * kevyr (2), Port. \& Sp. cobrar; Lat. recupero.
A. Transitive:

1. To recover, to regain, to receiva back or agaia.

2. To win, to gain.
" Keurer hem casteles." $\begin{gathered}\text { Aliaunder : Frag., 2sh }\end{gathered}$

"Throngh ooverture of hin fallas."一Gover, i. as
B. Law: The state or poeition of a married woman, who io looked apon as in potestate viri, or under the cover or authority of her husband, and who cannot, therefore, enter into any contract to the prejadice of herself or her husband, without his allowace or confirmation.
"The infincy of klog Edward VI, and the coverturs On Ireland.
oठv'-et, * covelt, *covelte, " covayte, * coveyt, * ceweytyn, v.i. \& $i$. [0. Fr. covoiter, coveiter; Fr, convoiter; 1tal. cubitare formed as if from a Lat. cupidito, from cupidus = eager, desirous. (Skeat.)]
A. Transitive:
3. To desire or wish for earnestly, to long for (in a good sense).

Coret earneetiy the best gifte" 1 Cor. xili. 81 .
2. To desire inordinately; to long for that which it is forbidden to aeek or to possess ; to luat after.
"England, he naid, conees, no eitices and no pro-
vinces."-rimes, Nov, itth, 2876 . B. Intransitive:

1. To desire sarnestly, to be eager for
"Youre oldres comeitoden to han don awey that
dignitee."-Chaucer: Boethius, p. sl.
2. To have sa inordinate deaire or longing That which I have than, arvet
Be cust from poesibility of all
conv'ět-a-ble, a. [Eng. covet; rable.] Fit or proper to be coveted; to be wished for or coveted
cóv'-ět-ěd, pr. par. or $\alpha$. [Covet, v.]
oóv'-ět-ẽr, * cov-eyt er, 8. [Eug. covet; -er.] One who covets.

We ben uot cousyteris of yuelis."一Wyelifo: 1 Cor.
cotv-ĕt-ĭng, * coveltyng, * covetynge,

A. \& B. As pr. par. \& particip. adj. : (See the vorb).
C. As subst. : The act or habit of desiring or lonzing for eagerly or inordinately.
"That place is clepid the eepnieris of couetyngs." $-~$
Hyclife : Numb, xi. 34 .

* côv'-et-ĭng-ly̆, adv. [Eng. coveting; lly.] In a covetous manner; with an cager or inordinate desire.
"Most covetingly ready."- B. Jonson : Cynth Revols.
" cotv'-e et-ise, * covaitis, * coveitise, " covaytise, ${ }^{*}$ coveytise, ${ }^{*}$ covetyse, ${ }^{8}$ [O. Fr. coveitise; Sp. codicia; Ital. cupidigia, cupidezza; Low Lat. cupiditia; Lat. cupiditas, from oupidus = eager, covetous; cupio $=$ to desire earnestly.]

1. An earnest deaire or longing for any. thing.
"Ther is an holy coueytise and an holy enuye."
2. Covetousness, svarice, inordinate desire. Whose greedy hust did lacke in greatest store;
Whose welth was want, whose plenty tas
Spe uner: F. $Q$., I. iv. 29.
cov'-ět-oŭs, * covatous, * cevaytous, "covclteus, "eovetouse, coveytouse, Ital cubitoso.]
3. Eagerly desirous or anxious to gain or possess

Coretrons only of a virtuous praine:
His life a lesson to the liund hes
His ule a lesson to the lund he corper: Taike Talk.
2. Inordiuately desirous of ; lusting after.
"The cruel nation, covetorus of prey.
Staind with my hood th' inhospitahle const,"
3. Spec.: Excessively eager for money; varicious.
"Let never so mncls probability hang on one side of in easpous to forroseo which will outwoigh."-Locke.
tcobv-ĕt-oŭs-ly̆, adv. [Eng. covetous; -ly.] In a covetous manner; with sn inordinately eager dewire to obtain ; suaricioualy.
cov'-ět-oŭs-něss, 3. [Eng. covetous; ness.] 1. Ordinary Language:

1. The quality of being covetonn; an inordinats deaire for money; avarice.

## "They might have pardoned

2. An eager longiog or desire for anything: eagerness.

When workmon strivo to do botter than well, sir akill in covetotoment
Shatesp.: King John, iv. 2
II. Theol. : The desire for what is not oae's own, whether it be money, other property, or own, whether it be money, other property, or
anything else of a desirable kind. Io Mahanything else of a desirable kind. In Mahratta, cobh (covetouaness) is orten used and in вome Scripture passages (as Ephes. v. 5) the meaning seems to be the same.
II Crabb thos discriminates between covetousness, cupidity, and ararice: "All these terma are employed to expreas an illicit desire after objects of gratification; but covetousmess is spplied to property in geaeral ; cupidity is sppararice only to money or possessions. a child may display its covetousmess is regard to the plsythings which fall in its way; a man ahows his cupidity in regard to the gains thst fall in his way; we should therefore be careful to check the covetous disposition in early life, lest it show itself in the more hateful character of cupidity in advanced years. Covetousness is the natural disposition for having or getting; cupidity is the acquired diaposition. As the love of appropriation is an innste characteristic in $\mathrm{maO}_{\text {, }}$ that of aceamulating or wanting to accumulsto, which constitutes covetousness, will show itself, in some persons, among the first iadications of character: where the prospect of amassing character: where the prospect of in the case of a governor of a diatant province, it will of a governor of a diatant province, it will not excited. The covetous man seeks to add to what he has; the avaricious msa only strivea to retain what he lias: the covetous man sacrifices others to indulge himaelf; the avaricious nan will sometimes sacrifice himaelf to indulge others; for generosity, which is opposed to covetousmess, is sonetimea asso ciated with avarice." (Crabb: Eng. Synon.)

Có-vét'-ta, s. [See Cove (1), s.] A plane ased for moulding framework, called also a qualter-round. (Knight.)
côv'-ey̆ (1), s. [O. Fr. covee ; Fr. couve, from O. Fr. cover ; Fr. couver = to hstch, to brood ; Lat. $c u b o=$ to lie down.]

1. Literally
2. A hatch; sn old bird with her young.
3. A small fock or aumber of birds feeding together.
"These birds do not go in coveyf, ‥"-Darwin
\# Now generally conflaed to partridges

* LI. Fig.: A jrair, a number, a set.
"There would be no waiking in a shady wood, with
out apringing a covey of toasts,"-Addion : Guardian
cớv'ey (2), s. [Contr. of Mnscovy. (Skinner.) A geranlaceous plant, Erodium moschatum.
${ }^{-}$Sweet covey: The same as Covey (q.v.).
* cồ ${ }^{\prime}$-ĕy-tişe, s. [Covetise.]
$\dagger$ côv'-in, " cov-ine, * cov-yne, s. [O. Fr. covine, from Lat. convenio $=$ to come together to agree.]

1. Ord. Lang.: A trick, treachery, scheming, artifice. (Chaucer: C. T., 605.)
2. Law: An agreement or collusion between two or more persoas to the prejudice or hort of another.
covin-tree, s. Scott, in a aote to Quentin Durward, ch. iii., where the word occurs, says that the large tree in front of Scottish casties was sometimes so calied. Davies suggests it may be from Lat. convenio, siace it was at the covin-tree thist the laird received guests, and thither he accoropanied them on their departure.
$\mathbf{c o ̄} \boldsymbol{v}^{\prime}$-ing
3. The overhang of the upper portions of a building beyond the limits of the groand plaa
4. The splayed revesls or inclined jsmbs on the sides of $s$ fireplace. These jsmbs were square in the old Engliah fireplsces. In some of the Louvre freplaces the jambs have an angie of about $4^{\circ}$. These were probably
erected about 1750, by Gabriel, under the erected about ordere of M. de Movigny. Gauger had pre viousiy (1715) given to the coviag a parabolie

curve. Count Rumford invented or adopted the inclined coving, having an angle of $135^{\circ}$ with the fire-back, to radiste heat into tho room. (Knight.)

* $\operatorname{cô}^{\prime}$-ĭn-oŭs, a. [Eag. covin; -ous.] Fraudulent, deceitful.
c6m (1), * cour * ca, * ku (pl. "ky, * kie, "kys, *kine, kryn, *in, cows), s. \& a. [A.S. ou (pl. cy) Cogn. with Dut. koe; Icel. kyr ; Sw. \& Dan. ko; O. H. Ger. chuo, chuoa; M. II. Ger, $k u$, ku; Ger. kuh; O. Ir. \& Gael. bó, all =a cow; Lat. bos; Gr. ßoûs (bous) $=$ aa ox.]

م〇w'pŏx, 3. [Eng. cow, and pox.]
Medical:
$\dagger$ 1. Gen.: Any diseasa producing pox upon the udd r or other parta of a cow. Edward Jenner discovered that there wera aeveral of these.

2. Spec.: That particular cutaneous diaease affecting the udder of the cow, which, being transferred to tha human frame, either gives an immunity from amall-pox or diminishea its violence. That this is its effect had long been a popular belief among the dairy milkers in Gloucestershire, and when, prior to 1770 , Jenner was an apprentice to Mr. Ludlow, an eminent aurgeon at Sudbury, near Bristol, a young woman who came into the shop where he was, to ask advice, hearing amall-pox mentioned, aaid with decision, "I cannot take that disease, for 1 have had cowpox." Jenner muad upon the statement, and aroke of it to muged upon the statement, and afoke oficule. Continued investigation, however. satisfled Continued investigation, however, satisned him of ita troth, and ahout 1780 he alruck sacticabla to propagate cowpox as a preaer vative againat amall-pox, by inoculating aoma human being from tha cow, and from that
peraon transferring the matter to another and another of tha community till protection was obtained for all. This was the origin of vaccination (q.v.)
"What varied woitern tampt uas an they paces!

Zoology:

A. As substantive:

Bot.: A well-known plant, Primula veris, of the same genus as the Primrose, $P$. vulgaris, the Oxslip, P. elatior, \&c. The two last are very much akin. The first and second widely differ in appearance, but atatements from time to time appear that they have been found growing from the aame root, in which case they would aot be two gpecies, but varieties of one. To naturalista believing in the aasparate creation and subsequent immutability fu essential character of each apeciea, this Would be an important fact ; but Darwinians would regard it as of littia moment. They would probsbly derive the Primrose, Cowslip, Oxiip, \&c., from a now extinct primulaceous plat more generalised than any of these. Tha Cowslip has ovate-crenate, toothed, and wrinkted leavea, with the flowers in an umbellate acape. It is common in clayey aolla in England, but is rarcr in scotland. The flowers are sedative and diaphoretic. They make a pleasant boporific wine. In the Cnited states the name Cowslip has been applied to a plant of different genus, the Lodecatheon Meadia, a handsome spring flower. It is sometimes called shooting Star.

The fowery May, who, from her green Inp, throwi
.

A huge crag-platform, smooth no burninked brase
Tonnyton: The Palace of Art
orăg (2), s. [Etym. donbtful.] A eonthconntry word for a amall beer vessel.

Then you'll have hrewed if I doo't fail

crăg (3), craig, * cragge, s. [Dut. kraag; Ger. kragen.]

1. The neck, the throat.
"Bearen the cragge so stiffe and so stata"
spenser: Shepheards Calender, ix
2. The small end of a neck of mutton; the scrag (q.v.).
cragg (1), s. [Provinc. Eng. crag, a term used in Norfolk, Suffolk, and Essex to designate masses of shelly sand used to fertilize aoila deflcient in calcareous matter. (Lyell.) ]

Geol.: Three series of British beds, all of Pleiocene age; the nppermost, the Norwich Crag, heing newer, and the Red Crag and White or Coralline Crag being older Pleiocene. Of the latter age ls a series of foreign beds called Antwerp Crag. The following series is In a descending order :

1. The Norwich, Fluvio Marine, or Mammaliferous Crag: The first name is given because it is found chiefly in the neighbourhood of Norwich. It consists of incolierent sand, loam, and gravel, exposed on both sides of loam, and gravel, exposed on these mnst have been deposited orjginally in an estuary; for the organic reorginaly in an estuary; for the organic re-
mains are partly land, partly fluviatile, and mains are partly land, partly fluviatile, and remains are the Mastodon arvernensis and the ELephas meridionalis. Of 124 marine shelis, Mr. Searles Wood conaiders that I8 are extinct. Arctic ahells are rarer than in the beds ahove.
2. The Red Crag of Suffolk and Essex, dc.: It is the highest of the older Pleiocene strata It rarely exceeds 20 ft . in thickness. Excluding 25 species of molluses derived from other heds, there are, according to Mr. Searies Wood, 256 known species of shells in the Red Crag, of which 65 or 25 per cent. are extinct.
3. The White, Lower or Coralline Crag: It is limited in extent, ranging only alront 20 in . in length by 3 in . or 4 in . in breadth, between the rivers Stnur and Alde in Snffolk. It is calcareons in composition, often consisting of comminnted ahella and remains of bryozna. From the abundance of the latter it is calied Coralline Crag, but this is somewhat of a misnomer, for bryozoa are not real corals. Mr. Searles Wood considera that 350 species of mollusca have been found in it, of which 110; or 31 per cent., seem to be extinct.

II Corresponding in age to 2 and 3 is the Antwerp Crag, found near the city after which it is called and along the scheldt.
4. The Black Crag: The lowest part of the Antwerp Crag, more encient than any of the British crag beda, and approaching the point of junction with the Upper Miocene. (Lyell.)

crāne(1), s. [A.S.cran, crano, cran; Sw. krana, trane; Dan. trane (the bird), krane (the machine); Dut. \& Low Ger. hraan; H. Ger. kranich; Corn., Wel., \& Arm. garan; Fr. grue: Sp. grua, grullia; Port. grou; I tal. grua, gru; Lat. grus; Gr. ý́pavos (geranos) = (1) a crané (the bird); (2) a crane for lifting weights. from the root geran.]

1. Ornithology \& Ordinary Language:
(1) Sing.: Any hirl of the genus Grus, or the family Gruidæ (q.v.). The Common Crsne s Grus cinerea. The tip of the bill is horncolonred, its midlle part greeniah-black, the base reddish. The top of the head, which is naked, is of a red colour; the plumage in general is an ashy grey; the throat, neck, and occiput darker ; the feet black-length 3 feet 8 in . to 3 feet 10 in . It is a grallatorial bird, frequenting marshes, but has certain affinities tn the Rasores. It is a migratory bird, in winter living in India, Egynt, and other wamn countries of the old world, and in summer migrating to the north. lu these pasasages it fies, generally by night, high in air, in a large wedge-formed flock, led by a single leader, or in long lines, and with discordant cries. These movementa attracted the notico of the ancient classic writers. The erane was once conmon in the fenny parts of England, now it is rare. Where it breeds, which is in the north of Enrope and Siberia, the nest is among rushes, or even on the walls of nufreqnented houses. The egge, two in number, are pale bluishgreen, with brown markings. [Grus, Gruins:] "Like an crane, or a awallow, so did I chatter."(2)
(2) PI. : The hirds of the genne Grirs, or the nub-fsmily Gruinæ, or the family Gruidæ(q.v.).
"The martines of Cambridgeobiry and Lineolnuhife Hero covered durius ponns monthe of overy yewr by eh. ifi.
2. Astron. : A small southern constellation, one of the twenty-seven introduced by Lacaille. It figures as Grus, the Crano.
3. Mech. : A machine for hoisting and lower. lng heary weights. It conaists of a vertical post or frame, which is rotatsble on its axis, anil a jit or projecting arm over which the chain or rope passes on its way from the winch at the foot of the post to the load to be lifted.
" In case the mould zboat it be eo ponderous ne not to be removed by any oruluary force, you may tber
"Then connmerce bronght into
Then comnmerse broaght into tho publick wall
The busy meerchant, , ing big wareiouse built,
Rais'd the strong crane."
Thomson: Autum
IT The projecting arm or beam of a crane is the jib. The post and jib collectively are sometimes known as the gibbet. The dingous is the stay.
4. Nautical:
(1) A forked post to support a boom or spare spar on deck.
(2) A projecting bracket to oupport spars, s.
5. Engin. : An overhanging tube for eupplying a tonder with water; a water-crane.
6. Lapid.: A contrivance to hold a stone, and present it to the slicer of the lapidary. It consists of a clamp which moves harizontally, having its beariogs on a vertical post rising from the beach of the lapidary. A rising from the beuch of the lapidary. A weighted string is attached to the lever-arm, against the slicer. [Sucer.]
7. Comm. : A machine for weighing goods, on the principle of the crane.
8. Domestic: An fron arm or beam fixed to the back of a fireplace, and used for suspending pots, kettles, \&ce, on.
9. Dist.: A siphon, or bent tube, used for drawing liquors out of a cask.

* 10. Old War: A kind of balista, or catspult, used fur discharging large stones, to ancient wartare.
If (1) Crowned Cranes:
Ornith. (Pl.): The African Cranes of the genus Balearica.
(2) Derrick Crane:

Machin. : A form of crane haviug spars for jib and yost. [Derrick.]
(3) Gigantic Crunes:

Ornith.: A book-name for the Adjutants, which are not of the family Grnidæ, hut are Ardeide (Herons) of the sub-fanily Cicouinæ (Storka).
(4) Numidian Crane:

Ornith.: The Demoiselle (Anthropoides virgo).
(5) Stanley Cranes :

Ornith., \&c.: East Indian cranes of the genus Anthropoides.
(6) True Cranes:

Ornith.: A book-name for the sub-farnily Gruine.

## crane-fly,s.

L Sing.: Any two-winged fly of the genus Tijuula or the farally Tipulidæ.
2. Pl. (Crune-fies): The genus Tipula or the family Tipolide. The tyrical species is what is popularly known as Daddy Long legs.
crane-like, a. Like a craue; longnecked.
crane-neclsed, a. Long-necked.
lean . one of thase purse-monthed, crane-necked clean brushed, pacific iodiviauals.
crane's-bill, s. [Cnanesbill.]
crāne (2), s. [Cran.] (Scotch.)
cräne, v.i. \& $t$. [Crane, s.]
A. Intrans: To stretch out one's neck like a crsne; to stare.

* B. Truns. : To raise, to lift.

What engines, what instruments are used lo eran.

cräneş'-bill, crane'e-bill, s. [Eng. crame's, and bill.]
I. Bot., de. :

1. Sing. (Of the two forms) : Ageneral English name for the species of Geraniom.

"Is there any blue half so pure, and doeep, and tender, of that of the large crane'sbill, the Geraninm praterns $x \times$. (Davies.)
2. Pl. (Of the form Cranesbills): The name given by Lindley to the order Geramlaceæ (q.v.).

If Crowfoot Crane's-bill: [So called from the form of the leaves] Geranium pratense.
II. Surg. (of the form Crane's-bill): A pair of long-nosed pincers.
cràng, s. [Dut. kreng $=\mathbf{a}$ csrcass.] The carcass of a whale.
craí'-gle, v.t [Cbankle, Cainkle.] To twist, to curl.

- It brew a serpent feil with head and taile ;

Whicb crangling crept, and ramue frome trod to troul
In many a lnot.
Du Bartas. (Nares.)
 shrimp, a prawn, or some aimilar animal.]

Zool. : A genus of Crustaceans. C. vulgaris is the Common Shrimp.
cräñg-ŏn'-ī-dæ, 8. pl. [Mod. Lat. crangon, and tem. pl, adj. suff. -idec.]

Zool.: A fsmily of macrourous (loog-tailed) Crustaceans. The internal antemne are inaerted in the same line as the exterual oues, the tirst joint of the latter having a large oval or triangulsr appendage. The front pair of feet are terumated by a monodactylous hand or an beheliform extremity. [Cbancon.]
crà'-nĭ-a, s. [Low Lat. cranium (q.v.).] [CraNIUM.]
Zool.: A genus of Mollusce, the typleal one of the family Craniada. The shell ia smooth or radtately striated, the umbo of the dorsal valve subcentral; that of the ventral valve subcentral, marginal, or prominent and captike, with an obscure triangular area traversed by a central line. Five recent species are by a central line. Five recent species are
known from Spitzbergen, Britain, the Mediknown from spitzbergen, Britain, the Wales; terranesn, India, and New sonth Wales; thirty-seren fossil have been found from the
Lower Silurian onward till now. The range of the former is to 150 fathonss. (Woodward, ed. Tate.)
$\dagger$ cra-ni'-a-dis, cra-ni'- i-das, s. pl. [Mod. Lat. crania, and feni. pl. sdj. suff. -ider.]
Zool.: A family of Molluscs, class Brachiopoda. The shell, which is punctate, ta orbicular, calcareous, and hingeless, attached by the umbo or by the whole breadth of the ventral valve, rarely free; the dorsal valve is limpet-like, the disk with four large muscular impressions, and digitated vascular ones. Only known genus, Crania (q.v.)
crä'-nǐal, s. [Mod. Lat. cranialis, from crenium (q.v.), and suff. alis.] Pertaining or relisting to the cranimin (q.v.). Thus there are a cranial cavity, o cranial flexus, cranial arteriea, nerves, ganglia, and sinuses.
crā-nǐch'-í-dæ (ch guttural), s. pl. [Mod. Lat crunichis (q.v.), sind fera. pl. adj. sulf. ide.]
Bot. : A family of Orchids, tribe Neottex
orä'-nich-is (ch guttural), s. [Gr. кpávos (krunos) $=$ a helmet, which the flower somewhat resenihles, and 'x's (ichis), an arbitrarily formed sufix (?).]
Bot.: A genus of Orchide, the typleal one of tha tamily Cranichidæ (q.v.). The flowera

crà'-ň̄- $\mathbf{0}$, in compos. [Lat. erani(um); o.connective. Pertaining or related to the cranium aud also to mome other part.
cranio- faciat, a. Pertaining to the rantum and to the faca. Thus there is cranio-faclal axis formed by certain bones.

## aranto-vertebral, a

$\Delta$ nat. : Pertaining or relating to the craninm and to the vertebres.

- errā-nyi-రg'-nす-my̆, s. [Gr. xpaviov (kranion) $=$ the skull, and ywunm (gnomē) $=$ the means f knowing, a mark, a tokeln, . . . the organ by which one perceives or knows, the mind .. judgment, opinion.] The ecience founded on knowiedge of the pecnliarities of the craainm in different individuals or races.
oraj'-nil-oid, a. [Mod. Lat. crania (q.v.), and Gr. eidos (eidos) = . . . form.]

Zool. : Resembling the molluses of the genus Cranda; pertaining to the family Cranladx.
"The Orbleulotd and Craniodd groups ; síviafford vini.
crā-niot-liär-i-a, s. [Dimin. of Low Lat. cranium $=$ a skull, which the capsules somewhat reaemble, and fem. sing. adj. snff. -aria.] Bot.: A genus of Pedsliads, tribe Pedsleæ. The fleshy sweet root of Craniolaria annua, \& West Indisn pisnt, when dry is said to be a bitter cooliog medicine. Moreover, it is preserved in sugar as a delicacy.
crän-ǐ-ठ1-ǒg'-ic-al, a. [Eng. craniolog(y); -fout.] Pertaining or relating to the science of craniology (q.v.).
"The cholcest craniological treasures ohtained from June qual, 196e, p. 4 ?
 -ist.] One who studies the science of craniology (q.v.).
 ${ }^{\text {xpaviov }}($ (cranion) $=$ the sos skull, and $\lambda$ áyos (hogos) = . a a discourse.] A scientific study of the cranium, or the sum of the knowledge scquired by such study. Tha examination of
the craniun is an essential part of anstomy, the craniur is an essential part of anstomy,
sltogether independent of the inferences with regard to the mental procilvitios which may be deduced from it. The comparison of different cranis is slso eseential to ethnology and archæology.
arin-ni-ŏm'-㐅t-ẽr, s. [Gr. кpapiov (kranion) $=$ the sknll, and $\mu$ eтpov (metron) $=$ a measure. An instrument for measuring the sizes of skulls. Dr. Morton givee the following as the average result of namerous measurements of skulls :-

## European

Megro
Negro
Mongol
Ancient Egyptian
American
Ancient Peruvian 75 to 79 "the most capacious European skull has a capacity of 114 cubic inches ; the smallest, 55 inches. Schaaffcubiesen finds Hindoo skulls of 46 cubic inches.
 $\operatorname{metr}(y)$; -ical. $]$ Pertaining to eraniometry (q.v.).
 [Craniometer.] The measurement of the cranium.
"In connexion with the anthor's own special study of craniometry."-Athenaum. March $4,18 \mathrm{~s}, 2$
crā-nI-ŏs'-cotp-1st, s. [Eag. cranioscop(y); -ist.] Ove proficient $\mathrm{in}_{\text {, }}$ or at least who studies cranioscopy (q.v.).
arä-nĭ-ös'-cotp-y̆, s. [Fr. cranioscopie; Gr. xpaviov (kranion) $=$ the sknil, and oккотew (skopeo) $=$ to look at or siter a thing.]
examination of the shape of the cranium; phamination
orī'-nĭ-ŭm, 8. [Low Lat., from Gr. крaviov (kranion) = the skull.]

- Anat. : The bony or cartilaginous case containing the brain. The crantum snd the face
takon together constitute the skull. In ahape it is spheroidal, a form which oters the greatest resistance to external vioisnce. This strength is increased by the compound ture of the eranial bones, which, as aruo, are in two tables, the one sxterual, the other internal. The cranium is composed of eight bones: one, the occipital bons, two
parietal, one froptal, aud two temporal bones,

oranium.
i. Decipital. pa Parietal. f. Frontal.
with the sphenold and the ethmoid bonss. The principal part of the vauit of the cranium the prinedpy part and is formed by the parietal bones, When rest upon the wings of the sphenova and upo lower temporal bones: these so overlap the lower parts of the parietal bones, as to prevent them starting out; in fact, they opersté in ths same way as ths tie-besms in the roofs of houses.
- That oubstances and modes of every kind Are mere impressions on the passive mind; And he that spilta his cranium, oreake at most
aratic, * oranise, s. [An original English root, of which other languages havs only less root, of which other langurges nsvs only less distinct traces: the origins form was krank $=$ to bend, to twist. Cf. Dut. kronkel $=8$ rumple, s wrinkle; kronkeln $=$ to rumple, to wrinkle, to bend, to turn, to wind. (Skeat.)] [CRANK, a.]
A. Ordinary Langıage:
I. Lit. (Of a material body, as a planet, dc.): 1. A turn, winding, or revolution.

Bo likevise grim Sir Satume oft doth zpara
Kis storne navect, and calme his crabbed looke Kis storne nimeet, rad calme his chabed looked So many turning crantireserr: f: Q., VII. vil. 62.
2. In the same senses as B.

* II. Figuratively :

1. Any turn, revolution, or vicissitude.
2. Any conceit formed by twisting or changing in any manuer the form or meaning of a word ; a pun
S. (U.S.) A person whose mental facultice have been wrongly twisted or bent in one particular reapect or particular respects; a mild monomaniac; hence any eccentric individual.

## B. Technically:

1. Machinery:
(1) An srm (called the web) at right angles to an axis, by which motion is imparted thereto or received therefron. The crank on the sxis of a grindstone or a fanning-mill is a farniliar instance. The crank is also a valued device in converting a rotary into a reciprocating motion, or conversely. An example of the former is found in the saw-mili ; of the latter, in the stean-engine. Watt is the inlatter, in the steam-engiplication of it. The ventor of the latter spplication of it. The crank was first nsed in coonection, in 1802 , on navigation by William Symington, in 180 , on his second steam-boat, the "Charlotte Dundas." The crank was fixed on the paddle shaft of the stern-wheel which impelied the vessel, and was worked from the piston-rod by means of a connectingrod, Since then the crank has superseded the sun-and-planet wheel motion and all other devices for producing rotary motion in the stean-cngine. The bell-erank, so called from its frequen use in ball-hanging, is only used to chang the direction of a rectprocating motion. A two-throw or three-throw erank-sluaft is one having so many cranks set at different angles on the shaft.
(2) A contrivance used for lahour in prisons, consisting of a mmall wheel, like the paddle wheel of \& steamer, which the prisoner has to turn with $s$ handle in a box more or less mlied with gravel.
2. Naut.: Iron braces which support the lanterns on the poop-quarters.
3. Mining: That part of the sale of the 47 which is bent into three knees, or right angles, and three projecting parts ; one of the parts is parallel to the axis, snd has the upper part of the crank-hook collared round it. (Weale.)
crăike "orancla, cranke, a. 't's [Teel. krankr $=$ slok, ill; Dut. \& (tor. krank.] [CRase, 8.]
A. As adjeotive:
I. Ordlnarg Language:
4. Sick, ill.
5. In a shaky or loose condition; cranky.
"In the cose of the Austrian Rnapire the crand machinery of this double goverument would augrant stete."- Thimes, Nov. 11, 1276.
*3. Liveiy, marry, brisk, sctive, sprightiy. "He, who was a 11 tio before bedrod and ouried $15 k 0$ cranke and lustia."-Vdal: Mark ii
6. Strong, mighty.
"Towered tha Grout Harry, ©rank and tall."
7. Poevish, morose, sour-tempered, cranky
II. Naut.: Ltable to upsot ; an epithst for vessel when sle cannot bear her sail, or vessel when ala cannot that ehs cannot whe brought on the ground without danger.
"In plying down the rivor, the Resolotion wav found into sheerness tu order to remove thit ovil, by making some alteration in her npper works."-Coak Voycge, voi. iil, bk. L. ch L
B. As subst. : A sick pereon.

## oranix-tuzle, 6

1. Vehicles: An axle bent down betwasn the wheels, in order to lower the bed of the waggon and make loading more easy.
2. Steam-engine: The driving-sxle to which are connected the piston-rods of a locomotive engine. In Americs they ars oonnected to wrists on the drive-wheels.
crank-bird, s. A local name for the Lesser Spotted Woodpecker (Picus minor). From the cry, which is said to resemble tha creaking of a windlass.
crank-brace, s. The usual form of brace, which has a bent shank by which it is rotated.
crank-hatches, s. pl. Hatches for covering the cranks of tbe engines within steamboats.
cranic-hools, s. The bar connecting the
treadle and craok in the common feot-lathe.
crank-pin, s. A pin connecting the ends of a donble crank or projecting from the end of a single crank. In either case it is for the attachment of a pitman or connecting-rod.
crank-puller, s. A machine for pulling the crank off an sxle or shaft. (Knight.)
crank-shaft, s. A shaft drivon by a crank, such as that of the grindstone.
crank-wheel, s, A wheel having a wrist to which a pitman or connecting-rod is attached, and acting as a crank, while the peripheral portion luay act as a dy-wheel, or masy constitute a pulley or a traction-whesl. (Knight.)
crăṅl, v.i. \& t. [Crank, a.]
3. Intrans.: To run in and out, to wind and turn, to dodge.
"He cranks and crosses with a thousand doubles."
4. Trans. : To shackle ; to apply the hob or ham-sbackle to s horse.
"As for the reward of prosumption, it is in Scotiand to be crant.
Mant.
crăn̄ked, a. [Eng. crank; ed.] Having bend or turn.

## cranised tool,

Iron-turning: A tool which is made to em brace the rest, by which it is prevented from lipping away from the work. A pin is inserted in one of the holes in the rest, to prevent the escape of the tool sideways. The direct penetration is obtained by depreesing the handle ; the lateral motion by rotating the tool by ita transverse handle, which may be s hand-vice temporarily serewed upon the shaft or s shoulder-rest handle. (Knight.)
bilt, hgi: pout, Jowl; cat, gell, chorus, ghin, bengh; go, gem; thin, this; gin, as ; expeot, Xenophon, exist. -ing.

* orări'-rice, v.t \& i. [A freq. 'form from crank, v. (q.v..).]

1. Trans.: To break tnto turns or angles to bend, to wind.

Forcid by the old Vagais stream,
Formook, and drew her hurald her wonted track Frankling her bauks." Phatipe : Cyder, bk 2. Intrans. : To bend, to turn, to twist, to wind.
"Now on along the crankling path do keep
Then by a rock turns np anothor way." Then by a rock turns np anothar way.

* crañó-crle, s. [Cbankle, v.] A bend, a turn, a twist, a winding; an angular prominonce.
crăn'-xiled, a. [Eng. crankl(e); ed.] Bent, twisted, turned.
crăñ'-klĭng, pr. par. or a. [Csankle, v.] Twisting, bending, turning, winding.
"Meander, who is sald so fo tricate to he, Hath not so many tarns, nor crankling 000 ks as she.
crăñk'-nĕss, s. [Eng. crank; -ness.]

1. Ord. Lang. : Health, vigour.
2. Naut. : A disposition to overset

* orăñk'-oŭs, a. [Eng. crank; -ous.] Frstful, irritable, coptions, cranky.

This While he's been in crankous mood.
Hor lost Milltion frrdd her blivid.
Burns : Earnest Cry and Prayer.

1. Ord. Lang. : Irritable, whimsical, fidgetty. "What "a cranky old bruta."-H. Kingoley: Geoffy 2. Naut.: Liable to be overset; crsnk.
$\dagger$ crăn'-niced, a. [Eng. cranny; ed.] Full of cramnies or chinks.
crăn'-nðgg, † crăn'-nŏge, s. [1r.]
Archeol.: A fortified lake dwelling, of which many occur in Ireland. They ars supposed to hsve been formed about the ninth or tenth century.
"The crannogs or lake dweliluge,"-Athenorum
crăn'-ny̆," crany, s. [Fr. cran $=$ a notch; Lat. crena.]
2. Ord Lang.: A crevice, a chink, a smsll or asrrow opening or tissure; a comer, a hole. 2. Glass-making: A tool for forming the necks flass bottles.
erăn'-ny̆, a. [Etym. donbtful. Probably connected with crank(q.v.).] Pleasant, brisk, jovisl.

* orandiny, d.i. [Channy, s.]

1. To be or become full of crannies or chinks, to crsck, to open.
"The ground did cranny everywhere."-Golding.
2. To haunt or frequent crannies; to pess through crannies.

* orǎn'-ny̌ed, * crannyd, a. [Ceannied.]
oran-rench, s. [Gael. cruuntarach.] Hoarfrost.
"To thole the wiater's sleety drible, An'cranreuch cauld! Burns: To a srouse
crăn-tar'-a, crăn-tar'-ra, s. [Gael., from crann $=$ cross, and tuir $=$ ahame. So called because to neglect it was regarded as shameful.] The fiery cross sent round to summon the Highlanders to rise.
"erănts, * crance, \& [Ger. kranz; Sw, \& j)ut. krans; O. Dut. krants.] a garland, \& wresth.
"Yet here she is sllow'd her virgin erants",
crăp (1), v.t. [Flem. kroppen.] To stuff, to All.
${ }^{*} \operatorname{crăp}(2), v . t$. [Crop.] To crop, to top.
" Fu" vogle, an' in" bivthe tn crap
The wilisome fow'rifre Natures lap",
Fergison : Poemu, il,
crăp (1), s. [Etym. doubtful.] Buckwheat, Polygonum Fagopyrum.
$\boldsymbol{\operatorname { e r a p }}$ (2), s. [CROP.] 1. A crop. (Scotch.)

2. The top of anything.

ICrap and root : Wholly, entirely, every bit.
"And yo may mind. I tauld yon crap and root
orap-leather, s. Leather made from thin cow-hides. Used for pumps and light shoes.

* orăp-ânde, crapante, * crepawde, * crepawnde, s. [0. Fr. crapaut; Fr. crapaud $=$ a toad.] The stone chelonitis, or crapaid stons (q.v.). [BEFonite.]

"Crapaudes * preclous name-orapawdine,"-Pałr-
crăp'-ân-dǐne, s. \&a. [Fr.]
A. As substantive:

1. Arch. : A pivot.
2. Farriery: An ulcer on the cosonet of a horse.
B. As adjective:

Arch. : Moving or turning on pivots top and bottom (applied to doors).
crāpe, 8. [Fr. crépe; 0. Fr. crespe = curled, frizzted, crisp; Lat. crispus $=\operatorname{crisp}$ (q.v.).]
Fabric: A gauzy fabric msde of raw silk, and woven without crossing. Uncoloured, or gaily dyed, it is a rich shawl-stuff. Coloured ilsck and crimped, it is a mourning-goods. Smooth crape is used in ecclesiastical habita of a certaia order, not quite so elevsted as the cambric lawn of a bishop. Siik intended for crisp erspe is more twisted than that for the smooth. The twist of the thread, eapecially thst of the warp, is what gives the wrinkled appearance to the goods when taken out of the loom. Aarophanes and gauze are goods of a similar description, either white or coloured. Crspe is sald to have been made by Ste. Badour, Queen of France, A.D. 680. It was first made st Boulogne. (Knight.)
crape-fish, s. Codfish salted snd pressed hard.

## crape-morette,s.

Fabric: A gauzy woollen isbric of fine texture, the warp being light sad open, and the weft relatively heavy and fleecy. Made either white or coloured.

* crāpe, v.t. [Fr. créper.] [Crape, \&] To frizzle, to curl, to formi tato ringlets.
"The hour.:' Por curllug and eraping the hatr."-
cräped, pa. par. or a. [Chape, v.]
A. As pa. par. : (See the verb).

13. As adj.: Dressed in crape.
crāp'-І̌ig, pr. par., $a .$, \& s. [CRAPE, v.]
A. \& B. As pr. par. \& particip. adj.: (See the verb).
C. As subat.: The act of frizzling, curling, or crinkling.
craping-machine, 8. A machine by which silk is ersped, i.e., crinkled.

- crăp'-le, s. [A variant of grapple (q.v.).] A claw. [Crapple.]

Soope as they did the monstrous scorpion wlew
With ugly craplet crawling in their wiv."
Spenter: P. Q.V. Fii. 40.
crăp'-nel. s. [A variant of grapmel (q.v.).] A grapnel, hook, or drag.

* crappe (pl. * crappes), s. [Low Lat. crapper.] Refuse corn, chaff.
"Crappe or gropys of corne. лcun, criballum"-
crăp'-pít, pa. par. or a. [Cane (1), v.]
crappit-heads, s. $p$ ?. The heads of haddocks stuffed with a pudding mads of the roe, oatmeal, and apiceries; formerly a common sccompaniment of fish and sauce in Scothand. (Jamieson.)
crap'-ple, v.t. [Grapple.] To grapple, to $^{\text {grapen }}$ claw.
crăps, . A game of chance, played with two dice, and in vogue amongst the negroes and lower classea in this country. The object ia to throw seven or eleven at the first cart, or to duplicate any initial throw before aeven io cast.
* craps, * crappys, s. pl. [Crappis]
* crăp'-ụ-lą, s. [Lat.] Crapulence.
crăp'-y-lẹnçe, s. [Lat. crapula.] A sarfeit or sickness from over-indulgence; drunkenness.
* oraph-q-lent, a. [Fr. crapulant, pr. par. of crapuler $=$ to indulge to excess.]

1. Surfeited with excess or tntamperance;
2. Noted for intemperance; given up to excess.

* crăp-p-lĕnt'-al, a. [Eng. crapulent; -al.] Caused by intemperance.
"The aforesald erapulontall hurts."-Fenner: Fia
* crăp'-n-ioŭs, a. [Fr. cropuleux. from Lat. crapulosus.] The same as Crapulent (q.v.) Brougham craputous realdence of his father
* crāp'-y. a. [Eng. orap(e); -y.] Of the nsture of or resembling crape.
"oräre, "crayer, s. [O. Fr. enaier.] [Crat.] a kind of coasting vessel, now disused.

Might ensilieat harbonr thy wiugrth crary
Shakesp.: Cymb., iv. 2

* crāse, v.t. \& i. [Sw. krasa; Dan. kräse.] 1. Trans. : To break to pieces.
II., "Thus was youre croune crastd."-Depot. of Richand

2. Intrans. : To be broken to pieces.

"She wrapte Crist with clothis, and putio him in
the cratehe: Wyclife : Select Works, i. 31 .-
2. An enclosure.
"Potters dwellynge in plamntyngis and in cratchis."
3. A hut, s cottage.
p. ${ }^{2787}$

* crătȩh, * oratche, v.t. [O.H. Ger. chrazzdn; M.H. Ger. kratzen.] [Scratch.] To scratch.

oratch-cradle, s. A child's gane, the same as Cat's cradle ( $q . v$. ).
crătçh'-ăş̧, s. [Cantch, s.]
Farriery: A putrid swelling en the pasterns the fetlock, or the hoof of a horse.
* crătgh'-ing $p r$. par. \& s. [Cantch, v.] A. As pr. par. : (See the verb).
B. As subst.: The act of scratching.
orāte, s. [Lat. crates $=8$ hurdle.] A lerge wicker hamper with wooden supports, in which crockery-ware is packed for transportation. Crates among the Romsns corresponded to the English hurdles. They were of wicker work, and were used for screens, for levelling gronod after rough-raking (rastrum) ; also for drying fruit.
crā'-tẽr, s. [Lat. crater; Gr. крatríp (kratēr) $=$ a mixing vessel . . a large bowl .. . any cup-sbaped hollow . . . the mouth of a volcano.]

1. Class. Archcool. : A large bowl. [Etym.]
"It wau decreed that with the sum thus ointanned at golden erater should be dedicated to Apollo."-Lewio:
2. Geol. \& Ord. Lang. : The basin-like, circular openiag, generally at the apex of a volcanic cone, from whieb eruption takes place. It is formed io the following way. A chasm or flisure opens in the earth, from which great volumes of stean and other gases are evolved. Slattered lava, fragmenta of broken atone, sand, \&c., follew; and, falling in heaps,

the same process, will ultimately become a volcanic cone. The movement upwards of steam and other gases keens open a passage from lonesth to the spex of the cone. This passage is the crater. The effux of lavs may ultimstely conselidate it, or it may produce the contrary effect and break it down. There may be many cones and many craters, or one large velcano, and escape of gases may be by long fissures instead of by cup-shaped crstera. (Lyell, dc.)
3. Astronomy:
(1) In the same sense as 1. There sre spparent craters in the mon, snd much larger than those in the earth, being sometimes as much as 100 miles aeross.
(2) A constellation, called in English the Cur, one of the firteen ancient southern constellations.

* Elevation crater theory :

Geol.: A theory which explained the rise of volcanic cones with their craters by sumposing that the concentric beds of scorix, de., now forming the cone were originally hosizental, forming the cone were orignally hosizontal, but were uphcaved to their present force. It was held by bon Buch Elie de Beanmont, and others ; Lut is now geneElie de Beanmont, and others; Lut is now gene-
rally abanduned, the rival theory of Lyyll and othera being that the beds in question have been formed by the descent of materials ejected into the air by successive eruptions, and arranging themselves at or about the angle at which we now find them as they fell.
crā-tër'a, s. [Lat. $=\mathbf{a}$ vessel in which wine was mixed with water, a bowl.]

Bot. : The cup-shaped receptacles of certain fungals. (Treas. of Bot.)
boil, bof; pout, jowl; cat, gell, chorus, çin, bench; go, gem; thin, this; sin, asj; expect, Xenophon, egist. ph $=f$.

cràtër-1-form, a. [Lat. cratera (q.ч.), and forma = form, ohape.]

1. Geol, Ac. : Shaped like a cup or a voleanic crater. (Used of mountains, hilla, sc.)
"Mr. Darwin, ia bis - Volcanic Tslands, has described ovveral erator Princty of God galapagos Archis pelago 2. Bot.: Globe-shaped, concave, hemi sphericai, a little contracted at the base.

* crä'tẽ̃r-oŭs, a. [Eng. crater; -oous.] Pertaining to, containiag, or reaembling a crater,
crăt-ŏ²-y-1ŏn, s. [Gr. крáтоs (kratos)= strength, and छu่入ov (xulon) = firewood, timber.]
Bct.: A geaus of hypogynous exogeas order Hypericaceæ, tribe Elodex. The capaula ia three-celled, with winged aeeds. The pecies are bushes or amall trees, with oppo aite leaves. Cratorylon Hornschuchii, which grows in Java, is ailghtly astringent and diuretic.

crēase (1), s. [Of anknown etymel. ; perhapg a Celtic word. Skeat suggests cennection with Bret, kriz = a wrinkle, but this suggestioa is rejected by Dr. Murray.]
L. Ordlnary Language:

1. A line or mark made by feldiag or deubling snything.
2. A slight bollew or indentatien.

II. Technically:
3. Mech.: A creaser.
4. Cricket: A name glven to certain lines marked on the gronnd st each wicket. They are threa in number, the bowling-crease, the return-crease, and the popping-crease. The firat extends in 8 straight line at right anglea centre of the stumps. The second is s short

liae drawn st an angle to the and of the bowl-ing-crease. The bowler ju delivering bis ball must bave ene foot behind the bowliug-crease, and within the return-crease. The poppingcrease is a lioe drawn parallel to the bowlingcrease, and st a distance of 4 ft . from it. it is unlimited in length. The batsman cannet move ent of the apace betwren the bowllog and popping-creases except st the risk of being put out.
crease (2), s. [Cheese.]
crēase, v.l. [Crease, s.] To make a crease or mark in hy donbling or folding.

crēased, pa. par. or a. [Caease, v.]
crēas'-ẽr, s. [Eng. creas(e); -er.]
I. Ord. Lang.: One who or that whick creases.
II. Technically:
5. Leather-working: A tool ased for making single or double lines on lesther, to form guidea or creases to sew by. They are slso used for lining leather, to give it a flnisbed appearance.
6. Iron-working: A tool naed by sheet-lron workers for rounding smsll beads and tubes. Its shank has s tang by which it is secured in
[^205]3 equare socket of the work-bench. Top and bottom creasing tools, of any euitable eize and pattern, may be aet in the jawe of a creasing 6wage, the lower end of whose frame has a hinged portion carries the top tool and is struck by a hammer.
3. Book-binding: A tool for making the band-impression distinct on the back.
4. Sewing-maching: An attachment whlch makea a mark in a line parallel with the work in hand, to indicata the place for the next geam or tuck.
crēas'-ľ̌g, pr. par., a., \& s. [Crasaee, v.]
A. \& B. As pr. par. \& particip. adj.: (See the verb).

## C. As substantive

1. Ord. Lang. : The act of making a crease or mark ln anythlng by folding or doubling; crease.
"It is rather ${ }^{n}$ mass, with loogitudloal parallel

2. Building: A layer of tiles forming a corona for a wall.
creadng-hammer,s. $\Delta$ narrow rounded edge hammer, used for making grooves in aheet metal.
creasing-tool, s. A creaser (q.v.).
oré'-as-öl, \&. [Eng., \&c., creas(ote), and Lat. on.
Chem.: Creosol, $\mathrm{C}_{8} \mathrm{H}_{10} \mathrm{O}_{2}$. A diatomic phenol, obtained by the dry diatillation of guaiacum, alao from creasote. It is a colourless oily, refractive, odorous liquid, with a pungent aste. Its density is 1.097 , boiling at $203^{\circ}$ It burna with a smoky flame.
crō'-a-sōte, crē'- $\mathbf{\delta}$-sōte, + krē'-a-sōte, s. [Fr. créosote; Gr. крео- (kreo), combining form
 save. So named because of its ability to pregerve animal aubatancea from decay.
3. Comm.: An impure creasol, mixed with phenol. Wood creasote has powerful antipentic power. Wood smoke contains this aubstance, hence its power of preserving aubstance, hence its power of preserving meat. Creasote is used no relieve toothachic, but oft
4. Phar. : Creasotum is obtained by distilling wood-tar. It is a colourleas liquid, with strong empyremmatic odour. It is slightly soluble in water, readily soluble in alcohol ether, and in glacial acetic acid; it coagulates albumen, and turns the plane of polarisation of a ray of polarised light to the right. It is used to prepare Mistura Creasoti, Unguentum Creasnti, and Vapor Creasoti. A slip of deal wood dipped into it, and afterwards into wodrochloric acid, acquires on exposure to hydrochloric acid, acquires on exposure to the atr a greenish-hlue colour. German creaCreasote is a mixture of phenol, guaiacnl, Creasote is a
creasote-appliance, s. A dentist's natrument intended to prevent fluid caustica, auch as creasote or solution of nitrate of ailver, from running down and cauterizing the lips when being applied to the gums. A spiral platinum-wire carries the sponge, and a glass tube attached to the handle and surrounding the wire catches any of the caustic which may run down the wire. (Knight.)
crē'-a-sōto, crē'-t-sōto, v.t. [Creasote, s.] To treat or katurate with creasote.
 \& s. [Caearote, v.]
A. \& B. As pr. par. \& particip. adj. : (See the verb).
C. As subst.: A mode of preventing decay of timber by saturating with creasote. This is sadd to coagulate the albumen, absorb the oxygen, resinify in the pores of the wood and exclude air, and act as a poison to prevent fungi, acari, and other parasitea. (Knight.)

* creast, s. [Crest.]
*erēast'-ĕd, a. [Crested.]
t crēas'-乌̆, a. [Eng. creas(e); -y.] Full of or marked with creases.

[^206]arē'-Z̆t, a [Fr., from Lat. creatus; Ital. creato; Sp. criado $=$ a pupil $]$
Mandge: An usher to a riding-master.
† orb-á'-ta-ble, a. [Eng. creat(e); -able.] Possible to be created.
oř-äte', * creat, v.t. [Cneate, a. In Fr. crier ; Sp. \& Port crear, criar; Ital creare.)

1. To make ont of nothing; to cause to exist ; to bring lato existence.
"In the begioning God created the heaven and the
2. To produce, to cause, to be the occaaion of.
"Long abstinence is trruhlesome to meld enostituArbuthnot.
3. To produce, to compose, to arrange, to be the author of.

##  <br> Vivite to London, Marcle 17, 1780.

* 4. To beget.

5. To appoint, to constitute, to invest with s new character.

Arise, my knighta o' th' battle: I create you
With dignitiea becoming your will at you

* 6. To form, to make.
"King Richard migbt ©reato a perfect gueas." 1 . 1.
IF For the difference between to create and to cause, seo Cause.
oré-äte', * creat, a. [Lat. creatus, pa. par. of creo $=$ to create.

1. Brought into exiatence, created.
" Bince Adam was create, fue thousand yeeres I gease
Flue bundreth, forty more and Gue wastories do exprewser Gucoligne : Dan Bartholomew of Bathe.
2. Composed, made np.
"Hearts create of duty and of zeal."
orě-ät'-ěd̈, pa par. or a. [Create, v.]
orē-ăt'-1̌o, a. [Gr. креат-; stem of крéas (kreas) $=$ flesh; Eng. guff. -ic.] Pertaining to flesh, or to animal food.
crē-ā-tio'-ö-las, s. pl. [The pl. of Lat. creaticola $=$ the worshipper of a created being, from creatus $=$ created, $i$ connective, and colo. $=$. . . to worship.]
Ch. Mist.: A monophysite gect in the sixth century who followed Severus in holding that, previons to the resurrection of our Saviour, his body was corruptible. They were called alao Pthartolatre and Ktistolatre. All the three names were given them by their focs.
orē'-at-Ĭne, s. [Ger. krentin, from Gr. кpeas (kreis), genit. крєатоs (kreatos) $=$ flesh, and suff. -ine (Chem.).]
Chem.: Methyl-glycocyamine. Methyl-guanido-acetic acid, $\mathrm{C}_{4} \mathrm{H}_{9} \mathrm{~N}_{3} \mathrm{O}_{2}+\mathrm{H}_{2} \mathrm{O}$, or $\mathrm{HN}=\mathrm{C}<\mathrm{NH}_{2}$
btained $\left(\mathrm{CH}_{3}\right)-\mathrm{CH}_{2}-\mathrm{CO} \cdot \mathrm{OH}$. Creatine is obtaimed from the muscular flesh of mammalia, birds, reptiles, and fishes. It has been found in the blood and urine, and in the brains of pigeons and dogs. it is obtained by chopping int the lean muscular flesh, removing the fat, and rubbing it with water and pressing it; the liquid is heated in a water-bath to coagulate the albumen, then strained ; to the filtrate baryta-water is added so long as it gives a precipitate, the filtrate concentrated on a water-bath, the erystals, concentrated on a water-bath, the erystals, Which se parate, decolorised by animal char-
coal and re-crystallised from water. Creatine coal and re-crystallised from water. Creatine crystallises in rhombic needles containing one
molecule of water, which is driven off at $100^{\circ}$. molecule of water, which is driven off at $100^{\circ}$.
The water solution has a bitter taate, ani The water solution has a bitter taste, and cipitate with silver nitrate, which is solnhle in potash. After a time the aolution zolidifles to a transiarent gelatioous mass, whiel is reduced when heated. Creatine heated gives off ammonia and hydrocyanic acid. Creatine ia disaolved by strong acids; it losea a molecule of water, and is converted into Creatioine. By boiling with baryta-water creatine is decomposed, yielding garcosine, methyl glycocine, $\mathrm{C}_{3} \mathrm{H}_{7} \mathrm{NO}_{2}+$ urea $\mathrm{CO}^{\prime \prime}<\mathrm{NHI}_{2}$. Creatine has been formed synthetically by heating cyanamide, $\mathrm{C} \ll{ }_{N I I}^{N}$, with sarcosine, $\mathrm{CH}_{2}<_{\mathrm{CO}}^{\mathrm{NH} \cdot \mathrm{CH}_{3}}$, in an alcoholic solution to $100^{\circ}$ for some houra; or
leaving a mixed aqueous aolution to evapor ate, the creatine separatee out in cryetals. ate, the creatine separatee out in cryetals. Creatize leatel to ren ness with ooda-lime in a
tube, yieids $\mathrm{NH}_{3}$ and inethylamine, $\mathrm{NH}_{2} \mathrm{CH}_{3}$.
crě-ä'-ting, pr. par., a., \& s. [Create, v.]
A. \& B, As pr. par. \& particip. adj,: (Ses the verb)
C. As subst.: The act of giving extstonce or being to; production, creation.
"For he epons the whole discussion by ntating,
crj-ב̆̈t'-inn-ine, s. [Eng. creatin(e); suff. -ine lu Ger. kreatinin.]

Chem. : Methyl-glycocyamidine, $\mathrm{C}_{4} \mathrm{H}_{7} \mathrm{~N}_{3} \mathrm{O}_{4}$ or $\mathrm{HN}=\mathrm{C}$ $\mathrm{NH}-\mathrm{CO}_{1}$ Creatinine occura in urine and in muscular flesh; it is found in the mother liquid formed in the preparation of creatine. It can be prepared by the action of atrong acids on creatine, also by evaporat ing, below $100^{\circ}$, fresh urine nautralised with carbonate of sodium to a symup. The ayrup la exhauated by alcohol, and the flltrata is mixed with a concentrated alcoholic solution of zine chloride: tha pracipitate, after atand ing some time, is washed and boiled with water; the filtrata is evaporated; the crystala wate diasolved in hot water and purified by are dissolved in hot water and purified by racrystallisation; the solution in boiling Water is then digested with hydratcd lead oxide, filtered from the oxide of zinc and nxy chloride of lead, purified by blood charcoal strong alcohol dissolves the creatinine and leaves the creatine. Creatinine forms colour leas prisms, very eoluble in water and in alcobol; a concentrated solution has an alka ine taste, reddens turmerie, and turns red litmus blue. It is a strong base. Creatimina concentrated solution givea a ruhy-red colour when made slightly alkaline with potash and nitro-prusside of aodium is added. Creatinine forms salts with acids. (Watts: Dict. Chem., dc.)
cre-a'-tion, " creacion, s. [Lat. freatio, from oreo $=$ to create; Fr. oréation; Sp. crea cion; Itai. creazione.]
I. Ordinary Language:
I. The act of creating, or of calling into existence out of nothing.

The mind finds no great diffleolty. to distinguish When the thing is wholly made new, so that no pirt therenf did ever exist hefore; ss whein a new partlclo of matter doth begio to exist, in rerum, natura, which Locke: Hum. Underat, hil. H... ©h. $\mathrm{xx} \times \mathrm{Vi}$
2. (Spec.): Used absolutely; the act of bringing the world into existence.
3. The point of time when the worll was created.
4. The act of appointing, constituting, or investing with a new chameter or position.
"The Gazette which rnnounced these creations an-tineut."- Mfacaulay: Hist. Eng., ch. xx.
5. The foundation or thrst constituting of anything.
"This detailed mecount of the creation of the clictatorship, sud of the appointment of the first instator given by Dionysius: "Lexis: Cred. E

8. An original work, composition, or production.

## II. Technically:

1. Theol.: The act of creating nut of nothing one of the three great operations attributed to God, the others being providence and redemption.
2. Geol.: In the same sense as I.

II (1) Centre or Centres of Creation:
(a) Sing. (Centre or focus of Creation): A point or place on the earth's surface where it is assumed that a certain indivilual species was created, and whence it is supposed that it diffused itself to the various regions in which it now is found.
(b) Pl. (Centres nr foci of Crgation): Certain apota on the earth's surface whera not one but

[^207]various, or perhsps even many species may have been created, and wheace they may have been disseminated. The Darwinians wonld object to the nse of the word creation in connection with "the origin of specles," butadmit centres or focl where they have come into bejag.
(2) Date, era, or epoch of the Creation: There ra about 140 opinions professedly founded oa calculations made from Scripture with respect to tbe era of the Creation. The highest date given is B.c. 6984, the lowest 3616, a diference of 3,363 years. One chlef reason of the discrepancy is the fact that the Hebrew and the Septnsgint chronologies of Genesis $\psi$, and some other parts of the same book, differ widely, and there may be difference of opinion as to which has been chsoged. [Caronology.] The reologist draws a wide diatigetion between the date when man first came foto belag and that at which the world was produced. Th flrst is a very receat event, if marked on the scale of geologicsl time, but a very remote one as compared with the date assigncd by those who have mado their calculations solely from the IIebrew or the Greek Septuagint nambers. [Antiedity of Man.] Various Christian harmonists hava attempted to reconcile Scripture and science $\ln$ this and other respects. [Harmony.]
(3) The hypothesis of successive creations: The vew was held by Mnrchison and nany others that successive creatlons have taken place, each an advance oa its predecessor.
"These viewa of the suçasive creation of different ruces are it is true, matuly based apon the proxressite yise in the scale of the vert
creation-day, s. The day on which anything is called ioto existence.

I I probilshed, because I Tras toid I might please edch
9. Inflaence, interest; power derived from character or reputation.
"Having credit eaough with his master to provide or his own oteres,
II. Technically:

1. Bookkeeping : The side of an sccount in which psyment is ontered; opposed to debit (q.v.).
2. Comm., Ec. : [Bill of CaEdit.]
-1 (1) A letter of credil: The aame as a Circular letter (q.v.).
(2) Public credit: The faith put by creditors sad the public generally in the honesty and financisl shility of a gevernment seeking to berrow money.
(1) Crabh this discriminates between credit, favour, and infuence: "Theae terms mark the state westand in with regard toothers as flowing out of their sentinzents towarda onrselves: credit srises ont of esteem; favour out of goodi-will or sffection; influenoe oust of elther credit or favour: credit depends altogether on personal merjt ; favour may depend on the caprice of him who bestows it. Credit Though sometimes obtained by falschood, is never got without exertion; but favour, Whether justly or unjustly bestowed, often comes by little or no effort on tha part of the receiver: a minister gains credit with hia parishioners by the conaistency of his condact, the gravity of his demesnour, and the atrictness of his life ; the favour of the populace is gained by arts which men of upright minds would disdais to employ. Credit and
favoir are the gifts of others ; Infuence is a possegton which we derive from circumstances; there will alwaye bs infuence where there ts eredit or favour, but it may exist independently of either: we have credit and favour for ourgelves; we exert influence over others : eredit end favour serve one's own purposes; inftuence is employed in directing others: wealc people easily give their credit or bestow their favour, by which an influence io gained over them to bend them to the will of gained over (Crabb: Eng. Synon.)
(2) For the difference butween creait and beltef, see Belief.
cred'rity, v.t [CREDIT, e.]
